Yet we all know yelling "fire" in a theater is illegal and forbidden by law...yet no one has been able to overturn such a law as being unconstitutional. Other limits on "free speech" include a whole array of "hate crime" laws and other PC limitations on speech. As for anyone being put in jail for imposing a limit on speech??? Frankly, I have no idea how that would even possibly come about.

The constitution ONLY restricts government from imposing free speech limits. There is no such limitation on private entities imposing all kinds of speech limitations. Businesses do it all the time and fire employees for violating their business speech limitations. That's also why ISPs can take the action they do to ban people from their services if they so choose based on things they have said in newsgroups, email and/or on web sites. Happens all the time.

Just some additional things to consider...it isn't just a black and white issue. There's all sorts of grey areas in the realm of free speech limits.

Cheers,
Bill K2UNK

Ran the test today and everything worked as planned, I have heard that the toad was a bit concerned that the front ends of the radios might blow? No need to be concerned toad, they won't blow unless you blow them, but it doesn't take a rocket scientist to see that if both rigs are in transmit then the receiver sections are out of the picture, it wouldn't matter anyway as they are only being used as transmitters! Another concern was about malicious interference? Two problems here, the FCC isn't going to get involved with giving him a monitoring station for his own use, nor do they care what happens to his "shows" after the names he has called them. The other thing is that 3 khz above or below has been the accepted spacing in Amateur Radio.
Anyway, get those reports in to the toad as soon as possible and I'll start to record the ARRL bulletins tomorrow!

Hi Bill,

Long time, no see! Hope you're well.

Everything you've described is a PRICE, not a limit.

In accordance with the US Constitution I can say anything I want to say. The price I pay may be that I lose acess to a particular channel communications channel, but I am in no way limited in what I may say. The control freaks may persuade the likes of "Consolidated" to decline to carry Todd's words to us, but in no way can they prevent him from saying them. Unfortunately, rather than engage in an honest two-way dialog with someone with the grapes to identify himself, it is likely that Todd will become another of the many "Lloyd's" who infest rrap.

"Congress shall make no law.... abridging the freedom of speech...."
--Amendment I, US Constitution

I know that by pointing this out I stand in danger of the same treatment as accorded to Todd, but let Steve do "his best" as he earlier alluded in relation to a member of my family.

Abridging freedom of speech means denying a person the right to express their ideas. Yelling "fire" in a theater (when no fire exists) is not the expression of an idea, but rather an act calculated to cause panic. The legal sanction is not against stating the word "fire", but rather against "public endangerment".

I'm sure you can dig up all kinds of laws against "public endangerment", but I challenge you to find one specifically against yelling "fire".

"Congress shall make no law.... abridging the freedom of speech...."

I seriously doubt that Thomas Jefferson or ANY of the Founding
Fathers could have envisioned a society where thier cherished
principles would be so abused and misused as these.

Please, Hans...Show me SOME really GOOD reason why it's necessary
to allow the kind of conduct that Todd et al would shove down our
throats under the guise of "Freedom of Speech".

An entire nation was created without so much as one "MF", "GD" or
other profanity having made it into print or recorded as having been
said in any public forum.

Nor was it necessary for such "speech" to be recorded in history
duing the Civil War, the "War to End All Wars" or the Second World War.
We managed to save "democracy" from the Nazis, Communists and Facists
without worrying about whose civil rights we might be violating by not
allowing them to call someone a

> The only valid limitation of free speech under our Constitution is
your
> individual right not to listen.

There is no truly "free" society, Hans. "We" as a society decide
what standards we consider to be necessary for that society to be
judged a worthy entity.

There are valid limitations on "freedom of speech", Hans, and it will be an ever-evolving concept.

I for one do not believe there's a single good reason to allow the kind of profanity that spews forth from Taylorville, Illinois, to be allowed in ANY forum.

Nice quote, if itself not abridged!

The First Amendment says that CONGRESS shall make no law. Society
can set it's own standards, however.

And the very Constitution you quote, Hans, is a man made document
subject to the "Ammendments" made by those same men (and now women...).
It needs a re-vamping.

Actually not only can anyone say anything anywhere anyway they want to if
they are willing to pay the price but they can also DO anything they want to
anywhere anytime if they are willing to pay the PRICE. In some cases that
is codified into law and in others it is not.

Todd has demonstrated that he is not capable of maintaining an honest
two-way dialog. At some point, especially when he is proven wrong, he goes
ballistic, stooping to behavior that is unbelievable in anyone.

> "Congress shall make no law.... abridging the freedom of speech...."
> --Amendment I, US Constitution
>

Do you really think the framers of the Constitution meant anyone could say
anything at anytime? They wished to protect the publication and
dissemination of truth so that the citizenry could make informed decisions.
It's doubtful that they would have crafted this amendment for any other

reasons.

You have split hairs in another post about falsely yelling fire in a crowded theater. That it is prosecuted under laws about public endangerment. But that IS a limit on what a person can say or do. False distress signals are also illegal. That too is a limit on when we can say what.

> I know that by pointing this out I stand in danger of the same treatment

Unless you stoop to making insulting comments about people's deceased children, extreme use of foul language, and the other antics that Todd has demonstrated, it is unlikely that you would be treated the same as he is.

19. Re: ARS License Numbers

Newsgroup: rec.radio.amateur.policy
Date: 2005-05-01 12:22:55 UTC
From: N2EY@AOL.COM
Message-ID: <1114950175.183827.113950@f14g2000cwb.googlegroups.com>
Source record: 107249

These are the numbers of current, unexpired amateur licenses held
by individuals on the stated dates:

As of May 14, 2000:

Novice - 49,329
Technician - 205,394
Technician Plus - 128,860
General - 112,677
Advanced - 99,782
Extra - 78,750

Total Tech/TechPlus - 334,254

Total all classes - 674,792

As of April 30, 2005:

Novice - 28,604 (decrease of 20,725)
Technician - 268,116 (increase of 62,722)
Technician Plus - 49,987 (decrease of 78,873)
General - 136,783 (increase of 24,106)
Advanced - 76,410 (decrease of 23,372)
Extra - 106,577 (increase of 27,827)

Total Tech/TechPlus - 318,103 (decrease of 16,151)

Total all classes - 666,477 (decrease of 8,315)

Note that these totals do not include licenses that
have expired but are in the grace period. They also
do not include club, military, RACES or other
station-only licenses.

Note also that effective April 15, 2000, new Novice, Technician Plus or
Advanced licenses are no longer issued, and that all existing
Technician Plus licenses are being renewed as Technician.

Sure it's a limit, Hans.

Know why there's no Hummer in my driveway? Becasue it costs over
$60,000 to get one equipped the way I'd like it.

If the price was half that, I'd have one.

Seems like a limit to me.

You can argue the language all day long, Hans, but whether it's a
line in a lawbook saying "Thou shalt not..." or the threat of monetary
forfiture or imprisonment, there ARE limits.

You can use your same "argument" to say that there is no "limit"
to commiting murder or bank robbbery.

> In accordance with the US Constitution I can say anything I want to
say. The
> price I pay may be that I lose acess to a particular channel
communications
> channel, but I am in no way limited in what I may say.

Stand up in a populated room and say "I am going to kill the
President" and see how far your "limit" on what you THINK you can say
goes.

> The control freaks may
> persuade the likes of "Consolidated" to decline to carry Todd's words
to us, but
> in no way can they prevent him from saying them.

You try to set your own limits on what others say, Hans, by applying your own labels, ie: "control freaks", with the intention that this will cause them to change what they say to avoid your labelling. You are trying to set your own limits.

You are very much the same "control freak" that you accuse others of being.

> Unfortunately, rather than
> engage in an honest two-way dialog with someone with the grapes to identify
> himself, it is likely that Todd will become another of the many "Lloyd's" who
> infest rrap.

Yes, Todd "identified" himself, and as you say, he had "the grapes" to do it.

Todd's issues are not with signing his name. They are with his lack of civility and his failure to recognize that his behaviour, both in this forum and on the air, are not welcomed.

> "Congress shall make no law.... abridging the freedom of speech...."
> --Amendment I, US Constitution
>
> I know that by pointing this out I stand in danger of the same treatment as

> to a member of my family.

I offered you a sincere "best wishes", Hans, and as usual you tried to turn it into something else. I have, in the past, refered to you as "Lennie with a License", and that is exactly why.

As Bill aptly pointed out, the First Ammendment restricts the government from arbitrarily making those laws.

NOTHING in the Constitution says that it can't be ammended if the citizens it governs so choose to do so. Perhaps it's time.

>
> Someone has to do it...poor Stevie NEVER did anything
> close to such HF communications...as an amateur or
> anything else.

Neither did you, Lennie.

You were a readio mechanic. Period. You were not a message
center clerk...You were not responsible for determining operating
frequencies, modes, etc.

If the box broke, you fixed it. Well done, but that doesn't make
you a radio OPERATOR.

> Stevie fails to get the point: A half century ago,
> the MAJOR message load throughout the U.S. military
> was by teleprinter, NOT morse code. Way higher than
> 90% of ALL message "traffic" in the military. A HALF
> CENTURY AGO.

Sure I get your point, Lennie...Here's a few for you:

(1) This forum is about Amateur Radio in the 21st century...Not
Army communications in the 1950's.

(2) YOU are the only one arguing about Morse Code-vs-teleprinter
traffic, Lennie. The rest of us moved on YEARS ago.

(3) You are still not licensed in nor have any practical
experience in AMATEUR RADIO communications. You continue to make
significant errors on matters of Amateur policy AND practice.

> > Your INITIAL claim, before everyone with a grade school
> mathematics
> >education put the numbers back in your face was that YOU were
> >responsible for this feat.
>
> Tsk, tsk, tsk. You still don't understand what the
> word APPROXIMATION means.

Sure I do.

And no matter HOW you "APPROXIMATE" the numbers, all you were was a radio mechanic. Sure, your efficiency in keeping the transmitters on the air was important to the overall mission of ADA. But YOU were NOT responsible for sending a single one of those messages...

Not a one!

Huge snip of Lennie's rationalization for having made a stupid assertion and even more stupid tap dance around it...SNIPPED.

It hasn't worked in the years since you uttered it, it doesn't work today.

> Robeson CANNOT acknowledge that some have much
> more experience IN radio communications than
> he ever had.

But you have NEVER had experience IN "radio communications", Lennie...THAT is by your OWN hand per your CV.

You have always been a black box technician...NEVER a radio OPERATOR! Oh...yes...You pushed a button once that caused a transponder on the mood to beep back at you...Almost as exciting as pusing the car door remote.

On the otherhand, I have had over three DECADES of experience in the very programs which YOU purport to be knowldegeable of.

> Rather than find out anything of
> the various communications systems or organizations
> he winds up doing PERSONAL INSULTS in lieu of
> discussion on a SUBJECT.

Old dead horse dragged out and re-subjected to yet another whipping.

You are SO guilty of the same conduct, Lennie. Had you not STARTED it, perhaps we'd be carrying on a different conversation today.

> That's Robeson's
> sickness demonstrated in here against all of his
> opponents.

Untrue, but then you're not one to do well with facts.

> Robeson is the role model of today's amateur
> extra?

No more or no less than you are the role model of today's electronics engineer.

Several years ago I observed a ham attempt to enter a CB radio
report of a tornado touch down into a ham net. The hams would not
accept the report, because it was not in proper "format," the observer
had not been "trained," and the observer did not have a ham call
sign. While the hams continued their petty nit picking, the tornado
touched down. This is the mentality of ham radio today.

Nice try.

Hams only talk to Hams since no one else should be on an Amateur allocation. ANYone, whether they have an Amateur license or not, is a "CBer" if they are using a CB radio.

"Emergency communications" is NOT about how many people you can talk to...It's about conducting disaster-mitigating operations in an efficient and timely manner...whether that is on Amateur, commercial, military, etc. CB radio is NOT conducive to efficiency OR timeliness.

And ego's-be-danged...CB radio (11 meters, anyway...) is NOT the medium of choice of ANY disaster mitigation agency in the United States. Even REACT has abandoned 11 meters in favor of GMRS at 462/467MHZ FM.

There's also a very real demand for prophylactics, Game-boy's and
Penthouse magazines...but they are of no use in emergency
communications either!

CB radio serves a purpose. I have one and I use it on occassion.
But it has long ago passed any expectation of being a viable means of
emergency communications. As I said...even REACT has abandoned it.

As much as I dislike the potty-mouth antics of Todd, he (and all citizens) are protected by rights laid out in Ammendment I of the Constitution.

Until you repeal that Ammendment (pack a lunch, it'll be a long job) the only limitation you can place on my Freedom of Speech is your right not to listen. Feel free to start any time.

There are mechanisms in place for citizens to work toward repeal of the 1st Ammendment, Steve. Go to work on that. In the meantime, accept it as the law of the land.

Doing fine...thanks.

> Everything you've described is a PRICE, not a limit.

I think we'll just have to agree to disagree on that. In order
to even determine if a "price" can be extracted from someone, the limit
must be there in law of some form. Slander and liabel are both
clearly defined in the law and that defines the limit. If I use
your logic, then muder, theft, etc are merely things that if done
have a price (jail, etc) yet they are clearly prohibited by law...as
is slander, liable, certain pornography, etc.... IMHO

> In accordance with the US Constitution I can say anything I want to say.

Yet there are many laws that do exactly that. Laws against disclosure
of secret information, slander, liabel, etc

Cheers,
Bill K2UNK

Nice Lennie-esque attempt at misdirection-by-outrageous-exaggeration, Steve. Todd, however distasteful his language, did not threaten the life of the President. He simply argued (in horribly crude language, and mostly without logical basis) that his rights for free speech on ham radio were threatened.

You don't agree with his assertions, and neither do I (see we >>CAN<< agree on something) but it's spookily ironic that your response was behaviour which reinforced his contention, by suppressing his expression of ideas!

"Our liberty depends on the freedom of speech and that cannot be limited without being lost."

You say that you "observed a ham attempt to enter a CB radio report
of a tornado touch down into a ham net."
Then you say "and the observer did not have a ham call sign."

A ham without a callsign?

Here's Roger's 2003 photo. Judge for yourself if he doesn't have long
hair and a greasy, pockmarked face. Roger posted that photo in the
Yahoo single's groups, Schwartz found it, and then Roger immediately
yanked everything off Yahoo within a few hours.

Enjoy.

Steve is a cengenital, natural-born liar. I'd bet that if you plugged him into a lie detector and asked if his name was "William Jefferson Clinton," he could respond "YES" without tripping the meter. Only when the telling of a lie causes an internal conflict will the meter trip. Steve has no internal conflict with lying. It's a natural act for him, like breathing.

He did introduce violence to this thread, then said that he didn't. He lied, but what's new?

> :
> : No, YOU opened the topic.

The fifth amendment gives Steve the right to be silent, but he won't.
The only time he get's quiet is when it comes time to back up his
claims of MARS service or seven hostile actions, but he quickly fills
in the silence with more accusations.

STALE SUBJECT
ZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZZ

53. Good morning or good evening depending upon your location. I want to ask you the most important question of your life. Your joy or sorrow for all eternity depends upon your answer. The question is: Are you saved? It is not a question of how good you are, nor if you are a church member, but are you saved? Are you sure you will go to Heaven when you die? GOOGLE·NEWSGROUP·POST·154

This is the most important question of your life.

The question is: Are you saved?

It is not a question of how good you are,
nor if you are a church member, but are you saved?

Are you sure you will go to Heaven when you die?

The reason some people don't know for sure if they
are going to Heaven when they die is because they
just don't know.

The good news is that you can know for sure that
you are going to Heaven.

The Holy Bible describes Heaven as a beautiful
place with no death, sorrow, sickness or pain.

God tells us in the Holy Bible how simple it is
to be saved so that we can live forever with Him
in Heaven.

"For if you confess with your mouth Jesus is Lord
and believe in your heart that God raised Him from
the dead, you WILL BE SAVED." (Romans 10:9)

Over 2000 years ago God came from Heaven to earth
in the person of Jesus Christ to shed His blood
and die on a cross to pay our sin debt in full.

Jesus Christ was born in Israel supernaturally to
a virgin Jewish woman named Mary and lived a sinless
life for thirty-three years.

At the age of thirty-three Jesus was scourged and
had a crown of thorns pressed onto His head then
Jesus was crucified.

Three days after Jesus died on a cross and was
placed in a grave Jesus rose from the dead as Jesus

said would happen before Jesus died.

If someone tells you that they are going to die and
then three days later come back to life and it
actually happens then this person must be the
real deal.

Jesus Christ is the only person that ever lived a
perfect sinless life.

This is why Jesus is able to cover our sins(misdeeds)
with His own blood because Jesus is sinless.

The Holy Bible says, "In Him(Jesus) we have
redemption through His blood, the forgiveness of
sins..." (Ephesians 1:7)

If you would like God to forgive you of your past,
present and future sins just ask Jesus Christ to be
your Lord and Saviour.

It doesn't matter how old you are or how many bad
things that you have done in your life including
lying and stealing all the way up to murder.

Just pray the prayer below with your mouth and mean
it from your heart and God will hear you and save you.

Dear Jesus Christ, I want to be saved so that I can
have a home in Heaven with You when I die. I agree
with You that I am a sinner. I believe that You love
me and want to save me. I believe that You bled and
died on the cross to pay the penalty for my sins and
that You rose from the dead. Please forgive my sins
and come into my heart and be my Lord and Saviour.
Thanks Lord Jesus Christ for forgiving me and saving
me through Your merciful grace. Amen.

Welcome to the family of God if you just allowed God
to save you.

Now you are a real Christian and you can know for
sure that you will live in Heaven forever when this
life comes to an end.

As a child of God we are to avoid sin(wrongdoing),
but if you do sin the Holy Bible says, "My dear
children, I write this to you so that you will not
sin. But if anybody does sin, we have one who speaks
to the Father in our defense Jesus Christ,
the Righteous One."

Those of you that have not yet decided to place your
trust in the Lord Jesus Christ may never get another

chance to do so because you do not know when you
will die.

Jesus said, "I am the way, the truth and the life:
no one can come to the Father(God)(in Heaven), but
by me." (John 14:6)

This means that if you die without trusting in Jesus
Christ as your Lord and Saviour you will die in your
sins and be forever separated from the love of God in
a place called Hell.

The Holy Bible descibes Hell as a place of eternal
torment, suffering, pain and agony for all those who
have rejected Jesus Christ.

The good news is that you can avoid Hell by allowing
Jesus Christ to save you today. Only then will you
have true peace in your life knowing that no matter
what happens you are on your way to Heaven.

Praise the Lord!
Servant of the Lord Jesus Christ

yeah. that is most certainly true.
unfortunately, some of those "idiots" tend to end up in positions of
power/responsibility and that's where their stupidity can endanger folks.

Despite your personal opinion, CB radio is -very- useful for emergency
comm because a) there are so many of them; b) most of them are mobile;
c) most of them are off the grid; d) they are easy to use; e) there is
a well-established organization in place to utilize the band.... there
are several more reasons. But what has been proven time and time again
is that when landlines fail in an emergency, CBers heed the call to
duty just like every other citizen. After all, it's not called the
Citizen's Band for nothing.

And CBers are a large group of idiots. The hams were right in not
communicating with a cber, who did not have a ham license, that was
transmitting illegally on the ham bands. Most cbers are best ignored.

Hans are you saying that Todd may say whatever he wants whenever where he wants however he wants on the ham bands? Do you believe then that Part 97 is unconstitutional when it prohibits commericial use and foul language?

NO! Channel 9 was abandoned for the cell phone--but, I assume many cells will be down in an emergency--then you will see the object replaced the by the cell phone--re-emerge, and that is/was NOT ham radio, it WAS CB... Damn hams keep re-writing history!!!!

Regards,
John

| Nice try.
|
| Hams only talk to Hams since no one else should be on an Amateur
| allocation. ANYone, whether they have an Amateur license or not, is a
| "CBer" if they are using a CB radio.
|
| "Emergency communications" is NOT about how many people you can
| talk to...It's about conducting disaster-mitigating operations in an
| efficient and timely manner...whether that is on Amateur, commercial,
| military, etc. CB radio is NOT conducive to efficiency OR timeliness.
|
| And ego's-be-danged...CB radio (11 meters, anyway...) is NOT the
| medium of choice of ANY disaster mitigation agency in the United
| States. Even REACT has abandoned 11 meters in favor of GMRS at
| 462/467MHZ FM.

In the latest REAL disaster, the Tsunami, it was CB radios, sent as emergency communications... the hams had a very secondary part... now, with all those CB's sitting down there, skip from that area should vastly improve--BOTH on 11 and 10 meters <grin>

Regards,
John

Good thing I don't have to retest. Dang! I wasn't aware that amateur radio was dependent upon repeaters. I can't remember what repeaters I've used to use on 160 meters (not to mention 75, 40, 20, or 15). I did use the 10 meter repeater from a 440 port a couple of times to chat with Australia, but that is, of course, not appropriate for an emergency.

Of course, if it actually is, you'll be happy to know we have a few repeaters that are *not* connected to the mains. Windmill and solar do work, but I wouldn't expect one of your obvious intellectual ability to understand those concepts.

LOL

Best regards from Rochester, NY

I think it was when I asked Jim H what was the problem that a few
people had with Phil.

I have never used my ham radio for commercial use nor have I used foul
language on it either. Steve assumes that since I do it on the internet
then I do it on the ham radio. Steve has never heard my transmission
yet he claims that's what I'm doing.

Steve, K4YZ

Hello, Steve

Maybe since I was on dial-up and AT&T didn't have newsgroups caused me to be
a bit inactive and not likely to defend myself?

I'm up and running on 3 megabaud DSL now. Clear the decks LOL

The reality is that a lot of the folks that love to post anonymous stuff
have nothing better to do in their lives. Too bad, really.

All that aside, this new DSL is a lot nicer than the old DSL that I had and
far superior to that dial-up. Plus, I'm saving about $5.00 per month by
going back to Frontier for all my phone services plus DSL. Nice. 56k to 3
megabaud plus it costs less! :)

No, Dee, I didn't say that (and of course you know that I didn't). The hams bands aren't a right, but a regulated privilege.

>
> Do you believe then that Part 97 is unconstitutional when
> it prohibits commericial use and foul language?

No, I don't believe that (and of course you know that I don't). The amateur bands aren't a right but a regulated privilege.

I do believe, however, that Todd has protections in the Constitution which allow him to raise those issues here on rrap, just as Steve has protections for his assertions that parts of the Constitution are not appropriate to his political views. While I'm disgusted by Todds trashy language here, I am more disgusted by the overt actions to deny him his Constitutional protections.

The biggest wind is all will be the cbers shouting "ten fer thar" along with a lot of other obscene junk to the point that no useful communications exists. Hams with VHF and UHF equipment will get the job done in spite of repeaters being down and they won't using silley phrases like 'good numbers'. Which numbers are bad? How do you distinguish between a 'good number' and a 'bad number'?

to
>commit slander and libel.

No, dear, "one is NOT perfectly free" in ANY practical sense.

By your logic, one is "perfectly free" to commit murder
or grand theft, etc.

You confuse "perfectly free" with BEING ABLE TO DO SOMETHING.

> It's not illegal and one cannot go to jail for it.

Slander (spoken) and libel (written) are NOT felonies.

Hello? There are TWO kinds of courts in our land and
under our (presumably you are a citizen of the USA)
laws: Criminal and Civil. [ask Phil Kane if you want
to make an issue of that...]

> Yet people CAN be held finanicially liable for the effects of their
>slander, etc.

It's a LOT stickier than that, Dee. FAILURE to carry out
a Civil COURT judgement order CAN result in both fines
and imprisonment.

The "financial" difference between Criminal and Civil
courts is that the State bears the legal costs of
Criminal prosecution...in Civil courts both sides
have to pay for legal representation (dependent on the
final decision of the court).

That's just basic civics information from public
school. I'm surprised you've forgotten that, being
a "parent" and all to the "children" in here...

> This liability for the effects of one's "free speech" are a
>limit even though it is not censorship.

Tsk. There's where you can't differentiate the Control
Freaks from the Free-speechers. The Control Freaks will
spend inordinate amounts of time in Harrassment,
Intimidation, Heckling, and Insulting certain groups...
all in an attempt to Assert Their Turf and try to force
all into "thinking" as they do (i.e., be of the same
opinions...or else). You can see them IN HERE. :-)

In Germany they once had "Krystalnacht." In here all
the glass-jawed Control Freaks bust their own chops
in spending all that "free time" on gratuitous
insulting, heckling, and general harrassement of
certain others. Their broken glass "tinkles" all
over each subject. "Free speech?" Only by a
technical definition.

Try to get with the program, Dee.

[message received and disposed of]

>> anything else.
>
> Neither did you, Lennie.

Tsk, tsk, tsk. Poor Stebie...still envious AND
FRUSTRATED. Tsk, tsk, tsk.

> You were a readio mechanic.

"Readio?" Reallio? :-)

Tsk, tsk, tsk. Primary MOS of Microwave Radio Relay
Operation and Maintenance Supervisor. Secondary MOS
of Fixed Station (transmitters) Radio Operation and
Maintenance Supervisor...and a few other little duties
such as Carrier Operation and Maintenance (not that
those Western Electric units had either drift or
failure). The VHF-UHF radio relay equipment operation
and maintenance fell under my primary MOS.

All official and everything...in my DD 214 and all the
records archived in St. Louis...not to mention posted
on Harold Hallikainen's website and also mentioned on
Walter Welkin's website for USAEUR post-WW2 Army
history. Hal is a ham, by the way. And, in that
vein, Gene Rosenbaum, N2JTV, is not only still a ham
but was also there - in my Battalion at the same time
at the same station - doing the same thing I did on
another operating team. [sunnuvagun!]

> Period. You were not a message
>center clerk...You were not responsible for determining operating
>frequencies, modes, etc.

Tsk, tsk. The Chief Signal Officer, Washington DC,
did that sort of deciding for ALL involved in ACAN -

STARCOM - DCS and still does for all the alphabet
soup organization evolvement that followed after the
1960s.

> If the box broke, you fixed it.

...or sent it to the Depot. Depended on the "broke"
condition. Did you ever "fix" a TWO-TON HV
TRANSFORMER (cast iron case, lots of iron in the
core, much copper, etc., full of PCB liquid)? :-)

No sweat to the murine corpse...a murine could hold
it in one hand and still be able to sing about "shores
of tripoli." Lots of 40 KW MARS transmitters in the
the 1st Marine Air Wing, right? :-)

> Well done, but that doesn't make
>you a radio OPERATOR.

Tsk, tsk, tsk. You go argue with Chief of Signals
(new title invoked by previous general) in DC and
have the Army "revise" all those MOSs to conform to
the wishes of Stebie da Wundermarine.

In 24/7 COMMUNICATIONS we didn't PLAY at HF radio
like it was a hobby, some kind of recreation.
WE GOT THE MESSAGE THROUGH. That requires
OPERATION as well as maintenance. OPERATION
AT THE TIMES REQUIRED. MINIMUM DOWNTIME.
With every QSY a radio circuit was DOWN until the
new frequency was set, tuned, and checked by
Frequency Standards for carrier and shift. All
the while the messages routed through that circuit
were being stacked up, unable to be transmitted.
That was worse with the SSB circuits carrying 6
to 12 TTY channels simultaneously.

>> Stevie fails to get the point: A half century ago,
>> the MAJOR message load throughout the U.S. military
>> was by teleprinter, NOT morse code. Way higher than
>> 90% of ALL message "traffic" in the military. A HALF
>> CENTURY AGO.
>
> Sure I get your point, Lennie...Here's a few for you:

Tsk...I'm only giving you ONE finger. :-)

> (1) This forum is about Amateur Radio in the 21st century...Not
>Army communications in the 1950's.

TSK, TSK, TSK, NURSIE!

1. This forum is NOT for Stebie's experiences with
the Commanding General of the First Marine Air

Wing in NINETINE EIGHTY ONE!!! [24 years ago]

2. This forum is NOT for Stebie's BRAGS of mighty
murine service in 'SEVEN HOSTILE ACTIONS!'

3. This forum is NOT for Stebie's BRAGS of prowess
in SUTURING or about his "medical qualifications."

4. This forum is NOT for Stebie's continuing
refusal to admit that MARS is >>NOT<< "run by
amateurs." MARS is run by the MILITARY.

5. This forum is NOT about MARS at all, although
the ASSIGNED MARS frequencies are OUTSIDE
the ham bands. [sunnuvagun!]

> (2) YOU are the only one arguing about Morse Code-vs-teleprinter
>traffic, Lennie. The rest of us moved on YEARS ago.

You PCTAs can't dance and your singing voices are as
flat as the 1930's attempted revival of vaudeville.

You MIGHTY MACHO MORSEMEN just CANNOT admit that TTY
was already downsizing manual morse a half century
ago. Sucks to be retrograde recreators of ancient
times, doesn't it?

> (3) You are still not licensed in nor have any practical
>experience in AMATEUR RADIO communications.

TSK, TSK, TSK. I'm a PROFESSIONAL in radio, have been
since 1953. :-)

Maybe ANOTHER radio license...for hobby/recreational
fun and games - like amateur radio - would be nice in
retirement. <shrug>

But...if all you hard-ass anal-retentive retrogrades
have to engage in the Control Freak harrassment like
amateur DILL SERGEANTS trying to treat "lesser
classes" like maggot recruits...y'all can just shove

ANYONE bothers to get into modern ham radio with all
you wannabe Chiefs making your smoke signals of
mighty radio "operation."

> You continue to make
>significant errors on matters of Amateur policy AND practice.

"wrong." :-)

Stebie KNOWS ALL ABOUT MILITARY COMMUNICATIONS?!?!?

From WHAT experience? As a helo ground support
person at a landing field? Did the marines have
pigeon messaging (pigeons fly)? Tsk, the Army
gave that up right after WW One.

> Sure, your efficiency in keeping the transmitters on
>the air was important to the overall mission of ADA.

NO, no...THE ENTIRE MISSION OF THE UNITED STATES ARMY.

"ADA" did NOT have "a mission." The 8235th Army
Unit had a "mission." "ADA" was a callsign of the
radio facility...RUEP was the TTY identifier for
the Tokyo node within ACAN.

> But YOU were NOT
>responsible for sending a single one of those messages...
>
> Not a one!

BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
HEEHEEHEEHEEHEEHEEHEEHEEHEEHEEHEEEH...gasp, BWARHAH
ahahahahahahaha!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Baby Stebie READ ALL THOSE MESSAGES TO PROVE THAT?

Tsk, tsk, tsk...messages were not the ONLY content
of Army Communications a half century ago OR now.
Stebie, from his VAST (well, half) EXPERIENCE in
24/7 military communications doesn't know shit from
order-wires. Tsk, tsk, tsk.

No problem, can't expect this Mighty Morseman to
understand a damn thing about HF communications
other than AMATEUR hobby/recreational radio of
one operator, one radio kind of thing.

> Huge snip of Lennie's rationalization for having made a stupid
>assertion and even more stupid tap dance around it...SNIPPED.

Tsk, tsk, tsk..."snipped" because little Stebie
doesn't have experience one on military communications

on HF, doesn't know the organization, doesn't know the
procedures, doesn't even know tap dancing...yet he tap
dances all the time in countless BRAGS of prowess.

> But you have NEVER had experience IN "radio communications",
>Lennie...THAT is by your OWN hand per your CV.

Tsk, tsk, tsk. STILL don't believe OR understand
what REAL communications is about, do you? All
you know is what you read in the AMATEUR radio
publications.

> You have always been a black box technician...NEVER a radio
>OPERATOR!

Tsk. Poor Stebie. Angry and frustrated...still
making the typos when furious (see following).

> Oh...yes...You pushed a button once that caused a
>transponder on the mood to beep back at you...Almost as exciting as
>pusing the car door remote.

Tsk. I've never known any "transponder" to have
"moods."

That's just a rationalization of humans. Electrons,
fields, and waves obey their OWN laws and totally
ignore the wishes of humans...or aliens who make
their pledges "for the corps, God, and country"
(in that order).

"Just pushing a button?!?" Tsk, tsk. BC-610s
(the ones in the AN/GRC-26 huts) could NOT be
operated by simple "button pushing." :-) Not
even the clumsy T-195 having Collins Autotune and
and an automatic antenna tuner (USMC development
contract in 1953, operational in 1955) could be
operated by a simple "button push." :-)

I started in HF radio in the vacuum tube era.
The ONLY transmitter that came close to just
"pushing a button" was the Western Electric LD-T2,
a commercial SSB 4 KW PEP HF transmitter that
could "tune itself" to any of 10 preset frequencies
(minimizing down time on QSYs). But, poor Stebie
NEVER would have been allowed near the actual
presetting of 12 potentiometers per frequency or
of checking the distortion of the 12 KHz spectral
bandwidth of that commercial SSB.

> On the otherhand, I have had over three DECADES of experience in
>the very programs which YOU purport to be knowldegeable of.

BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
HEEHEEHEEHEEHEEHEEHEEHEEHEEHEEHEEEH...gasp, BWARHAH
ahahahahahahaha!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The WEEKEND WARRIOR doing his thing in AMATEUR radio
and playing like he be Chief of Signals of the
Amateur Radio Corps!

Stebie, cut the bullshit. I began in HF radio
before you were born. I've both OPERATED and
DESIGNED and BUILT (protoype) radios over MORE of
the EM spectrum than amateurs have been allowed
to in the 71 year life of the FCC.

Stebie did 8 hours a day, 5 days a week, for
"three decades" as an AMATEUR?!?!?

Guess Stebie was NOT in "the Corps" then...USMC
doesn't want HOBBYISTS defending the country...
USMC is a PROFESSIONAL military branch.

Guess Stebie was NOT in "nursing" earning his
"needles" in marvelous suture closures...nursing
is supposed to be professional, not amateur...but
Stebie allatime wanna link his "medicine" to
RADIO!!!

>> Rather than find out anything of
>> the various communications systems or organizations
>> he winds up doing PERSONAL INSULTS in lieu of
>> discussion on a SUBJECT.
>
> Old dead horse dragged out and re-subjected to yet another
>whipping.

Tsk. I've never called Stebie "a dead horse." The
BACK END of one, yes, but DEAD only in his mind and
ego. Tsk, tsk.

> You are SO guilty of the same conduct, Lennie.

Poor baby. Can't take it, can you? Great big heroic
Gunnery Nurse just can't stand any opinion opposite
to his own?

> Had you not STARTED
>it, perhaps we'd be carrying on a different conversation today.

1. I didn't "start" anything but an opposition to
the morse code test for an AMATEUR radio license.

2. The resident retrograde PCTAs in here >>STARTED<<
all the snide bullshit about "needing" a code
test to be "qualified" to operate an HF radio.

[that's all archived...begin with KH2D]

3. I began and was QUALIFED to operate high-power HF
transmitters in 1953...haven't bothered much to
get AUTHORIZATION to do so as an amateur...even
though I've legally operated on HF (last year,
from a sailboat, SSB 20 W PEP) without ANY radio
license. Sunnuvagun!

4. ALL of radio - except for a minority who still
live by 1930s standards and practices in amateur
radio - has advanced since I began 52 years ago
and keeps on advancing. That minority still
thinks that morsemanship is an absolute necessity
to operate below 30 MHz...all newcomers gots to
do dat to "show dedication and committment to
the amateur service!!!"

BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
HEEHEEHEEHEEHEEHEEHEEHEEHEEHEEEH...gasp, BWARHAH
ahahahahahahaha!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

>> That's Robeson's
>> sickness demonstrated in here against all of his
>> opponents.
>
> Untrue, but then you're not one to do well with facts.

Tsk, tsk, tsk!!! Google has the archives of Stebie's
SOCIOPATHIC (with overtones of psychosis) behavior
against ALL who oppose his opinions! Everyone in
here has seen it. The "projection" is evident to
anyone with a memory...projection of himself on others
when trying to blame them for the faults Stebie has.

Stebie tries very hard to make EVERY thread in this
newsgroup about HIM. Stebie gots too much time on
his hands...doesn't leave enough time for playing
with his radio set.

"If it looks like a duck and quacks like a duck and
has feathers like a duck, chances are very good that
it IS a duck!" So...Stebie snarls like a sociopath,
looks like a sociopath (scowls in every photo), has
the thin skin of a sociopath...chances are very good
Stebie >>IS<> Robeson is the role model of today's amateur
>> extra?
>
> No more or no less than you are the role model of today's
>electronics engineer.

Now, now, don't try for the sharp retort...you keep breaking all that glass and you retorts don't hold water. You kept saying (in addition to "PUTZ") that I was "nothing but a bench technician and NEVER an engineer!" [it's in Google archives several times]

Don't add HYPOCRITE to your faults. TRY for consistency.

I do NOT try to be any "role model of an engineer." I am one. Have been for a long time...since 1960 when I got my first design assignment at Micro-Radionics, Inc. [that's OVER three decades :-)] I've NOT behaved in your manner to others in engineering, not even in Design Reviews (as both a subject and as a reviewer). It is impossible to be so ONE-SIDED and stubborn as you've shown in these "discussions" and still hold a job. I've held my jobs, never been fired or "told to leave." I've attended many a night class in college-level, college-credit courses while still holding my day job...and never been told those college classes were "useless" or that "I was stupid and had to take them." Yes, I did NOT have the finances to attend college full-time, all years at once early in life, but that didn't stop me from learning enough on my own to continue with DESIGN engineering before the very late degree award. I've never met any periodical editor in-person yet have a 96% sell rate on all submitted manuscripts and was ASKED to be an Associate Editor for HR. Ham Radio magazine was in existance for 22 years as an independent, income solely from advertising yet Stebie expresses the opinion it was a "loser."

Tsk. Stebie runs to emotional extremes, thinks I "have to be published in professional journals" to "make my name." Actually, I have, but Stebie doesn't read them. Doesn't stop Stebie from yet more insults. I have written documents in public view plus living witnesses as to what I've done, but Stebie has only vague brags and "references" such as "write the CG of 1st MAW" about his 1981 "assignment." Yeah, right, as if 24 years is a normal Commanding General's tour of duty at ONE assignment? :-)

Today's (and yesterday's) engineers all know that electrons, fields, and waves obey physical laws, not the whims of humankind. Yesterday's (and even today) engineers looked/look to a future with an advancement of the state of the radio and

electronics art. All of radio (except the minds of retrograde worshippers of the amateur past) has either abandoned morse code or never considered it for new radio services. Retrogrades see NOTHING wrong with freezing the past...THEY made it and, by damn, every newbie MUST sweat and work and "show dedication" like THEY did! Like ham radio is NOT a hobby? :-)

The name of this newsgroup's game seems to be junior high name-calling, posturing and preening over "seven hostile actions" and other wannabe stuff. [try for "HALO drop" one of the classic pipe-dreams of Stebie] Makes it even tougher for any newcomer to show interest in any hobby radio when all these middle-school drop-outs wanna be the Dill Instructor, closing the main gate to all but "their kind." :-)

The statement did NOT state that the CBer was operating on
amateur frequencies. Here's the exact statement:
"Several years ago I observed a ham (ham #1) attempt to enter a CB radio
report of a tornado touch down into a ham net. The hams (#2) would not
accept the report, because it was not in proper "format," the observer
had not been "trained," and the observer did not have a ham call
sign."

Exactly how the "report" from the CBer was provided to the
first ham. The ststement indicates ham #2 refused to accept the
report from ham #1 because of format, nontrained source and
the lack of a ham callsign. From my perspective, that was a
dangerous and arbitrary position/action to take by ham #2.

Cheers,
Bill K2UNK

I don't think so. That is why you have formats to be followed by trained
people. Ham #2 was correct.

If there has been a nuclear explosion close enough to where you are that
generated an EMP that destroyed ss equipment, I doubt you are going to
be worried about a few repeaters.

Yeah, Tex

And when we had the big ice storm back in the early 90s, why was the police department in one area severely affected switched to an amateur repeater?

Ever been around after a big blow? Ever notice that it is the *large* trees, not the small ones, that get blown over?

Try a google search on "wind loading" and see if you can figure it out.

BTW, after that ice storm, power and telephone service was cut for hundreds of miles. They were asking for volunteer amateur *hf* operators. They needed reliable communications covering hundreds of miles.

I am aware that a number of cbers run excessive power. Should you run hundreds or thousands of watts, you will be heard for 100 miles or perhaps a bit more. 70 miles, for certain. Unfortunately, 90% of the folks that do hear you and answer you won't be able to hear. Unless, of course, they are also running far far in excess of the 12 watts pep ssb. This is not ground wave, nor is it space wave. It is scatter. Try a google search on that and see what you come up with.

The answer to continuous communications over hundreds of miles (continuous from zero miles to several hundred) depends upon being able to shift frequency. Not a few megahertz; rather a range approaching a 10 to 1 range (from 3.5 to 30 MHz).

Meanwhile, go do that search on "wind loading", keeping in mind about the small trees surviving winds that blow over large trees.

With luck, you may figure it out.

As to small "disasters", such as an auto accident, cell phones are far more likely to supply the information than cb or amateur radio.

With all due regards from Rochester, NY
Jim

An EMP blast is not designed to destroy buildings and life, simply to generate enormous amounts of rf... you will probably still be holding the radio which no longer works, wondering where you will get another....
And, "close" is VERY FAR.... those will be gigawatts of rf for a short duration--just long enough to fry the front end...

Regards,
John

Where did I say I didn't believe in violence, Hans?

I >>DID<< say that Mel et al flatter themselves if they thought
I'd prejudice my freedom with an act of violence against them. That is
NOT the same as suggesting that I don't think that there is a time and
a place for constructive violence.

now *who* is complaining about rewriting history?

your assertion that ham played only a small "secondary part" in the tsunami
distaster is simply put: false.

it was reporting in even a number of respectable sources throughout the
region that ham radio allowed government ministry personally to keep in
contact with the many islands that still had capability. mo where (I REPEAT
NO WHERE) was CB radio ever mentioned as a valid or utilized
communications medium.

if you can prove otherwise, please show me the links.

who said that operations had to be limited to bands where there are
repeaters?

I spent a lot of time listening across the HF bands during the tsunami
distaster and I heard plenty of strong signals on the band passing
health/welfare traffic from the western pacific rim. I don't think I ever
even heard mention of repeater use at all in all of that traffic.

of course, you are right about 1 point: cell service was non-existant (save
for those with sat phones).

Nope...Not frustrated, Lennie...but just amazed at how much time
you ahd on your hands to try and redirect from your own newsgroup
silliness.

> > You were a readio mechanic.
>
> "Readio?" Reallio?

Typo. My Bad. You were still only a radio mechanic.

> Tsk, tsk, tsk. Primary MOS of Microwave Radio Relay
> Operation and Maintenance Supervisor.

M A I N T E N A N C E.

As in "mechanic".

> Secondary MOS
> of Fixed Station (transmitters) Radio Operation and
> Maintenance Supervisor...and a few other little duties
> such as Carrier Operation and Maintenance (not that
> those Western Electric units had either drift or
> failure). The VHF-UHF radio relay equipment operation

Maintenance, maintenance, maintenance.

R A D I O M E C H A N I C.

Not one word of "OPERATOR" in there...Thanks for backing me up,
Lennie.

> > Period. You were not a message

> 1960s.

You were not a message center clerk...You were not responsible for
determining operating frequencies, modes, etc.

Big snippage of usual stuff.

> > (1) This forum is about Amateur Radio in the 21st
century...Not

> TSK, TSK, TSK, NURSIE!
>
> 1. This forum is NOT for Stebie's experiences with
> the Commanding General of the First Marine Air
> Wing in NINETINE EIGHTY ONE!!! [24 years ago]

Nope. But It was one of SEVERAL assignments that placed me in a
position to OPERATE radios...Something you've not done.

> 2. This forum is NOT for Stebie's BRAGS of mighty
> murine service in 'SEVEN HOSTILE ACTIONS!'

"murine"...What's "murine", other than a commercial eye care
product. You wouldn't be proactively "dissing" the military service of
another, would you, Lennie?

You's emphatically stated in this forum that you don't do that.

> 3. This forum is NOT for Stebie's BRAGS of prowess
> in SUTURING or about his "medical qualifications."

Wasn't bragging, Lennie.
>
> 4. This forum is NOT for Stebie's continuing
> refusal to admit that MARS is >>NOT<< "run by
> amateurs." MARS is run by the MILITARY.

However this >>IS<< a forum for me to state that you continue to
promulgate a lie by trying to perpetuate that lie, Lennie.

I never said that MARS was not run by the military, Lennie.

Failure to validate that assertion is yet another LennieLie.

I HAVE said, and correctly so, that No Amateur Radio = No MARS.

> 5. This forum is NOT about MARS at all, although
> the ASSIGNED MARS frequencies are OUTSIDE
> the ham bands. [sunnuvagun!]

Sunnuvagun! Participation in the MARS program is predicated upon
having an AMATEUR RADIO LICENSE...Remember...The one YOU said you
didn't need to have to be a MARS participant.

> > (2) YOU are the only one arguing about Morse
Code-vs-teleprinter

No, I don't.

But the fact remains that you continue to make errors, almost on a
weekly basis, about Amateur Radio practice and policy.

> Stebie, cut the bull#####. I began in HF radio
> before you were born. I've both OPERATED and
> DESIGNED and BUILT (protoype) radios over MORE of

I am not interviewing with you for a job. I wouldn't work for a
habitual liar like you, Lennie...

> I've held my jobs, never been fired or "told to leave."

No doubt. But you've not been asked back to at least one.

Probably more.

> The name of this newsgroup's game seems to be
> junior high name-calling, posturing and
> preening over "seven hostile actions" and other

> outs wanna be the Dill Instructor, closing the
> main gate to all but "their kind."

"Their kind", Lennie...?!?!

I've put far more NCT's into licenses than I have Extras.

I DO know that pleanty of new hams are licensed every day...with
AND without Morse Code skills. I know...I help a lot of them get here.

How many kids have YOU helped into an electronics career or
Amateur Radio, Lennie...?!?!

same could be asked for most consumer grade electronics devices (including
CB radios). Believe me, they haven't yet built a cb or a ham rig that can
handle a close lightning strike (same effect as an emp blast at 70 miles
up) unless you are talking about old tube gear.

anymore, most everything solid state is made to be as "cheap" as possible.
to harden against the effects of EMP and other "radiation" sources would
make everything almost unaffordable (unless you are a government or
military org).

Dear Hans,

You have addressed several e-mails to me over the past few weeks, and I have responded, relatively civily I believe, to each one.

Yesterday you sent one making some nasty allegations, yet when I responded, I got your message from Earthlink telling me I am not on your happy list.

So...It's OK for you to drop letters in my e-mail, yet NOT ok to respond to you in the same forum...?!?!

Sheeesh! You have the cajones to lambaste >>ME<< about "control freak" issues, Hans...?!?!

I have no problem with you sending mail to me, even when it makes unfounded allegations. However you owe me the courtesy of allowing me to respond in the same forum.

Take notice...Any future e-mail sent to me marked "PRIVATE MESSAGE" that gets a "bounced message" notice when I respond will find it's entire contents posted to RRAP for reply.

And keep your "control freak" allegations to yourself, Hans...You have more than ample number of examples of your own "control freak" issues of your own, this being one of them.

Steve, K4YZ

I never said you used it for commercial purposes. I never said
you use profanity on the air...I said you have to POTENTIAL to be the
same potty mouth on the air as you are here.

> Steve assumes that since I do it on the internet
> then I do it on the ham radio.

I assume nothing. However people who insist on violating civil
decorum in one forum tend to do it in others.

Remember the Vice President's faux pas a few weeks ago...?!?!

> Steve has never heard my transmission yet he claims that's
> what I'm doing.

You continue to insist that I have never heard you on the air,
Todd, yet you've never been to my station to know if I have or not, nor
have you had any representitive in my home to attest one way or the
other.

Why do you keep making this assertion when you know it's not
true...?!?!

And what seventh grader did you pay to make that post for you,
Todd...?!?! No profanity...Proper grammar...You even got periods in
the right places. I am impressed...What ever you paid the kid, double
it and keep him/her around...

Congratulations.

I don't violate the rules, so the FCC never has ask me to retest, unlike
two-test wogie.

>
>>Bet wogie couldn't pass even the General exam, <blatherings>
>
>
> He's already proven he could, shit for brains. And he was only
> retested once, you alcoholic moron.

Two-test wogie couldn't pass if he had to take the test when they were
real tests, in front of an FCC examiner. He can only pass by taking them
at a license give-away VE session where the answers to the questions are
available to be memorized from a question pool. No knowledge required.
Wogie holds an Extra yet he doesn't have a clue about RMS or ask him
about negative SWR. HAHAHAHAHAHAHAHA!!!
Poor two-test, had to be retested because he violated FCC rules.
LOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOL!!!!!
By the way two-test, there are more holders of the Advanced license than
Extra.

More mistruth from the N9OGL lie-fest, n9oglvoice.blogspot.com:

Well, the beat goes on, and the question is who's threating who? Let's start at he beginning, N9OGL (ME) announced on the newsgroup rec.radio.amateur,policy that I was going to run an information bulletin on HF. (An Information bulletin is not defined by the FCC except that an information bulletin has to be directed to amateur radio operators and consist solely of amateur radio material.(97.3(a)(26)

An "information bulletin" that you refer to as a "show". A "show" that is nothing more than a showcase for your rhetoric..

It was then that control freak Steven Robbieson K4YZ began his nazi style campaign against me and my information bulletin claiming it was illegal and even had the balls to tell my internet service provider that I was "promote wanton violation of federal regulations" (Letter to Illinois Consolidated Communication). He claimed all this #### despite the fact that I proved that he was full of ####.

Todd...I gave you a "pass" on this the first time around because I know it was too easy for you to get confused with everything going on...

You ARE promoting wanton violation of FCC rules and regulations. You have stated, on numerous occassions, that you operated both a "pirate" TV and FM station...You've said you'd do it again.

I gave a link to the FCC website that stated what I've been say the whole time, that my staion is legal and there NOTHING he can do about it.

So you have.

And >>I<< provided links to YOUR assertions of the aforementioned "pirate" operations. Along with your gross profanities, razor blade comments, references to my deceased daughter, etc etc etc.

Civil people don't act that way, Todd, and your ISP agreed. You were warned but blew it off.

He claims that I'm abusive yet he has to cry and whine like the little ##### he is, to my service provider claiming I'm promote wanton violation of federal law although he knows dam well that my information bulletin are legal,

It's not about your shows, Todd....

If he doesn't then he is just as dumb as I thought he was. Speaking of dumb, that brings us to steve's girlfriend Little Jimmy KC8GXW who claims he's going to run two radio's on either side of my information bulletin (malicious Interference).

And like I said...If he does, then that's on him...And my wife won't let me have a girlfriend, Todd.

Although he might think it funny that he and his little #### K4YZ is "yanking my chain" we will see if the FCC thinks their yanking my chain is funny!

I am not yanking your chain, Todd...I told you it had BEEN yanked...

So who's threating who? we have liar K4YZ and his little whore Jimmy getting on the newsgroup acting like they own the place and suggestion to cause malicious interference with my LEGAL station.

You SAY it's legal. We have no evidence of it. You randymouthed other correspondents about being "appliance operators", yet when tasked to list YOUR station, you balked.

I hope that people on that newsgroup wise up and kick Stevey and Jimmy harassing ###es off the newsgroup.

The harrassing one already got booted, Todd. At least for a while...The one who signed your name and call yesterday was actually polite and civil. Was that you, or did you give someone your password...?!?!

Steve, K4YZ

I suggest the next time you go to the theater, stand up in the middle of
the movie and yell "FIRE!!!!" and see what happens if there is no fire.
See if the people who belive you and exit the theater get arrested or if
you are the one who gets arrested.
You have the freedom to talk about hijacking a plane too, but go to an
airport and tell the security guard you are thinking of hijacking a
plane and see what happens. Freedom of speech does not give anyone the
right to say anything, anywhere, anytime they please without facing
possible consequences.

Todd,

Thanks for cleaning up your language.

73, de Hans, K0HB

PS: I think you "bulletin station" is an idea which should not be tossed aside lightly. It should be hurled aside with great force. But that's just me.

Steve,

>An "information bulletin" that you refer to as a "show". A "show"
>that is nothing more than a showcase for your rhetoric..

Despite what you hink steve and information bulletin doesn't have to be a "newscast" it only has to be directed only to amteur radio operators consisting solely of subject matter of direct interest to the amateur service.

>Todd...I gave you a "pass" on this the first time around because I
>know it was too easy for you to get confused with everything going
>on...

>You ARE promoting wanton violation of FCC rules and regulations.
>You have stated, on numerous occassions, that you operated both a
>"pirate" TV and FM station...You've said you'd do it again.

First off I never ran a Pirate radio station, I applied for a LPFM license, Secondly that's between me and the FCC, and as I stated before they will NOT doing anything about, and finally You don't know what the HELL was going on so I suggest you shut your fucking mouth, that does concern you.

>And >>I<< provided links to YOUR assertions of the aforementioned
>"pirate" operations. Along with your gross profanities, razor blade
>comments, references to my deceased daughter, etc etc etc.
> Civil people don't act that way, Todd, and your ISP agreed. You
>were warned but blew it off.

First off you taking the razor blade too serious....I don't you name in that post and was not directed towards you directly. The problem with service porviders is they only respond to complaints they don't investigate the complaint. if my ISP was on here and realize what a PRICK you are perhaps they would change their mine.

>You SAY it's legal. We have no evidence of it. You randymouthed
>other correspondents about being "appliance operators", yet when
tasked
>to list YOUR station, you balked

Below there is a link to the FCC website where you and others on this website can read all about information bulletins

http://wireless.fcc.gov/services/amateur/about/communications.html

>The harrassing one already got booted, Todd. At least for a
>while...The one who signed your name and call yesterday was actually

>polite and civil. Was that you, or did you give someone your
>password...?!?!

Well steve on a final note I hope that people on this newsgroup wise up and get sick of your harassment and boot your sorry ass off the newsgroup

Well Hans Information bulletins are legal and there's really nothing anyone can do about it. I'm currently working with the House Subcommittee on Telecommunication to resolve this information bulletin problem.

Steve,

here's some light reading for you!!!

Todd N9OGL

SUPREME COURT OF THE UNITED STATES

No. 96-511

JANET RENO, ATTORNEY GENERAL OF THE UNITED STATES, et al., APPELLANTS
v. AMERICAN CIVIL LIBERTIES UNION et al.

on appeal from the United States District Court for the Eastern
District of Pennsylvania

[June 26, 1997]

Justice Stevens delivered the opinion of the Court.

At issue is the constitutionality of two statutory provisions enacted to protect minors from "indecent" and "patently offensive" communications on the Internet. Notwithstanding the legitimacy and importance of the congressional goal of protecting children from harmful materials, we agree with the three judge District Court that the statute abridges "the freedom of speech" protected by the First Amendment. [n.1]

The District Court made extensive findings of fact, most of which were based on a detailed stipulation prepared by the parties. See 929 F. Supp. 824, 830-849 (ED Pa. 1996). [n.2] The findings describe the character and the dimensions of the Internet, the availability ofsexually explicit material in that medium, and the problems confronting age verification for recipients of Internet communications. Because those findings provide the underpinnings for the legal issues, we begin with a summary of the undisputed facts.

The Internet

The Internet is an international network of interconnected computers. It is the outgrowth of what began in 1969 as a military program called "ARPANET," [n.3] which was designed to enable computers operated by the military, defense contractors, and universities conducting defense related research to communicate with one another by redundant channels even if some portions of the network were damaged in a war. While the

ARPANET no longer exists, it provided an example for the development of a number of civilian networks that, eventually linking with each other, now enable tens of millions of people to communicate with one another and to access vast amounts of information from around the world. The Internet is "a unique and wholly new medium of worldwide human communication." [n.4]

The Internet has experienced "extraordinary growth." [n.5] The number of "host" computers--those that store information and relay communications--increased from about 300 in 1981 to approximately 9,400,000 by the time of the trial in 1996. Roughly 60% of these hosts are located in the United States. About 40 million people used the Internet at the time of trial, a number that is expected to mushroom to 200 million by 1999.

Individuals can obtain access to the Internet frommany different sources, generally hosts themselves or entities with a host affiliation. Most colleges and universities provide access for their students and faculty; many corporations provide their employees with access through an office network; many communities and local libraries provide free access; and an increasing number of storefront "computer coffee shops" provide access for a small hourly fee. Several major national "online services" such as America Online, CompuServe, the Microsoft Network, and Prodigy offer access to their own extensive proprietary networks as well as a link to the much larger resources of the Internet. These commercial online services had almost 12 million individual subscribers at the time of trial.

Anyone with access to the Internet may take advantage of a wide variety of communication and information retrieval methods. These methods are constantly evolving and difficult to categorize precisely. But, as presently constituted, those most relevant to this case are electronic mail ("e mail"), automatic mailing list services ("mail exploders," sometimes referred to as "listservs"), "newsgroups," "chat rooms," and the "World Wide Web." All of these methods can be used to transmit text; most can transmit sound, pictures, and moving video images. Taken together, these tools constitute a unique medium--known to its users as "cyberspace"--located in no particular geographical location but available to anyone, anywhere in the world, with access to the Internet.

E mail enables an individual to send an electronic message--generally akin to a note or letter--to another individual or to a group of addressees. The message is generally stored electronically, sometimes waiting for the recipient to check her "mailbox" and sometimes making its receipt known through some type of prompt. A mail exploder is a sort of e mail group. Subscribers can send messages to a common e mail address, which then forwards the message to the group's other subscribers.Newsgroups also serve groups of regular participants, but these postings may be read by others as well. There are thousands of such groups, each serving to foster an exchange of information or

opinion on a particular topic running the gamut from, say, the music of Wagner to Balkan politics to AIDS prevention to the Chicago Bulls. About 100,000 new messages are posted every day. In most newsgroups, postings are automatically purged at regular intervals. In addition to posting a message that can be read later, two or more individuals wishing to communicate more immediately can enter a chat room to engage in real time dialogue--in other words, by typing messages to one another that appear almost immediately on the others' computer screens. The District Court found that at any given time "tens of thousands of users are engaging in conversations on a huge range of subjects." [n.6] It is "no exaggeration to conclude that the content on the Internet is as diverse as human thought." [n.7]

The best known category of communication over the Internet is the World Wide Web, which allows users to search for and retrieve information stored in remote computers, as well as, in some cases, to communicate back to designated sites. In concrete terms, the Web consists of a vast number of documents stored in different computers all over the world. Some of these documents are simply files containing information. However, more elaborate documents, commonly known as Web "pages," are also prevalent. Each has its own address--%rather like a telephone number." [n.8] Web pages frequently contain information and sometimes allow the viewer to communicate with the page's (or "site's") author. They generally also contain "links" to otherdocuments created by that site's author or to other (generally) related sites. Typically, the links are either blue or underlined text--sometimes images.

Navigating the Web is relatively straightforward. A user may either type the address of a known page or enter one or more keywords into a commercial "search engine" in an effort to locate sites on a subject of interest. A particular Web page may contain the information sought by the "surfer," or, through its links, it may be an avenue to other documents located anywhere on the Internet. Users generally explore a given Web page, or move to another, by clicking a computer "mouse" on one of the page's icons or links. Access to most Web pages is freely available, but some allow access only to those who have purchased the right from a commercial provider. The Web is thus comparable, from the readers' viewpoint, to both a vast library including millions of readily available and indexed publications and a sprawling mall offering goods and services.

>From the publishers' point of view, it constitutes a vast platform from which to address and hear from a world wide audience of millions of readers, viewers, researchers, and buyers. Any person or organization with a computer connected to the Internet can "publish" information. Publishers include government agencies, educational institutions, commercial entities, advocacy groups, and individuals. [n.9] Publishers may either make their material available to the entire pool of Internet users, or confine access to a selected group, such as those willing to pay for the privilege. "No single organization controls any membership in the Web, nor is there any centralized point from which individual

Web sites or services can be blocked from the Web." [n.10]

Sexually Explicit Material

Sexually explicit material on the Internet includes text, pictures, and chat and "extends from the modestly titillating to the hardest core." [n.11] These files are created, named, and posted in the same manner as material that is not sexually explicit, and may be accessed either deliberately or unintentionally during the course of an imprecise search. "Once a provider posts its content on the Internet, it cannot prevent that content from entering any community." [n.12] Thus, for example,

"when the UCR/California Museum of Photography posts to its Web site nudes by Edward Weston and Robert Mapplethorpe to announce that its new exhibit will travel to Baltimore and New York City, those images are available not only in Los Angeles, Baltimore, and New York City, but also in Cincinnati, Mobile, or Beijing--wherever Internet users live. Similarly, the safer sex instructions that Critical Path posts to its Web site, written in street language so that the teenage receiver can understand them, are available not just in Philadelphia, but also in Provo and Prague." [n.13]

Some of the communications over the Internet that originate in foreign countries are also sexually explicit. [n.14]

Though such material is widely available, users seldomencounter such content accidentally. "A document's title or a description of the document will usually appear before the document itself . . . and in many cases the user will receive detailed information about a site's content before he or she need take the step to access the document. Almost all sexually explicit images are preceded by warnings as to the content." [n.15] For that reason, the "odds are slim" that a user would enter a sexually explicit site by accident. [n.16] Unlike communications received by radio or television, "the receipt of information on the Internet requires a series of affirmative steps more deliberate and directed than merely turning a dial. A child requires some sophistication and some ability to read to retrieve material and thereby to use the Internet unattended." [n.17]

Systems have been developed to help parents control the material that may be available on a home computer with Internet access. A system may either limit a computer's access to an approved list of sources that have been identified as containing no adult material, it may block designated inappropriate sites, or it may attempt to block messages containing identifiable objectionable features. "Although parental control software currently can screen for certain suggestive words or for known sexually explicit sites, it cannot now screen for sexually explicit images." [n.18] Nevertheless, the evidence indicates that "a reasonably effective method by which parents can prevent their children from accessing sexually explicit and other material which parents may believe is inappropriate for their children will soon be available."

[n.19]

Age Verification

The problem of age verification differs for different uses of the Internet. The District Court categorically determined that there "is no effective way to determine the identity or the age of a user who is accessing material through e mail, mail exploders, newsgroups or chat rooms." [n.20] The Government offered no evidence that there was a reliable way to screen recipients and participants in such fora for age. Moreover, even if it were technologically feasible to block minors' access to newsgroups and chat rooms containing discussions of art, politics or other subjects that potentially elicit "indecent" or "patently offensive" contributions, it would not be possible to block their access to that material and "still allow them access to the remaining content, even if the overwhelming majority of that content was not indecent." [n.21]

Technology exists by which an operator of a Web site may condition access on the verification of requested information such as a credit card number or an adult password. Credit card verification is only feasible, however, either in connection with a commercial transaction in which the card is used, or by payment to averification agency. Using credit card possession as a surrogate for proof of age would impose costs on non commercial Web sites that would require many of them to shut down. For that reason, at the time of the trial, credit card verification was "effectively unavailable to a substantial number of Internet content providers." Id., at 846 (finding 102). Moreover, the imposition of such a requirement "would completely bar adults who do not have a credit card and lack the resources to obtain one from accessing any blocked material." [n.22]

Commercial pornographic sites that charge their users for access have assigned them passwords as a method of age verification. The record does not contain any evidence concerning the reliability of these technologies. Even if passwords are effective for commercial purveyors of indecent material, the District Court found that an adult password requirement would impose significant burdens on noncommercial sites, both because they would discourage users from accessing their sites and because the cost of creating and maintaining such screening systems would be "beyond their reach." [n.23]

In sum, the District Court found:

"Even if credit card verification or adult password verification were implemented, the Government presented no testimony as to how such systems could ensure that the user of the password or credit card is in fact over 18. The burdens imposed by credit card verification and adult password verification systems make them effectively unavailable to a substantial number of Internet content providers." Ibid. (finding 107).

The Telecommunications Act of 1996, Pub. L. 104-104, 110 Stat. 56, was an unusually important legislative enactment. As stated on the first of its 103 pages, its primary purpose was to reduce regulation and encourage "the rapid deployment of new telecommunications technologies." The major components of the statute have nothing to do with the Internet; they were designed to promote competition in the local telephone service market, the multichannel video market, and the market for over the air broadcasting. The Act includes seven Titles, six of which are the product of extensive committee hearings and the subject of discussion in Reports prepared by Committees of the Senate and the House of Representatives. By contrast, Title V--known as the "Communications Decency Act of 1996" (CDA)--contains provisions that were either added in executive committee after the hearings were concluded or as amendments offered during floor debate on the legislation. An amendment offered in the Senate was the source of the two statutory provisions challenged in this case. [n.24] Theyare informally described as the "indecent transmission" provision and the "patently offensive display" provision. [n.25]

The first, 47 U. S. C. A. §223(a) (Supp. 1997), prohibits the knowing transmission of obscene or indecent messages to any recipient under 18 years of age. It provides in pertinent part:

"(a) Whoever--

%(1) in interstate or foreign communications--

. . . . .

"(B) by means of a telecommunications device knowingly--

%(i) makes, creates, or solicits, and

%(ii) initiates the transmission of,

%any comment, request, suggestion, proposal, image, or other communication which is obscene or indecent, knowing that the recipient of the communication is under 18 years of age, regardless of whether the maker of such communication placedthe call or initiated the communication;

. . . . .

"(2) knowingly permits any telecommunications facility under his control to be used for any activity prohibited by paragraph (1) with the intent that it be used for such activity,

%shall be fined under Title 18, or imprisoned not more than two years, or both."

The second provision, §223(d), prohibits the knowing sending or displaying of patently offensive messages in a manner that is available to a person under 18 years of age. It provides:

"(d) Whoever--

"(1) in interstate or foreign communications knowingly--

"(A) uses an interactive computer service to send to a specific person or persons under 18 years of age, or

"(B) uses any interactive computer service to display in a manner available to a person under 18 years of age,

%any comment, request, suggestion, proposal, image, or other communication that, in context, depicts or describes, in terms patently offensive asmeasured by contemporary community standards, sexual or excretory activities or organs, regardless of whether the user of such service placed the call or initiated the communication; or

"(2) knowingly permits any telecommunications facility under such person's control to be used for an activity prohibited by paragraph (1) with the intent that it be used for such activity,

%shall be fined under Title 18, or imprisoned not more than two years, or both."

The breadth of these prohibitions is qualified by two affirmative defenses. See §223(e)(5). [n.26] One covers those who take "good faith, reasonable, effective, and appropriate actions" to restrict access by minors to the prohibited communications. §223(e)(5)(A). The other covers those who restrict access to covered material by requiring certain designated forms of age proof, such as a verified credit card or an adult identification number or code. §223(e)(5)(B).

On February 8, 1996, immediately after the Presidentsigned the statute, 20 plaintiffs [n.27] filed suit against the Attorney General of the United States and the Department of Justice challenging the constitutionality of §§223(a)(1) and 223(d). A week later, based on his conclusion that the term "indecent" was too vague to provide the basis for a criminal prosecution, District Judge Buckwalter entered a temporary restraining order against enforcement of §223(a)(1)(B)(ii) insofar as it applies to indecent communications. A second suit was then filed by 27 additional plaintiffs, [n.28] the two cases were consolidated, and a three judge District Court was convened pursuant to §561 of the Act. [n.29] After an evidentiary hearing, that Court entered a preliminary injunction against enforcement of both of the challenged provisions. Each of the three judges wrote a separate opinion, but their judgment was unanimous.

Chief Judge Sloviter doubted the strength of the Government's interest in regulating "the vast range of online material covered or potentially covered by the CDA," but acknowledged that the interest was "compelling" with respect to some of that material. 929 F. Supp., at 853. She concluded, nonetheless, that the statute "sweeps more broadly than necessary and thereby chills the expression of adults" and that the terms "patently offensive" and "indecent" were "inherently vague." Id., at 854. She also determined that the affirmative defenses were not "technologically or economically feasible for most providers," specifically considering and rejecting an argument that providers could

avoid liability by "tagging" their material in a manner that would allow potential readers to screen out unwanted transmissions. Id., at 856. Chief Judge Sloviter also rejected the Government's suggestion that the scope of the statute could be narrowed by construing it to apply only to commercial pornographers. Id., at 854-855.

Judge Buckwalter concluded that the word "indecent" in §223(a)(1)(B) and the terms "patently offensive" and "in context" in §223(d)(1) were so vague that criminal enforcement of either section would violate the "fundamental constitutional principle" of "simple fairness," id., at 861, and the specific protections of the First and Fifth Amendments, id., at 858. He found no statutory basis for the Government's argument that the challenged provisions would be applied only to "pornographic" materials, noting that, unlike obscenity, "indecency has not been defined to exclude works of serious literary, artistic, political or scientific value." Id., at 863. Moreover, the Government's claim that the work must be considered patently offensive "in context" was itself vague because the relevant context might "refer to, among other things, the nature of the communication as a whole, the time of day it was conveyed, the medium used, the identity of the speaker, or whether or not it is accompanied by appropriate warnings." Id., at 864. He believed that the unique nature of the Internet aggravated the vagueness of the statute. Id., at 865, n. 9.

Judge Dalzell's review of "the special attributes of Internet communication" disclosed by the evidence convinced him that the First Amendment denies Congress the power to regulate the content of protected speech on the Internet. Id., at 867. His opinion explained at length why he believed the Act would abridge significant protected speech, particularly by noncommercial speakers, while "[p]erversely, commercial pornographers would remain relatively unaffected." Id., at 879. He construed our cases as requiring a "medium specific" approach to the analysis of the regulation of mass communication, id., at 873, and concluded that the Internet--as "the most participatory form of mass speech yet developed," id., at 883--is entitled to "the highest protection from governmental intrusion," ibid. [n.30]

The judgment of the District Court enjoins the Government from enforcing the prohibitions in §223(a)(1)(B) insofar as they relate to "indecent" communications, but expressly preserves the Government's right to investigate and prosecute the obscenity or child pornography activities prohibited therein. The injunction against enforcement of §§223(d)(1) and (2) is unqualified because those provisions contain no separate reference to obscenity or child pornography.

The Government appealed under the Act's special review provisions, §561, 110 Stat. 142-143, and we noted probable jurisdiction, see 519 U. S. ___ (1996). In its appeal, the Government argues that the District Court erred in holding that the CDA violated both the First Amendment because it is overbroad and the Fifth Amendment because it is vague. While we discuss the vagueness of the CDA because of its

relevance to the First Amendment overbreadth inquiry, we conclude that the judgment should be affirmed without reaching the Fifth Amendment issue. We begin our analysis by reviewing the principal authorities on which the Government relies. Then, after describing the overbreadth of the CDA, we consider the Government's specific contentions, including its submission that we save portions of the statute either by severance or by fashioning judicial limitations on the scope of its coverage.

In arguing for reversal, the Government contends that the CDA is plainly constitutional under three ofour prior decisions: (1) Ginsberg v. New York, 390 U.S. 629 (1968); (2) FCC v. Pacifica Foundation, 438 U.S. 726 (1978); and (3) Renton v. Playtime Theatres, Inc., 475 U.S. 41 (1986). A close look at these cases, however, raises--rather than relieves--doubts concerning the constitutionality of the CDA.

In Ginsberg, we upheld the constitutionality of a New York statute that prohibited selling to minors under 17 years of age material that was considered obscene as to them even if not obscene as to adults. We rejected the defendant's broad submission that "the scope of the constitutional freedom of expression secured to a citizen to read or see material concerned with sex cannot be made to depend on whether the citizen is an adult or a minor." 390 U. S., at 636. In rejecting that contention, we relied not only on the State's independent interest in the well being of its youth, but also on our consistent recognition of the principle that "the parents' claim to authority in their own household to direct the rearing of their children is basic in the structure of our society." [n.31] In four important respects, the statute upheld in Ginsberg was narrower than the CDA. First, we noted in Ginsberg that "the prohibition against sales to minors does not bar parents who so desire from purchasing the magazines for their children." Id., at 639. Under the CDA, by contrast, neither the parents' consent--nor even their participation--in the communication would avoid the application of the statute. [n.32] Second, the NewYork statute applied only to commercial transactions, id., at 647, whereas the CDA contains no such limitation. Third, the New York statute cabined its definition of material that is harmful to minors with the requirement that it be "utterly without redeeming social importance for minors." Id., at 646. The CDA fails to provide us with any definition of the term "indecent" as used in§223(a)(1) and, importantly, omits any requirement that the "patently offensive" material covered by §223(d) lack serious literary, artistic, political, or scientific value. Fourth, the New York statute defined a minor as a person under the age of 17, whereas the CDA, in applying to all those under 18 years, includes an additional year of those nearest majority.

In Pacifica, we upheld a declaratory order of the Federal Communications Commission, holding that the broadcast of a recording of a 12-minute monologue entitled "Filthy Words" that had previously been delivered to a live audience "could have been the subject of administrative sanctions." 438 U. S., at 730 (internal quotations omitted). The Commission had found that the repetitive use of certain

words referring to excretory or sexual activities or organs "in an afternoon broadcast when children are in the audience was patently offensive" and concluded that the monologue was indecent "as broadcast." Id., at 735. The respondent did not quarrel with the finding that the afternoon broadcast was patently offensive, but contended that it was not "indecent" within the meaning of the relevant statutes because it contained no prurient appeal. After rejecting respondent's statutory arguments, we confronted its two constitutional arguments: (1) that the Commission's construction of its authority to ban indecent speech was so broad that its order had to be set aside even if thebroadcast at issue was unprotected; and (2) that since the recording was not obscene, the First Amendment forbade any abridgement of the right to broadcast it on the radio.

In the portion of the lead opinion not joined by Justices Powell and Blackmun, the plurality stated that the First Amendment does not prohibit all governmental regulation that depends on the content of speech. Id., at 742-743. Accordingly, the availability of constitutional protection for a vulgar and offensive monologue that was not obscene depended on the context of the broadcast. Id., at 744-748. Relying on the premise that "of all forms of communication" broadcasting had received the most limited First Amendment protection, id., at 748-749, the Court concluded that the ease with which children may obtain access to broadcasts, "coupled with the concerns recognized in Ginsberg," justified special treatment of indecent broadcasting. Id., at 749-750.

As with the New York statute at issue in Ginsberg, there are significant differences between the order upheld in Pacifica and the CDA. First, the order in Pacifica, issued by an agency that had been regulating radio stations for decades, targeted a specific broadcast that represented a rather dramatic departure from traditional program content in order to designate when--rather than whether--it would be permissible to air such a program in that particular medium. The CDA's broad categorical prohibitions are not limited to particular times and are not dependent on any evaluation by an agency familiar with the unique characteristics of the Internet. Second, unlike the CDA, the Commission's declaratory order was not punitive; we expressly refused to decide whether the indecent broadcast "would justify a criminal prosecution." Id., at 750. Finally, the Commission's order applied to a medium which as a matter of history had "received the most limited First Amendment protection," id., at 748, in large part because warnings could not adequately protect the listener from unexpected program content. The Internet, however, has no comparable history. Moreover, the District Court found that the risk of encountering indecent material by accident is remote because a series of affirmative steps is required to access specific material.

In Renton, we upheld a zoning ordinance that kept adult movie theatres out of residential neighborhoods. The ordinance was aimed, not at the content of the films shown in the theaters, but rather at the

"secondary effects"--such as crime and deteriorating property values--that these theaters fostered: " `It is th[e] secondary effect which these zoning ordinances attempt to avoid, not the dissemination of "offensive" speech.' " 475 U. S., at 49 (quoting Young v. American Mini Theatres, Inc., 427 U.S. 50, 71, n. 34 (1976)). According to the Government, the CDA is constitutional because it constitutes a sort of "cyberzoning" on the Internet. But the CDA applies broadly to the entire universe of cyberspace. And the purpose of the CDA is to protect children from the primary effects of "indecent" and "patently offensive" speech, rather than any "secondary" effect of such speech. Thus, the CDA is a content based blanket restriction on speech, and, as such, cannot be "properly analyzed as a form of time, place, and manner regulation." 475 U. S., at 46. See also Boos v. Barry, 485 U.S. 312, 321 (1988) ("Regulations that focus on the direct impact of speech on its audience" are not properly analyzed under Renton); Forsyth County v. Nationalist Movement, 505 U.S. 123, 134 (1992) ("Listeners' reaction to speech is not a content neutral basis for regulation").

These precedents, then, surely do not require us to uphold the CDA and are fully consistent with the application of the moststringent review of its provisions.

In Southeastern Promotions, Ltd. v. Conrad, 420 U.S. 546, 557 (1975), we observed that "[e]ach medium of expression . . . may present its own problems." Thus, some of our cases have recognized special justifications for regulation of the broadcast media that are not applicable to other speakers, see Red Lion Broadcasting Co. v. FCC, 395 U.S. 367 (1969); FCC v. Pacifica Foundation, 438 U.S. 726 (1978). In these cases, the Court relied on the history of extensive government regulation of the broadcast medium, see, e.g., Red Lion, 395 U. S., at 399-400; the scarcity of available frequencies at its inception, see, e.g., Turner Broadcasting System, Inc. v. FCC, 512 U.S. 622, 637-638 (1994); and its "invasive" nature, see Sable Communications of Cal., Inc. v. FCC, 492 U.S. 115, 128 (1989).

Those factors are not present in cyberspace. Neither before nor after the enactment of the CDA have the vast democratic fora of the Internet been subject to the type of government supervision and regulation that has attended the broadcast industry. [n.33] Moreover, the Internet is not as "invasive" as radio or television. The District Court specifically found that "[c]ommunications over the Internet do not `invade' an individual's home or appear on one's computer screen unbidden. Users seldom encounter content `by accident.' " 929 F. Supp., at844 (finding 88). It also found that "[a]lmost all sexually explicit images are preceded by warnings as to the content," and cited testimony that " `odds are slim' that a user would come across a sexually explicit sight by accident." Ibid.

We distinguished Pacifica in Sable, 492 U. S., at 128, on just this basis. In Sable, a company engaged in the business of offering sexually oriented prerecorded telephone messages (popularly known as "dial a

porn") challenged the constitutionality of an amendment to the Communications Act that imposed a blanket prohibition on indecent as well as obscene interstate commercial telephone messages. We held that the statute was constitutional insofar as it applied to obscene messages but invalid as applied to indecent messages. In attempting to justify the complete ban and criminalization of indecent commercial telephone messages, the Government relied on Pacifica, arguing that the ban was necessary to prevent children from gaining access to such messages. We agreed that "there is a compelling interest in protecting the physical and psychological well being of minors" which extended to shielding them from indecent messages that are not obscene by adult standards, 492 U. S., at 126, but distinguished our "emphatically narrow holding" in Pacifica because it did not involve a complete ban and because it involved a different medium of communication, id., at 127. We explained that "the dial it medium requires the listener to take affirmative steps to receive the communication." Id., at 127-128. "Placing a telephone call," we continued, "is not the same as turning on a radio and being taken by surprise by an indecent message." Id., at 128.

Finally, unlike the conditions that prevailed when Congress first authorized regulation of the broadcast spectrum, the Internet can hardly be considered a "scarce" expressive commodity. It provides relatively unlimited, low cost capacity for communication of allkinds. The Government estimates that "[a]s many as 40 million people use the Internet today, and that figure is expected to grow to 200 million by 1999." [n.34] This dynamic, multifaceted category of communication includes not only traditional print and news services, but also audio, video, and still images, as well as interactive, real time dialogue. Through the use of chat rooms, any person with a phone line can become a town crier with a voice that resonates farther than it could from any soapbox. Through the use of Web pages, mail exploders, and newsgroups, the same individual can become a pamphleteer. As the District Court found, "the content on the Internet is as diverse as human thought." 929 F. Supp., at 842 (finding 74). We agree with its conclusion that our cases provide no basis for qualifying the level of First Amendment scrutiny that should be applied to this medium.

Regardless of whether the CDA is so vague that it violates the Fifth Amendment, the many ambiguities concerning the scope of its coverage render it problematic for purposes of the First Amendment. For instance, each of the two parts of the CDA uses a different linguistic form. The first uses the word "indecent," 47 U. S. C. A. §223(a) (Supp. 1997), while the second speaks of material that "in context, depicts or describes, in terms patently offensive as measured by contemporary community standards, sexual or excretory activities or organs," §223(d). Given the absence of a definition of either term, [n.35] this difference in language will provokeuncertainty among speakers about how the two standards relate to each other [n.36] and just what they mean. [n.37] Could a spe aker confidently assume that a serious discussion about birth control practices, homosexuality, the

First Amendment issues raised by the Appendix to our Pacifica opinion, or the consequences of prison rape would not violate the CDA? This uncertainty undermines the likelihood that the CDA has been carefully tailored to the congressional goal of protecting minors from potentially harmful materials.

The vagueness of the CDA is a matter of special concern for two reasons. First, the CDA is a content based regulation of speech. The vagueness of such a regulation raises special First Amendment concerns because of its obvious chilling effect on free speech. See, e.g., Gentile v. State Bar of Nev., 501 U.S. 1030, 1048-1051 (1991). Second, the CDA is a criminal statute. In addition to the opprobrium and stigma of a criminal conviction, the CDA threatens violators with penalties including up to two years in prison for each act of violation. The severity of criminal sanctions may well cause speakers to remain silent rather than communicate even arguably unlawful words, ideas, and images. See, e.g., Dombrowski v. Pfister, 380 U.S. 479, 494 (1965). As a practical matter, this increased deterrent effect, coupled with the "risk of discriminatory enforcement" of vague regulations, poses greater First Amendment concerns than those implicated by the civil regulation reviewed in Denver Area Ed. Telecommunications Consortium, Inc. v. FCC, 518 U. S. ___ (1996).

The Government argues that the statute is no more vague than the obscenity standard this Court established in Millerv. California, 413 U.S. 15 (1973). But that is not so. In Miller, this Court reviewed a criminal conviction against a commercial vendor who mailed brochures containing pictures of sexually explicit activities to individuals who had not requested such materials. Id., at 18. Having struggled for some time to establish a definition of obscenity, we set forth in Miller the test for obscenity that controls to this day:

"(a) whether the average person, applying contemporary community standards would find that the work, taken as a whole, appeals to the prurient interest; (b) whether the work depicts or describes, in a patently offensive way, sexual conduct specifically defined by the applicable state law; and (c) whether the work, taken as a whole, lacks serious literary, artistic, political, or scientific value." Id., at 24 (internal quotation marks and citations omitted).

Because the CDA's "patently offensive" standard (and, we assume arguendo, its synonymous "indecent" standard) is one part of the three prong Miller test, the Government reasons, it cannot be unconstitutionally vague.

The Government's assertion is incorrect as a matter of fact. The second prong of the Miller test--the purportedly analogous standard--contains a critical requirement that is omitted from the CDA: that the proscribed material be "specifically defined by the applicable state law." This requirement reduces the vagueness inherent in the open ended term "patently offensive" as used in the CDA. Moreover, the Miller definition is limited to "sexual conduct," whereas the CDA extends also

to include (1) "excretory activities" as well as (2) "organs" of both a sexual and excretory nature.

The Government's reasoning is also flawed. Just because a definition including three limitations is not vague, it does not follow that one of those limitations, standing by itself, is not vague. [n.38] Each of Miller's additional two prongs--(1) that, taken as a whole, the material appeal to the "prurient" interest, and (2) that it "lac[k] serious literary, artistic, political, or scientific value"--critically limits the uncertain sweep of the obscenity definition. The second requirement is particularly important because, unlike the "patently offensive" and "prurient interest" criteria, it is not judged by contemporary community standards. See Pope v. Illinois, 481 U.S. 497, 500 (1987). This "societal value" requirement, absent in the CDA, allows appellate courts to impose some limitations and regularity on the definition by setting, as a matter of law, a national floor for socially redeeming value. The Government's contention that courts will be able to give such legal limitations to the CDA's standards is belied by Miller's own rationale for having juries determine whether material is "patently offensive" according to community standards: that such questions are essentially ones of fact. [n.39]

In contrast to Miller and our other previous cases, the CDA thus presents a greater threat of censoring speech that, in fact, falls outside the statute's scope. Given the vague contours of the coverage of the statute, it unquestionably silences some speakers whose messages would be entitled to constitutional protection. That danger provides further reason for insisting that the statute not be overly broad. The CDA's burden on protected speech cannot be justified if it could be avoided by a more carefully drafted statute.

We are persuaded that the CDA lacks the precision that the First Amendment requires when a statute regulates the content of speech. In order to deny minors access to potentially harmful speech, the CDA effectively suppresses a large amount of speech that adults have a constitutional right to receive and to address to one another. That burden on adult speech is unacceptable if less restrictive alternatives would be at least as effective in achieving the legitimate purpose that the statute was enacted to serve.

In evaluating the free speech rights of adults, we have made it perfectly clear that "[s]exual expression which is indecent but not obscene is protected by the First Amendment." Sable, 492 U. S., at 126. See also Carey v. Population Services Int'l, 431 U.S. 678, 701 (1977) ("[W]here obscenity is not involved, we have consistentlyheld that the fact that protected speech may be offensive to some does not justify its suppression"). Indeed, Pacifica itself

admonished that "the fact that society may find speech offensive is not a sufficient reason for suppressing it." 438 U. S., at 745.

It is true that we have repeatedly recognized the governmental interest in protecting children from harmful materials. See Ginsberg, 390 U. S., at 639; Pacifica, 438 U. S., at 749. But that interest does not justify an unnecessarily broad suppression of speech addressed to adults. As we have explained, the Government may not "reduc[e] the adult population . . . to . . . only what is fit for children." Denver, 518 U. S., at ___ (slip op., at 29) (internal quotation marks omitted) (quoting Sable, 492 U. S., at 128). [n.40] "[R]egardless of the strength of the government's interest" in protecting children, "[t]he level of discourse reaching a mailbox simply cannot be limited to that which would be suitable for a sandbox." Bolger v. Youngs Drug Products Corp., 463 U.S. 60, 74-75 (1983).

The District Court was correct to conclude that the CDA effectively resembles the ban on "dial a porn" invalidated in Sable. 929 F. Supp., at 854. In Sable, 492 U. S., at 129, this Court rejected the argument that we should defer to the congressional judgment that nothing less than a total ban would be effective in preventing enterprising youngsters from gaining access to indecent communications. Sable thus made clear that the mere fact that a statutory regulation of speech was enactedfor the important purpose of protecting children from exposure to sexually explicit material does not foreclose inquiry into its validity. [n.41] As we pointed out last Term, that inquiry embodies an "over arching commitment" to make sure that Congress has designed its statute to accomplish its purpose "without imposing an unnecessarily great restriction on speech." Denver, 518 U. S., at ___ (slip op., at 11).

In arguing that the CDA does not so diminish adult communication, the Government relies on the incorrect factual premise that prohibiting a transmission whenever it is known that one of its recipients is a minor would not interfere with adult to adult communication. The findings of the District Court make clear that this premise is untenable.

Given the size of the potential audience for most messages, in the absence of a viable age verification process, the sender must be charged with knowing that one or more minors will likely view it. Knowledge that, for instance, one or more members of a 100 person chat group will be minor--and therefore that it would be a crime to send the group an indecent message--would surely burden communication among adults. [n.42]

The District Court found that at the time of trial existing technology did not include any effective method for a sender to prevent minors from obtaining access to its communications on the Internet without also denying access to adults. The Court found no effective way to determine the age of a user who is accessing material through e mail, mail exploders, newsgroups, or chat rooms. 929 F. Supp., at 845 (findings 90-94). As a practical matter, the Court also found that it would be prohibitively expensive for noncommercial--as well as some commercial--speakers who have Web sites to verify that their users are adults. Id., at 845-848 (findings 95-116). [n.43] These limitations

must inevitably curtail a significant amount of adult communication on the Internet. By contrast, the District Court found that "[d]espite its limitations, currently available user based software suggests that a reasonably effective method by which parents can prevent their children from accessing sexually explicit and other material which parents may believe is inappropriate for their children will soon be widely available." Id., at 842 (finding 73) (emphases added).

The breadth of the CDA's coverage is wholly unprecedented. Unlike the regulations upheld in Ginsberg and Pacifica, the scope of the CDA is not limited to commercial speech or commercial entities. Its open ended prohibitions embrace all nonprofit entities and individuals posting indecent messages or displaying them on their own computers in the presence of minors. The general,undefined terms "indecent" and "patently offensive" cover large amounts of nonpornographic material with serious educational or other value. [n.44] Moreover, the "community standards" criterion as applied to the Internet means that any communication available to a nation wide audience will be judged by the standards of the community most likely to be offended by the message. [n.45] The regulated subject matter includes any of the seven "dirty words" used in the Pacifica monologue, the use of which the Government's expert acknowledged could constitute a felony. See Olsen Test., Tr. Vol. V, 53:16-54:10. It may also extend to discussions about prison rape or safe sexual practices, artistic images that include nude subjects, and arguably the card catalogue of the Carnegie Library.

For the purposes of our decision, we need neither accept nor reject the Government's submission that the First Amendment does not forbid a blanket prohibition on all "indecent" and "patently offensive" messages communicated to a 17 year old--no matter how much valuethe message may contain and regardless of parental approval. It is at least clear that the strength of the Government's interest in protecting minors is not equally strong throughout the coverage of this broad statute. Under the CDA, a parent allowing her 17 year old to use the family computer to obtain information on the Internet that she, in her parental judgment, deems appropriate could face a lengthy prison term. See 47 U. S. C. A. §223(a)(2) (Supp. 1997). Similarly, a parent who sent his 17 year old college freshman information on birth control via e mail could be incarcerated even though neither he, his child, nor anyone in their home community, found the material "indecent" or "patently offensive," if the college town's community thought otherwise.

The breadth of this content based restriction of speech imposes an especially heavy burden on the Government to explain why a less restrictive provision would not be as effective as the CDA. It has not done so. The arguments in this Court have referred to possible alternatives such as requiring that indecent material be "tagged" in a way that facilitates parental control of material coming into their homes, making exceptions for messages with artistic or educational value, providing some tolerance for parental choice, and regulating some portions of the Internet--such as commercial web

sites--differently than others, such as chat rooms. Particularly in the light of the absence of any detailed findings by the Congress, or even hearings addressing the special problems of the CDA, we are persuaded that the CDA is not narrowly tailored if that requirement has any meaning at all.

In an attempt to curtail the CDA's facial overbreadth, the Government advances three additional arguments for sustaining the Act's affirmative prohibitions: (1) thatthe CDA is constitutional because it leaves open ample "alternative channels" of communication; (2) that the plain meaning of the Act's "knowledge" and "specific person" requirement significantly restricts its permissible applications; and (3) that the Act's prohibitions are "almost always" limited to material lacking redeeming social value.

The Government first contends that, even though the CDA effectively censors discourse on many of the Internet's modalities--such as chat groups, newsgroups, and mail exploders--it is nonetheless constitutional because it provides a "reasonable opportunity" for speakers to engage in the restricted speech on the World Wide Web. Brief for Appellants 39. This argument is unpersuasive because the CDA regulates speech on the basis of its content. A "time, place, and manner" analysis is therefore inapplicable. See Consolidated Edison Co. of N. Y. v. Public Serv. Comm'n of N. Y., 447 U.S. 530, 536 (1980). It is thus immaterial whether such speech would be feasible on the Web (which, as the Government's own expert acknowledged, would cost up to $10,000 if the speaker's interests were not accommodated by an existing Web site, not including costs for database management and age verification). The Government's position is equivalent to arguing that a statute could ban leaflets on certain subjects as long as individuals are free to publish books. In invalidating a number of laws that banned leafletting on the streets regardless of their content--we explained that "one is not to have the exercise of his liberty of expression in appropriate places abridged on the plea that it may be exercised in some other place." Schneider v. State (Town of Irvington), 308 U.S. 147, 163 (1939).

The Government also asserts that the "knowledge" requirement of both §§223(a) and (d), especially when coupled with the "specific child" element found in §223(d), saves the CDA from overbreadth. Because bothsections prohibit the dissemination of indecent messages only to persons known to be under 18, the Government argues, it does not require transmitters to "refrain from communicating indecent material to adults; they need only refrain from disseminating such materials to persons they know to be under 18." Brief for Appellants 24. This argument ignores the fact that most Internet fora--including chat rooms, newsgroups, mail exploders, and the Web--are open to all comers. The Government's assertion that the knowledge requirement somehow protects the communications of adults is therefore untenable. Even the strongest reading of the "specific person" requirement of §223(d) cannot save the statute. It would confer broad powers of censorship, in

the form of a "heckler's veto," upon any opponent of indecent speech who might simply log on and inform the would be discoursers that his 17 year old child--a "specific person . . . under 18 years of age," 47 U. S. C. A. §223(d)(1)(A) (Supp. 1997)--would be present.

Finally, we find no textual support for the Government's submission that material having scientific, educational, or other redeeming social value will necessarily fall outside the CDA's "patently offensive" and "indecent" prohibitions. See also n. 37, supra.

The Government's three remaining arguments focus on the defenses provided in §223(e)(5). [n.46] First, relying on the "good faith, reasonable, effective, and appropriate actions" provision, the Government suggests that "tagging" provides a defense that saves the constitutionality of the Act. The suggestion assumes that transmitters may encode their indecent communications in a way that would indicate their contents, thus permitting recipients to block their reception with appropriatesoftware. It is the requirement that the good faith action must be "effective" that makes this defense illusory. The Government recognizes that its proposed screening software does not currently exist. Even if it did, there is no way to know whether a potential recipient will actually block the encoded material. Without the impossible knowledge that every guardian in America is screening for the "tag," the transmitter could not reasonably rely on its action to be "effective."

For its second and third arguments concerning defenses--which we can consider together--the Government relies on the latter half of §223(e)(5), which applies when the transmitter has restricted access by requiring use of a verified credit card or adult identification. Such verification is not only technologically available but actually is used by commercial providers of sexually explicit material. These providers, therefore, would be protected by the defense. Under the findings of the District Court, however, it is not economically feasible for most noncommercial speakers to employ such verification. Accordingly, this defense would not significantly narrow the statute's burden on noncommercial speech. Even with respect to the commercial pornographers that would be protected by the defense, the Government failed to adduce any evidence that these verification techniques actually preclude minors from posing as adults. [n.47] Given that the risk of criminal sanctions "hovers over each content provider, like the proverbial sword of Damocles," [n.48] the District Court correctly refused to rely on unproven future technology to save the statute. The Government thus failed to prove that theproffered defense would significantly reduce the heavy burden on adult speech produced by the prohibition on offensive displays.

We agree with the District Court's conclusion that the CDA places an unacceptably heavy burden on protected speech, and that the defenses do not constitute the sort of "narrow tailoring" that will save an otherwise patently invalid unconstitutional provision. In Sable, 492 U.

S., at 127, we remarked that the speech restriction at issue there amounted to " `burn[ing] the house to roast the pig.' " The CDA, casting a far darker shadow over free speech, threatens to torch a large segment of the Internet community.

At oral argument, the Government relied heavily on its ultimate fall back position: If this Court should conclude that the CDA is insufficiently tailored, it urged, we should save the statute's constitutionality by honoring the severability clause, see 47 U.S.C. § 608 and construing nonseverable terms narrowly. In only one respect is this argument acceptable.

A severability clause requires textual provisions that can be severed. We will follow §608's guidance by leaving constitutional textual elements of the statute intact in the one place where they are, in fact, severable. The "indecency" provision, 47 U. S. C. A. §223(a) (Supp. 1997), applies to "any comment, request, suggestion, proposal, image, or other communication which is obscene or indecent." (Emphasis added.) Appellees do not challenge the application of the statute to obscene speech, which, they acknowledge, can be banned totally because it enjoys no First Amendment protection. See Miller, 413 U. S., at 18. As set forth by the statute, the restriction of "obscene" material enjoys a textual manifestation separate from that for "indecent" material, which we have held unconstitutional. Therefore, we willsever the term "or indecent" from the statute, leaving the rest of §223(a) standing. In no other respect, however, can §223(a) or §223(d) be saved by such a textual surgery.

The Government also draws on an additional, less traditional aspect of the CDA's severability clause, 47 U. S. C., §608, which asks any reviewing court that holds the statute facially unconstitutional not to invalidate the CDA in application to "other persons or circumstances" that might be constitutionally permissible. It further invokes this Court's admonition that, absent "countervailing considerations," a statute should "be declared invalid to the extent it reaches too far, but otherwise left intact." Brockett v. Spokane Arcades, Inc., 472 U.S. 491, 503-504 (1985). There are two flaws in this argument.

First, the statute that grants our jurisdiction for this expedited review, 47 U. S. C. A. §561 (Supp. 1997), limits that jurisdictional grant to actions challenging the CDA "on its face." Consistent with §561, the plaintiffs who brought this suit and the three judge panel that decided it treated it as a facial challenge. We have no authority, in this particular posture, to convert this litigation into an "as applied" challenge. Nor, given the vast array of plaintiffs, the range of their expressive activities, and the vagueness of the statute, would it be practicable to limit our holding to a judicially defined set of specific applications.

Second, one of the "countervailing considerations" mentioned in Brockett is present here. In considering a facial challenge, this Court may impose a limiting construction on a statute only if it is "readily

susceptible" to such a construction. Virginia v. American Bookseller's Assn., Inc., 484 U.S. 383, 397 (1988). See also Erznoznik, v. Jacksonville, 422 U.S. 205, 216 (1975) ("readily subject" to narrowing construction). The open ended character of the CDA provides no guidance whatever for limiting its coverage.

This case is therefore unlike those in which we have construed a statute narrowly because the text or other source of congressional intent identified a clear line that this Court could draw. Cf., e.g., Brockett, 472 U. S., at 504-505 (invalidating obscenity statute only to the extent that word "lust" was actually or effectively excised from statute); United States v. Grace, 461 U.S. 171, 180-183 (1983) (invalidating federal statute banning expressive displays only insofar as it extended to public sidewalks when clear line could be drawn between sidewalks and other grounds that comported with congressional purpose of protecting the building, grounds, and people therein). Rather, our decision in United States v. Treasury Employees, 513 U.S. 454, 479, n. 26 (1995), is applicable. In that case, we declined to "dra[w] one or more lines between categories of speech covered by an overly broad statute, when Congress has sent inconsistent signals as to where the new line or lines should be drawn" because doing so "involves a far more serious invasion of the legislative domain." [n.49] This Court "will not rewrite a . . . law to conform it to constitutional requirements." American Booksellers, 484 U. S., at 397. [n.50]

In this Court, though not in the District Court, the Government asserts that--in addition to its interest in protecting children--its "[e]qually significant" interest in fostering the growth of the Internet provides an independent basis for upholding the constitutionality of the CDA. Brief for Appellants 19. The Government apparently assumes that the unregulated availability of "indecent" and "patently offensive" material on the Internet is driving countless citizens away from the medium because of the risk of exposing themselves or their children to harmful material.

We find this argument singularly unpersuasive. The dramatic expansion of this new marketplace of ideas contradicts the factual basis of this contention. The record demonstrates that the growth of the Internet has been and continues to be phenomenal. As a matter of constitutional tradition, in the absence of evidence to the contrary, we presume that governmental regulation of the content of speech is more likely to interfere with the free exchange of ideas than to encourage it. The interest in encouraging freedom of expression in a democratic society outweighs any theoretical but unproven benefit of censorship.

For the foregoing reasons, the judgment of the district court is affirmed.

It is so ordered.

Notes

1 "Congress shall make no law . . . abridging the freedom of speech." U. S. Const., Amdt. 1.

2 The Court made 410 findings, including 356 paragraphs of the parties' stipulation and 54 findings based on evidence received in open court. See 929 F. Supp. at 830, n. 9, 842, n. 15.

23 Id., at 847 (findings 104-106):

"At least some, if not almost all, non commercial organizations, such as the ACLU, Stop Prisoner Rape or Critical Path AIDS Project, regard charging listeners to access their speech as contrary to their goals of making their materials available to a wide audience free of charge.

. . . . .

"There is evidence suggesting that adult users, particularly casual Web browsers, would be discouraged from retrieving information that required use of a credit card or password. Andrew Anker testified that HotWired has received many complaints from its members about HotWired's registration system, which requires only that a member supply a name, e mail address and self created password. There is concern by commercial content providers that age verification requirements would decrease advertising and revenue because advertisers depend on a demonstration that the sites arewidely available and frequently visited."

24 See Exon Amendment No. 1268, 141 Cong. Rec. S8120 (June 9, 1995). See also id., at S8087. This amendment, as revised, became§502 of the Communications Act of 1996, 110 Stat. 133, 47 U. S. C. A. §§223(a)%(e) (Supp. 1997). Some Members of the House of Representatives opposed the Exon Amendment because they thought it "possible for our parents now to child proof the family computer with these products available in the private sector." They also thought the Senate's approach would "involve the Federal Government spending vast sums of money trying to define elusive terms that are going to lead to a flood of legal challenges while our kids are unprotected." These Members offered an amendment intended as a substitute for the Exon Amendment, but instead enacted as an additional section of the Act entitled "Online Family Empowerment." See 110 Stat. 137, 47 U. S. C. A. §230 (Supp. 1997); 141 Cong. Rec. H8468-H8472. No hearings were held on the provisions that became law. See S. Rep. No. 104-23 (1995), p. 9. After the Senate adopted the Exon amendment, however, its Judiciary Committee did conduct a one day hearing on "Cyberporn and Children." In his opening statement at that hearing, Senator Leahy observed:

"It really struck me in your opening statement when you mentioned, Mr. Chairman, that it is the first ever hearing, and you are absolutely right. And yet we had a major debate on the floor, passed legislation overwhelmingly on a subject involving the Internet, legislation that could dramatically change--some would say even wreak havoc--on the Internet. The Senate went in willy nilly, passed legislation, and never once had a hearing, never once had a discussion other than an hour or so on the floor." Cyberporn and Children: The Scope of the Problem, The

State of the Technology, and the Need for Congressional Action, Hearing on S. 892 before the Senate Committee on the Judiciary, 104th Cong., 1st Sess., 7-8 (1995).

25 Although the Government and the dissent break §223(d)(1) into two separate "patently offensive" and "display" provisions, we follow the convention of both parties below, as well the District Court's order and opinion, in describing §223(d)(1) as one provision.

26 In full, § 223(e)(5) provides:

"(5) It is a defense to a prosecution under subsection (a)(1)(B) or (d) of this section, or under subsection (a)(2) of this section with respect to the use of a facility for an activity under subsection (a)(1)(B) of this section that a person--

"(A) has taken, in good faith, reasonable, effective, and appropriate actions under the circumstances to restrict or prevent access by minors to a communication specified in such subsections, which may involve any appropriate measures to restrict minors from such communications, including any method which is feasible under available technology; or

"(B) has restricted access to such communication by requiring use of a verified credit card, debit account, adult access code, or adult personal identification number."

29 110 Stat. 142-143, note following 47 U. S. C. A. §223 (Supp.1997).

30 See also 929 F. Supp., at 877: "Four related characteristics of Internet communication have a transcendent importance to our shared holding that the CDA is unconstitutional on its face. We explain these characteristics in our Findings of fact above, and I only rehearse them briefly here. First, the Internet presents very low barriers to entry. Second, these barriers to entry are identical for both speakers and listeners. Third, as a result of these low barriers, astoundingly diverse content is available on the Internet. Fourth, the Internet provides significant access to all who wish to speak in the medium, and even creates a relative parity among speakers." According to Judge Dalzell, these characteristics and therest of the District Court's findings "lead to the conclusion that Congress may not regulate indecency on the Internet at all." Ibid. Because appellees do not press this argument before this Court, we do not consider it. Appellees also do not dispute that the Government generally has a compelling interest in protecting minors from "indecent" and "patently offensive" speech.

31 390 U. S., at 639. We quoted from Prince v. Massachusetts, 321 U.S. 158, 166 (1944): "It is cardinal with us that the custody, care and nurture of the child reside first in the parents, whose primary function and freedom include preparation for obligations the state can neither supply nor hinder."

32 Given the likelihood that many E mail transmissions from an adult to a minor are conversations between family members, it is therefore incorrect for the dissent to suggest that the provisions of the CDA, even in this narrow area, "are no different from the lawwe sustained in Ginsberg." Post, at 8.

33 Cf. Pacifica Foundation v. FCC, 556 F. 2d 9, 36 (CADC 1977) (Levanthal, J., dissenting), rev'd, FCC v. Pacifica Foundation, 438 U.S. 726 (1978). When Pacifica was decided, given that radio stations were allowed to operate only pursuant to federal license, and that Congress had enacted legislation prohibiting licensees from broadcasting indecent speech, there was a risk that members of the radio audience might infer some sort of official or societal approval of whatever was heard over the radio, see 556 F. 2d, at 37, n. 18. No such risk attends messages received through the Internet, which is not supervised by any federal agency.

34 Juris. Statement 3 (citing 929 F. Supp., at 831 (finding 3)).

35 "Indecent" does not benefit from any textual embellishment at all. "Patently offensive" is qualified only to the extent that it involves "sexual or excretory activities or organs" taken "in context" and "measured by contemporary community standards."

36 See Gozlon Peretz v. United States, 498 U.S. 395, 404 (1991) ("Where Congress includes particular language in one section of a statute but omits it in another section of the same Act, it is generally presumed that Congress acts intentionally and purposely in the disparate inclusion and exclusion") (internal quotation marks omitted).

37 The statute does not indicate whether the "patently offensive" and "indecent" determinations should be made with respect to minors or the population as a whole. The Government asserts that the appropriate standard is "what is suitable material for minors." Reply Brief for Appellants 18, n. 13 (citing Ginsberg v. New York, 390 U.S. 629, 633 (1968)). But the Conferees expressly rejected amendments that would have imposed such a "harmful to minors" standard. See S. Conf. Rep. No. 104-230, p. 189 (1996) (S. Conf. Rep.), 142 Cong. Rec. H1145, H1165-1166 (Feb. 1, 1996). The Conferees also rejected amendments that would have limited the proscribed materials to those lacking redeeming value. See S. Conf. Rep., at 189, 142 Cong. Rec. H1165-1166 (Feb. 1, 1996).

38 Even though the word "trunk," standing alone, might refer to luggage, a swimming suit, the base of a tree, or the long nose of an animal, its meaning is clear when it is one prong of a three part description of a species of gray animals.

39 413 U. S., at 30 (Determinations of "what appeals to the `prurient interest' or is `patently offensive'. . . . are essentially questions of fact, and our Nation is simply too big and too diverse for this Court to reasonably expect that such standards could be articulated for all 50 States in a single formulation, even assuming the prerequisite consensus exists"). The CDA, which implements the "contemporary community standards" language of Miller, thus conflicts with the Conferees' own assertion that the CDA was intended "to establish a uniform national standard of content regulation." S. Conf. Rep., at 191.

40 Accord, Butler v. Michigan, 352 U.S. 380, 383 (1957) (ban on sale to adults of books deemed harmful to children unconstitutional); Sable Communications of Cal., Inc. v. FCC, 492 U.S. 115, 128 (1989) (ban on "dial a porn" messages unconstitutional); Bolger v. Youngs Drug Products Corp., 463 U.S. 60, 73 (1983) (ban on mailing of unsolicited advertisement for contraceptives unconstitutional).

41 The lack of legislative attention to the statute at issue in Sable suggests another parallel with this case. Compare 492 U. S., at 129-130 ("[A]side from conclusory statements during the debates by proponents of the bill, as well as similar assertions in hearings on a substantially identical bill the year before, . . . the congressional record presented to us contains no evidence as to how effective or ineffective the FCC's most recent regulations were or might prove to be. . . . No Congressman or Senator purported to present a considered judgment with respect to how often or to what extent minors could or would circumvent the rules and have access to dial a porn messages") with n. 24, supra.

42 The Government agrees that these provisions are applicable whenever "a sender transmits a message to more than one recipient, knowing that at least one of the specific persons receiving themessage is a minor." Opposition to Motion to Affirm and Reply to Juris. Statement 4-5, n. 1.

43 The Government asserts that "[t]here is nothing constitutionally suspect about requiring commercial Web site operators . . . to shoulder the modest burdens associated with their use." Brief for Appellants 35. As a matter of fact, however, there is no evidence that a "modest burden" would be effective.

44 Transmitting obscenity and child pornography, whether via the Internet or other means, is already illegal under federal law for both adults and juveniles. See 18 U.S.C. §§ 1464-1465 (criminalizing obscenity); §2251 (criminalizing child pornography). In fact, when Congress was considering the CDA, the Government expressed its view that the law was unnecessary because existing laws already authorized its ongoing efforts to prosecute obscenity, child pornography, and child solicitation. See 141 Cong. Rec. S8342 (June 14, 1995) (letter from Kent Markus, Acting Assistant Attorney General,U. S. Department of Justice, to Sen. Leahy).

45 Citing Church of Lukumi Babalu Aye, Inc. v. Hialeah, 508 U.S. 520 (1993), among other cases, appellees offer an additional reason why, in their view, the CDA fails strict scrutiny. Because so much sexually explicit content originates overseas, they argue, the CDA cannot be "effective." Brief for Appellees American Library Association et al. 33-34. This argument raises difficult issues regarding the intended, as well as the permissible scope of, extraterritorial application of the CDA. We find it unnecessary to address those issues to dispose of this case.

46 For the full text of §223(e)(5), see n. 26, supra.

47 Thus, ironically, this defense may significantly protect commercial purveyors of obscene postings while providing little (or no) benefit for transmitters of indecent messages that have significant social or artistic value.

48 929 F. Supp., at 855-856.

49 As this Court long ago explained, "It would certainly be dangerous if the Legislature could set a net large enough to catch all possible offenders and leave it to the courts to step inside and say who could be rightfully be detained and who should be set at large. This would, to some extent, substitute the judicial for the legislative department of the government." United States v. Reese, 92 U.S. 214, 221 (1876). In part because of these separation of powers concerns, we have held that a severability clause is "an aid merely; not an inexorable command." Dorchy v. Kansas, 264 U.S. 286, 290 (1924).

50 See also Osborne v. Ohio, 495 U.S. 103, 121 (1990) (judicial rewriting of statutes would derogate Congress's "incentive to draft a narrowly tailored law in the first place").

:
: Yet we all know yelling "fire" in a theater is illegal and forbidden by
: law...
:

Show us the law.

Freedom of speech gives you the right. That doesn't mean you -do- that, it means you -have the freedom to do- that, which is an excellent freedom to have available if you should happen to see a fire in a theater.

Practically, if you hear someone yell "FIRE!" then you have some decisions to make. Are you going to believe that person or not, especially when you see nothing? If you do believe this person, are you going to run for the door like a crazed animal, or quickly make your way to the exit in a civilized manner?

Whichever you choose, it's -your- choice and -your- responsibility. It is -not- the responsibility of the person who yelled "FIRE!" that -you- chose one direction or another.

Thinking that it is the responsibility of the person who yelled "FIRE!" strips your power away from you and makes you not responsible for your life. Is that what you want?

73,

M.A.N.

You'd best read up on what a "bulletin" is, Todd.

You're broadcasting a show.

> >Todd...I gave you a "pass" on this the first time around because I

Then you're lying to SOMEone, Todd, because there's a ton of
messages with you bragging about your illegal stations. Including a
ton of messages signed off with your "pirate" station ID.

Some of those copied messages are on THEIR way to Washington.
Some are on their way to Springfield.

I wonder how much "support" you're going to get once some office
staffer starts to "research" those links...?!?!

> I applied for a LPFM license...(SNIP)

So you did. And the FCC wisely denied it.

> Secondly that's between me and the FCC...(SNIP)

Wrong.

ANY...repeat ANY application for licensure by the Federal
Communications Commission is a matter of public record. Whether it's
for a broadcast license, an Amateur license, GMRS, etc.

> and as I stated before
> they will NOT doing anything about, and finally You don't know what
the

They won't embarrass me, Hans. The POINT is that you drop YOUR
comments to my e-mail then block any reply. You accuse me of "control
issues" in this forum then manifest them in your own actions.

And if you care to do so, post them. I think that you will find
that not all of the "embarrassment" will fall on me, Sir!

Better go back and re-read some of those press releases...Almost
every one about GMRS.

UHF-CB, AKA GMRS, is the prefered method of operation for REACT
teams.

And if CB is all-that for emergency communications, why is the
federal goverment putting money into the ARRL and ARES and >>NOT<<
REACT...???

There are a great many of them. Quantity does absolutely no good
unless they are in the hands of trained operators.

b) most of them are mobile;

Can't argue that one.

> c) most of them are off the grid;

Waaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaay off the grid!

d) they are easy to use;

Obviously. IQ is not a dermining factor for turning one on.

e) there is a well-established organization in place to utilize the
band....

There is an organization. They do use the band. But they conduct
most of their operations on GMRS. They have even submitted a proposal
to the FCC to allow greater flexibility in then use of GMRS by
501(c)(3) organizations.

Note no mention of using 11 meters for emergency or "homeland
security" purposes.

> there are several more reasons. But what has been proven time and
time again
> is that when landlines fail in an emergency, CBers heed the call to
> duty just like every other citizen. After all, it's not called the
> Citizen's Band for nothing.

There are a great many Patriotic, well-intentioned persons who own a CB and would gladly lend it's use to any meaningful emergency purpose, no doubt.

However the Citizen's Band Radio Service (11 meters) is nothing more than a footnote in disaster communications planning and practice. The unpredictable propagation, lack of trained persons and the overall lawlessness and shennanigans that goes on the service make it all but useless for practical use.

But when the Federal, State or local governments or the Armed Forces need a RELIABLE method of anciliary communicaitons they turn to ARES, RACES or MARS for those needs.

>control-freak / dicktator steve says

>You'd best read up on what a "bulletin" is, Todd.
>You're broadcasting a show.

FROM THE FCC WEBSITE:

http://wireless.fcc.gov/services/amateur/about/communications.html

Q. What is an "information bulletin"?

A. The term is defined in Section 97.3. It is a message directed only to amateur operators and consists solely of subject matter of direct interest to the amateur service. The control operator of the station transmitting an information bulletin is responsible for determining that the subject matter is of direct interest to the amateur service.

Q. Does an amateur station transmitting information bulletins have to share the channel?

A. Yes. Section 97.101 provides that each station licensee and each control operator must cooperate in selecting transmitting channels and in making the most effective use of the amateur service frequencies. A specific transmitting channel is not assigned for the exclusive use of any amateur station. Section 97.101 also provides that no amateur operator shall cause interference to any radio communication or signal. There is no exemption for amateur stations transmitting for information bulletins.

Q. Is broadcasting prohibited?

A. Yes. Section 97.113 prohibits amateur stations from engaging in any form of broadcasting or in any activity related to program production or news gathering for broadcasting purposes.

Q. Is there an exception to this prohibition?

A. Yes, there is one exception: Communications directly related to the immediate safety of human life or the protection of property may be provided by amateur stations to broadcasters for dissemination to the public where no other means of communication is reasonably available before or at the time of the event.

Q. What is "broadcasting"?

A. Section 97.3 defines the term "broadcasting," in the context of the amateur service, as a transmission intended for reception by the general public, either direct or delayed.

Sorry but I think I know what the rules state!

There's nothing about you that's better than me, Todd.

Not one thing.

I dont say that arrogantly or egotistically...It's just not
possible for you to be better than too many people.

I figure you to be a nicer guy than say....John Wayne Gacy, or Ted
Bundy...But that's about the limit.

I maybe obscene and I
> maybe indecent but I don't go around threaten people's lives, or
even
> pretend to threaten people lives by claiming I sending shit to this
> group and sending stuff to that group just to screw someone over.

I've not threatened anyone's life, Todd. And as for "...sending
to this group and sending stuff to taht group just to screw
someone over", just what do you call your letters to Congressman
Shimkus?

What do you call all those threatening and profane slurs you've
thrown at the ARRL when they've not uttered one single iota of comment
on you, your shows or your opinions...?!?!

> that's what make me a hell of lot better then you ###hole!

Keep repeating that to yourslef over and over, Todd. It's not
true today, it wasn't true yesterday, and even if you spent every last
day of your life in a monastery begging forgiveness it wouldn't be true
tomorrow.

You're just not capable of it.

I'm not threating anyone with my letter to Shimkus, I mainly wait him to have the FCC clairfy the rules pertaining to information bulletins and resolve some of the problems surrounding information bulletins.

> What do you call all those threatening and profane slurs you've
>thrown at the ARRL when they've not uttered one single iota of comment

>on you, your shows or your opinions...?!?!

Well I'm not the only one that hates the ARRL with a passion. as far as I see they are the main problem surrounding the problems with information bulletins. the huge MAJORITY of people complaining about other Information Bulletins are ARRL members. Secondly when a person gets on a public fourm and ask why I'm on the FCC amateur Auxiliary list then It's time to take action. I have the right to my opinion as do you with yours if you don't want to listen to my comments then don't read them plain and simple.

You lying sack of excrement. You, David Heil, Brian Kelly and The Other Steve put out an APB and searched the web worldwide for one of my cards.

Since no one came forward with one, You declared that my operation never happened and that I was a liar.

You continue to say that to this day.

Now I want you to produce authentic evidence of your MARS activity on Okinawa, and of your claimed seven hostile actions.

> I just acknowledged the error when it was shown and moved on.

Again you're a lying sack of excrement. You complained that Hans had to dig 3 years deep to find your single "mistake."

You acknowledged your itsy bitsy mistake and TRIED to move on as quickly as you could, brushing aside all the mayhem that you caused along the way.

You make no apology for all of the accusations that your itsy bitsy little mistake enabled you to make, and still make to this day.

I saw a movie once, and the antagonist tells the young Toad, "Toad, I
am your father."

Steve said that he wanted to sit down and teach me a few things. I
asked if he was applying to be my new mentor. He looked so ridiculous.

Silly Gunny, when you open your mouth I hear a lie. It's become that simple. Maybe if you started telling truths...

>you ahd on your hands to try and redirect from your own newsgroup
>silliness.

"Ahd?" :-)

Tsk, tsk, I'm retired from regular hours, can set my
own hours. [sunnuvagun!]

"Silliness?" :-) Poor Stebie spends much time
on here attacking EVERYONE who doesn't agree with
him. Tsk, tsk, that is visible "silliness" to all
in here.

As to "redirect," you have it backwards as usual.
You must understand that your INSULTS against all
who disagree with you are NOT all your way and
that those who object to your personal attacks on
them and respond is NOT a "redirect" of anything
except your fantasy of being able to control this
newsgroup's content.

Example...you make NEW threads in here with the
sole purpose of insulting and/or attempting to
intimidate others...such as this "new" thread.

>> > You were a readio mechanic.
>>
>> "Readio?" Reallio?
>
> Typo. My Bad. You were still only a radio mechanic.

Tsk, tsk, tsk..."mechanics" were in the motor
pool doing maintenance on vehicles.

Poor Stebie, never having had the opportunity
of working REAL military communications thinks
that all non-amateur "operating" is done as if

in amateur radio. :-)

>> Tsk, tsk, tsk. Primary MOS of Microwave Radio Relay
>> Operation and Maintenance Supervisor.
>
> M A I N T E N A N C E.
>
> As in "mechanic".

W R O N G :-)

O P E R A T I O N and maintenance. That's what
the U.S. Army stated it to be and still does.
The definition for similar MOSs in the USN and
USAF say the same. Stebie, the military of today
and for the last half century have NOT done REAL
radio O P E R A T I O N in an amateur fashion of
one-operator-one-readio[sic]-pseQSL-UR599OM. :-)

Maybe the USMC did it that way? Must be if the
role model of today's murine says so... :-)

>> Secondary MOS
>> of Fixed Station (transmitters) Radio Operation and
>> Maintenance Supervisor...and a few other little duties

> Maintenance, maintenance, maintenance.
>
> R A D I O M E C H A N I C.

Tsk, tsk, tsk...little Stebie fists his pudgy
hands, pounds on the table, whines like a baby
while REWRITING the United States military radio
experience, definitions, and mission.

> Not one word of "OPERATOR" in there...Thanks for backing me up,
>Lennie.

Tsk. Stebie must have tears of anger in his eyes
clouding his vision. :-)

Sorry, nursie, but OPERATING >>IS<< the name of
the game in REAL, non-amateur radio operation for
REAL communications, military OR civilian. The
military and the civilian communications people
do OPERATING. Regardless of your trying to
control the definitions. They've done that for
over a half century, longer than you've been
alive (loosely speaking on 'alive').

OPERATION to REAL communications folks means
KEEPING THE OPERATION GOING. To me, to them,
it isn't taking recreational pleasure in front
of a ready-built ricebox "tuning the bands" and
diddling a morse key when not skimming pages of
QST and dreaming of pioneer days in radio long
before your time.

But, Stebie, not having been IN the REAL radio
communications activity, just doesn't know what
OPERATING means other than playing with his
readios [sic].

>> > Period. You were not a message
>> >center clerk...You were not responsible for determining operating
>> >frequencies, modes, etc.
>>
>> Tsk, tsk. The Chief Signal Officer, Washington DC,
>> did that sort of deciding for ALL involved in ACAN -

>> soup organization evolvement that followed after the
>> 1960s.
>
> You were not a message center clerk...You were not responsible
for
>determining operating frequencies, modes, etc.

I "was not a message center clerk?" Tsk, tsk.
You said I WAS, more than once. Have you
forgotten? [of course you have and you will be
demanding I produce the 'quote' from Google
archives, claiming you never said that! :-)]

Actually, for the one month spent in ADA Control,
I actually could determine which operating
frequencies to use...depending on the signal
reports generated by Receivers for the various
radio circuits...and the permission of the Duty
Officer, of course. There was a selection of
frequencies, all fixed and crystal controlled
back in the 1950s...no ALE then, no synthesizers
and no "VFOs" to diddle in Fixed Station
OPERATION. Signal strengths were HONEST, not
the gratuitous "599" used by too many hams...
too many others could see the same recorder
charts of carrier signal strength out at Camp
Owada (Receiver site shared with the USAF).

"Not responsible for modes..." OF COURSE NOT.
If the Chief Signal Office said that the San
Francisco radio circuit would have a 4-channel
SSB of 4 KW PEP -and- 4-TTY-via-MUX RTTY
circuit of 10 KW RF output, WE - the entire

station - WOULD OPERATE THAT and do it 24/7!
ON DEFINITE, ASSIGNED FREQUENCIES, ALLOWING
CHOICE ONLY BASED ON PROPAGATION CONDITIONS.

REAL communications providers don't "work the
bands" diddling with VFOs (and your alleged
"greatness in tuning ability" - haw - that
you "deserve to be called extra!"). In REAL
communications on 24/7 assignment, one IS
on frequency until ordered to change.

> Big snippage of usual stuff.

...because little Stebie REFUSES TO LEARN
HOW *REAL* COMMUNICATIONS PEOPLE DO THINGS.

Little Stebie, the Avenging Angle of Dearth,
wants only to INSULT, DEFAME, DENIGRATE all
those who disagree with him! Poor Stebie.

>> 1. This forum is NOT for Stebie's experiences with
>> the Commanding General of the First Marine Air
>> Wing in NINETINE EIGHTY ONE!!! [24 years ago]
>
> Nope. But It was one of SEVERAL assignments that placed me in a
>position to OPERATE radios...Something you've not done.

TSK, TSK, TSK. Stebie da wundermurine must give
his "definition" of "operating" readios [sic].

So far, Stebie hasn't shown a single REFERENCE to
ACTUALLY PROVE he did ANYTHING! He keeps getting
things W R O N G on "operating radio in the
military." Tsk, tsk, tsk. He keeps thinking that
all radios are "operated" by acting like radio
amateurs. United States military communications,
the REAL thing, not the MARS recreational/morale
stuff, is done in a PROFESSIONAL manner.

>> 2. This forum is NOT for Stebie's BRAGS of mighty
>> murine service in 'SEVEN HOSTILE ACTIONS!'
>
> "murine"...What's "murine", other than a commercial eye care
>product.

Tsk, tsk, tsk...you don't get it, do you? :-)

Robeson is EYEWASH. Sterile solution, "medically
approved" only in that it doesn't harm the eyes.

BWWAAAAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
HAHAHAHAHAHAHAHHAHAHAHA!!!!!!!!!!!!!!!!!!!!!!!!

TEMPER FRY little man.

>> 3. This forum is NOT for Stebie's BRAGS of prowess
>> in SUTURING or about his "medical qualifications."
>
> Wasn't bragging, Lennie.

HOW DO WE KNOW? WHY SHOULD WE CARE?

:-)

Does suture tying have ANYTHING to do with RADIO
OPERATING?!? :-)

Keeping a bedpan handy might be good for all the
"radiosport" contesters who like to rack up points.
[nurses have to handle bedpans...before and after]
Note: Few wastebaskets are waterproof and keeping
one under the desk for those contest days can only
harm the flooring.

>> 4. This forum is NOT for Stebie's continuing
>> refusal to admit that MARS is >>NOT<< "run by
>> amateurs." MARS is run by the MILITARY.
>
> However this >>IS<promulgate a lie by trying to perpetuate that
lie, Lennie.

The Avenging Angle of Dearth keeps up his
psychological syndrome of Projection...trying to
project his own acts on those of his "opponents."

Poor guy needs some mental therapy.

Let's take "operator" again. Stebie said "I never
'operated'" a radio. That is at odds with both the
old and new definitions of the USA Signal Corps,
J-6 of the JCS, lots and lots of definitions in
lots of USN publications, the civilian world in
MANY places such as dictionaries (try the huge
IEEE one, all concerned with ALL electronics...
which includes radio). Stebie keeps trying to
REWRITE everything in his OWN image...or fantasy.

I have - most definitely - OPERATED military
radios IN the military as both serviceperson AND
as a civilian. OPERATED - by anyone's REAL
definition - but not in Stebieworld. What's
really bad is that I have both text and photos
of me doing just that, some available on the
Internet for anyone to see. Does Stebie have
that? No? Tsk, tsk. We can all access QRZ and
see a middle-aged male (?) in a flight suit
sitting somewhere at some time. Is he OPERATING
A RADIO? No. He just sitting there, scowling
at the camera. Tsk, tsk. [get those teeth

fixed so you can show a proper smile sometime]

Stebie's "proof" of his military prowess is "in
his wallet" or, in other words, out of sight,
out of hearing. He say we got no business to
see all that, he "doesn't have to show it."
Tsk. Stebie doesn't have to be BELIEVED, either.

Hans Brakob has DEFINITELY been IN the military,
has OPERATED RADIO! He KNOWS what military
radio operation IS. Hans says all the words
which ARE FAMILIAR to the rest of us who HAVE
OPERATED military radio. Stebie don't talk
like dat, he mumble insults an' say everybody
else LIE! Tsk, tsk, tsk.

> I never said that MARS was not run by the military, Lennie.

Tsk. You will NOT say that the military DOES
RUN MARS! :-) Department of Defense DOES
DIRECT MARS. You've been shown the link to the
very definition of that DIRECTIVE, visible to
anyone accessing the DoD. You've been shown
the link to OFFICIAL MARS HISTORY from the U.S.
Army that ORIGINATED MARS. You've been shown
the link to access the Army's MARS Headquarters
at Fort Huachuca. Have you checked those
references? No? You still want to flame others
for not agreeing with your - now classic -
"Sorry, Hans, MARS >>IS<< amateur radio!" :-)

> Failure to validate that assertion is yet another LennieLie.

Merde! The Avenging Angle of Dearth keeps up his
silly PROJECTION syndrome!

> I HAVE said, and correctly so, that No Amateur Radio = No MARS.

Tsk, tsk, tsk. Nursie got a bedpan over his
eyes. MARS exists because the DoD has DIRECTED
its existance. MARS has, and continues to run,
exercises WITHOUT amateur volunteers. Try
reading the MARS headquarters' statements instead
of getting all your 'readio' information from
ham magazines.

> Sunnuvagun! Participation in the MARS program is predicated upon
>having an AMATEUR RADIO LICENSE...Remember...The one YOU said you
>didn't need to have to be a MARS participant.

Tsk, tsk, tsk. You are attempting "logical
wordplay" again and FAIL. :-)

MARS operators (in everyone else's definition of
operator, not Stebie's) IN the military have to
OPERATE their radios according to the commands
they are given to do so. :-)

Hello? The "M" in MARS is "MILITARY." Are you
getting the connection? Yet?

>> BULL####. Don't you PCTAs give that song and dance.
>> You PCTAs can't dance and your singing voices are as
>> flat as the 1930's attempted revival of vaudeville.
>
> Ahhhhhhhhhh....More profanity to fill in the holes...

So...how many times has Stebie used the word PUTZ?

Calling someone a PENIS HEAD (translation of the
colloquial Yiddish pejorative "putz") is >>NOT<<
profanity?!?!? Ah, yes, in Stebieworld, such is
profanity only IF it is directed TO Stebie...Stebie
can say ANYTHING he wants. :-) And does! :-)

How about "pathological liar?" How many times has
Stebie used such "civil" (in Stebieland) discourse?
We - us readers - have lost count.

Tsk, tsk, Stebie do his PROJECTION syndrome again
and again, refusing to admit to wrongness and
blaming everyone else for HIS faults.

Tsk, tsk, a "marine" with "seven hostile actions"
becoming disturbed about profanity?!?!?

:-)

>> TSK, TSK, TSK. I'm a PROFESSIONAL in radio, have been
>> since 1953.
>
> You are still not licensed in nor ahve any practical experience
>in AMATEUR RADIO communications.

Which means WHAT, little man?

AMATEUR RADIO is NOT a business, NOT a guild, NOT a
union, NOT a military service, NOT a civilian
service. It is a recreational hobby pursuit, done
for personal pleasure. Voluntary.

AMATEUR RADIO works by the SAME physical laws as
every other radio. [regardless of what some extras
think it does]

AMATEUR RADIO in the United States is regulated by
the same federal agency as EVERY OTHER CIVIL RADIO
SERVICE in the United States. No exceptions.

Since the U.S. federal government regulates it, that
allows ANY CITIZEN to exercise their CONSTITUTIONAL
RIGHTS to communicate with their government on ANY
regulatory matter. [sunnuvagun!]

So, little man, regardless of whether I "ahve" [sic]
an AMATEUR radio license or not (I have a commercial
radio license), it only matters to CONTROL FREAKS
like yourself who can't seem to cow others into
acknowledging their self-defined (unauthorized)
"leadership" over others! :-)

BTW, this is NOT a moderated newsgroup. Try under-
standing (I know that is so hard for you) that YOU
do NOT control the content nor anyone else's
personal OPINION...of anything. You do NOT control
who has access here nor are you "judge" of anything
anywhere but in your own fevered little mind.

> But the fact remains that you continue to make errors, almost on
a
>weekly basis, about Amateur Radio practice and policy.

NO, sweetie, the "fact" does NOT "remain."

You are W R O N G.

Understand that Stebie's personal OPINION of
anything is NOT law. It is seldom reality.

The Avenging Angle of Dearth and "veteran of
seven hostile actions" does not appear to live
in reality. It may be too harsh for him...
unknown...none of us can appreciate his
psychosis?

Yes, I DISAGREE on many of the things that
the PCTA Double Standard extras think are
"correct" and "right" and "how things should
be." But, that disagreement does NOT mean that
such is "wrong." That disagreement would ONLY
be WRONG to the control freaks who demand
obediance to the control freaks' commands.

> Stebie, cut the bull####. I began in HF radio
> before you were born. I've both OPERATED and
> DESIGNED and BUILT (protoype) radios over MORE of
> the EM spectrum than amateurs have been allowed
> to in the 71 year life of the FCC.

But the fact remains that you continue to make errors, almost on a
weekly basis, about Amateur Radio practice and policy.

NO, sweetie, the "fact" does NOT "remain."

You are W R O N G.

Understand that Stebie's personal OPINION of
anything is NOT law. It is seldom reality.

The Avenging Angle of Dearth and "veteran of
seven hostile actions" does not appear to live
in reality. It may be too harsh for him...
unknown...none of us can appreciate his
psychosis?

Yes, I DISAGREE on many of the things that
the PCTA Double Standard extras think are
"correct" and "right" and "how things should
be." But, such disagreement does NOT mean
that it is "wrong." :-)

What IS wrong is trying to make everyone
conform to your particular view of things.

>> 1. I didn't "start" anything but an opposition to
>> the morse code test for an AMATEUR radio license.
>
> You are a liar.

No. :-) Ask Jim Kehler, KH2D. He was in here then.
You were NOT.

> You started in on the "Nazi", thugs", etc etc etc. Deja'd,
>Googled, filed for posterity.

Noooooo. :-) Only when some ex-Gomer Pyle
jumped in, waving his swagger stick (or was
that swaggering his waving stick?), and
making like a ham version of Chesty Puller.

That's ALL in Google...and saved to put up
your posterior, er, posterity...

Let's see...if someone struts like a Nazi,
shouts like a Nazi, looks like a Nazi, then
might very well BE a Nazi! [sunnuvagun!]

But in Stebie (da Avenging Angle of Dearth)
messaging, he be little more than Hitler
Youth after too many "hostile actions." :-)

>> 3. I began and was QUALIFED to operate high-power HF
>> transmitters in 1953...(SNIP)
>
> You were qualified to MAINTAIN those radios. You were not a
>qualified operator.

Tsk, tsk, tsk. Stebie da wundermurine is now
calling the UNITED STATES MILIARY A LIAR.

Official orders said what I wrote in here.
Orders of the Signal Corps, United States
Army. Official pictures taken by an official
Signal photographer state that I was
OPERATING a big radio transmitter...all in
the official officialese of mimeo on the
photo back, along with ID of the USA.

"Qualified." Who is to judge of things in
1953 to 1956? Stebie da wundermurine? Noooo.
That was before/during/just-after Stebie
was born (probably with a congenital scowl).
Stebie born with "qualifications" to judge
who is "qualified?" :-)

Maybe Stebie wanna call the FCC a LIAR!?!
Got First 'Phone in Chicago office of FCC
in 1956. FCC say I was "qualified," but,
more importantly, gave me AUTHORIZATION!
[sunnuvagun!]

> I am not interviewing with you for a job.

Tsk. You aren't QUALIFIED to hold a Human
Resources job. Personnel folks have to be
human first...

> I wouldn't work for a habitual liar like you, Lennie...

Sweat not, little man. I wouldn't even
process the paperwork sent up by Personnel
for your interview. I'd stick a little
Post-It note on there and define you as
"fullashit" for applying as a Purchasing
Agent.

>> I've held my jobs, never been fired or "told to leave."
>
> No doubt. But you've not been asked back to at least one.

WRONG. Worked for Hughes Aircraft Company
twice...Missle Division in Canoga Park, CA,
the second time, first time at El Segundo
Division.

> Probably more.

Oh, and in case you are going to try that old
"NADC thing" again, let me remind you of the
REAL facts: I was there as a field representative
FOR RCA Corporation on their SECANT R&D contract
for system flight tests. Allatime getting paid
by RCA, not the USN, and remaining with RCA

afterwards. Never, ever "tried to get a job
there" as you kept saying for years LONG after
the fact. :-)

> "Their kind", Lennie...?!?!
>
> I've put far more NCT's into licenses than I have Extras.

Show the proof. :-)

Are their names logged in with your famous
"seven hostile actions?" :-) Was one of them
the Commanding General of the First Marine Air
Wing in 1981? :-) Maybe their names are in your
box of medals? :-)

> I DO know that pleanty of new hams are licensed every day...with
>AND without Morse Code skills. I know...I help a lot of them get
here.

Again, SHOW YOUR PROOF of your "help."

Tsk, tsk, if you "help" like you carry on
in here, you would NOT be authorized to be in
any ham radio recruiting office...you'd have
your portrait on the Post Office walls...as
one of the "most wanted."

> How many kids have YOU helped into an electronics career or
>Amateur Radio, Lennie...?!?!

I don't know about "kids," Stebie, but anyone who
asked me about electronics as a hobby or about
electronics as a PROFESSION would get a courteous
explanation, information sources, and pointers on
where to get more information. I am in both and
have been for a long time...a hobbyist since '47
and a professional since '52.

Radio is only a part of the entire, huge field of
technology called electronics. I am a member of
the Institute for Electrical and Electronics
Engineering (IEEE) which is a worldwide professional
association and has about a quarter million members
(I could get the exact number but some flamers
want to quibble about minutae). I find the whole
huge field of electronics and electricity fascinating
and never regretted getting into it. It has been
rewarding to me both personally and financially.

Like any association, the IEEE has its own self-
promotion agenda and programs. I don't always
agree on those agenda, perferring to promote

interest at my own level with others in my group of professional acquaintences. That isn't restricted to "kids" or schoolchildren, either as a hobby or as a profession. Some in here like to say "the right" way to get into either is THEIR way. Not so. The only "right" way is to show an interest and become educated in what it is about. There are NO "requirements" to "show dedication or committment" in a HOBBY...that's an artificiality imposed by certain membership groups...largely to wave their own self-patriotic flags.

I've never kept a "body count" on "recruitment." Neither have I attempted to brainwash any kiddies (teen agers, actually) at a couple of magnet schools. Straight talk, no group-self-patriotic bullshit. One MUST have the personality and sense of speaking-and-being-understood in such efforts. Without it the audience, whether teens or adults, will listen if one can present a point about the subject. I have experience in that and some good, praised qualities for that but it's not my favorite thing to do now. Heh, I used to teach others how to do presentations...including having a "hostile" audience. Not hecklers, those that didn't want to learn anything. The best one can hope for there is that they got some information and - maybe - changed their minds. It doesn't hurt to know a few actors in the acting profession (I do) who can give pointers. :-)

Now, give the rest of us Stebie's definition of OPERATING...and keep saying that everyone who doesn't agree with Stebie is a "LIAR." Nobody should expect otherwise... :-)

Steve is such a sorry sack of excrement. If he didn't have people on RRAP to argue with, he would have no reason for living.

Len, I'm enjoying a nice Vidal (fr. hybrid) that I picked on Veteran's Day 2003. Would you like me to send you a bottle? It's just slightly off dry. Drop me an e-mail at "myname@juno.com"

Ha! I just thought of something funny. An Ohio grown grape wine being sent to California. Welp, our ice wines are getting some notice anyway.

Caught you lying enough that my instincts are pretty good.

So you're crying "Woe is me" over the Brits loosing a band that you've never made a single amateur transmission on??? Has W4 land and G-land even made a 2M QSO yet?

Hi! You are as ridiculous as God has ever made a person.

Why don't we hold a raffle and at a buck a ticket, find some Central State's VHFfer, preferably a lowly Technician, who will -allow you- to use his 24GHz gear so you can be that Superior Extra that you've claimed to be for years. You just might be able to earn a Civil Air Patrol medal for you singularly in-distinctive accomplishment. Hi!

You lying sack of excrement.

Stebie KNOWS things, Brian. He has the "facts"
locked up in his head (besides in his wallet).

Remember the Double Standard in here:

1. Everyone "owes" Stebie.

2. Stebie don't owe NUTHIN' to NOBODY!

Simple as that, shitty though that be.

>Now I want you to produce authentic evidence of your MARS activity on
>Okinawa, and of your claimed seven hostile actions.

Tsk. He will NOT.

Stebie wants everyone to "verify" his "Okinawa
MARS" thing with the "CG of 1st MAF, 1981."
Tsk. It is unlikely that the First Marine Air
Wing will still BE on Okinawa 24 years later,
let alone have the "same" Commanding General!"

Humphhh...on "seven hostile actions," I can't
see AIRCRAFT GROUND CREW AND SUPPORT being
anything other than REAR-AREA operations!
Wow! Some "hostile actions" with implied

combat and hand-to-hand fighting over ground
at the airfield! Stebie need a whole new
box to hold all his "medals" for "combat."

All we can expect is weeks of waffling and
misdirection by him to AVOID revelation of
truth.

This is all a bad re-make of "X Files"
fantasy on TV! ["The Truth ISN'T Out There"]

>> I just acknowledged the error when it was shown and moved on.
>
>Again you're a lying sack of excrement. You complained that Hans had
>to dig 3 years deep to find your single "mistake."

Standard Local Operating Procedure in Stebieland.

The acronym works out to be SLOP. :-)

>You acknowledged your itsy bitsy mistake and TRIED to move on as
>quickly as you could, brushing aside all the mayhem that you caused
>along the way.

Stebie NEBBER do wrong! Everybody else do wrong!

>You make no apology for all of the accusations that your itsy bitsy
>little mistake enabled you to make, and still make to this day.

Again, a given. Trouble is, Stebie just won't
admit he "exaggerated" a "little" on his claims.
In his view of things (apparent, judging from
thousands of postings) is that he ALWAYS TELLS
THE TRUTH...and anyone disagreeing with Stebie's
statements is a "LIAR."

Circular logic. Wonderful stuff and universally
used by psycho sociopaths. No one can effectively
"discuss" anything with one of those...the world
evolves around the sociopath and the world is (to
them) "always wrong."

"Temper Fry" I say to them. :-)

>> You have addressed several e-mails to me over the past few
weeks,
>> and I have responded, relatively civily I believe, to each one.
>
>You opinions on civility are not valid.

That's a given in here...QED. :-)

Once a few years ago, my wife was up in Washington state
and we were "talking" using Instant Messaging on AOL.

Steve popped in on the IM session (I had neglected to
reset the privacy controls after upgrading the AOL
software). He wanted to "chat."

He got one very short answer that I was busy.

My wife was trying to IM me about our niece then in
the hospital. Steve couldn't see that part of the
conversation, only that I was on-line at AOL. He
became increasingly insistent on having a "chat" via
IM. I ignored him since I was more concerned about
niece's condition than wanting to "chat" with Stebie.

Stebie got increasingly abusive in his wording to
me via IM. Finally, he made some remarks about my
"being too stuck-up to talk to him." That caused me
to tell my wife what was going on, paused to check
the privacy controls on IM, reset them, and continued
talking to my wife.

Stebie got ALL angry and abusive in public messages
after that...actually more so than usual.

Niece Laurel survived that operation for Crohn's
disease and continues life reasonably well. Stebie
keeps on with his abuse and accusations...he needs
SOME kind of operation... <shrug>

>> Yesterday you sent one making some nasty allegations, yet when
I
>> responded, I got your message from Earthlink telling me I am not on

>> your happy list.
>
>Whaaaaaaaaaaaaa!

Poor widdle Stebie.

Gosh, I should have saved Stebie's AOL Home Page
special that he manufactured, entitled "Never Trust
Lennie" or words to that effect. Poor guy went
bananas in a vicious fit of LIBEL. I had AOL
check it out and they tossed it.

Tsk. It would have been a cakewalk to win a civil
suit against Stebie just on that AOL Home Page.
Stebie "advertised" it in the newsgroup. Oh, he
wailed and wailed about "freedoms" and stuff...
"freedom" so HE could insult anyone he wanted
WITHOUT any censorship. :-)

Too bad I tossed it into the electron recycling
bin. Was a better "classic" than Stebie's pipe
dreaming over "being back in action and doing a
HALO drop!" [High-Altitude, Low-Opening, a
technique apparently used by SEALs]

>> So...It's OK for you to drop letters in my e-mail, yet NOT ok
to
>> respond to you in the same forum...?!?!
>
>Don't send ANYTHING to my email address. Ever!

AOL has nice privacy controls and I'm sure other
browser softwares have them.

>> Sheeesh! You have the cajones to lambaste >>ME<< about
"control
>> freak" issues, Hans...?!?!
>
>I couldn't think of a more likely candidate.

Nor I...and that covers a LOT of individuals in
here! :-)

>> I have no problem with you sending mail to me, even when it
makes
>> unfounded allegations. However you owe me the courtesy of allowing
me
>> to respond in the same forum.
>
>Or what?

Here's the way Stebie thinks the rules go down:

1. Everyone owes Stebie all kinds of courtesy.

2. Stebie don't own NUTHIN to anyone on courtesy.

It's as simple as that...demonstrated time and
time again.

>> Take notice...Any future e-mail sent to me marked "PRIVATE
>> MESSAGE" that gets a "bounced message" notice when I respond will
find
>> it's entire contents posted to RRAP for reply.
>
>Like Todd's problems with his ISP? You posted something from his ISP
>without you having been an adressee on it.

Stebie NEVER does anything wrong...he KNOWS things!

:-)

>> And keep your "control freak" allegations to yourself,
Hans...You
>> have more than ample number of examples of your own "control freak"
>> issues of your own, this being one of them.
>>
>>
>> Steve, K4YZ
>
>Control yourself. Get freaky about it.

Ho ho! Highly unlikely, Brian. Stebie has a "rep"
to uphold...he wants to be CONSISTENT with his
abuse and accusations and general nastiness to all
who don't agree with him!

He has the "right" to do that, all guaranteed in
the CONSTITUTION OF STEVIELAND...the one on display
inside his head.

Okay...so maybe Stebie DOESN'T need shrink rapping?
Maybe he needs a SKIN SPECIALIST. Yeah, that's it,
he got such a thin skin that almost EVERYTHING
"rubs him the wrong way!" Poor guy, soooooo
sensitive to negativisms of his opinions and
actions. Boo hoo. :-)

Thank you much but the small "wine cellar" here is full.
We don't do a lot of sipping here so much of what is there
is for dessert purposes. If you had a muscato amabile
(amiable muscat), that's something I'd never turn down!

>Ha! I just thought of something funny. An Ohio grown grape wine
being
>sent to California. Welp, our ice wines are getting some notice
anyway.

Hmmm...Ohio now competing with Missouri? :-)

When my wife and I drove back to the midwest in 2000,
we noticed lots and lots of little wineries in Missouri
(of all places). In 2001 on a similar trip we bought
lots of wines in Amana, Iowa...the flavored kind, all
very tasty. Made nice gifts..."imported from Amana."

In 1975 there was a private family reunion (just two Swedish-ancestry families) where the oldest gal cooked a fancy Greek dinner. Her husband is a scholar on Grecian things and they and sons lived in Paris at the time. She had brought some French wine for the dinner. After dinner I suggested she ought to get California wine in Paris...because "everyone knows that imported wines are best!" Chuckles all around on that.

Watch Stebie's reaction on that little story. :-)

Note that he will come unglued again and make an ISSUE of it. What we don't know is the exact details of his reply...but - as past is sometimes prologue - he WILL rant and rave, fuss and fume! QED. :-)

We all know that the 146MHz Band with no repeater needed goes father for the same amount of power, and audio is much better compared to CB . Also the talkies on this band has a good range for its antenna size, where as the CB talkies are useless. The FRS or any 460MHz equipment sucks for any range, some say good for 6 miles, yeh right, maybe in a line of site arrangement, in most cases .5 to one mile Max.

That's what a cber operating illegally with a 2 meter rig thought one
time in Dallas, he got quite a supprised when he was pulled over on LBJ
freeway by a Federal Marshal and FCC agents. Even being mobile won't
keep you from being caught if the FCC really decides to catch you.

Jeez,

CBers vs. Hams

What's the point in debating which is better?

Both have positives and negatives.

CB - Positives: No license required, can remain anonymous, because of the national fraternity of truck drivers, it works better than a radar detector, you *can* find friendly people, you can buy a new transceiver for a dollar a channel. Negatives: limited range, can remain anonymous, you can always find a troublemaker, can't rely on it in an emergency, can't get away from a high noise floor.

Ham - Positives: can't remain anonymous which prevents a lot of riff-raft, frequencies all over the spectrum so you can plan for the distance you're looking for, as much power as you need (legally), can be reliable in emergencies if you know the right repeater frequencies, PL tones and access numbers or if you know some folks personally in the area who always monitor. Negatives: You can find malicious interferes on the ham bands also (more so now-a-days than a few years ago), no longer a fraternity of techies (which is the original reason I became a ham.) It would be hard for me to determine sometimes if I was listening to voices on 75 meters or 11 meters these days if I didn't look at the dial.

I do both. On the highways, I'm on channel 19 except in the big cities. Once you get in the big cities, the troublemakers make it impossible to use for more than a couple hundred yards. Then I slow down and switch to scanning 2 meters. I rely on my cell phone for emergencies these days--it's hard to find a place it doesn't work.

At home, I still like to work CW on HF. It still amazes me what you can do with a watt and a half on 20 or 15 meters. Sometimes I listen to channel 19 to hear what's going on and if someone asks for help, I give it to them. They are always gratefull.

When I first became a ham back in 1975, all my ham friends were experimenters. I can't describe the feeling I had the first contact I made with my homemade 6L6 CW transmitter and a kit Eico receiver. Hams like that don't exist anymore. The only thing to play around with now-a-days is antennas. And there's only so many antennas to play around with. Some work better than others depending on what you're trying to do.

I don't understand all these hard-line statements being made in this thread. If you like it, do it. If it pisses you off, don't do it. At least go get

a ham license, that way you have a choice. It doesn't take much to get a ham license these days. And if passing that simple little test is too hard for you, there are enough corrupt VECs out there handing ham licenses out.

They both make good back-ups to the cell phone if your cell phone has no signal.

I'll choose to remain anonymous here.

Guy

| numbers or if you know some folks personally in the area who always
| monitor. Negatives: You can find malicious interferes on the ham bands
| also (more so now-a-days than a few years ago), no longer a fraternity of
| techies (which is the original reason I became a ham.) It would be hard
| for me to determine sometimes if I was listening to voices on 75 meters or
| 11 meters these days if I didn't look at the dial.
|
| I do both. On the highways, I'm on channel 19 except in the big cities.

| Once you get in the big cities, the troublemakers make it impossible to
use
| for more than a couple hundred yards. Then I slow down and switch to
| scanning 2 meters. I rely on my cell phone for emergencies these
| days--it's hard to find a place it doesn't work.
|
| At home, I still like to work CW on HF. It still amazes me what you can
do
| with a watt and a half on 20 or 15 meters. Sometimes I listen to channel
| 19 to hear what's going on and if someone asks for help, I give it to
them.
| They are always gratefull.
|
| When I first became a ham back in 1975, all my ham friends were
| experimenters. I can't describe the feeling I had the first contact I
made
| with my homemade 6L6 CW transmitter and a kit Eico receiver. Hams like
| that don't exist anymore. The only thing to play around with now-a-days
is
| antennas. And there's only so many antennas to play around with. Some
| work better than others depending on what you're trying to do.
|
| I don't understand all these hard-line statements being made in this
thread.
| If you like it, do it. If it pisses you off, don't do it. At least go
get
| a ham license, that way you have a choice. It doesn't take much to get a
| ham license these days. And if passing that simple little test is too
hard
| for you, there are enough corrupt VECs out there handing ham licenses out.
|
| They both make good back-ups to the cell phone if your cell phone has no
| signal.
|
| I'll choose to remain anonymous here.

On 11 meters, with my 100 ft tower with a two element beam, I reach 50-75 air miles consistantly(at night when the chan is quiet)... but, I am on a valley floor... and that is 4.5 watts output... and you know I have NEVER ran more power than that!!!! (But, if I did, it would be a good sized chunk of this state, well, the valley walls would be a limit) And, of course, skip would be worldwide during the day...

On 10 meters, it is not that good (same tower, same ant), mainly because the hams don't have as good as antennas as the CB'ers (height wise.) And, there are just not as many hams here to chat with on 10 meters...

Regards,
John

"John" <JF@comcast.net> wrote in message
news:sq2dnRmLqOD8TuvfRVn-tQ@comcast.com...
| We all know that the 146MHz Band with no repeater needed goes father for
the
| same amount of power, and audio is much better compared to CB . Also the
| talkies on this band has a good range for its antenna size, where as the
CB
| talkies are useless. The FRS or any 460MHz equipment sucks for any range,
| some say good for 6 miles, yeh right, maybe in a line of site arrangement,
| in most cases .5 to one mile Max.

>(from 3.5 to 30 MHz).

For point-to-point communications, HF is not nearly as reliable as
sat-comm or MF/LF/VLF. Hams have satellites, 160m -and- HF, which is
all well and fine. But the issue is that the bulk of radio comm is
needed -within- the disaster area. Outside lines are pretty well
covered because almost all of the emergency long-distance comm these
days is done with portable sat-phones that are already in the hands of
emergency organizations and government agencies. IOW, long distance
emergency communication works just fine without hams. Although in my
own experiences, hams -did- provide some public service by helping
people contact distant family members, but that's about it.

Slightly OT, I should also mention that some of the HF ham traffic I
heard during Mt. St. Helens and hurricane Gloria was absolutely
disgraceful -- some sick bastards think it's cool to get a QSL card
from a disaster zone. If hams want to criticize CBers for poor
behavior they should at least hold themselves to a higher standard.

>Meanwhile, go do that search on "wind loading", keeping in mind about the
>small trees surviving winds that blow over large trees.

The same applies to antennas.

Yet they still come in mighty handy during a disaster. Feel free to
try and rationalize that paradox.

> But when the Federal, State or local governments or the Armed
>Forces need a RELIABLE method of anciliary communicaitons they turn to
>ARES, RACES or MARS for those needs.

Not even close. Both FEMA and the military have their own, 100%
self-contained communications networks complete with dedicated
satellites; and the military has more backup systems than you can
imagine. Most state and local governments have some sort of emergency
management agency or plan that evolved out of the old civil defense
networks initiated during the cold war. Usually it consists of the
LERN network, the Emergency Alert System, "hardened" land lines, and
the wide availability of satellite communications.

The fact is that long-distance radio communication has evolved well
beyond the need to rely on hams during emergencies. You should have
seen that coming when Sputnik was launched.

There is an increasing level of packet & spread spectrum
activity by CB stations in the traditional freeband ranges, which
indicates the ever growing ability of cb to provide reliable
worldwide comms and experiment with nontraditional modes.
There are at least three international cb packet nets. Amazing
what one observes, if you point your receiver outside the ham
bands.

Even when I tuned around between 27.5 and 28 during the last peak (we're in the trough of the 11 sunspot cycle right now), I don't understand why those people don't just break down and get a ham license.

It's hard to exchange QSL cards when you're trying to remain anonymous.

Is it the excitement of doing something illegal and not getting caught? Is that the adreniline rush? Is that why they do it?

your antenna is a toy compared to most ham antennas. if you have
trouble chatting with somone on 10 meters, maybe you should learn to
speak english. most freebanders are quite illiterate.

Other interesting findings made by The National Communications System
(NCS), a governmental entity made up from 22 different Federal
agenciesengineers were that portable generators, such as Honda types,
were not likely to be adversely effected by EMP at all. Neither were
hand-held walkie-talkie type portable radios, particularly those with
short stubby "rubber duck" antennas.

looks like hams with HT's is the best thing to have during an EMP
blast.

169. Putting ARRL back "mainstream" with hometown hams

Newsgroup: rec.radio.amateur.policy
Date: 2005-05-03 14:21:48 UTC
From: K&#65533;HB <groupk0hb@earthlink.net>
Message-ID: <0OLde.5010$GQ5.2830@newsread1.news.pas.earthlink.net>
Source record: 107449

The growth in numbers of Amateurs over the past decade has been overwhelmingly via the Technician license. This segment of the Amateur population does not seem highly attracted to ARRL membership, nor affiliative with the "national association" nature of ARRL.

Interestingly, however, these new Amateurs are "local joiners". They attach some importance to public service communications events such as disaster drills, SkyWarn, flood relief, marathons, parade communications, and similar functions of a local nature. Interestingly, even though their on-the-air participation is limited, they represent a significant portion of the crew at Field Day, hamfest staffs, and similar "local" events. They are also well represented on the rosters of many local clubs.

Following is a PBI (Partially Baked Idea) to favorably position ARRL (and Amateur Radio in general) with these newcomers to our hobby.

I propose that the ARRL BoD consider an initiative to attract these newcomers to an interest in ARRL by establishment of a new "Department of Community Support".

The mission of this department of ARRL would be to organize, train, support, and nurture a system of tactical communications teams on the LOCAL level. I use the term "tactical" as opposed to "emergency" intentionally to broaden the scope of the mission to include a wide variety of community-level communications needs.

This "department" would be outside the current Field Organization, and given VISIBLE and COMMITTED volunteer leadership at Director or Vice President rank.

Did I hear someone muttering "Isn't that what ARES is all about?" or "Our current field organization already provides for this." Good points -- ARRL already has some of the pieces in place, and it looks good on paper. Unfortunately these "pieces" tend to be scattered around the ARRL organization and are not linked into a cohesive program. Support and leadership responsibility, from Newington all the way down to the local level, is often a collateral duty and the attention level is spotty and often diluted by competing responsibilities and personal interests. Leadership attention at the SM level is widely variable, and SM's have a diminished mindshare of the general membership by the unfortunate H.Q. decision to remove "Section News" from the national journal of our Association. Without dwelling overlong on the shortcomings of the current situation, I think we can all agree on four points:

1) A focused national program with Director (or higher) level leadership would have more impact than the current fragmented attention to "local" Amateur Radio.

2) Such a program, if successful, would give Amateur Radio valuable credibility in the regulatory and legislative arenas, and with national organizations like Homeland Security, FEMA, and the Red Cross.

3) Such a program, if successful, would serve to elevate the perceived value of Amateur Radio with local civil authorities, perhaps softening the effects of issues like tower ordinances, etc.

4) Such a program, strongly identified with the League, would provide a membership "attractor" to those classes of Amateurs that are now only locally "affiliative". Gaining some traction into this huge reservoir of potential members would be a godsend to the health and growth of ARRL.

What would need to be done to implement such a plan. Here are some "off the top of my head" thoughts.

-- Define the mission and organizational structure.

-- Many of the people (SEC/EC's, etc) are already in place. The organization structure would need to include a short chain-of-command headed by a focused leader at Newington.

-- Move Field Day and SET into this organization as "their" events.

-- Devise a recognition vehicle to give visibility to noteworthy work by individuals and teams in this Department. This visibility (QST?) should extend outside the organization to the "general population" of hams as a recruiting tool.

-- Establish a new periodical (like NCJ for contesters and QEX for experimenters) to help build a "sense of community" among the participants.

-- Educate local civil authorities about this organization, their capabilities, and how to best interface with them to take advantage of their capabilities.

In order to build some critical mass and gain traction, the outreach effort to build these teams should not initially stress ARRL membership for "grassroots" level players, but rather depend on a strong ARRL identity to build esprit de corps and lead to an attitude of support and affiliation with the parent organization. Perhaps appointment to team leadership positions would be conditioned on ARRL membership.

Obviously a lot of this proposal needs a great deal of "fleshing out" and refinement, but I present it in the spirit of a "topic for discussion". I'm sure that the minds gathered here will not be bashful about improving my PBI.

The federal government, NORAD and Homeland Security, have ham radio in
their planning for emergency comms, CB isn't even a consideration.

Besides he needs to read it again, he is using a beam, that is worthless for local emergency communications, the point is that in a local disaster use the two meter band works out allllllooottt better than CB.

What a myth! Amazing how the untrained "think" they can't be caught simply
because they are mobile. There's
quite a few truckers that thought that when they got caught for playing
around on 10 Meters. :)

It sure doesn't fit in the emergency plans of NORAD and Homeland
Security. I would be curious as to just which national emergency plans
(US Government) include any cb spread spectrum.

No argument there. Many of the people I can count on to help with this
sort of thing are the Tech's.

Perhaps if the new hams believed that there was relevancy, they might
join, eh?

>
> -- Establish a new periodical (like NCJ for contesters and QEX for
> experimenters) to help build a "sense of community" among the participants.

I have mixed thoughts on this. Perhaps if the other efforts appear to
be working, it would be a good thing. It might be an expensive thing if
the effort were to fall flat.

>
> -- Educate local civil authorities about this organization, their capabilities,
> and how to best interface with them to take advantage of their capabilities.

Absolutely. Some effort should be extended toward event coverage also.
I think that there are a lot of groups that do not know about Hams even
offering this sort of coverage. And their other options don't work very
well. But these groups would probably enjoy the tie-in with the civil
work too.

I do think this is a good idea, and as PBI's go, it is pretty good. I
believe that at some point in the process, advancement should be gently
suggested. I think esprit de corps hinges upon that also.

- Mike KB3EIA -

And tks for something to talk about! 8^)

Not sure about A3E & J3E modes, but at least two advanced CB modes
do figure in to national plans. They are CB spread-spectrum and packet.

11 meter cb spread spectrum? i don't think so.

11 meter cb fits no where in any national plans.

CB fits into national disaster plans simply because "we all" have them!!!
We will use them, we will use them to help others, we will be out in our
mobiles, we will be in neighbor hoods, we will be highly accessable to the
general public, and right next to people who need help, etc, etc....
The people in need will NOT be hunting up a ham to help them!!!!

Think MAN!!! Think!

Regards,
John

No. I don't see CB helping NORAD, the gov't, the FCC, George Bush or my
OTHER PUBLIC SERVANTS, the cities' mayor, etc... they will just have to do
the best they can... <grin>
I see it helping myself, my neighbor and other fellow citizens....

However, I hope the damn hams will finally crawl down off their high horse
and take my traffic when they see all those needing REAL help!!!!
They just might not.... and here lies the real problem!

That may be true, or it might not be, but I think it is a completely separate agenda from pointing ARRL back at "mainstreet America".

In my mind we should leave the question of social-engineering missions to the regulators (FCC).

73, and thanks for your thoughtful comments,

You had best be careful, Todd...The result STILL might not be what
you'd like...Especially after they get a load of your true intentions
and ulterior motives, Todd...

> > What do you call all those threatening and profane slurs you've
> >thrown at the ARRL when they've not uttered one single iota of
comment
> >on you, your shows or your opinions...?!?!
>
> Well I'm not the only one that hates the ARRL with a passion.

So what? My question to you was what has the ARRL done to you
that you'd use the language against them that you do?

The ARRL has not uttered ONE word about N9OGL, his shows or his
internet behaviour. Not one. Yet you have attacked them with
unwarranted ferocity and foulness. Why?

> as far as
> I see they are the main problem surrounding the problems with
> information bulletins.

The ARRL is not the problem.

The problem is with people like K1MAN and you who think that 97.3
is a blanket authorization to go into the Junior Broadcasting business.

The ARRL does not make policy on what constitutes an "information
bulletin", Todd.

> the huge MAJORITY of people complaining about other Information
Bulletins are ARRL members.

OK...Show me the numbers...

AND THEN show me where the >>ARRL ITSELF<<, not an Amateur who
HAPPENS to be an ARRL member, has caused you any problems.

> Secondly when a person
> gets on a public fourm and ask why I'm on the FCC amateur Auxiliary
> list then It's time to take action.

The action you need to take is (1) Clean up your mouth, (2)
Follow FCC rules and regulations, and (3) Realize that most Amateurs DO
NOT want another self-stylized broadcaster to plop down another
"information bulletin" station on the most crowded HF Amateur
allocation.

> I have the right to my opinion as
> do you with yours if you don't want to listen to my comments then
don't
> read them plain and simple.

And you have the right to ignore mine...but THIS is a public forum.
So you're stuck. And so far, I don't remember a single person
offering any support or encouragement to you to proceed with your
"information bulletins" on 20 meters.

> >Keep repeating that to yourslef over and over, Todd. It's not
> >true today, it wasn't true yesterday, and even if you spent every
last
>
> >day of your life in a monastery begging forgiveness it wouldn't be
> true
> >tomorrow.
>
> I prefere Shintoism over christian religions

Fine. But so far you've not demonstrated that you have the
clarity of thought or discipline of mind to practice Shintoism.

Here's an honest, forthright suggestion on your "bulletin" ideas,
Todd.

Become an ARRL "Official Bulletin Station". Use YOUR repeater to
rebroadcast ARRL bulletins, the Amateur Radio Newsline program, or
other RESPECTED, professionally produced offerings for the "main
course".

Then, at the end of the transmission, hold a directed net on
frequency to invite other Amateurs to join in for round table
discussions on any of the bulletins subjects, local policy issues, or
technical projects or ideas.

Build up some credibility there, then expand your "services" as
the demand dictates.

Like it or not, Todd, if you start broadasting your shows on 20
meters with any regularity, you will find yourself on the receiving end
of more grief than you ever thought of generating on RRAP.

From: K4YZ <k4yz@aol.com>
Message-ID: <1115146487.919925.213550@g14g2000cwa.googlegroups.com>
Source record: 107377

K0HB Said:

QUOTE:

Did I hear someone muttering "Isn't that what ARES is all about?" or
"Our
current field organization already provides for this." Good points --
ARRL
already has some of the pieces in place, and it looks good on paper.
Unfortunately these "pieces" tend to be scattered around the ARRL
organization
and are not linked into a cohesive program.

UNQUOTE.

Yes, that was my first thought, Hans.

A couple of points of my own.

First of all, there's already flexibility written into the ARES
program to allow for it's implementation based upon local needs or
concerns. The needs of emergency planners in Plymouth, MN or
Winchester, TN are going to be different than those of New York City or
Miami, FL.

I don't see how a nationally directed program could possibly do
anything more than appear to be micromanaging.

Secondly, the ARRL Special Services Club's program already offers
assistance for helping to manage some aspects of club activities,
offers of sponsorship, etc.

What they (the ARRL) COULD do, without creating a whole new
"branch" and field directorship with it, would be to start spending
some more money to get more recruiting materials, including TV/Radio
"commercials" into the field. They could "regionalize" the materials
with pictures of local clubs, landmarks, etc in them to help "identify"
them to the target audience.

Otherwise, I like the ideas.

my PBI.

All warm and fuzzy good Hans but it's another OF's top-down "reorganizational solution" which I don't see would work any better than it's predecessors.

The League needs to recognize/concede that it has a serious marketing problem and address the problem the same way other businesses do in these situations. They have a product line which isn't selling to a large sector of their potential buyers. Why? Nobody actually knows. And nobody will know until the League finds out why the Techs aren't buying their wares.

Well-run businesses tackle this problem via market research and the League needs to do a bunch of long-overdue bottom-up market research as a first step if they expect to get any more real penetration into their Tech market.

The League should go out into the trenches in volume and, for openers, start asking all the Techs who are not ARRL members why they aren't members and what the League needs to do to pry the forty bucks a year out of them. Then properly analyze the results of the surveys and make the appropriate changes in their product line. Shuffling SM's duties around and talking up ham radio to the town burghers, etc., etc. as "potential solutions" would drive a real marketeer to tears of laughter.

>
> Think MAN!!! Think!

They won't have to "hunt up" anyone, assuming this is anything
other than a direct nuclear hit where there's NOone to "hunt up"
anyway.

Those who are parts of various volunteer teams, whether it's ARES,
REACT, Red Cross, Civil Air Patrol, etc etc etc, will know where to go
and what to do if the need arises. They won't need an "invitation" to
show up and they'll already know what to do.

And the only good an 11 meter CB radio will do is get "smokey"
reports along the way to their staging point.

funny the california office of emergency services recognizes RACES but
not cb or freeband. why is that? cb'ers and freebanders show no self
control or discipline. during a emergency there will be hundreds of
the dummies all trying to talk over the top of each other.

breaker how bout a radio check,just want to see if this things gettin
out.

During the floods here on the Red and Minnesota rivers a few years ago when
Grand Forks burned, the 11M guys patrolled the dikes and reported problems just
as effectively as the hams did. Reality trumps myth every time.

For some reason, when I read "advancement" above, my first thought
was to encourage the Techs to advance to "general" or "extra".
Then they'd get on HF and then have a reason to join a national
club (ARRL). But that reason is kinda stupid. Upgrading
doesn't mean that you'd have to give up the Tech allocations,
so the Techs could still do local stuff even if they did
upgrade. Not like the old days when a Novice upgraded to
Tech and thus lose the Novice allocations (now THAT was
stupid). Where am I going with this? Damm if I know... :-)

Here's one big reason:

The League is a *national* organization. Focused mostly on national,
international, and regional issues, and not so much local ones.

Now if a ham's focus and interest are national or international, the
League can have a lot to offer. But at the local level, how much the
ARRL can offer someone depends entirely on who the local folks are.

As a prime example, look at QST. How much of it is devoted to purely
local stuff? Not much - the mag would have to be huge to cover ever
locality in any depth at all. So why should someone whose main interest
in amateur radio is the folks within, say, 50 miles, shell out $40/yr
for a membership?

Do you have any numbers to back that up, Hans? The license numbers I post here every two weeks point back to 2000 but not to 1995.

I agree that since about 1987 or so, most new hams have started out as Technicians. Maybe even earlier than that. But it's also true that many of them have gone on to other license classes.

The total number of Technicians and Technician Pluses today is less than it was 5 years ago.

Jim, we can nit-pick the semantics if you really think that's productive, but the two statements above both seem to convey the same notion, which we might more clearly state "Most new hams since 1991 have entered via the Technician class which is now the largest single license class in the US, comprising almost half (47.7%) of the population of licensees in this country, nearly equal to the combined total population of the three higher classes.".

Some of the problem is not really ham related. It is due to the fact that the various emergency services will NOT accept an unconfirmed report from an untrained individual whether or not they are a ham or anyone else.

For example, if Joe Blow Citizen calls in a tornado on a land line, the report will be considered only a possible tornado not a confirmed tornado unless he is a trained storm spotter.

Last time I looked, the FCC regulations don't allow CB antennas to exceed 20
feet in height.

In any activity it would be normal for the "beginners" group to be the largest segment. There are always a lot of people who start activities but then drop out for a wide variety of reasons.

The ability to express ideas is indeed protected (unless of course one is advocating the VIOLENT overthrow of the government). However those ideas can be expressed in trashy language or they can be expressed in non-trashy language. I see no violation of freedom of speech in requiring the use of non-trashy language in public forums. Internet news groups, since they are open to all, would be a public forum.

Astute observation. It would be nice to find a way reduce that "first termer"
attrition by promoting an atmosphere which reinforces the reasons they took the
time and trouble to come aboard. To steal an idea from marketing, "It's usually
a lot easier and cheaper to keep an old customer than to identify and recruit a
new one."

As many of us as possible!

But it might not be as big a battle as you'd guess. I posted this same idea on QRZ.COM this morning and within the hour received a phone call from W5JBP. We spent a full half-hour exploring the PBI.

Even if we do pick the nits, you have a point that is valid. A lot of
Technicians elect not to join the ARRL.

During the time that I was a Tech, I didn't think that the league was
relevant to what I was doing in Ham radio.

You know, stuff like helping with walkathons, 4-H events, Bike races....

Sound familiar to what you wrote? For about 2 years, the type of Ham
you spoke of was ME.

After I got my General license, I decided that ARRL was relevant to my
new interests.

And personal experience, not just opinion, is why I agree with you.

Event support is an overlooked area. Instead of the sometimes
(rightfully so) rigid protocols of the serious emergency work, it allows
the new guys and gals to get used to the idea of communications with
other people. We handle traffic, call for and receive assistance for the
occasional boo-boo, and occasional serious problem, but in a more
relaxed atmosphere. This is great for the new folks. It needs to be
encouraged.

So you have 20% of the cbres still on all yelling,
"aaauuuuuuuddddddiiiiiiooooo", "ten fer thar", along with gobs of other
obscene junk, stumbling all over each other like a bunch of babbons. I
will go with what may be fewer, but trained hams who know how to take
messages, pass traffic, follow protocal, and can work with emergency
officials anytime over a bunch of halfwit cbers screaming into their
mics attempting to stomp over the next guy.
That's the way emergency officials see it as well. CB isn't even
considered when it come to government disaster planning.

Every person that drops out is one small failure on our part.

We need to cultivate these new folk into the ARS. They are a resource
that is being largely ignored by the "better Hams".

He is just another cber too lazy to get a ham license so the best he can
do is attempt to slam ham operators. Ham radio out performs cb radio in
so many ways it makes cb look really pathetic, and the cbers have done
an excellent job themselves of making cb look pathetic by making 11
meters the sewer pit of the radio spectrum.

How about the foot in your mouth wogie, I ain't Steve, not even close.
Poor two-test wogie, doesn't have a clue who he is talking about, but
then what's new?
>
> You sure did snivel the "damnage control" about it on the so-
> called "Liberty net."

Like I said two-test, I have never even listened to the "liberty net",
much less been on it. Again, you don't have a clue.

That is pretty hard to do since the only antenna I have up is a 40 meter
dipole. Again two-test, you don't have a clue.
>

>
> But Roger did pass a commercial license exam in front of an FCC
> examiner in 1976, Gopher face. You lose again.

Well, well. I got my First Class Phone in 1960, so what does that have
to do with anything, other than two-test wogie couldn't have passed a
ham exam in front of an FCC examiner. The only way two-test could pass
is at a license give-away VE session where all the questions had the
answers available for memorization. So two-test got an Extra lite, big
deal, but he is still a novice and always will be. Poor two-test.

> And he's already proven he could pass the amateur tests,
> regardless, unlike you, who has to settle for an obsolete
> license.
>

Again you loose two-test, the Advanceed isn't obsolete and there are
more holders of the Advanced license than there are the Extra.
FCC spanked wogie real good, twice. SPANK SPANK.
LOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOL!!!!!!!!!!!!!!!

Even emergency officials won't take a report from an untrained,
unofficial source. Ham #2 was correct.

Oh well, life is not a guaranteed thing...
Let me know when you have caught 'em all!!!
Regards,
John

_
He didn't catch any. He padrooled the interstate
and wrote down truckers numbers and told the FCC he witnessed their
violations. The FCC sends the truckers a letter claiming the information
they received "indicates" a violation has taken place and warn them not
to do it again. As you probably already guessed by now, the majority of
these warnings go straight to the trash and the truckers become educated
in the way of radio law and learn the FCC must witness a violation for
any real action to be taken. Ironically, this often results in the very
opposite of what JO K4KWH is trying to achieve, as once the truckers
learn there is NO cb enforcement on TOP of their newly learned
education that the feds can't touch them through such tactics,
well,,,,you figure it out. :)

Moreover, many truckers now install marine radio equipment in
their trucks, or otoh, they open their hf xcvrs and communicate
most anywhere in the hf spectrum. I have heard long haul truckers
in the 6, 7, 8, 10, & 14 mHz bands. Tune between 5500 kHz to
7000 at night, and you can pick up a few long haul trucker nets.
They chatter all night while driving.

With many people as soon as the new wears off and their initial
curiosity is satisfied, they move on to something new. Call it a short
attention span I guess.

Circa 1999-2000, how's that for specifics, Gopher face?
Here's your letter:

March 29, 2000

CERTIFIED MAIL--RETURN RECEIPT REQUESTED

Mr. Steven A. Tunder

72643 Glasgow Road

Freeport, OH 43973

Licensee of N8WGM

Mr. Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

Licensee of KC8JBO

Dear Messrs. Tunder and Wiseman:

The Commission has been made aware of an ongoing personal
dispute between
you, and there have been allegations of interference or jamming

on the
Twenty-Meter Band.

The purpose of this letter is to caution you both to review
Section 97.1 of
the Amateur Radio Service rules, and to make certain that
whatever disputes
that may exist are not carried over to Amateur Radio frequencies.

Please call me at 717-338-2502 if you have any questions about
this matter.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur radio

Enforcement Bureau

Would you like some pepper for that foot in your mouth, Gopher
face?

You sure did snivel the "damnage control" about it on the so-
called "Liberty net."

> >>Never had to retest
> >
> >
> > And it's a good thing, too, because you sure couldn't pass
it if
> > you had to retake it today.
>
> I don't violate the rules, (more lies)

You violate the rules all the time, Gopher face. You jam people
on 75 and 80 meters.
You stopped for a time jamming people on 20.
Especially after that letter above.

> >
> >>Bet wogie couldn't pass even the General exam, <blatherings>

face must be snorting cocaine again)

But Roger did pass a commercial license exam in front of an FCC
examiner in 1976, Gopher face. You lose again.
And he's already proven he could pass the amateur tests,

regardless, unlike you, who has to settle for an obsolete
license.

The ARRL has made an effort to get web pages up for each division and
section. That is the method they use of distributing regional and
local information.

Ham #2 took an inflexible position that could have resulted
in harm to life/limb and/or property. Yes, formats are helpful
to be followed...BUT, no one should be so inflexible that
they ignor or otherwise dismiss a report of something as potentially
dangerous as the tornado that was referenced.

Cheers,
Bill K2UNK

I'm not the one who posted, "Sorry Hans, MARS >>>IS<<< Amateur Radio!"

Hi, hi!!!

So how about authentic documentation of your claims of MARS service?

Got Papers?

From the different organizations I've been involved with, I think the larger beginner "drop-out" is just a truth of human nature. I've seen it in scouting, college, classic car clubs, etc. Exactly why newcomers move on to other pursuits is one of life's mysteries in most cases.

Cheers,
Bill K2UNK

I wouldn't take it that seriously. Lots of folks start something
new only to learn it isn't their "cup of tea." Now if they
drop because others in the hobby (whatever the hobby) didn't
welcome them or otherwise treated them in an unwelcome manner...
then that is a shame and a failure.

http://svartifoss2.fcc.gov/reports/index.cfm

A search of the above FCC data base yields negative results
for a commercial FCC license in your name Roger. In fact, the
only FCC license you hold, according to the FCC, is your
ham radio license. Can't wait to hear your spew of excuses
and lies.

Possible Roger Excuses:

1. I passed it but let it expire.
2. I didn't say the commercial license was issued by the FCC.
3. You are not looking in the right data base.
4. I let it lapse, because I didn't need it anymore.
5. I found it in the FCC data base, why can't you?
6. You must not know how to look up a license.
7. (reserved for Roger)

I did make a dessert Orange Muscat (California juice) that won a 3rd in
the local competition. I'll have to check, but I think its all gone.
Very popular with everyone. Last fall I entered 4 white wines in
competition and three won 3rd places, and one was a first.

> >Ha! I just thought of something funny. An Ohio grown grape wine

> anyway.
>
> Hmmm...Ohio now competing with Missouri? :-)

Ohio was one of the original big wine states, early 1800's. A guy named Longsworth was behind it. The grape was "Delaware."

Actually, TJ (Tommy Jefferson) pushed hard to get vineyards established in America. He kept bringing vines in from France, and they never figured out why they wouldn't survive (phyloxeria). He wasn't quite satisfied with native grapes.

> When my wife and I drove back to the midwest in 2000,
> we noticed lots and lots of little wineries in Missouri
> (of all places).

Anywhere the Germans settled. Hermann, MO is kind of the heartland of the Missouri wine country, and I used to maintain the river gage on the bridge leading in to/out of town. That was a bad location.

In 2001 on a similar trip we bought
> lots of wines in Amana, Iowa...the flavored kind, all
> very tasty. Made nice gifts..."imported from Amana."

Ahh, yes, the Amana Colonies. My wife and I stopped just off I80 for a meal while travelling from Nebraska. The waitresses had German accents, but were probably 5th generation USA born. Didn't buy any wine nor home appliances during our stop.

> In 1975 there was a private family reunion (just two

> California wine in Paris...because "everyone knows that
> imported wines are best!" Chuckles all around on that.

In 1976 that actually happened in a blind tasting in France with French judges. They said they could easily tell a California wine from French, then proceeded to rate several California wines higher than the most prestigious French wines. It changed the world of wine.

> Watch Stebie's reaction on that little story. :-)

Steve needs to import a little rationality. Actually, a lot of it.

Sooner or later you're going to have to leave the house for bread
and toilet paper. The second you walk out of the room, there's no
control operator present.

And what happened to school, Todd?

And when you "graduate", what about a job so you can move out of
mommy and daddy's house...?!?!

Or are mommy and daddy independently wealthy and letting you lay
up in your room 24/7...???

Guess that "Japanese" girlfriend of yours get's no attention, eh?
Or is she gonna lay up in the bedroom with you...???

Yes, Todd, I can see that you have a brilliant future ahead of
you.

Tell you what go around to some of these other amatuer message boards and see what other amateurs think. I don't have any figures in front of me right now but, from what I've seen on these other message boards the majority of the amateurs who complain about OTHER information bulletins, not W1AW are ARRL members.

>(2) You better read again.

Believe me the amateur rules are a hell of lot easier to read then broadcast rules.

> (3) It's not a "bulletin" if you're running "24/7".

Not true, there is no time limit on information bulletins

>Yes there is. And it's already in progress.

GO FOR IT!!! your just validation my opinion that 1. I'm better then you cause I don't go crying to the government to settle a personal vendetta and get my nuts off doing it. 2. that your ham radio's number one PRICK! enjoy your poor pathetic ego trip and hey don't shot your wads too hard

Insufficient. Post authentic documentation. Got papers?

> > > You've been given dates, times and specifics. Any police

> ahve put to you for YEARS...

I don't recall what you claim are details.

Post authentic documentation. You know what you say about people who
can't or won't post authentic documentation???

It didn't happen, and they are lying about it.

> > Were those demands mistakes? If so, do take the time to
acknowledge

Nice Dodge Coronet with bald tires.

Now answer the tuff question.

Where your demands of others a mistake? Were your subsequent lies
about others a mistake?

> > > You do not. THAT is documented. Over and over and over.

>
> Even if I DID have a "double standard", it would be two
> "standards" more than you, Brain...

Finally an admission to the PCTA double-standard.

And therein lies the problem.

You think that having two standards is a good solution to your
problems.

> > > You have the specifics of when I was in MARS, the callsigns,

You lie. You have no sorrow.

> Like I said...RIGHT AFTER I start seeing some of the stuff that
I
> have been asking you about...Not even "documents"...Just some
> verifyable details...

Horrible, broke down Dodge.

No. You will never receive anything from me except condemnation.

Now back to your claims of having been appointed to a MARS leadership position. Post your papers. No Documentation = Never Happened = Lies.

Your words, your rules, your logic.

> > > and what I was doing.
> >
> > As far as what you were doing? Obviously not MARS communications
or
> > you just might know a little something about MARS. Hi!
> >
> > Now go find that letter of appointment and post it for all to see.
>
> Waiting on you, Brain...Waiting on you.....

In other words, you're lying. No MARS service.

"Bulletins" are time-specific releases of information. Just like
"Headline News", if it's more than an hour old, it's old and no longer
a "bulletin".

> >Yes there is. And it's already in progress.

So are you going to be at your station as the control operator 24/7?

From your very immature blog site:

"No changes to the VHF schedule will be changed."

Care to explain that sentence?

Also from your site:

"N9OGL IS REAMPING HIS WEBSITE AT"

Just how does one go about "reamping" a website?

Making grammatical errors like that, that my first grade granddaughter would know better, do you really think anyone would be interested in your "broadcasts"?

And I won't. You assholes treated me like the Antichrist in a Spanish
Inquisition.

> And I've never said "Let me see your papers"...That's Lennie's
> schtick...

You've asked for documentation, and if documentation is not
forthcomeing, then the event never happened, and the person is forever
held up as a liar, an miscreant, and a homosexual.

So I ask again, Where are your MARS documents? Post them!

I say it does. Prove me wrong. Post your papers.

> You have the information.

I see no papers.

> Either act on it or admit you're a coward.

No Documentation = Didn't Happen = LIAR

Is Steve Robeson/K4YZ/K4CAP/K4MARS a liar?

According to his own words, his own rules, and his own logic, the
answer is an emphatic yes.

Apology for what? I said I was wrong for the "Q" signal error.

I was.

And I am RIGHT that Lennie is a liar, a miscreat, and a Putz. (I
didn't call him a penis...You should get your attributes right, Brain.

> > The problem is you are ...

Spanish
> Inquisition.

Because YOU made all these claims that you could not/would not
substantiate. You make excuses as to why you won't, Brain, but the
ANSWER is that you CAN'T!

Kind of like the "ARES" claims and the "Chased Techs" ones you
have out there now.

Stupid claims with no reasonable expectation of corroborating
evidence, documentation or rationale.

> > And I've never said "Let me see your papers"...That's Lennie's

I've asked you for proof. Proof doesn't have to be in the form of
a document, and you've been TOLD that before.

What was the name of the USAF officer that allegedly gave you
"authorization" to operate Amateur Radio while in Somalia...?!?!

> So I ask again, Where are your MARS documents? Post them!

And I told you they're not forthcoming. I've given you far more
information to verify this ONE claim than you've ever provided for ALL
of the questions before you!

The bottom line is you're too cowardly to ask the appropriate
agencies if it's true.

The answers would leave you defenseless.

> > My error via "Q" signals does not negate teh rest of my

> questions still awaiting answers, Brian.

MARS letters of appointment. Prove your claims with authentic
documents.

Remember, Steve, you claimed that without documentation, the activity
never happened and the person is a liar, a miscreant, and a homosexual.

Are you a liar, a miscreant, and a homosexual?

Show your documents.

In other words, the info's been in your hands for over a year.

Sucks to be you, Brain...Still a liar...Still a putz...

Still going to have to find a way to explain to your kids one day
why you lied in public so often.....

Seems like it's just a group of fellers taking turns insulting each other in a perpetual, semi-literate daisy-chain.

Any actual discussion of ARRL policy here, or has all of that moved off to QRZ?

And, you know partner, that is one VERY CHEAP SHOT... I am betting it is indicative of your whole character....

You should have mentioned it is from rec.radio.cb...

The group there are truck drivers, when speaking to truck drivers a much different form of speech is chosen than in other groups...

It would have been much more appropriate to have mentioned that.... or, even better, to have referred them to rec.radio.cb and told them I was posting there... either or both would have been preferable...

That is uncouth... what next... pickup something from a porn room and drop it here?

Indeed, if you look in the above postings, of mine, in this group, you will find I have expressed these same ideas here--with gentler nouns, verbs and text... but then, I think you are for another purpose... perhaps because you are feeling you are losing the argument there, and so wish to sick more hounds upon me?

Which is almost entirely a function of the quality of the leadership of the local clubs and the time and effort they have available to put into the clubs. Which the League can't control or do anything about no matter how they reshuffle the organization and event charts in Newington. Beyond that the facts are that the League has only managed to sign up ~20% of all licensees in this country nocodes thru 20wpm Extras and some uncounted huge number of those aren't members of local clubs either. There's nothing new about any of it, this whole topic area has been massaged into oblivion many times in the past and it'll come up again after this minor cycle of angst peters out.

Hi Steve,

ONE community?

A VERY SMALL group?

Check a map, Twenty-one counties in Minnesota and eleven counties in North Dakota were in the flood zone of the two rivers and their tributaries. Cities and farmsteads all up and down both sides of both rivers were diked, well over 180 miles of dikes were patrolled for almost three weeks.

I still have one CB radio that I keep operational. I turn it on to reaffirm why I became a ham. In the early '70s, CB was still an honorable communication means employed by many groups performing public services. Most operators were considerate; the key word here is "were".

If we had a national emergency today, John and his "good buddies" would step on each other and crank up their "leenyars" to the point they would wipe out the nationwide 11 meter band with heterodyne. Wait---they already do that on a daily basis.

Quite a number of truckers are now licensed hams--they need to be able to communicate more than a mile or two.

I have good memories of my CB days, and I appreciate that it got me into ham radio. Unfortunately, "Sewer Pit" is a realistic description for what it has become in many areas--including mine.

Illegitimi non caborundum.

The range of CB radio is 5 miles or less. Why would it be considered
as a method of communication for NORAD or the Department of Homeland
Secrecy? Regardless:

The group there are truck drivers, when speaking to truck drivers a
much
different form of speech is chosen than in other groups... ....

All CB'ers are truck drivers? I know a few truck drivers, and I didn't
need an interpretor... The ones I know seem to speak english.
Are you talking to Iranian truck drivers? I doubt they use many CB's...
Most prefer to bootleg on VHF using ham tranceivers....Kinda the
3rd world "family radio"....

Indeed, if you look in the above postings, of mine, in this group, you
will
find I have expressed these same ideas here--with gentler nouns, verbs
and
text...

I've read your rantings at both places....All in all....I still think
you
must have been an abused child...You seem fairly silly at either
group...gentle or not...BTW....What is this great "mis-information"
we hams have supposably foisted upon the world? I read that post....
Sillyness it was...You don't need to be a ham to foist
misinformation...
You can go back to barking at the moon now....
BTW, Don't worry. I'm not going to argue with you...
I fear it would be too painful for you to cope with.
I wouldn't want you to go "postal" on us, or anything....I remember
once on 75m, they picked on this dude for so long, he went postal
and shot his wife to death out of sheer frustration. No joke....
It was on the frequency I talked on at that time...Some out there
may still remember it....He was a "4" lander....Was about '85 or so...
He may still be serving time for it... So you can see my concern.
I wouldn't want you to end up like that. I've argued with some people,

and they started barking at the moon out of frustration. You already
bark at the moon, so I'm afraid I could be fatal to you...:(So I'll
leave
you alone....Resume barking now....

Aside from the occasional article where a Ham speaks of the mode he/she uses, I find very little in QST about Morse code. Ads for Keys are there. But not a whole lot else.

Roger remains curiously silent, after he was challenged to explain why his Commercial FCC license, which he claims was passed before a FCC examiner in 1976, does not appear in the FCC's data base?

Could it be because a list of his excuses (lies) was posted in advance?

Perhaps the DeVry master degree boy has never had said license?

Let me know if you want me to post the link to the FCC's data base again Roger?

This is the most important question of your life.

The question is: Are you saved?

It is not a question of how good you are,
nor if you are a church member, but are you saved?

Are you sure you will go to Heaven when you die?

The reason some people don't know for sure if they
are going to Heaven when they die is because they
just don't know.

The good news is that you can know for sure that
you are going to Heaven.

The Holy Bible describes Heaven as a beautiful
place with no death, sorrow, sickness or pain.

God tells us in the Holy Bible how simple it is
to be saved so that we can live forever with Him
in Heaven.

"For if you confess with your mouth Jesus is Lord
and believe in your heart that God raised Him from
the dead, you WILL BE SAVED." (Romans 10:9)

Over 2000 years ago God came from Heaven to earth
in the person of Jesus Christ to shed His blood
and die on a cross to pay our sin debt in full.

Jesus Christ was born in Israel supernaturally to
a virgin Jewish woman named Mary and lived a sinless
life for thirty-three years.

At the age of thirty-three Jesus was scourged and
had a crown of thorns pressed onto His head then
Jesus was crucified.

Three days after Jesus died on a cross and was
placed in a grave Jesus rose from the dead as Jesus

said would happen before Jesus died.

If someone tells you that they are going to die and
then three days later come back to life and it
actually happens then this person must be the
real deal.

Jesus Christ is the only person that ever lived a
perfect sinless life.

This is why Jesus is able to cover our sins(misdeeds)
with His own blood because Jesus is sinless.

The Holy Bible says, "In Him(Jesus) we have
redemption through His blood, the forgiveness of
sins..." (Ephesians 1:7)

If you would like God to forgive you of your past,
present and future sins just ask Jesus Christ to be
your Lord and Saviour.

It doesn't matter how old you are or how many bad
things that you have done in your life including
lying and stealing all the way up to murder.

Just pray the prayer below with your mouth and mean
it from your heart and God will hear you and save you.

Dear Jesus Christ, I want to be saved so that I can
have a home in Heaven with You when I die. I agree
with You that I am a sinner. I believe that You love
me and want to save me. I believe that You bled and
died on the cross to pay the penalty for my sins and
that You rose from the dead. Please forgive my sins
and come into my heart and be my Lord and Saviour.
Thanks Lord Jesus Christ for forgiving me and saving
me through Your merciful grace. Amen.

Welcome to the family of God if you just allowed God
to save you.

Now you are a real Christian and you can know for
sure that you will live in Heaven forever when this
life comes to an end.

As a child of God we are to avoid sin(wrongdoing),
but if you do sin the Holy Bible says, "My dear
children, I write this to you so that you will not
sin. But if anybody does sin, we have one who speaks
to the Father in our defense Jesus Christ,
the Righteous One."

Those of you that have not yet decided to place your
trust in the Lord Jesus Christ may never get another

chance to do so because you do not know when you
will die.

Jesus said, "I am the way, the truth and the life:
no one can come to the Father(God)(in Heaven), but
by me." (John 14:6)

This means that if you die without trusting in Jesus
Christ as your Lord and Saviour you will die in your
sins and be forever separated from the love of God in
a place called Hell.

The Holy Bible descibes Hell as a place of eternal
torment, suffering, pain and agony for all those who
have rejected Jesus Christ.

The good news is that you can avoid Hell by allowing
Jesus Christ to save you today. Only then will you
have true peace in your life knowing that no matter
what happens you are on your way to Heaven.

Praise the Lord!
Servant of the Lord Jesus Christ

Do a Google search, limiting your search to rec.radio.cb
Then do a general web search, using Google. Spread Spectrum,
Packet, and other digital modes have been discussed in
rec.radio.cb with posts dating back to 1991. Typical ham, you
want all the work done for you. And when are you going to
upgrade from No Code Tech?

There is a lot of "generic" local stuff the ARRL could
deal in. Doing a parade or county fair in Cowville, North
Nebraska won't be that different than the parade or county
fair in Swampgulch, Alabama. Sure the names are different,
but organizational politics and technical issues with 2 meter
handhelds on the street would be quite similar.

I'm in complete agreement with Brian Kelly on that.

ARRL budgetarily exists on SALES OF PUBLICATIONS, not the annual dues. Figuring $30 x 170 thousand members (allowing for all the "Life" memberships done once) yields only a %5.1 million per year. That's about the cost to produce (and stay afloat) QST, the "membership magazine," to pay the printers, the fullfillment enablers, QST staff, all the magazine ancilliary costs - provided - they ALSO have revenue from advertising sales. Without that advertising sales income, QST will dry up and become just a newsletter

printed on newsprint.

The IRS forms (available on another website) show that
the ARRL monetary income for 2002 was about $12.5 million.
Even if all members paid $40/year dues, the total dues
income would be only $6.8 million. The rest of that income
came from PUBLICATIONS and RESALE of other goods...all
pushed on the ARRL website.

>The League should go out into the trenches in volume and, for openers,
>start asking all the Techs who are not ARRL members why they aren't
>members and what the League needs to do to pry the forty bucks a year

>around and talking up ham radio to the town burghers, etc., etc. as
>"potential solutions" would drive a real marketeer to tears of
>laughter.

Quite so. :-) But that CANNOT be explained to the
entrenched, we-know-what-is-best-for-everybody, old-
school thinking of the "leaders" at the ARRL. They
seem to want to run a little clubhouse of the BoD and
Hq staff, keeping things nice and cozy for themselves.

The psychological term is "conditioned thinking" by
the League. The leadership seems stuck in the way
things were done a half century ago...plus the rah-rah
self-promotion of the "ideals" of their elders of that
long-ago period. Their conditioning is almost absolute.
They just don't seem to understand that their cozy
existance-in-the-clubhouse is NOT what the newcomers
want to preserve. Newcomers, already exposed to the
wonders of worldwide webbing (no ionospheric
propagation problems), aren't interested in being
the epitome of morsemen as they were in the 1930s.

Yes, the ARRL plays to "high-technology" on things
such as satellite communications and "talking with
astronauts on the International Space Station" (all
three of them sometimes) and has a lot of books
(shipping cost extra if mail-ordered, no shipping
cost if purchased at ham stores) on a few things
which are state-of-the-art, sort-of. Lots of style,
plenty of gloss, little substance in general.

The vast majority of ARRL concentration in
publications is on the HF ham bands...where no-code
test Technicians are still forbidden - by law - to
operate. VHF and above is still treated "different"
something to be shunned by "real" hams...now as it
was a half century ago. Too many oldsters are still
conditioned to that time and to "working DX with CW

on HF," collecting "wallpaper" (QSL cards) to show their "prowess" as "radio operators." OK, that was FB in the 1950s when all the League "leaders" were young. Times have changed, the "leadership" hasn't.

"Marketing" research by the League? Don't bet on it. The "leadership" is still inclined to have their "burghers" their way...emphasizing, of course, "CW" skills as the epitome of all "real" radio amateurs. It worked for them when they were young, and, by T.O.M., it MUST apply to newcomers of today! :-)

League business as usual...as it was then, so shall it be now...

Disregarding the range problem, they won't consider cb because of the type of operators you typically find on cb. Would you want those bunch of morons handling your emergency traffic.

I'm not trying to nitpick semantics, Hans, just looking for solid info.

I do agree that most new hams since 1991 have entered via the Tech license - in fact, by the mid-80s if not earlier, most new hams I encountered bypassed the Novice and went straight to Tech. The main reason they gave me was 2 meter and 440 repeaters - Techs could use 'em, Novices couldn't. The splitting of the Element 3 written test in 1987 and the dropping of the code test for Tech in 1991 just helped the trend along.

AH0A's posted numbers only go back to June 1997, which is of course 8 years rather than a decade, but let's take a look anyway:

June 1997 (per AH0A.org):

Novice - 66,551
Tech - 174,924
TechPlus - 139,608
Tech/TechPlus combined - 314,532 (46.4%)
General - 116,629
Advanced - 107,024
Extra - 73,737

General/Advanced/Extra combined - 297,390 (43.8%)
Total all classes: 678,473

April 2005 (per AH0A.org):

Novice - 28,615
Tech/TechPlus combined - 318,318 (47.7%)
General - 136,808
Advanced - 76,418
Extra - 106,587
General/Advanced/Extra combined - 319,813 (48.0%)
Total all classes: 666,746

So in the past 7 years 8 months we've seen growth of 3,786 in the Tech/TechPlus classes, pushing those classes' percentage of US hamdom up 1.3%. But in the same time period we've also seen growth of 22,423 in the General/Advanced/Extra classes, pushing those classes' percentage of US hamdom up 4.2%.

So when I read a claim that "The growth in numbers of Amateurs over the past decade
has been overwhelmingly via the Technician license.", I would like to see more data.

Now it occurs to me that you may have meant that "via the Technician license" means most hams start that way, and I agree. Point is, it seems to me that a lot of new hams don't *stay* Technicians forever.

--

I don't think there's ever been a time when ARRL had a majority of US hams as members. The most I ever saw claimed was about one-third, and that was many decades ago.

I think the big unknown in all this is the percentage of *active* hams who are members - or even the number of active hams, period.

The number of ham radio licenses has always included a certain percentage of SK and totally inactive hams, but with the increase of the license term to 10 years back in 1984 and the general aging of the US population, it's logical to think that the percentage of SK and totally inactive hams has increased dramatically in recent years. From 1994 to 1999, no US ham licenses expired at all.

In the bad old days, those who lost interest quickly disappeared from the license totals. Novices had one or two years to upgrade or leave the air, and the other licenses were only good for 5 years. IIRC, it used to be that if you didn't get your Form 610 to FCC before the license expired, it was gone - no grace period. (Of course back then FCC would renew a lot sooner than 90 days before the license expired, upgrades caused automatic renewal and you could combine a renewal and a modification.)

You have a hard time with comprehension don't you two-test. The Advance
isn't obsolete, it is still a valid license. There are more Advanced
class holders then there are Extra.
You only got an Extra-lite, you never would have been able to pass a
real test for Extra, only one where the answers were provided for you.
At least my Advanced license is real, I didn't take the test at some
license VE give-away session where all the answers were provided like
two-test wogie did.
Poor two-test, the Extra lite ham. HAHAHAHAHAHAHAHAHAHAHAHA!!!!!

>

Poor two-test wogie, the FCC spanked him really good. You see, wogie was
caught red-handed violating the FCC rules so Riley made him retake the
exam. Wogie couldn't operate according to the rules like any normal
ham, he had to go and jam other ham's transmissions and Riley caught him
red handed. So wogie had to retest in order to keep his license. Poor
two-test. Lets see the hands of all those who have been called in by the
FCC to retest. Oh, I only see wogie's hand...figures. I have been
licensed since 1961 and never once has the FCC made me retake the exam.
Poor widdle two-test can't say that. Poor two-test, he couldn't have
passed the exam except he took it at a license give-away VE session
where all the answers to all the questions were available for
memorization. Wogie got an Extra-lite, he never could have passed the
old test were knowledge was required and you had to set in front of an
FCC examiner. But on the other hand, someone from the FCC is probably
the last thing two-test wogie wants to see.
You care to explain negative SWR and RMS to us wogie?

I'm not, I'm running an Information Bulletin, big difference...a
broadcast is attended for reception of the general public while a
information bulletin is a program directed to amateur radio.

Yup, everyone just got through saying that there's a problem attracting Technicians to the organization. No one seems to be able to put their finger on exactly why, only because they reject the -correct- answer (reminds me of the OJ case). And they still wring their hands and bite their knuckles and ask, "Why?"

OK, I'll rephrase the answer. The ARRL may not be >>>just<<< about HF radio using Morse Code, but the Technicians think it is. Hi! Sheds a whole new light on the subject. How about that for fair play?

HAHAHAHAHAHAHA!!!!! It's a restricted radiotelephone operator permit.
Not even a technical license like a First or Second Class Phone, just a
restricted operator permit. Doesn't even require a test, just complete
an FCC form. My pilot's license grants me the same priveledges.
Poor two-test, the best he can do is brag about holding an FCC
commercial RR operator's permit (not license) that doesn't even require
a simple test. Oh, part of the qualifications for holding such a license
does require one to be able to speak and hear, wonder how wogie fooled
them on that part? He can babble on and on, put speaking coherently is
another matter.
Wah-who, a restricted radiotelephone operator permit, hot-dog!!!!! Way
to go wogie, you really accomplished something there, yes sir!!!
LOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOL!!!!!!!!!!!!!!!!!!!!!!!

There will always be some we won't be able to keep no matter how hard we try. There will always be some who were just trying it out to see if they would like it but then found that they preferred other activities more. And that's ok. At least they have broadened there knowledge of the world a bit even if they don't stay with it.

But Steve, wasn't it you who demanded documentation for everyone else's
activities?

Ayup!

And if the documentation didn't flow it meant that the event didn't
happen and the person was lying?

Yep, that was you. Your words, your rules, your logic. That is the
basis that you use for calling other people liars. It's too bad that
your heavy handed tactics have to be used on you, that's the way it
works. You are not exempt from your own rules, though you are
desperately trying to avoid them.

So again I ask you to post documentation of your MARS claims. An
authentic letter of appointment to your alledged claim of "ANCOIC
Okinawa" would be satisfactory. Got Papers? Sucks to be Robeson.

I disagree. Everyone who has been convinced to give it a try is a success
on our part. Not everyone who tries it will find it to be interesting to
them in the long run. However, they have enriched their lives and broadened
their horizons by even an introductory participation.

> We need to cultivate these new folk into the ARS. They are a resource that
> is being largely ignored by the "better Hams".
>
> - Mike KB3EIA -

We do need to spend more time in working with people to determine if they have a long term interest and help them develop that. Just because some drop out doesn't mean that the ARS has failed. It is perfectly legitimate for a person to start an activity and once they have learned something about it to make the judgement that their interets do no lie in that particular hobby. That's not an ARS failure.

I disagree and do not believe that it is a short attention span. Life is
rich with possible activities and interests. To sort among them and
determine what you like for the long haul is often best done by sampling the
activity. This means starting and then "dropping out" of some things.

Actually there was a time decades ago that it was so. There was a time that people had to hold a separate Novice license and a separate Technician license to participate in the privileges of both license levels. It was before my (ham) time but I've read about it in some book or another on the history of ham radio.

Your accusation is based upon your "mistake."

(I
> didn't call him a penis...You should get your attributes right,
Brain.

You can begin telling the truth about the terms you use at any time.

Penis is the translation of "putz."

Testicles is the translation of "cajones."

Homosexual is the translation for two guys sleeping together as "bunk
buddies."

Homosexual is the translation for two men marrying.

Why would I want your reservations?

I've merely asked you to post your MARS documentation. Just as you've asked others to post documentation and subsequently called them liars, miscreants, and homosexuals for not providing you what you've demanded.

Why do you have such a problem coming up with the documentation? Could it be that your claimed MARS service never happened? That would certainly explain why you have no documentation.

That's just it toddieboy, your opinions are of no interest to the
amateur community.
So, are you going to be at your station 24/7 as the control operator as
you broadcast your non-bulletins?

BZZZZT!! Wrong!!! There is no exam for a restricted radiotelephone operator permit. It isn't even a license, just a permit. Fill out the FCC form, send it in, that's all there is to it. Wogie could't pass an exam in front of an FCC examiner if he tried, especially after Riley and the FCC spanked him real good for violating FCC regulations. Poor two-test, having delusions again.

I can't argue with that. (And by extension, the less hard we try, the less we'll be able to keep.)

But my PBI has little (if anything) to do with "keeping" them in the hobby.

It has to do with ARRL membership growing more representative of the whole population of amateurs. (See the "Subject" line)

That's because most new hams can recognize a garden
variety classic New England "mutual admiration society"
of wannabe blue-bloods who's only reason for existence
is to maintain their monuments to the past which nobody
cares about anymore and to keep a magazine going
which is composed of 80% advertising.

Face it boys. the ARRL blew it BIG TIME when they had
the chance to eliminate the dammed Code for HF way
back in the early 1980's with the "Plain Language" rewrite
of the amateur rules. Today most of the ham fossils who
opposed this are either in their graves or waiting to expire
and we're stuck with an obsolete hobby as a result.

Thanks boys! (posthumously)

The ARRL has fought and continues to fight to protect our spectrum, hardly the action of a "mutual admiration society". They might be able to do a better job if some of you non-members would get off YOUR high horses, join the group, and start working towards what you would like to see them doing. So long as you stay on the outside, they have no reason to represent you or your views.

You obviously have not investigated their various classes for all levels of interest in areas of ham radio activity such as the many emergency courses, etc. It is all too apparent that you speak from preconceived notions and haven't bothered to get involved. You simply sit there on the outside and whine and complain.

You want it to be different? Get in there and do the work to change it. Oh, that's too hard you say. Then you are just a parasite waiting for some one else to do the work so you can benefit without having contributed.

Do a better job of reading up on history. The ARRL had NO chance of eliminating the code in the 1980s as the US was signatory to an international treaty that mandated code for HF privileges.

I think that's probably a reasonably accurate statement.

And it is what my PBI is intended to address --- putting ARRL back into "mainstreet amateur radio" where the Technicians live, and connecting with them in the activities that are relevant to them.

According to the rules an Information bulletin is "A message directed only to amateur operators consisting solely of subject matter of direct interest to the amateur service." and according to the FCC website http://wireless.fcc.gov/services/amateur/about/communications.html "The control operator of the station transmitting an information bulletin is responsible for determining that the subject matter is of direct interest to the amateur service. " and lastly "There are no specific time limits placed upon information bulletins by Commission rules." (letter to K1MAN from the FCC 2004)

No you're not. It's a "show". That's how you promote it.

You can TRY and make people believe that it's "just a bulletin",
but your threat to go "24/7" and your "itinerary" that does nothing but
parrot the ARRL website says otherwise.

Nice try, Slick.

"...of direct interest to the amateur service."

You have torqued off everyone on this list except Brian and
Lennie, and their diminished character has been known for years.

And this is just OFF the air...

No one, here or on the air, wants to hear the ranting of a
functionally illiterate loudmouth who doesn't think twice about
violating the law when it suits him.

Just how many "fans" do you think you'll create by mimicking
ARRL's "bulletins" on the most crowded Amateur allocation
worldwide...???

You're the epitome of selfish, Todd.

But why should they?

Almost every aspect of ARRL policy and practice is focused on
getting MORE people into Amateur Radio and USING those people in their
programs, ie ARES.

There's not one sentence, nay one letter in any ARRL policy or
program that "disses" anyone because of their level of licensure.

> And it is what my PBI is intended to address --- putting ARRL back
into
> "mainstreet amateur radio" where the Technicians live, and connecting
with them
> in the activities that are relevant to them.

ARES isn't? Special Services Clubs?

They've accomodated NCT's at almost every turn...Even most of the
League's long time awards have been adapated or modified in some form
to accomodate them.

I just don't see it. I didn't see it when I was a Novice. Nor
when I was a Tech, General, Advanced or Extra.

The ARRL is a NATIONAL organization. I think they do the best
that they can to help promote Amateur Radio, and if they were to do
anything more for the grass roots level, it would be with getting more
air-time/print in national media.

Several years ago we all got into a turn over how it seems like
there are certain mindsets drawn to Amateur Radio...EMS-types,
experimenters, "gadget freaks" and competitors.

Instead of trying to "recruit" persons from other (most likely
disinterested) demographics, why not just capitalize on the ones that
seem to have a large drawing? EMS, Aviation, "orienteering" and
outdoors types, engineering, etc.

349. A Final Word With Brain...

Newsgroup: rec.radio.amateur.policy
Date: 2005-05-05 07:25:41 UTC
From: K4YZ <k4yz@aol.com>
Message-ID: <1115277941.743920.224980@o13g2000cwo.googlegroups.com>
Source record: 107633

Brain,

I can see that this is going to go tit-for-tat ad nauseum, so I'll just add my last word on this and be done with you for now.

You have the information you asked for. After you finished choking on the fact that I gave you the information, you then demanded "documentation", alledging that I've demanded the same from you. Obviously a tactic to just drag this out.

I've not...I've asked for any PROOF that any of your claims or assertions were valid. ANY kind of verifyable reference...

Not a word...

In the case of your illegal bootlegging from Somalia, I asked you to just provide the name of the officer who allegedly gave you permission to operate there...Nothing.

You've been asked to validate your assertions about "unlicensed devices" having a "major roll in emergency communications", but you've balked at that too...Not a URL...Not an article...not one thing.

Your most recent rant about ARES being overblown and unlikely to respond to any significant emergency has been proven wrong over and over for the last several weeks with one news release after another...

And that "...they've chased all the Techs away..." silliness...?!?! Who chased who away? In the last 10 days of casual operation on 2 meter SSB alone I've worked 11 stations. Six of them were Techs. I didn't go in to asking them if they'd passed the code..I didn't even ASK them what class of license they had...Just got it from QRZ.

So...here we are...You've got my former USMC command, the dates, the places, former MARS calls, etc...All data you can verify with independent resources.

And from you..we have...

Nothing.

Spin your way out if that, if you'd like, but you're boring me, Mr. Burke. Go play with Todd and Lennie. That have nothing to offer too.....

I am waiting for when the FCC eleminates the tests to upgrade, wogie.
Then I can just send in an FCC form for the Extra, like you did for your
restricted radiotelephone operator permit.
Who-ha, wogie worked real hard and got an FCC Restricted Radiotelephone
Operator Permit (no license), took him a week to figure out how to fill
out that FCC form. Had to get the six year old next door to help him
fill it out. Then Riley and the FCC make wogie retake his amateur exam
because wogie violated the FCC rules. So wogie runs down to the license
give-away VE session where the answers to the tests are given and gets
his Extra-lite. Yessir, real accomplishment there wogie.
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!!!!!!!!!!!!!!!!

Yea, at a license give-away VE session where the answers to the test are available, no technical knowledge necessary. Kinda like that Restricted Radiotelephone Operator Permit. So now wogie has an Extra-lite permit. Whoooooo-ha, way to go two-test.
Want to explain to us about negative SWR and RMS voltage two-test? BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!!!!!!!!!!!!!

>>Try and prove it two-test.
>
>
> It would be on the FCC ULS website, Gopher face, if it existed.

OK, so where is your 2nd Class Phone two-test?

As far as my 1st Class Radiotelephone license, when it was issued in 1960, the holder of such license had to either use the license in his employment a certain amount of time or it could not be renewed. I had no need to use my license so it expired. That's why it isn't in the FCC database, dumb nuts.

That requirement was later changed for both the 1st and 2nd class licenses so they never expired.

So, where is your 2nd Class two-test? I don't see it on the FCC website.

>
> Now I can go on the Extra portions of the bands, much to your
> chagrin, Gopher face, since you couldn't pass the Extra test,
> even as it exists now. Ever.

Not being able to use the Extra class portion of the bands where you might be I look at as a blessing. Why would I want to go somewhere where two-test wogie trashes up everything? Why would I want to talk to someone who was requested by the FCC to retake his exam because he violated FCC regulations? Why would I want to communicate with someone with an Extra-lite permit? Why would I want to stoop that low?

>

Sorry to dissappoint you two-test, my wife and I have been together for some 44 years now. On the other hand, you couldn't maintain a relationship with a woman for more than two weeks unless she was a blow up doll. Another man maybe.
Poor two-test wogie, had to retake the exam at the request of the FCC because wogie broke the rules. Now he brags about his Extra-lite permit.
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!!!!!!!!!!!!!!!!!

My PBI has nothing to do with recruiting persons into Amateur Radio.

It deals with a program aimed at putting ARRL back on mainstreet where is was
when over 50% of "1 year Novices" were card carrying ARRL members.

And, for what it is worth the code test will be gone for General
sometime down the road. It isn't a matter of if, it is simply
when at this point. ARRL's proposal recommends ending code
and ONLY retaining a code test for Extra.

Cheers,
Bill K2UNK

for you.

No, I passed an Extra, something you can't do. At all!
BWHAHAHAHAHAHAHA!

You couldn't handle it, could you? From what I hear doing 13 wpm
code really taxed that little squirrel cage in your malformed
head.

> At least my Advanced license is real, I didn't take the test
at some
> license VE give-away session where all the answers were
provided

You just bribed your VE, because you flunked your Advanced so
many times. And you still couldn't pass the Extra, ever, could
you? BWHAHAHAHAHAHAHAHAHAHA!!!!!!!!

> Poor two-

Poor Gopher face, the obsolete licensed ham.

> And where did I admit it was hard to do?

You should lay off the cocaine use, Gopher face. Your short term memory just might return.

> You're really funny two-test. NOT!!

You're really funny... looking, Gopher face. You should really get those yellow buck teeth fixed.

> >>Well, well. I got my First Class Phone in (more lies)
> >
> >
> > No, you didn't. You are lying again, Gopher face.

Saw a spread spectrum set up in a long haul trucker rig yesterday.
Driver would not say exactly where they are being sold, except
somewhere in Illinois. His rig also had a Icom HF rig in it and
what looked like a marine radio. Too bad he wouldn't talke more.
A couple years ago these guys were very talkative. My guess, the
FCC letters are classic "unintended consequences." Meaning. these
guys are now much more security aware.

>worldwide...???

Who says I mimicking the ARRL??

>You're the epitome of selfish, Todd.

DAM RIGHT! I didn't get in this hobby for you or any other dumb fuck ham operator, I got into it for my own selfishness.

97.3(a)
(4) Amateur service. "......duly authorized persons interested in radio technique solely with a personal aim and without pecuniary interest."

I think the key words to look at steve is "PERSONAL AIM" there is nothing in the rules stating that I have to listen to what other amateur say. It dumb ass groups like the ARRL which pushes this communistic "collectivism" on the amateur radio service. Then there is dumb asses like yourself who believe it.

Works for me. :-)

Does definitely NOT work for those olde-tyme
morsemen locked into the standards and
practices of seven decades ago...they're
still scratching their balding heads wondering
why the rest of the radio world gave up on "CW."

Well, they have their imaginary universes
locked up in their heads. They seem to be

happy in their status quondam...

Armenian judges gave it a 9.8 on the Olympic Troll-O-Meter,
but they were over-ruled by the umpires in instant replay, who
award it a 2.1.

The Armenian judges lodged a formal protest!

It was sufficiently trollish, of course, but way too obvious.
It was poorly written, poorly executed, and was so incredibly
lame as to lack the true drawing power of a really masterful
troll. Maybe as high as a 2.3 for the sheer stupidity of the
premise, but a 9.8? Never! The Armenian judges tear their
hair out, throw their balalaikas down in dismay, and perform
the traditional Armenian Dismay Chant! They demand a recount!

Regards,

Hans, K0HB

You mean like the standards were lowered for the Extra-lite? You know two-test, questions from a pool where the answers are available, no knowledge required and from a license give-away VE session. That is the only way poor little two-test could have ever gotten the Extra-lite. Why didn't you get the Extra when it was a real test wogie? Couldn't hack it could you? No, the best you could settle for is the Extra-lite which requies no technical knowledge at all. Just memorize some answers to a few questions from the question pool and bingo! an Extra-lite. Give us the theory on negative SWR and RMS voltage if you will. HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!!!!!!!!!!!!!

I didn't know the FCC could issue callsigns that start with "R"
"RR00025000" is Roger's "Restricted Operator" license call
sign. At least that's what the ULS web page says under
"Callsign" :-)

I suppose "Restricted Radiotelephone Operator Permit" is what
they call a commercial license nowadays.

You have a hard time with English, don't you, Gopher face?

Well, you did drop out your freshman year of community college!

> The Advance isn't obsolete,

Looks like your English skills are, though!

>(more excuses)

> You only got an Extra-lite, you never would have been able to
pass a
> real test for Extra, only one where the answers were provided
for you.

No, I passed an Extra, something you can't do. At all!
BWHAHAHAHAHAHAHA!

You couldn't handle it, could you? From what I hear doing 13 wpm
code really taxed that little squirrel cage in your malformed
head.

> At least my Advanced license is real, I didn't take the test
at some
> license VE give-away session where all the answers were
provided

You just bribed your VE, because you flunked your Advanced so
many times. And you still couldn't pass the Extra, ever, could
you? BWHAHAHAHAHAHAHAHAHAHA!!!!!!!!

> Poor two-

Poor Gopher face, the obsolete licensed ham.

> And where did I admit it was hard to do?

You should lay off the cocaine use, Gopher face. Your short term memory just might return.

> You're really funny two-test. NOT!!

You're really funny... looking, Gopher face. You should really get those yellow buck teeth fixed.

> >>Well, well. I got my First Class Phone in (more lies)
> >
> >
> > No, you didn't. You are lying again, Gopher face.
>
> Try and prove it two-test.

It would be on the FCC ULS website, Gopher face, if it existed.

And try to use correct punctuation, Gopher face.

> > Again, you "lose" Gopher Face. You can't even post in English.
> > Now go cry because you have that obsolete license.
> >
> Now you go

Now I can go on the Extra portions of the bands, much to your chagrin, Gopher face, since you couldn't pass the Extra test, even as it exists now. Ever.

> > --
> > Gopher Face "Buzz Corey" proves he is quite a "loser" when he

> >
>
> Poor two-

Poor Gopher face, has that obsolete license. Has to talk on 40 meters along with the Shortwavce broadcast stations drowning his piss-willy signal out. Poor Gopher Face Butt Cornholer, he couldn't spell "loser", because he snorted so much cocaine and followed it up with a vodka chaser. Tell us Gopher face, why'd your wife walk out on you?
BWHAHAHAHAHAHAHAHAHAHAHAHAHAAHAHAHAHAHAHAHAHAHA!
Were you such an underachiever with her, too?

The pilots license is right here in my billfold *two-test* boy. As far as the 1st Class Phone, I explained that but it was obviously too far over your head for you to understand.
So where is your 2nd Class ticket, chubby *two-test* boy?

What does your middle initial L stand for *two-test*? Lloydie?

You enjoy using that Welfare Extra-lite ticket *two-test*? Talked to Riley down at the FCC office lately? Maybe you better brush up on the question pool, Riley may want you to retake the test. LOLOLOLOLOLOL!!!!

Proof is in the pudding, like when you spell 'correctly' as 'coreectly'.
Should we post the list of all the words you have mispelled again
two-test. It is rather long.

So where is it again on the FCC website we can see proof of this 2nd
Class Radiotelephone ticket you claim to hold? Care to provide the URL
two-test curtains boy?

Apparently you must want "affrimative action" for your obvious
mental handicap.
Retards like you always want the standards lowered, when you are
too lazy and stupid to pass the current requirements.
Grow up fat boy, and do something that requires effort in your
life. Then you wouldn't have such
low self-esteem. Being drunk, fat, and stupid is no way to go
through life.

And what is "eleminates?" Is that what the DNA gene pool did you
yours, "eliminated" your defective DNA?
Because you are so inferior in every way. You want the standards
lowered because you can't match them.

> Then I can just send in an FCC

You can't even spell "eliminated" coreectly, you could be hardly
ever expected to actually follow FCC directions.

I doubt it. I bet it takes you less than 60 seconds in any
conversation wherein you think you're not getting your way to resort to
the kind of language you let fly in here.

Which is probably why you're finishing up your "college" on-line
over this summer rather than by the deadline that's already passed.

> > Just how many "fans" do you think you'll create by mimicking

>
>The ARRL has fought and continues to fight to protect our spectrum,
hardly
>the action of a "mutual admiration society".

Tsk, tsk, tsk..."protecting [your] spectrum"...

The 40 meter issue then sounds like the "24 years war"
in "fighting to protect" since it went UNresolved from
1979 to 2003...

Look at 60 meters...ARRL "fought" to get FIVE
CHANNELS?

Dee, you did NOT address the main point: ARRL is NOT
"representative" of the MAJORITY of licensed U.S.
radio amateurs...by anyone's count, including the
demographics published by the ARRL itself.

> They might be able to do a
>better job if some of you non-members would get off YOUR high horses,
join
>the group, and start working towards what you would like to see them

doing.

Oh, my, the LECTURE on How To Behave again. Tsk.

>So long as you stay on the outside, they have no reason to represent
you or your views.

As long as the ARRL does LITTLE to attract Technician
class licensees, it will REMAIN the "mutual admiration
society" seen by SO many others.

>You obviously have not investigated their various classes for all
levels of
>interest in areas of ham radio activity such as the many emergency
courses,
>etc.

Tsk, tsk, tsk. YOU "obviously" have not investigated
what the ARRL is NOT doing for the largest group of
licensed U.S. radio amateurs. Why else would there be
such enmity by so many?

Marie, are you saying that eating cake is BETTER for
all than bread? [don't lose your head about that]

> It is all too apparent that you speak from preconceived notions and
>haven't bothered to get involved.

Tsk, tsk, tsk. My "preconceived notions" are the
result of about 55 years of observation, talking to
many other radio amateurs, seeing/hearing what others
have to say, etc., etc.

There's NOTHING "preconceived" about the MASS opinion
that EXISTS.

> You simply sit there on the outside and whine and complain.

Shut them out if it disturbs your royalness. Can't
have you Elitists getting all hot and huffy about
the masses out there.

>You want it to be different? Get in there and do the work to change
it.
>Oh, that's too hard you say.

Tsk, tsk, tsk. Now you are getting a mite hostile.

ARRL is IN CONTROL of what the ARRL DOES...and, by
all the possible objective observation, the BoD acts
like they are the Elite who Know What Is Good For All
...because that is what the BoD likes.

> Then you are just a parasite waiting for some
>one else to do the work so you can benefit without having contributed.

Tsk, tsk, tsk. Now you ARE getting hostile!

Ooops, I forgot...the Elite KNOW What Is Good For
Everyone! All should OBEY the Elite...

How does the Elitist position of the ARRL "encourage"
anyone to enter amateur radio? Learn morse code?!?

Dee...I was WORKING IN HF 52 years ago and NEVER had
to know any morse code then, nor in all the years
that followed in my engineering career. In EVERY
other radio service in the USA, government included,
morse code is GOING or was NEVER CONSIDERED for ANY
communications. The ARRL still champions morse code
as the "requirement" for "working below 30 MHz" as
a radio amateur.

Hello? Can you NOT recognize how OUTMODED the notion
of "requiring" morse code testing as a "qualification"
is?

If you can't, then you have NO business of being so
Elitist and Knowing What Is Good For All.

>> Face it boys. the ARRL blew it BIG TIME when they had
>> the chance to eliminate the dammed Code for HF way
>> back in the early 1980's with the "Plain Language" rewrite
>> of the amateur rules. Today most of the ham fossils who
>> opposed this are either in their graves or waiting to expire
>> and we're stuck with an obsolete hobby as a result.
>
>Do a better job of reading up on history.

Dee, YOU "read up on history" and be sure to include
all the recent documents from WRC-03. :-)

> The ARRL had NO chance of
>eliminating the code in the 1980s as the US was signatory to an
>international treaty that mandated code for HF privileges.

That is SUCH crude nonsense that I almost want to use
Hans' method of dealing with it...i.e., "hurling it aside
with great force!"

Hello, Dee, are you with the sentient beings again?
Did you think the revision of S25 (almost entire) was
"done by the ARRL" at Geneva in 2003?!?

Dee, the ARRL got aced out in 2003 because of pressure
mainly from their "buddies" at the IARU and the largely-
extra-class-movers-and-shakers at No Code International.
The ARRL OPPOSED almost ALL the revisions that made S25
MORE modern for the international community of radio
amateurs. The revisions were done by VOTE...of the
INTERNATIONAL radio community.

Back two decades, the ARRL was OPPOSED to CHANGE. They did LITTLE if anything to effect change. WARCs didn't bring it up because the ARRL was "fighting" to preserve the status quo...to stop change anathema to the elders at the Newington admiration society.

The International Amateur Radio Union finally got tired of that stick-in-the-mud, stick-it-up-somewhere attitude of the ARRL and began their OWN lobbying for changes in S25 about the year 2000. ARRL could have joined with the IARU to be a part of PROGRESSIVE LEADERSHIP. It did not. The ARRL continued its opposition for at least three years into this new millennium. They still can't take a positive position, remain in the ineffective We Know What Is Best For All vacillating state.

The ARRL could have taken a position of MODERN LEADER-SHIP a decade ago. They could have pressured the administrations to change S25 THEN. They didn't do that. They haven't done that since. They've only promoted themselves, their products, and their olde-tyme members. The olde-tymers are pleased. THEY "know what is good for all" yet they don't. They don't understand that such Elitist tunnel-vision viewpoints do NOT attract newcomers, nor does it do any good for all but the olde-tymer minority.

> I can see that this is going to go tit-for-tat ad nauseum, so
I'll
>just add my last word on this and be done with you for now.

Tsk, tsk, tsk, stebie...you don't GET the last word...

> You have the information you asked for.

WE don't, you self-described "royal."

> After you finished
>choking on the fact that I gave you the information, you then demanded
>"documentation", alledging that I've demanded the same from you.

Tsk, tsk, tsk. Another LIE.

Stebie, anyone reading here can SEE what you wrote,
how you phrased your DEMANDS and how you phrased
your BRAGS/LIES. No PhD needed to realize it.

>Obviously a tactic to just drag this out.

What "tactic," mighty warrior of "seven hostile
actions?"

YOU have kept all this going ad nauseum, ALWAYS on
the ATTACK...and generally ALWAYS insulting.

> I've not...I've asked for any PROOF that any of your claims or
>assertions were valid. ANY kind of verifyable reference...

Poor baby, still under the delusion that you are
given Special Dispensation from sinning?

What kind of "word" of "proof" do we have from
stebie? CLAIMS, just CLAIMS...everything else is
"in your wallet."

"Seven hostile actions:" Where and When?

You CLAIM it, but haven't PROVED it yet.

The "in-charge non-commissioned officer" of a
MARS station? TWENTY-FOUR YEARS AGO and under
a GENERAL?!? Get real. Given the rapid
movement of military units around the globe,
there will NOT be any "records" to "verify"

your claims...certainly NOT logged into the
national archives in St. Louis.

How about that medical discharge you once
CLAIMED...the one that suddenly became an
"honorable" when you took heat for that
CLAIM?

How about that CLAIM that you could "just pick
up a telephone and have Brian 'picked up' by
authorities?" You know, the one where you
also CLAIMED you "had the 'medical qualifications'
for?

BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHAHAHAHAHAHA!!!!!!!!!!!!!!!!!!!

Tsk. You should be working for an insurance
company as a CLAIMS ADJUSTER!

> Not a word...

Absolutely TRUE! NOT A WORD of PROOF from
stebie.

Not ONE single tangible PROOF of anything, not
a digitized certificate, NO valid references,
just a lot of BULLSHIT from the CLAIMSman.

> In the case of your illegal bootlegging from Somalia, I asked you
>to just provide the name of the officer who allegedly gave you
>permission to operate there...Nothing.

Stebie, "JAG" has QUIT the TV broadcasting
scene. YOU do NOT have ANY AUTHORITY to
CLAIM about "investigating any 'illegal
radio activity'" BY THE MILITARY IN A
FOREIGN LAND.

All anyone here has for "illegal radio
activity" is a bunch of HATE from a couple
of self-described "radio cops" who think they
are some kind of "agent" for the FCC...OR the
Department of State.

> You've been asked to validate your assertions about "unlicensed
>devices" having a "major roll in emergency communications", but you've
>balked at that too...Not a URL...Not an article...not one thing.

Poor baby...still under the notion you have
Special Dispensation for sinning? [see above
for the CLAIMS]

Poor stebie is livid with rage at being challenged
in ANYTHING TO DO WITH STEBIE'S *OPINIONS*, thinks
everyone against him MUST produce tangible proof
for any opinion opposite to stebie.

> Your most recent rant about ARES being overblown and unlikely to
>respond to any significant emergency has been proven wrong over and
>over for the last several weeks with one news release after another...

Poor deluded, brainwashed stebie...thinking that ALL
emergencies are handled ONLY by amateurs. He's been
given many facts by several, links included, going
back 11 years, and still can't admit that the REAL
emergency communications is NOT handled by amateurs.

> And that "...they've chased all the Techs away..."
>silliness...?!?! Who chased who away? In the last 10 days of casual
>operation on 2 meter SSB alone I've worked 11 stations.

All eleven? A big Ben Stein '...wowwwww....'

Tsk. A quarter million Technician class licensees
in the USA and stebie uses CLAIMS of ELEVEN to show
something. [what he shows is quite obscure...except
an almost total inability to REASON correctly]

> Six of them
>were Techs. I didn't go in to asking them if they'd passed the
code..I
>didn't even ASK them what class of license they had...Just got it from
>QRZ.

Tsk. Stebie is as 'believable' as a used car salesman.

> So...here we are...You've got my former USMC command, the dates,
>the places, former MARS calls, etc...All data you can verify with
>independent resources.

Tsk, tsk. Not ONE VISIBLE form of proof. A bunch of
stevie CLAIMS.

But, it's all stebie got, them CLAIMS. Eyewash.
Bluff, inuendo (like he's trying to stick something
there). NO VISIBLE PROOF.

> And from you..we have...
>
> Nothing.

From stebie: NOTHING. Hot air. CLAIMS. Can't
describe a single piece of military communications
equipment by name, nomenclature, where used on
what...doesn't know the procedures...doesn't know
the military laws governing authority in foreign
lands that he's never been in...tries to describe

others' military occupation specialties CONTRARY
to the entire military of the United States.

Stebie try to be guru, is hardly even a grunt.

Stebie try to be judge, is not even a jury or a
court clerk.

Stebie try to be hot dog, is only stale bun taken
from another.

> Spin your way out if that, if you'd like, but you're boring me,

Like anyone gives a shit. :-]

Stebie, GIVE IT UP. In radio you are a NOTHING,
just another bragging ham who has NO REAL knowledge
of communicating, a poseur who wants to be "big" on
word of mouth and some certificates hanging on the
wall...but with enough hot air to life a large
zeppelin.

DO try to NOT make EVERY thread in here all about
YOU and how you are "better" than anyone. You ain't.

GLENDALE, WV: The FCC requested July 11, 2000, that Roger L. Wiseman, KC8JBO, retake the General examination elements under the supervision of an ARRL-VEC volunteer examiner team. Wiseman must appear for retesting by September 11, 2000, or his license will be canceled. Applicants appearing for re-examination are granted an Amateur Radio license consistent with the elements passed. The FCC had written Wiseman on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" between Wiseman and another licensee that included allegations of interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth invited the two licensees to contact him to discuss the matter. Additionally, the FCC had sent Wiseman a Warning Notice last November in response to allegations of deliberate and malicious interference on 20 meters.

GLENDALE, WV: The FCC sent a Warning Notice November 9, 1999, to General licensee Roger L. Wiseman, KC8JBO, citing evidence that the licensee had been "deliberately and maliciously interfering with the radio operations of other licensed amateurs" on 20 meters. "This interference has occurred at various times in the last several months and includes broadcasting music and other unidentified transmissions," said a letter from FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth. Hollingsworth warned that continued operation of the type described could result in a fine or license revocation proceeding, and he requested that the licensee contact him to discuss the allegations.

Nice try, Lennie.

I gave you the unit, date, time and place. Nothing there
inaccurate.

And no where did I say I was working directly for a General
officer.

Please quote?

> How about that CLAIM that you could "just pick
> up a telephone and have Brian 'picked up' by
> authorities?" You know, the one where you
> also CLAIMED you "had the 'medical qualifications'
> for?

Nice try again, Lennie.

That's not what I said...But go right on ahead and try to run with
it.

> > In the case of your illegal bootlegging from Somalia, I asked
you
> >to just provide the name of the officer who allegedly gave you
> >permission to operate there...Nothing.

> radio activity'" BY THE MILITARY IN A
> FOREIGN LAND.

Nothing was said about investigating military operations in a
foreign land, Lennie.

The topic, Lennie, was not other radio services.

It was strictly about Brain's cliam of ARES not being what has
been stated.

> > And that "...they've chased all the Techs away..."
> >silliness...?!?! Who chased who away? In the last 10 days of

It does show something, Lennie.

It shows that I have the means from which to make an INFORMED
opinon on the matter.

You, however, do not.

> Stebie, GIVE IT UP. In radio you are a NOTHING,
> just another bragging ham who has NO REAL knowledge
> of communicating, a poseur who wants to be "big" on
> word of mouth and some certificates hanging on the
> wall...but with enough hot air to life a large
> zeppelin.

Pretty sour grapes there, Lennie...

Not true, of course, but it makes you feel better to "diss" fokls
who DO get on the air every day from their own radio stations.

> DO try to NOT make EVERY thread in here all about
> YOU and how you are "better" than anyone. You ain't.

That's not what I said, but I guess you're probably feeling a bit
inadequate inasmuch as you are constantly exposed for the inept, poorly
informed cretin that you are, Lennie.

Can't be helped, though...You keep doing it to yourself.

You'll be done when I say you're done, Silly Gunny.

> You have the information you asked for.

I do not. As I've explained to you for the past three weeks, your say so is no longer and never has been adequate for documentation purposes. I only accept authentic documents as your word cannot be trusted. Why can't your word be trusted? Easy: You Lie!

Post original, authentic documentation of your claims of MARS Service.

That will be all.

Silly Gunny, I won't accept your say so. You need to show an
authenticate document with your name on it, appointing you to the
position of "ANCOIC MARS" with a duty location of Okinawa. Got one?

Any other correspondence from that claimed activity? Copy of MARS
license? Logs? Anything? Hello???

Don't think so because it didn't happen. Hi!

And so they still search for the answer. The answer will only be
meaningful if they work hard for it (uphill both ways). Sufficient
time must pass for them to forget what you or I have said, and for them
to arrive at the answer independantly.

To borrow from Edison: 100% perspiration, 0% inspiration.

Poor Gopher face, has that obsolete license. Has to talk on 40
meters along with the Shortwavce broadcast stations drowning his
piss-willy signal out. Poor Gopher Face Butt Cornholer, he
couldn't spell "loser", because he snorted so much cocaine and
followed it up with a vodka chaser. Tell us Gopher face, why'd
your wife walk out on you?
BWHAHAHAHAHAHAHAHAHAHAHAHAAHAHAHAHAHAHAHAHAHA!
Were you such an underachiever with her, too?
>

This is TOO good to pass up.

Wogie...your wife left you high and dry. She walked out on you and took her
kids with her.
If fact, Wogie, there are those who say that her kids were hers by a
previous marriage and were
NOT yours.
Story goes, Wogie, that she walked out on you because you were a moody
nutcase and you treated her kids as if they were second class citizens. You
just could not get along with her or the kids and were mean to them.

Then she got the house, the kids and the other belongings and you had to
move up north with Mommy.

Cmd Butt Cornholer <m...@this.ten> whined:

> BZZZZT!! Wrong!!! There is no exam for a restricted
radiotelephone
> operator permit.

Now. But Roger took and passed a 2nd Class Radiotelephone in
1976. In front of an FCC examiner. The guy with the horned
rimmed glasses, crewcut, white shirt and tie and black pants.
The one who if you didn't follow their instructions exactly
would terminate your exam. The database clearly shows that the
Restricted Radiotelephone Permit was granted in 1981. You should
brush up on your reading skills.

> It isn't even a license (whines and excuses)

Sort of like your obsolete Advanced.

\

Sure thing, Wogie. You sat down in front of an alleged FCC rep. and filled
out a questionnaire.
Big Deal.

You did nothing that any CB'er could not have done, so what is the reason
you feel it is such a mark of excellence? There are literally thousands of
those Phone licenses floating about, so you did nothing extraordinary.

Oh, wait, you DID do something extraordinary. You rankled Riley
Hollingsworth several times and he sent you, out of the goodness of his FCC
heart, an "invitation" to retake your Amateur Radio tests.

He must think very highly of you to have taken time out of his busy schedule
to have personally sent you Retest Invitations.

Riley likes you. I can tell.

(next up...discussion ref. the many ISP's you have lost)

Hi All,

Seeing as how there's finally something worthwhile to chime in on here (a refreshing break before getting back to the mindless flame wars that have characterized this NG for the last year or two), I'll de-lurk and contribute my $0.02 on this subject, in the hope that it might turn out to be worth at least $0.02.

In the comments that follow, I've quoted comments from several other posters as well as from Hans' original post, so as to get all my comments into one place rather than having them fragmented in several replies throughout the thread. As a result, this post is rather on the lengthy side, but...well, like i said, hopefully it's at least worth the $0.02. Here goes:

On Tue, 03 May 2005 14:21:48 GMT, "Kï¿½HB" <groupk0hb@earthlink.net> got us started with his now well-known (to regulars anyway) PBI:

>The growth in numbers of Amateurs over the past decade has been overwhelmingly
>via the Technician license. This segment of the Amateur population does not seem
>highly attracted to ARRL membership, nor affiliative with the "national
>association" nature of ARRL.
>
>Interestingly, however, these new Amateurs are "local joiners". They attach some
>importance to public service communications events such as disaster drills,
>SkyWarn, flood relief, marathons, parade communications, and similar functions
>of a local nature. Interestingly, even though their on-the-air participation is
>limited, they represent a significant portion of the crew at Field Day, hamfest
>staffs, and similar "local" events. They are also well represented on the
>rosters of many local clubs.

I think it's worth noting here, the old adage about birds of a feather flocking together. It's been my experience that people join the local ham radio clubs for a variety of reasons, just as they get involved with amateur radio to begin with for a wide variety of reasons. When you bottom-line it, though, a local club remains a sure-fire way for a newcomer to meet others who share at least some of their interests in amateur radio. For many it's a way of introducing themselves to the other hams in their area, sort of like, "I've got my license and I'm here now, so when you hear me on the local repeaters you don't have to worry that I might be a bootlegger."

When they get to the local clubs and hook up with other newcomers (and the observation that the vast majority of newcomers to the ARS enter via the Technician route is dead on...that's why it's called the "entry-level license class"), they find the other Techs basically

doing the only things they're permitted to do, absent any meaningful
HF privileges unless they pass a code test - they're doing Skywarn;
tactical comms for parades, bike races, marathons; Field Day, etc.

Another old adage: When in Rome, do as the Romans do. Thus, it's no
surprise that many new Techs join in these activities. This is the
same route I myself took when I entered into the ARS back in '99 and
I'm still active in these pursuits now, except it's in a leadership
role rather than as one who is learning the ropes, so to speak.

>Following is a PBI (Partially Baked Idea) to favorably position ARRL (and
>Amateur Radio in general) with these newcomers to our hobby.
>
>
>I propose that the ARRL BoD consider an initiative to attract these newcomers to
>an interest in ARRL by establishment of a new "Department of Community Support".
>
>
>The mission of this department of ARRL would be to organize, train, support, and
>nurture a system of tactical communications teams on the LOCAL level. I use the
>term "tactical" as opposed to "emergency" intentionally to broaden the scope of
>the mission to include a wide variety of community-level communications needs.

Mike Coslo contributed on this that many of the people he can count on
for such activites are Techs, and added:

>"That is a good idea. Tactical communications would serve as a good training ground."

For what it's worth, I concur. In fact, I think tactical
communications is a skill that is too often ignored as many public
service and emergency communications groups opt for developing
proficiency in formal traffic handling - which is a valuable skill in
the right circumstances, but unless a group is located somewhere that
circumstances warrant the frequent use of formal traffic handling
(like being somewhere that often gets smacked by earthquakes,
tornadoes, hurricanes, and other major disasters that result in
relatively long relief efforts and a lot of health & Welfare
traffic)...well, many groups will only rarely need formal traffic
handling skills. Tactical communications skills, on the other hand,
are something I think any such group is going to always need,
especially if they are doing parades, races, etc.

Incidentally, I personally use the term "public service
communications" to distinguish this type of work from the more
commonly thought of "emergency" communications that is used during and
in the aftermath of some sort of disaster.

At any rate, to continue...

>This "department" would be outside the current Field Organization, and given
>VISIBLE and COMMITTED volunteer leadership at Director or Vice President rank.
>
>

>Did I hear someone muttering "Isn't that what ARES is all about?" or "Our
>current field organization already provides for this." Good points -- ARRL
>already has some of the pieces in place, and it looks good on paper.
>Unfortunately these "pieces" tend to be scattered around the ARRL organization
>and are not linked into a cohesive program. Support and leadership
>responsibility, from Newington all the way down to the local level, is often a
>collateral duty and the attention level is spotty and often diluted by competing
>responsibilities and personal interests. Leadership attention at the SM level
>is widely variable, and SM's have a diminished mindshare of the general
>membership by the unfortunate H.Q. decision to remove "Section News" from the
>national journal of our Association.

On this passage, Steve, K4YZ, commented as follows:

>First of all, there's already flexibility written into the ARES
>program to allow for it's implementation based upon local needs or
>concerns. The needs of emergency planners in Plymouth, MN or
>Winchester, TN are going to be different than those of New York City or
>Miami, FL.

As I see it, Steve, the problem with this is that in many (most?) areas, the local ARES group wears two hats, serving also as the local RACES group, and because FEMA guidelines for RACES call for its implementation at the County level, there's often a lack of ARES/RACES groups having established relationships with local governments (city, town, village, etc.). That is something that, as a result, often falls to the local clubs - but ARRL sees it as an ARES function and local clubs looking for support for their efforts in this area end up getting referred to the local ARES leadership...which is often hesitant to help because they see the clubs' efforts as undermining their own.

Steve continued:

>I don't see how a nationally directed program could possibly do
>anything more than appear to be micromanaging.

Again, admitting that their is a niche for local groups to be involved at a local level and offering some support to them independent of the ARES (or ARES/RACES) mechanism would not be micromanaging. Often there are entirely different missions involved, and even when the missions overlap, again it does not hurt ARES all that much for the local clubs to have a relationship with a city government's disaster preparedness officials in a county where the ARES group has a relationship with the county's disaster preparedness office.

In other words, this would eliminate the "turf war" mentality that often crops up when the local clubs, or other groups independent of ARES, start to actually succeed at what they're doing.

Steve went on...

>Secondly, the ARRL Special Services Club's program already offers
>assistance for helping to manage some aspects of club activities,
>offers of sponsorship, etc.

> What they (the ARRL) COULD do, without creating a whole new
>"branch" and field directorship with it, would be to start spending
>some more money to get more recruiting materials, including TV/Radio
>"commercials" into the field. They could "regionalize" the materials
>with pictures of local clubs, landmarks, etc in them to help "identify"
>them to the target audience.

To this I say, "Bingo!"

As one of two co-coordinators of the public service communications
team sponsored by a local SSC, I know from personal experience that
one of our biggest challenges is just letting people know we are here.
This is exactly the kind of support I had in mind above.

OK, back to Hans' original PBI:

> Without dwelling overlong on the
>shortcomings of the current situation, I think we can all agree on four points:

I'd settle for seeing everyone agree on ONE point. Four is really
asking a lot. But... <grin>

>1) A focused national program with Director (or higher) level leadership would
>have more impact than the current fragmented attention to "local" Amateur Radio.

I'd say that depends on whether the program deals directly with
amateurs operating at the local level (in which case I tend to agree),
or attempts to use the existing field organization to accomplish its
goals (in which case I have serious doubts, mainly because I'm
convinced that in many areas the existing field organization is so
completely out of touch with "local" amateur radio as to render any
meaningful progress in a project of this nature highly unlikely).

>2) Such a program, if successful, would give Amateur Radio valuable credibility
>in the regulatory and legislative arenas, and with national organizations like
>Homeland Security, FEMA, and the Red Cross.

I'm not so sure about this. As far as FEMA is concerned, and FEMA is
part of the DHS, they're primarily looking at RACES, and their
guidelines call for implmentation at the county level. To me, "local"
means this city, this town, this village. In some areas, county-level
might work. In my own area, I'm quite sure it would not. As for the
Red Cross, in my area the two Red Cross chapters are served agencies
of two different county ARES groups. As for the group I co-coordinate,
we have a relationship with a city that is served by the Red Cross
chapter that is based in a county whose ARES/RACES group has them as a
served agency, but it is not the same county our city is in!

>3) Such a program, if successful, would serve to elevate the perceived value of
>Amateur Radio with local civil authorities, perhaps softening the effects of
>issues like tower ordinances, etc.

I'm in complete agreement.

>4) Such a program, strongly identified with the League, would provide a
>membership "attractor" to those classes of Amateurs that are now only locally
>"affiliative". Gaining some traction into this huge reservoir of
>potential members would be a godsend to the health and growth of ARRL.

Again, I'm in complete agreement.

>What would need to be done to implement such a plan. Here are some "off the top
>of my head" thoughts.
>
>-- Define the mission and organizational structure.

You've already defined the mission quite well. The organizational
structure definitely needs to be defined.

>-- Many of the people (SEC/EC's, etc) are already in place. The organization
>structure would need to include a short chain-of-command headed by a focused
>leader at Newington.

If you're going through the SEC/EC's, you're going through ARES. In my
opinion, this is not going to work in many areas, including my own.
This needs to be totally separated from the existing field
organization, in my opinion.

>-- Move Field Day and SET into this organization as "their" events.

This is throwing the new dog a bone...however, I think the local
amateur radio clubs that sponsor public service communications groups
are probably already active in Field Day and already consider FD to be
one of "their" events - I know we do. Much less so with SET, which is
the "other" annual ARRL-sponsored EmComm event, and (in this area at
least) gets far less attention than Field Day.

My feeling is that Field Day and SET are fine the way they are, and
let both the ARES groups and the new local public service
communications groups participate.

>-- Devise a recognition vehicle to give visibility to noteworthy work by
>individuals and teams in this Department. This visibility (QST?) should extend
>outside the organization to the "general population" of hams as a recruiting
>tool.

You've already noted the boneheaded mistake the league made in
removing the section news from QST - undoing that mistake would be a
good start.

The user here who goes by Billy Beeper has commented:

>The ARRL has made an effort to get web pages up for each division and
>section. That is the method they use of distributing regional and
>local information.

It's easy to forget that not everyone has Internet access. As far as
the section news on the net is concerned, I'm subscribed to the

section news summary and am supposed to receive it monthly via e-mail, but have received nothing since December. If they are going to call QST "The Official Journal Of The ARRL" then the section news should be in each month's issue, period. That's the only way of insuring that it reaches each and every member. ARRL membership is about ham radio, not about the Internet. When they have a magazine that is sent to each and every member on a monthly basis, relying on the Internet to distribute regional and local information is just plain bullshit, IMO.

>-- Establish a new periodical (like NCJ for contesters and QEX for
>experimenters) to help build a "sense of community" among the participants.

I can see another magazine like QST, full of advertising, with a little note at the bottom of a page somewhere inviting you to visit the ARRL website if you want anything really useful. In which case, thanks, but I'm going to pass. There's also the problem of how to get the word out about this new periodical to its target audience. Since the audience you want to reach isn't ARRL members, talking about it in QST isn't going to cut it, because your target audience isn't receiving QST and isn't reading it.

>-- Educate local civil authorities about this organization, their capabilities,
>and how to best interface with them to take advantage of their capabilities.

Definitely. This is exactly the kind of support that is lacking now, in terms of what the local clubs are able to do in this regard.

>In order to build some critical mass and gain traction, the outreach effort to
>build these teams should not initially stress ARRL membership for "grassroots"
>level players, but rather depend on a strong ARRL identity to build esprit de
>corps and lead to an attitude of support and affiliation with the parent
>organization. Perhaps appointment to team leadership positions would be
>conditioned on ARRL membership.

Well, first of all, I think you produce a more effective team if you base appointment to leadership positions on ability rather than on what cards one does or doesn't have stuffed into one's wallet.

Beyond that, though, if you start to tie in ARRL membership, at that point, with many Techs you crash head-on into the other issue that a couple of guys here have already raised, namely, the perception held by many people about the ARRL and the Morse code issue. Based on what many people have said to me in eye-to-eye discussions, this issue is one of the major reasons why a lot of people choose not to join ARRL.

Len Anderson commented with respect to the ARRL position on code testing over the years as follows:

>The ARRL could have taken a position of MODERN LEADER-
>SHIP a decade ago.

Actually, the ARRL could have taken a position of modern leadership THREE decades ago when the mid-1970's Communicator Class proposal was

out there. Instead, the League chose to register strong opposition to the idea of any no-code license class, delaying the introduction of a codeless license class for another twenty years - something that many have never forgotten, myself included.

In fact, personally, I never will forget it.

Oh, yes, I've gotten over it - I'm now an ARRL member, I'm a duly appointed (by the SM) PIO in this section, and have a leadership role in an ARRL SSC here - but a lot of guys my age would have been involved in amateur radio twenty years earlier, and many retain that *perception* of the League today despite the current ARRL proposal for retaining the code test only for the Extra class license. Whether the perception is accurate or not, it is the *perception* in the minds of Tech licensees that matters, especially NCTs.

If someone sees ARRL as acting in opposition to their best interests, they're probably not going to join ARRL...and this is how many hams have felt about ARRL for years.

In this respect, Len and Billy are quite correct - the ARRL has shot itself in the foot more than once on this issue, at least with respect to the hams who would otherwise have benefitted from reduced emphasis on code proficiency in the testing procedures.

How they go about fixing that now, I don't know. For one thing, they should push hard for and hope for the FCC to get off its collective duff and allow Techs some meaningful HF privileges without a code test. Then, they need to take advantage of the opportunity this will present by providing some support for the newcomers once they start to exercise their new privileges. Sponsoring a new contest aimed at the new operators might help. Incorporating a new award perhaps - or maybe bring back RCC and...what was it called, the Friendship Award (where you tried to get a contact with callsigns ending in all the letters from A to Z)? But they've got to do something to offset the perception many people have of the League having crapped on no-coders for thirty years if they want to ever see those hams joining ARRL in any significant numbers.

>Obviously a lot of this proposal needs a great deal of "fleshing out" and
>refinement, but I present it in the spirit of a "topic for discussion". I'm
>sure that the minds gathered here will not be bashful about improving my PBI.

Hans, anything would be better than the endless flame wars in here, but you've actually come up with something constructive that just might be a good start toward doing something positive for the ARRL and for the ARS. Here's hoping it works out!

to
> worry that I might be a bootlegger."

Exactly...And that's where a "national" organization can
help...Recruiting materials, media bites, testing/training materials.

It should be up to the "locals" to deceide where the focus of the
organization is going.

"...absent any meaningful HF privileges..."

Sounds like a set-up for the "If you don't have HF you're not a
Ham" argument, John. Not only are well over 90% of all Amateur
allocations above 50Mhz, so are most ACTIVITIES above 50MHz.

I went on up to Extra thinking all the activities were on HF only
to find I keep pulling back to 50Mhz and up for a lot of my hamming
activities.

I think the "failure" comes only from thinking that there's
"nothing to do" above 50Mhz. That's just wrong.

> Another old adage: When in Rome, do as the Romans do. Thus, it's no

And it's in fellowship that we learn more effectively. My only
"problem" with clubs is that they often try to be too many things to
too many people with too few resources.

> >"That is a good idea. Tactical communications would serve as a good

I agree on the use of those skills, John...and those are some
roots we shouldn't get too far away from.

We've done exactly that here in Tennessee CAP, and now we are
"re-energizing" those basic communicator skills along with the techie
web-rat things. We're creating a "Communications College" to start
from Ground Zero and re-establish basic communicator skills.

My experiences here in TN are that all those hats are being worn
by ARES now. certainly not in all areas, but RACES as a seperate entity
is dwindling. Since the Feds have actually pulled the rug out from
under a lot of the RACES regulations the lines have blurred and one hat
seems to fit better!

I think a lot of this is being answered by having the EC's or
DEC's oversee the ARES groups and coordinate the ARES representation
with the various EOC's.

The folks in the EOC's aren't concerned with where the operators
come from or what club sponsors them...Just as long as that cah do what
they say they can do.

BTW...Part of Tennessee's Homeland Security implementation was to
issue a funded mandate that all hospitals within the state have
operating Amateur Radio facilites. We have a short tower with the
V/UHF antennas installed already.

Sorry, Todd..you said "graduating"...The end of the semester is not
"graduating".

Talk to Lennie about school...He managed to turn a 3 year diploma
program into a 14 year project. I am sure he can offer you some
pointers on how to be a career undergraduate student.

Woger believes his Restricted Phone Permit is some sort of technical credential, similar to his belief that a DeVry "masters" degree earned via correspondence is some sort of academic credential. For the former, you fill out a FCC form, and for the latter, you complete ten simple open book "quizzes" and mail in your payment, sort of like a diploma mill.

ROTFLMAO!

An encyclopedia? Considering the amount of stuff known today,
that ain't bad. As an electrical engineer, that means that
I don't know much if anything about medicine, law, or
finance. That should fill that encyclopedia. And then there's
lots of foreign languages that I don't know. I doubt that there
is anyone out there who doesn't know an encyclopedia's worth
of knowledge...

People who have a FCC Restricted Operator Permit and a masters
degree from DeVry, earned via correspondence, are generally
considered to have an encyclopedia's worth of knowledge. Should
you doubt that, just ask Woger, he will be glad to tell you. Of
course, you will have to first filter out all the childish filth & profanity
that normally accompanies a reply from Roger.

>
>And so they still search for the answer.

So far, all I see is RATIONALIZATION for the
alleged efficacy of morse code. LOTS and LOTS
of old-style BS that went invalid around 1950
or so.

For the BRAINWASHED, their "search" is ONLY
through the olde-tymer's Rah-Rah on how "CW
gets through when nothing else will..." :-)
They can't think any different...the conditioned
thinking (fancy word for brainwashing) is too
strongly embedded.

> The answer will only be
>meaningful if they work hard for it (uphill both ways).

Oh, it's MUCH more than that! Example -

"Work HARD [at ham radio] to show DEDICATION and
COMMITMENT to the 'amateur community!'" :-)

That's a typical conditioned thinker output,
imagining they are part of some "service" to
the nation, a "corps" a la some military force.

It's all ARTIFICIALITY, this group-think. Amateur
radio is a HOBBY, a recreational pursuit involving
radio, done for personal pleasure. Brainwashing
(by guess who) has conditioned the mental activity

of many that it is much more than a "mere" hobby.

So...the conditioned thinkers allow themselves to
be led into an imaginary state of "importance"
and "service" to justify their having fun with
their radio sets. They perceive themselves as
"better" than other humans/citizens and are
therefore "superior." [some NEED that self-applied
tag of "superior"]

> Sufficient
>time must pass for them to forget what you or I have said, and for
them
>to arrive at the answer independantly.

Not for those morsemen who won't give in until the
morse key is pried out of their cold, dead fingers.

Some just cannot go along with reality.

>To borrow from Edison: 100% perspiration, 0% inspiration.

Well, not quite that exaggerated on values... :-)

But darn close! :-)

>> Does definitely NOT work for those olde-tyme
>> morsemen locked into the standards and
>> practices of seven decades ago...they're
>> still scratching their balding heads wondering
>> why the rest of the radio world gave up on "CW."
>
>Maybe one day, once they forget that you told them why already,
they'll
>arrive at that answer independantly, too.

I'm basically an optimist that a few will see and
understand. Unfortunately, too many are stuck in
their own ego-boo (self boasting) of "excellence"
at morsemanship that they cannot possibly see
the rest of the world.

The rest of the radio world HAS given up on morse
code. None of them in that great big outer world
"needed to learn CW" in order to show them it was
too slow, too error prone to be worth applying to
REAL communications. Once, long ago, when there
was NOTHING ELSE in radio, morse code was good.
None of the morse proponents were ever alive in
those long-ago days so they can't speak of personal
activity of such morsemanship.

Amateur morsemen just cannot be convinced of any
of that. Most live in the fantasy that this new

millenium is still using the standards and practices
of the 20s and 30s..."keeping the 'tradition'" and
all that while they refuse to learn what today is
all about.

Several things are operative with these morsemen:
The strongest of them ARE skilled at morsemanship
and they have a NEED to be recognized for that...
much more than just being satisfied by themselves.
They MUST have many giving them honor and respect
for their accomplishments. They will prioritize
their skill as "above" any newcomer and thus will
demand adherence to what they had to meet long ago;
forget trying to change regulations with them.
Some are just so brainwashed that it may be beyond
medical science to get them to see reality.

Mix all of those together (in various parts) and
there's the "we're better than you 'no-coders'"
nyah-nyahs because they fancy themselves as "REAL"
hams. Homeboy stuff, "turf" staked out, and da
boys in da 'hood are ready to FIGHT all that don't
agree with their "superiority."

So, we've got FLAME WARS in here.

Not only that, we get re-runs of tired old cliches
or the anonymous middle-schoolers who love to
be kids again so they can cuss out others with
NO sense of civility or comportment. A few of
those (such as Barnabus Blowhard...or whatever
IT is) making like some not-quite-funny Miss
Manners chiding all the other children. :-)

>> Well, they have their imaginary universes
>> locked up in their heads. They seem to be
>> happy in their status quondam...
>>
>> LenAnderson@ieee.org
>
>I give up.

Never give up! :-)

Of course, for those of us doing OTHER things
(like trying to work with Win32 APIs and actual
electronic hardware designs NOT written up in
QST), there isn't enough time left to play with
the adolescents "serving" in the mighty fifth
branch of the military...the Archaic Radio-
telegraphy Society (ARS), a "service to the
nation!" :-)

I salute all them...one finger at a time...

LenAnderson@ieee.org

Have you noticed how the majority of participants in non-repeater
VHF/UHF/and up activities are NOT the Technicians. Just get on during the
ARRL VHF contest and count the percentage of stations that are General class
and higher that you end up working.

My OM is a fan of the VHF realm and has made presentations to the club on
what you can do in these area of the hobby. The result? Well maybe 2 out
of 100 work satellites and SSB and another couple work FM simplex and SSB.
That's it (sigh).

That applies to amateur radio, shit for brains!
The prefix forthe serial numbers on the RP license begins with "RR," which is what was being discussed, dumbass!
But you are from New Jersey, so it only figures, you'd screw it up.

Is it that surprising, Commander, considering where he's
from...Downtown Granola City...Land of flakes and nuts.

Los Angeles is a cesspool of what's wrong with Amateur
Radio...WB6JAC, KG6IRO, W6NUT, etc etc etc... And then there's Lennie
Anderson...Everything that's wrong with radio in one soup bowl.

Much of this is due to the dumping of hundreds if not thousands of
ill-prepared if not ill-informed "graduates" of the "radio school" of a
certain well known Amateur Radio author from Costa Mesa, CA.

Many of the repeaters in the mid and late 80's were saturated with
these "operators" who thought nothing of initiating a "honey-do"
autopatch in the middle of another on-going QSO. When asked what the
heck they thought they were doing, the answer was frequently "But
Gordon West told me....".

Well if his books are an accurate indication of what he teaches, then he most certainly did not tell these yahoos they could use such poor practices. However, way too many people only half listen.

When I'm teaching, I use the "tell them three times" approach on critical items and some of them still miss part of it and/or misinterpret the material. Oh well!

I could beleive that Robeson signed up to be a MARS member and got a
callsign, but I cannot beleive that he underwent any MARS training
whatsovever. Nor can I beleive that he held a position of authority in
Okinawa MARS.

Why do I think that?

Because he has shown no knowledge whatsoever of MARS, that's why.

He suffers from Excrementia.

475. Robeson is being Dogged

Robeson is being dogged for authentic documentation of his claimed MARS activities. Much like Robeson constantly dogs other people for "proof." But he no like it no more, got tired of waking up on the floor. No thank you please...

Excrementia runs deep. Into Robeson's life is did creep...

The Northern Lights Radio Society here in Minnesota is an organization of operators who are active in weak signal (SSB/CW) work on the VHF, UHF, and Microwave bands. I'm sure your OM has heard of the club. A significant number of the members are Technician licensees.

May be different where you live, but in this area the Technicians do a lions share of the work in Skywarn, Grandmas Marathon, Twin Cities Marathon, and a host of public service events. During disaster recovery (floods and tornados) events they are major contributors of time and talent.

Contrary to common sentiment, they are extraordinarily engaged in the local ham scene and not just "shack-on-a-belt-repeater-lizards" as some like to characterize them.

The sooner ARRL membership has Technicians as members in numbers proportional to their population, the sooner ARRL will truly represent the full spectrum of amateur licensees. My PBI seeks to make that happen.

"I bet you spend your days cowering."

Roger accuses another of doing what he does best. Wogie is no stranger when it comes to cowering behind curtains.
Hiding behind curtains is how Wogie earned his nickname. Curtains Boy.

By the way, Curtains Boy. I see that somebody spilled the beans about your failed marriage and the kids that were not yours. It is amazing that any woman in her right mind would have anything to do with you to begin with. It seems that all the women in your miserable little life have Restraining Orders against you.

Thats what happens when you French Kiss the kids goodnight.

> like to characterize them.
>

The Technicians here are also quite engaged in all the public service,
community, and club activities. What the participation seems to lag here is
in the wide range of on air activities.

> The sooner ARRL membership has Technicians as members in numbers
> proportional to their population, the sooner ARRL will truly represent the
> full spectrum of amateur licensees. My PBI seeks to make that happen.
>

I thought that I had seen a statistic where close to half of the ARRL
membership were Technicians. If so, then it simply means that the Techs
need to get more involved on the management side to make things happen.
Afterall there is no reason that a Tech couldn't be President.

Perhaps if this PBI were more aimed at expanding the membership at all levels it would be more fruitful. Very little change would be needed to what you propose other than seeking out non-members of all classes.

There's a small difference there, Brian.

When I make a mistake, I admit it.

When you ask for information (other than about non-radio aspects of my military service), I tell you.

You, on the other hand, are a habitual liar. As is Leonard H. Anderson.

It really is THAT simple.

Steve, K4YZ

No, he didn't "make a mistake".

A "mistake" is not having the volume turned up and accidenting
making a call n the repeater while others are chatting...

Hours of cat calls, profanities and pre-recorded "policitcal
commentary" on public service frequencies was absolutely assinine.
Doing it on Amatuer frequencies was stupid enough...but to the cops and
EMS...?!?!?

What an idiot! He's where he belongs.

It is your job to substantiate your alledged MARS involvement.

I suggest you do so. As you're so fond of saying: No proof = Lies.

Post something indisputable such as an actual license or letter of appointment. Best of Luck

I've found that you say a great many things which are not true, i.e., you lie. So the only way to learn if your MARS statements are true is for you to post indisputable evidence such as a MARS license, or a letter of appointment to "ANCOIC" MARS/Okinawa. Got any?

I still laugh each time I remember you saying, "Sorry Hans, MARS >>>IS<<< Amateur Radio."

So show some proof that you were ever involved. Until you do you're just a bystander without a clue.

I keep visiting your profile on QRZ and don't see your photo replaced with a scan of authentic documentation. Too bad for you.

> Brian P Burke, on the other hand, remians a habitual liar who

The Technicians have been kicked around by the 'higher class' licensees
or some time for some strange reason. There seems to be some elitists
attitude among some holding higher class licenses towards the Techs,
that they haven't quite attained the status of being a 'real ham' yet.
However, it seems that the Techs are doing one of the very things that
hams have long been noted for and helps justify our existance, that of
using ham radio for public service. They seem to be a class of folk who
aren't much interested in setting in front of an HF rig just to chat
with someone in the next state or country, but had much rather put their
energy into using ham radio to benefit others. Hooray for the Techs.

It wasn't one mistake. It wasn't an oversight. Not
a case of a defective transmitter causing TVI and
he not knowing it. Not a case of by mistake once using
SSB in the data (morse code) subband on 40m when
chasing some interesting DX. This bozo kept interfering
with other radio users many times. And he knew what
he was doing. No way an oversight.

Oh, I see we have another bright bulb loose in the newsgroup.

Using police frequencies is just fine? Hmmm ... just wait until you need an ambulance and the dispatch frequency is being hammered by someone who thinks it is fine to "talk" whenever and wherever they like.

Also seems to me like we are getting an influx of folks who used to haunt "rec.radio.misc" which I dropped years ago due to the inane posts there. I remember "Arf Arf" is a big poster in there back then.

If I might steal a line from Hans,

ZBM-2

Hello, Steve

You make a good point with police and EMT frequencies. Eventually, the public has to be protected. Mistake? Yeah, like a bank robber - aw, I just made a mistake.

This might be an underlying problem between the hams and the freebanders. Some folks just won't know when and where to draw the line. There are reasons for rules (I don't particularly care to drive the wrong way down a divided highway and would appreciate that folks who do get their license revoked.). They exist to allow all of us to co-exist and share the airwaves.

This thread was started by Hans who stated in so many words that Techs
are under-represented by the ARRL because they don't join in the
quantities other class licensees join that some changes need to be
made, etc., etc. ~Half the hams in this country are Techs. If, as you
state, half the Techs are also ARRL members then what's the point to
this whole thread?? Or is it me again?

> If so, then it simply means that the Techs

Hello, Hans

I hope you didn't mind that note I forwarded to you about being recalled to active duty.

Ah, us swabbies. I wouldn't mind serving on that ship. That would be even better than serving under Captain Delaney ;)

K4CAP is not an active callsign, Brian.

Why do you conntinue to make such glaring errors? It's making
foolish errors that has made you the fool you are today.

That's NOT the "only way".

The OTHER way is for you to take the information you've been given
and independently verify it yourself.

Be my guest.

> I get the distinct impression that you don't like your tactics used
on

> appointment. Best of Luck

No luck needed.

You've been provided with all the information needed to make a reliable third party corroboration. On all THREE of my MARS involvements. Five callsigns all together. Every one of them verifiable. Dates...Times...Places....

You're every bit the coward I've claimed you to be by not making the effort to verify any one of them.

Think of it, Brain...I've given you a wide open opportunity to have life-time bragging rights that I "lied"...

The only PROBLEM here is that you are too much of a coward to take that step and find out if (1) I was lying or (2) You were wrong.

The point here being, of course, that I wouldn't expose a weak flank if I thought it would be used against me. Of course the TRUTH is that YOU are lying...Again...

You're a coward, Brian P Burke...Always were...always will be.

Sucks to be you.

Hi! That's all very tough talk coming from a short, pudgy former Marine. But if you had proof you'd have posted it. Why? So you could rub my nose in it, that's why.

So in the end, Robeson has nothing. Nothing at all. And he is not believed. He is not believable. He is not to be trusted. He lies.

Stebie tried a simple BLUFF. He is a "credentialist"
whose expertise is all in his collection of certificates,
medals, titles, and badges of rank. He tried to pull
off a snowjob thinking that NOBODY would ever check
up on him.

>> It's the Marine Corps.
>
>Hi! Hi, hi!!!
>
>The Marine Corps is silent on the subject. You better dig through
that
>box of medals and see if you can find some authentic documentation.
>Funny how you have things that you didn't earn, but don't have the

>
>Hi!

Poor Stebie...he NEEDS to be a PART of something
"greater" than the ordinary...to "be somebody" in
his own eyes. He NEEDS to be in a position of
authority...to have some "belonging" to a mighty
(in some eyes) organization having lots of trappings
of patriotism, honor, glory, etc. The military cast
him out and he probably resents that, begging to
have a connections again.

MARS on Okinawa of 1981 was NOT of any importance in military communications in the Pacific area. It was primarily of the "special services" kind...of the same importance as any morale-boosting activity such as USO stage shows to entertain the troops. The message identifier of RUAW in the DCS (Defense Communications System) was handled by regular military communications personnel at Okinawa...as it had been since 1945. MARS activities were never a part of that. [Note: With the advent of the DSN the node identifiers were no doubt revised from the old 100 WPM TTY times' identifiers of the early 1980s]

"NCOIC" is an old, common military term, an acronym for Non-Commissioned Officer In Charge. It refers to what would be "foreman" or "superintendent" in civilian life. "OIC" (for Officer In Charge) would be the responsible commissioned officer.

Stebie did NOT explain what the "A" stood for in "ANOIC." That's an unusual acronym and not familiar.

>> > Any other correspondence from that claimed activity? Copy of MARS
>> > license? Logs? Anything? Hello???
>> >
>> > Don't think so because it didn't happen. Hi!
>>
>> Unlike your Somalia operation, this DID happen and happened
with
>> the proper authorizations.
>
>Why would I beleive that?

Stebie is just trying to BLUFF his way out, Brian. He will NOT answer you directly (a sure case of him doing the bluffing snowjob) and instead tries to misdirect the thread onto you and your alleged (by him and Heil) "illegal operation."

1981 was 24 years ago, in relative peacetime (the U.S. engagement in Vietnam stopped in 1975 or 30 years ago). Ordinary people NOT in the marines would not understand "MAW" as an acronym for "Marine Air Wing" nor the prefix of "1st" as being a unit designation, not the baggage-holder of "first" as in "first-class" or "number one," etc. Using "1st MAW" carries with it a sense of "familiarity" with the military as if the writer was someone with importance. Self-importance in this case. Military unit personnel, commanders included, come and go rather frequently...records

of 24 years ago are not kept intact in a unit but
are sent to some archival facility. The
"Commanding General" of the First Marine Air Wing
of today (if it was a flag rank) would NOT have
such detailed personnel records of two dozen
years ago to verify anyone...except other high
staff officers listed by name and rank in a unit
historical summary. Is a marine "wing" large
enough for star rank as a commander? That hasn't
been explained.

A "wing" in the USAF is a large unit and goes back
to Army Air Corps days. Bottom to top, the old
Air Force aircraft unit names were squadron, group,
wing...corresponding roughly to land forces'
company, battalion, brigade, respectively. There
is no explanation given by Stebie on the size or
actual function of a Marine "air wing"...he
presumes that "everyone will 'know' it." Few,
relatively speaking, will know it. The USMC is
the fourth smallest U.S. military branch. USMC
is one of the last branches to become organized
into MARS...the USN was the last major branch
to join, several years after the USAF joined
with the USA origninating branch.

In a similar manner, Stebie once emphasized
his "importance" in the Tennessee State Guard
which has (from their own website) four
"brigades." The TN *STATE* (not affiliated
with the national guard or the federal
government) idea of a "brigade" is of a size
equivalent to a conventional USA company.
Stebie had a "commission" with the TN STATE
Guard as a "First Lieutenant"...and briefly
had his picture in a group's personnel
descriptions as "communications officer."
[the picture had him in his usual scowl]
Tsk. Few states have INDEPENDENT "guard"
organizations and they are NOT under any
federal command as are Army or Air Guard
units in times of emergency.

Stebie never went to OCS let alone an Academy.

>> I even told you when, where and who to ask.
>
>I told you to cough up some authentic documentation. Got any???

Stebie keeps trying to BLUFF. He thinks his
bluff and bluster will work...it is very difficult
to pull out any detailed military information on

a relatively UN-important military position that
supposedly existed 24 years ago.

>> You just refuse to "make the call".
>
>You stupidly refuse to represent your own self-interest.

Stebie is doing nothing more than BLUFFING. He
doesn't hold any good cards, can't meet the "call."

>> Because Mrs. Brain P Burke is married to a coward.
>>
>> What will the kids say...?!?!
>>
>> Steve, K4YZ
>
>They'll say that you suffer from Excrementia!

Tsk, tsk, tsk, Brian, Stebie is doing his misdirect
and personal insult thing again. He can't admit to
BLUFFING so he tries to turn things around with
misdirection into your personal life.

As I've written, copying an old, hoary folk maxim,
"assholes are cheap and plentiful." BLUFFERS
are that kind of person. They all suffer from
the malady of EXCREMENTIA...

It's part of the wonderful warm, friendly nature of
United States Radio Amateurs of the extra persuasion?

Poor Stebie...takes EVERYTHING personally.

Stebie is frustrated and angry, tries to relieve
himself by being nasty to everyone who disagrees
with him. He relieves himself in here quite a bit.

>Poor Steve, suffers from Excrementia!

The jury is still out on that particular definition
but it DOES seem to apply in here, doesn't it?

Offhand, I'd say it was part of his Projection
syndrome. He projects his own frustrations and
anger onto others.

For example, his sudden misdirection onto others'
wives...who were NOT in the thread subject before
but are now brought in. That might be a window
into his own relationship...the second one, that is,
since he doesn't want to bring up the first one.

Stebie likes to get VICIOUS against his perceived
enemies, cannot ever let go. Witness his anger and
frustration exemplified in another posting from the
"ex-KG6IRO Arrested" thread:

"Los Angeles is a cesspool of what's wrong with Amateur Radio...WB6JAC, KG6IRO, W6NUT, etc etc etc... And then there's Lennie Anderson...Everything that's wrong with radio in one soup bowl."

I'm not a part of that thread, haven't discussed anything there, but Stebie's anger and hatred stand out by including me, plus insulting a major urban area and about 10 million United States citizens. Stebie has a lot of HATE and he must vent. I am not connected in any way with the individuals whose callsigns are given, have not ever been cited by any agency for radio misuse (certainly not amateur radio). Still, Stebie MUST bring my misspelled name in with his anger and hatred. That's SICK.

The syndrome is textbook sociopathy, with the anger, hatred, and frustration indicative of other psychoses lurking in him. None of these are good qualities to take into the hobby of amateur radio.

I originally wrote that "assholes are cheap and plentiful." That was a very general statement, not at all orginal...but fitting in almost every society. Poor Stebie took it very personally... a sign, perhaps, of a guilty conscience? <shrug>

"Excrementia" is an apt term in Stebie's case. It fits in with his misogyny?

Welp, if he wants to clear his bad name, he has a request in at such a facility. Otherwise.... he is unable to articulate any rational knowledge of MARS activities indicating nothing more than a mere callsign collection at the very, very best.

The
> "Commanding General" of the First Marine Air Wing

Its important to Steve to be associated with MARS, no matter how Johnny
Come Lately the US Navy was on the scene.

> In a similar manner, Stebie once emphasized
> his "importance" in the Tennessee State Guard
> which has (from their own website) four
> "brigades."

Another desperate attempt to be affiliated with something with an
important sounding name.

Heh, heh. He's got to still have authentic documention of that.
Wonder if he will post it? Should I start betaing him up on that one,
too?

The TN *STATE* (not affiliated
> with the national guard or the federal
> government) idea of a "brigade" is of a size
> equivalent to a conventional USA company.
> Stebie had a "commission" with the TN STATE
> Guard as a "First Lieutenant"...and briefly

> lurking in him. None of these are good qualities to
> take into the hobby of amateur radio.

There may be hope. Our local prosecutor, in the freeway shooting case,
claimed that being a paranoid schizo didn't necessarily make someone
crazy. Of course, the prosecutor doesn't want the shooter to get off
on an insanity plea.

> I originally wrote that "assholes are cheap and
> plentiful." That was a very general statement,
> not at all orginal...but fitting in almost every

represent the
>> full spectrum of amateur licensees. My PBI seeks to make that
happen.
>
>I thought that I had seen a statistic where close to half of the ARRL
>membership were Technicians.

Whose pipe smoke were you gazing at for that factoid?

The ARRL remains silent on demographics of its
membership. On the QST "Publisher's Sworn
Circulation Statement" [www.arrl.org/ads/circ.html]
page marked "last revised 17 March 2005," the
ARRL membership as of 31 December 2004 was 151,727.
The "individuals who are ARRL members" is given
as 138,127. Obvious discrepancy there. ARRL
does not clarify what seems to be a glaring error
in arithmetic...

That's about ALL that is given BY the ARRL on their
membership...or any other demographics.

According to www.hamdata.com, the total licensees
for U.S. radio amateurs was 733,080 on 7 May 2005.

Of those, 310,455 were Technician classes...which
works out to 42.35% of the total. If the ARRL
membership is really as high as 151,727 then that
represents only 20.70% of the total number of
licensed U.S. radio amateurs.

> If so, then it simply means that the Techs
>need to get more involved on the management side to make things
happen.

Long jump of a conclusion. Tsk, tsk. What
would your class say about that?

>Afterall there is no reason that a Tech couldn't be President.

Quite true. The only requirement is that they
are natural-born citizens of the United States,
are at least 35 years old and been a resident of
the United States for at least 14 years.
- Article II, Section 1, Constitution of the
United States of America

Oh, you meant the ARRL? The ARRL laready has TWO
Presidents...Sumner and Haynie. Are you suggesting
they try for THREE? [incroyable...]

>Perhaps if this PBI were more aimed at expanding the membership at all

>levels it would be more fruitful. Very little change would be needed
to
>what you propose other than seeking out non-members of all classes.

ARRL membership is dropping. [go look at older
BoD Membership reports] Dropping with essentially
NO change in their requirements. That is NOT good
for the League.

What is "seeking out non-members of all classes?"

First you say that "half the ARRL membership is
Technicians," then you want more attraction for
all classes? You aren't being clear in what you
are saying.

BTW, how DID the cake taste?

>
>Active or not, it was issued to you, Bozo.

True enough. Note that it HAD to have "CAP" in the callsign.
Very Important for the pudgies in poopy suits.

However, Robeson has NOT stated what he thinks "operating"
is. Tsk, tsk, I will accept what the United States Government
has described, especially the U.S. Army who said I was at
least three different kinds of OPERATOR during my years of
military service. Stebie disagrees with the United States
Government. Tsk, tsk.

>It's making
>> foolish errors that has made you the fool you are today.

>
>> Steve, K4YZ
>
>Your misredirection failed miserably. I've just shown you to be the
>fool that I say you are.

Poor Stebie, once again with Projection on others what his own
faults are. I don't know why he keeps that up. It doesn't work
and annoys all the readers.

Such misdirection (onto "personal faults" of others) might get him
away from defining what Stebie thinks as "operator" is, but I doubt
he has the courage (or conviction) to state that. Even if he did,
it
would be something about ham radio style "operating." :-) The
United States military communications groups are PROFESSIONAL
in all aspects, not amateur radio hobbyists. <shrug>

No "discrepancy" exits; no "glaring error in arithmetic" exists.

QST circulation numbers will always be lower than ARRL membership numbers
because multi-member households recieve a single copy of QST.

Sunuvagun!

> The ARRL laready has TWO Presidents...Sumner and Haynie.

Glaring error in arithmetic, Kindly Old Sir. There is only ONE President of
ARRL, Jim Haynie. Dave Sumner is Secretary and CEO.

Sunuvagun!

With all kind wishes,

de Hans, K0HB

Did your icehole melt again?

I thought your proposal had some merit. I just expressed
the thought that the ARRL just would NOT do such a
radical thing.

>> The ARRL laready has TWO Presidents...Sumner and Haynie.
>
>Glaring error in arithmetic, Kindly Old Sir. There is only ONE
President of
>ARRL, Jim Haynie. Dave Sumner is Secretary and CEO.

Yeah, riiiiight, super chief. :-)

Can a lowly Technician become PRESIDENT of the UNITED
STATES, super chief? :-)

I think Dee can answer for herself...except that she
doesn't want to associate with "lowly" unlicensed
(in the amateur radio service) persons who don't love
the League.

You think otherwise? Feel free. You ARE free to
express contempt for those who don't embrace your
ideas wholeheartedly. <shrug>

I would think you better serving the "amateur
community" by disciplining certain other extras
who make such terrible errors and personal insults
such as our "veteran of seven hostile actions."
He NOT be a good role-model to advertise U.S.
amateur radio.

Dee is an okay person. She's just a BELIEVER in
the gloriousness of the League which can do no
wrong. [i.e., a conditioned thinker]

>The moving cursor prints, and having printed, blinks on.

Tsk, tsk, tsk. Cursors do NOT print, super chief.

Not in C++, not in Win32 APIs, not in anything.

Metaphors be with you, super chief...but don't get
another tattoo in Tattoine.

"Inadequacies?!?" Mais non, Stebie is a Ruff & Tuff marine, a
veteran of "seven hostile actions" and an "ANCOIC" of an itty
bitty special services radio set. He has "taught" (or "taut") all
kinds of amateurs as ham radio's answer to ELMER Wingfield.

Stebie has yet to reveal all those NAMES of his "elmer" subjects
and probably won't...out of some manufactured "promise never
to reveal them." Hi hi and a Ho ho.

>> For example, his sudden misdirection onto others'
>> wives...who were NOT in the thread subject before
>> but are now brought in. That might be a window
>> into his own relationship...the second one, that is,
>> since he doesn't want to bring up the first one.
>
>Steve needs allies. Assumes everyone has a bad marriage (like him)
and
>he can get the wife to gang up... Unless it's time to terrorize the
>wives...

Stebie loves to gang up on those he perceives to be "weak."

He will use ANYTHING as a personal insult to someone who
disagrees with him. If that means dragging in spouses, hurling
insinuations at the BSA, snarling at offspring, no problem for
Stebie. He loves to belittle anyone not agreeing with him.

>> I'm not a part of that thread, haven't discussed
>> anything there, but Stebie's anger and hatred stand
>> out by including me, plus insulting a major urban
>> area and about 10 million United States citizens.

>
>> "Excrementia" is an apt term in Stebie's case. It
>> fits in with his misogyny?
>
>I don't know that term, misogyny. Sounds like Miso and Gunny.

Misogyny means "hatred of women." Stebie considers
women as sex objects only. Notice how often he has used the
term "honey-do" for XYLs with licenses... [i.e., "Honey, do this
for me..." etc. call on radio] Depreciatory description.

See also Stebie's day-dreaming about sexy young stars in the
media such as Brittney Spears. He needs his fantasies fired
up. Fantasies seem his whole life.

If Hans is correct about the scarcity of Techs in the ARRL membership, he proposes a way to attract them is all. I simply indicated that his original premise may or may not be true. Thus it should be checked. I don't know what the numbers are. I simply thought I saw something on it but haven't checked it. It is my point of view that the ARRL ought to try to get the involvement of more hams of all classes.

Sorry, Kindly Old Sir, but Amateur Radio is a hobby for me. "Discipline" and "role-model" aren't part of the lexicon. It's not the responsibility of Amateur Radio to resolve his personality deficiencies, nor yours.

No, I wouldn't call you any of those things, Dee.

"ZBM2" is the operating signal meaning "Place a competent operator on this
circuit."

Generally not considered complimentary.

Sometimes. Rarely. Eventually.

But in the meantime, you assume that the other person is wrong and take great liberties in calling them names, accusing them of lying, question their manhood, and sometimes even infer that they are homosexual or pedophiles.

Then you discover that you were wrong, and apologize for making a teeny weeny mistake. No harm, no foul, and never apologize for all of the mayhem you cause.

You're a loser.

QST circulation numbers will always be higher than ARRL membership
numbers because of library subscriptions and news stand sales.

And I will correct my mistake before you do wogie, I meant to say the
FAA database. And thanks for bringing this up by the way. I just went
into the FAA database and got a logon id so I could change my airman
certificate number from my SSN to another number.
So again wogie, you prove you don't have a clue.

Your "those morons who are listening" comment illuminated your
true intentions, Todd...You have no interest in Amateur Radio other
than as a forum to artificially bolster your deficient testosterone
levels.

And Todd...Your grammar, spelling and construction really need some
work.

Allow me: "Oh...I forgot that you're a Communist who believes that
we must be a collective."

No, I am an American Armed Forces Veteran who knows what's at
stake. You, on the other hand, are a stay-at-home spoiled brat
parasite sponging off of your aging parents.

And that's my liberal opinion.

There you go...blaming the ARRL for something that they've not chimed one word in on, Todd....You've still not explained to me why you are blaming the ARRL for anything.

My O N L Y comment of "support" has been that the ARRL bulletin station is recognized by the FCC as the defacto representitive of the Amateur Radio Service membership...I make this statement since W1AW is the ONLY "bulletin station" that the FCC makes direct liasion with when it needs to pass messages to the Amateur Service, ie: communications emergencies, etc.

> for all the "Life" memberships done once) yields only a
> %5.1 million per year.

Figuring $30 would be wrong. The cost of membership is $39 per year for those to age 64. Those 65 and older pay $36. For a two-year membership, those under 65 pay $38 per year and those 65 and older pay $35. For a three-year membership, those under 65 pay $37 and those 65 and older pay $34.34 No need to "allow" for those life memberships as that money was invested. The League got my money up front. In a couple of years, I'll have been a Life Member for thirty years.

> That's about the cost to produce

No kidding? I have little doubt that the ARRL will continue to sell advertising so that QST won't take the form of a newsletter and be printed on newsprint.

> The IRS forms (available on another website) show that

I'm sure you have similar views on the VFW, American Legion and similar
membership organizations. What proof have you of your claims?

> They just don't seem to understand that their cozy
> existance-in-the-clubhouse is NOT what the newcomers
> want to preserve.

The Board of Directors doesn't live and work in Newington, Len. The
Directors come from all over the country. Do the directors of the VFW
live in a clubhouse?

> Newcomers, already exposed to the
> wonders of worldwide webbing (no ionospheric

I don't think so, copyright law states that you have to have the
persons permission before republishing it. Fair-Use according to the
court says you can use a small portion of the work but not the whole
work. I suggest cornwhore to read up on copyright law. I've been doing
to copyright thing for a VERY LONG time.

Hello, Len

It just might be what a particular operator is familiar with. Back when (in the 60s) the military used a lot of HF point to point communications, they (the radiomen) were familiar with having to change frequencies, how to set crypto gear, and many other things. One thing they were *not* familiar with was how to handle a strong signal.

When the communications station attempted to re-establish communications with Saipan, Hans, K0HB, was sent to Saipan. The communications station kept telling him he was "loud, but garbled". Big hint - too much signal for the local oscillator injection to properly demodulate the ssb. I called Hans from the hamshack (KG6AAY) and we (the hams) ended up not only establishing communications but got orders to pass traffic from Saipan to Commander, Naval Forces Marianas directly.

I also recall whilst aboard ship we lost the "broadcast" - multiplex signals for many channels of teletypes. The problem was that we were getting to close to the station and we were in a skip zone. I suggested to the chief that we try LF (low frequency). He didn't think it would work, but said to give it a try as everything else was out. On LF, the signal was overpowering. In a few minutes, the broadcast was back up and running.

In both of these instances, it was the hams that had the proper experience.

I shan't go much further than to say that one day whilst aboard ship, we received an SOS on 500 KHz. It turns out that only *two* of us could

actually copy Morse at any reasonable speed. I don't know about the other guy, but I was an amateur extra and also had a commercial telegraph license. The military radioman were *supposed* to be able to copy 16 words per minute to graduate from A school.

Sorry to shoot your "professional" theory down. You aren't totally wrong, of course; it is what happens when the *unexpected* happens.

Don't matter unless I say they are public domain they are copyrighted. the writer has to say I'm putting this work in public domain (word for word) for it to be in public domain, if he does not then it not in public domain. I suggest you some copyright law, I've been doing that crap a lot longer the amateur radio I have a number of works that copyrighted. under copright law you can use fair use of the work, but as court have stated a person making a comment can only use a small portion of the work. like I said Stebie read some Copyright Law.

You've been a bystander for 55 years. That doesn't make you an expert
on the ARRL. As far as your "talking to many other radio amateurs":
What do you mean "other radio amateurs". You aren't a radio amateur.

>>You want it to be different? Get in there and do the work to change

> it.

>>Oh, that's too hard you say.

> Tsk, tsk, tsk. Now you are getting a mite hostile.

> ARRL is IN CONTROL of what the ARRL DOES...

Another in your series of masterful statements of the obvious, Len?
Who knew that the ARRL is in control of what it does?

> ...and, by
> all the possible objective observation, the BoD acts
> like they are the Elite who Know What Is Good For All
> ...because that is what the BoD likes.

You really have little idea how the ARRL works, Leonard. The ARRL Board of Directors takes action. Members of each Division have input to their Director. The Director's vote on any issue is not likely to please all. If enough of the League members in any Division disagree with the votes of their Director, they may vote him out.

>> Then you are just a parasite waiting for some

Actually, he has no license of ANY kind that allows him to access
HF, Parts 15 and 95 notwithstanding.

(His GROL does not allow him to access ANYthing without a
"STATION" license that specifies discreet channels, mode, exact power,
etc...In otherwords, he's just a radio mechanic)

> > In EVERY

Oh no, Brain...

Make no mistake about it...I know EXACTLY who you needed
authorization for your "Somalia" operation...And there was not a single
one of the officers in your unit who had that authority.

> But even worse is that he knows that he needs my approval.

I need nothing from you, Brain.

You refusal to answer the questions I put to you in response to assertions YOU make is all I need...It's all ANYone following any of this needs.

> Welp, if he wants to clear his bad name...(SNIP)

I have no "bad name" to clear, Brain.

You asked for information, I gave it to you.

You then tried to change the parameters since you know that following up on the information I gave you is going to make an even bigger idiot out of you than you already are...If that's possible...

> The
> > "Commanding General" of the First Marine Air Wing

Acutally, the Marine Corps keeps rather definitive records...Going back to the beginning of the Marine Corps in 1775.

The "snowjob" is you trying to find a way to beg off of following up on the very specific details you were given...

> > In a similar manner, Stebie once emphasized
> > his "importance" in the Tennessee State Guard
> > which has (from their own website) four
> > "brigades."

For two Veterans who allege patriotic service, both of you seem to be embarrased or ashamed of it.

I think you are the ones we should be ashemed of...

In fact, I know we are...

> > [the picture had him in his usual scowl]

Silly Gunny, I had a Commander. Unlike your claimed "ANCOIC" stint, we
had leadership.

> > But even worse is that he knows that he needs my approval.
>
> I need nothing from you, Brain.

You beg for my approval. You get all upset when it isn't there.

> You refusal to answer the questions I put to you in response to

By "more idiocy" are you claiming that the callsign was never issued to
you, or that you never activated the callsign, or that it wasn't a cool
callsign, or that you're not Bozo?

Be specific, but precise. Limit your answer to 200 words or less.

> > > Why do you conntinue to make such glaring errors?

K4CAP was not issued to you? You didn't tag tour RRAP posts with
K4CAP?

Slant and Rant is your trademark.

> > Active or not, it was issued to you, Bozo.
>
> "Bozo" now! Getting a bit miffed that your attempts to get
around
> the fact that you've been bested again, eh, Brain...???

If K4CAP was not issued to you, and if your never posted to RRAP with
the tagline of K4CAP, then you indeed have bested me. Hi!

But the archives say you lie.

> > It's making
> > > foolish errors that has made you the fool you are today.

By "more idiocy" I am claiming that you are an idiot. Was it
really that hard to figure out?

And I am not "collecting" callsigns. callsigns are an
admistrative tool. Nothing more, nothing less.

> Be specific, but precise. Limit your answer to 200 words or less.

OK.

Brian P Burke is an idiot. He's a habitual liar who must find
ways to hide his cowardice and inadequacies. His current
"documentation" rant in the face of verifiable references is proof.

He makes assinine assertions that are easily disproven with
information from third party sources. He is inept at telling the truth.

There...that was 54 words. Beat your "200 words or less"
challenge by almost 75%.

Next.

> > > > Why do you conntinue to make such glaring errors?

>

> So why did you attempt to diss your K4CAP call? Convenience?

I didn't "diss" it. You are appending it to current threads as if
it were current.

It's not. But doing so when anyone else can check QRZ for
themselves DOES make YOU look like the idiot I am claiming you to be,
so please...be my guest...

> > > I said no such thing. You assume that I said that K4CAP was an

K4CAP was issued to me. It no longer is.

Your use of it aas if it were makes you look foolish.

Do you enjoy looking foolish, Brain?

(That was a rhetoical question...we all know you do....)

> But the archives say you lie.

No they don't.

But they've sure got you by the short hairs, Brian....

Still waiting for you to show where a lie on my part occured,
Brain...

On the OTHER hand, we're still waiting for your reference as to
what unlicensed devices play a "major role" in emergency comms".

And who was that anonymous Air Force officer who allegedly
approved your T5 operation...?!?!

And P-U-H-L-E-E-E-Z-E tell us where all those Techs got run off
to. Maybe they are hiding with all those ARES guys wo aren't
responding...?!?!

True.

He's a "life member" in an organization that he had to buy his way into. IEEE does not, to the best of my knowledge, participate in any public service, emergency service or other community-based programs. Do they even do any philanthropic work? Scholarships? Even the ARRL and CAP have money for kids to go on to advanced education with....What does the IEEE offer kids...???

Obviously not.

You allege that one of them "gave (you) permission" to operate your Amateur radio station when he did not, in fact, have that authority to do so. Some "leadership".

I am sure he is grateful that if you were too stupid to keep your mouth shut about operating from there, you've at least not embarrassed

him (her?) by dropping his name thereby exposing him (her?) for being
an idiot too....

All of my uniforms fir just fine, thank-you. (So says the USAF
Liasion Officers in front of whom I just stood a SAREX eval...)

Nice try though.

Since you're challenging me on who looks appropriate in uniforms,
let's see you post a picture of you in your "Official" Cub scout
leader's uniform, Brain...

You've lied about me being "flabby" despite evidence to the
contrary...Let's see a pic of YOU on line in your Official U. S. Cub
Scout Leader Uniform, complete with den numbers, council patch and
WEBLOS pin...

I wonder, by the way, what the Scouts would have to say about one
of their "leaders" who publically lies and uses the kind of language
you use in this public forum, Brain...?!?!

Or is reality a bit too challenging for you?

Well, Lennie, there's another area where you and I are at odds.

First of all, at least I know who Britney Spears is.

Secondly, a person without fantasies is dead...or soon will be.

And lastly, at least I've had the initiative to chase some of
mine...You just plopped into that rut and were perfectly happy to stay
there...happy as long as you could blame anyone else for it...

IEEE sponsors hundreds of college-level scholarships, grants, internships, and other educational awards totalling upwards of $1,000,000 per year.

High-school programs include the PEERS which provides resources at the high-school level to encourage students in the study of science, math, and technology.

With NSF and CCNY they sponsor "Stuff That Works", a set of academic tools (lesson plans/curriculum units) for elementary and middle school teachers to use to introduce the world of technology and engineering to their students.

The list could go on for several pages.

While ARRL has an excellent track record in supporting youth and education, their efforts pale by comparison to the work being done by IEEE.

Can someone explain what this putz is ttrying to say ?

He seems to write in "white-ebonics" (grin...baaaa hahahahaha!)

Would likely make a great studio audience groupie for
the Jerry Springer Show..?

Yeah...watch for the episode "Functionally Illiterate Stay-At-Home Parasite Adult Kids Who Won't Get A Job Or A Bath"

The whole hour is devoted to Todd. He'll be the one in the black leather camasole, mesh stockings and peaked Nazi field cap.

If they can get him out of his bedroom, that is......

>>
>> Sunuvagun!
>
>QST circulation numbers will always be higher than ARRL membership
>numbers because of library subscriptions and news stand sales.

To quote from the ARRL's own page in regards to the
"Publisher's Sworn Circulation Statement" on web page
www.arrl.org/ads/circ.html -

1. Average monthly paid circulation by type:
Association, individuals who are ARRL members 138,137
Subscribers, institutions such as libraries, etc. 816
Net single copy sales, radio stores, etc. 1,481
*includes 20,233 Life Members 140,434

Hans wants to escalate things to a Battle Royal when he feels
anyone has "wronged" the blessed ARRL...other than him. :-)

The total of Subscribers, institutions and net single copy
sales is 2,297. That corresponds to only 1.64% of the total
of 140,434. The total of 20,233 Life Members is far above
that. More importantly, there's NO statement on how many
households have more than one ARRL member so it is difficult
to quantify Hans' CLAIM of "wrongness." Hans wants himself
free of challenge.

Now, if Hans says "no discrepancy exists" or "no glaring
error in arithmetic exists," then IT DOESN'T EXIST!!!

Further, if Hans says you are "completely wrong," then you ARE WRONG!!!

Them's the Laws in this here "Everyone Loves da ARRL" newsgroup. Hans has spoken. Therefore it is SO. :-)

Reality is different. But, reality doesn't exist in here.

to
>Commander, Naval Forces Marianas directly.

So...an anecdote from USN days is suddenly a Standard
Operating Procedure? Or a professional dissertation on
how certain others are "completely 'wrong'?" :-)

Two things, perhaps three, come to mind here.

First of all, the HF military receivers of the 60s era, typified by the R-388s and R-390s, all had RF GAIN controls. NOT a problem to handle the alleged "overloads" of strong signal length. There are ADDITIONAL controls for attenuation, not only on the receivers but on their outboard Converters for TTY or SSB separation. Were all the "S Meters" on those receivers inoperative?

Secondly, a transmitter could have been deliberately mistuned (without damage to itself) to reduce the signal power output. Non-standard, but that would have been a possibility...such as toss a wire out the window (porthole?) and tune that up. :-)

Third, how did YOU "know" the garble WAS "intermodulation distortion" if you didn't have any way of determining the incoming signal strength? I'm familiar with the characteristics of U.S. military receivers of the 60s (through testing to spec. and for other, specialized applications)...and those have a rather wide dynamic signal strength range with or without the deliberate attenuation via RF GAIN setting.

>I also recall whilst aboard ship we lost the "broadcast" - multiplex signals
>for many channels of teletypes.

Sounds like the common "commercial format" SSB that's been around since the 30s...12 KHz wide modulation spectrum, the outer 6 KHz carrying 4 to 12 TTY tone pairs. One needs the Converters (outboard) to separate them and all the Converters I've seen all have separate level-setting controls...as do the "carrier" equipments that separate out the individual TTY signals.

> The problem was that we were getting to
>close to the station and we were in a skip zone. I suggested to the chief
>that we try LF (low frequency). He didn't think it would work, but said to
>give it a try as everything else was out. On LF, the signal was
>overpowering. In a few minutes, the broadcast was back up and running.

What are you saying there? Are you saying that LF is "immune" from IM effects? [ain't so...]

The USN was running 12 KHz SSB on LF? Capable of it? Doesn't sound likely. Please explain.

>In both of these instances, it was the hams that had the proper experience.

"Proper?" :-)

Your tale, oriented for the "lets all give each other high-
fives as hams for saving the world again" crowd in here is
a nice story. But, without some revealing details, it seems
little more than a STORY.

In that same era, in the USA, it was not uncommon
to have Field Radio AN/GRC-26 huts-and-trucks at
sites as close as 15 miles. They never had any
reported "overload to the point of garble" on their
single-channel TTY with AM voice communications
locally. "Angry-twenty-six" was typically 400 W
(CW) output carrying dipole and half-rhombic wire
antennas, using either R-388 or R-390 receivers.

Could it be - gasp, choke - that the Army guys
were "better" at communications than you sailors? :-)

>I shan't go much further than to say that one day whilst aboard ship,
we
>received an SOS on 500 KHz. It turns out that only *two* of us could
>actually copy Morse at any reasonable speed. I don't know about the
other
>guy, but I was an amateur extra and also had a commercial telegraph
license.
>The military radioman were *supposed* to be able to copy 16 words per
minute
>to graduate from A school.

There ya go! Another tale of "hams make the world
safe and show the pros how to do it via CW." :-)

Ho hum.

Why is it that the ENTIRE maritime world of radio
REJECTED morse code messaging for distress and
safety in favor of GMDSS? Tsk. I've heard all the
tales of "GMDSS won't work!" from all the retired
navy morsemen...but GMDSS continues to work...with
the approval of the maritime community. Tsk.

Field Radio MOSs in the Army of the 60s era ALSO
had to demonstrate morsemanship. Ho hum. The
Army field commanders insisted on using TTY
messaging just the same. There's NO need to
demonstrate morsemanship in ANY branches' radio
communications specialties today. NONE.

>Sorry to shoot your "professional" theory down.

Just WHO were you aiming at? Wasn't me. I wasn't
hit by any "fire." :-)

Your airborne "spotter" must have been that TN CAP
ace, Stebie Robeson, former "ANCOIC" of Okinawa
MARS and PR Field Agent for ARRL recruiting. :-)

HE should have his wings clipped.

> You aren't totally wrong,
>of course; it is what happens when the *unexpected* happens.

Tsk, tsk, tsk. Us ex-Army types just never had
"emergencies" or "weren't as good as hams?" :-)

Best you hike on down to the nearest office of
BuShips or whatever and inform THEM that they
are "all wrong" or even "partly wrong" and
re-insitute all that morsemanship training (to
keep the world safe through use of Sam's wonderful
code). Think of it as a "holy mission."

Peace be unto you. Amen.

the
> involvement of more hams of all classes.

I went for the actual numbers.

I tossed an e-mail msg at Dave Sumner requesting a breakdown of ARRL memberships vs. their license classes which he came right back with. The last time these numbers were pulled together in detail at HQ was in August 1996 as reported in the February 1997 issue of QST. He added "The proportions will not have changed dramatically since then."

Extras 38,852
Advanced 39,430
General 25,245
Tech Plus 22,634
Tech 24,021
Novice 2,627

Total members = 152,809

Total Techs = 46,655 or ~30% of the ARRL membership are Techs vs. ~50% of all licensees. There's a shortfall of Techs within the membership but certainly not any sort of "yawning gap" in the representation of Techs at the ARRL (or vice versa) as Hans has implied.

If we throw out those Novices, which aren't any appreciable number,
then the percentages look like this:

Extras: 25.52%

Advanced: 25.91%

General: 16.25%

Techs: 30.65%

...or leave the Novices in...it only changes the percentages by
1/10th or thereabouts of a percent...

Nonetheless...The Techs DO comprise a significant membership base
in the ARRL...Enough to be a significant voting block if they wanted
to.

So why don't they?

Lennie and Brain contend that they are somehow a repressed subset
of the membership, yet there's not a single impediment to ANY person
with ANY specific interest in ARRL policies or programs from pushing
for changes in those programs and policies if they so choose.

If anything, we should be asking why are the Generals so
inequitably represented in the ARRL membership.

The ARRL is, afterall, a membership organization. If in this day
and age there's not been some major effort to organize a major change

to the ARRL's policies and programs, then apparently they ARE representing the opinions of their demographic fairly evenly.

If there was such a disaffection for the ARRL, where's the "alter-ARRL"...?!?!

(1) Why would I hide behind a remailer and threaten to "diable"
the newsgroups? That stupid troll's been going around for 2 weeks
now...It's as assinine now as it was when the anonymous coward that
uttered it suggested it.

(2) If Todd or anyone else cares to try and file a "TOS" with AOL
alleging that I am behind that idiocy, be my guest. I am sure they
have adequate resources to determine who the real culprit is.

(3) And your "what goes around" comment sounds a lot like a
threat...Guess that's why you hide behind a remailer yourself. Perhaps
you should read a bit deeper.

Simple addition It corresponds exactly with their claim of

"Average paid circulation for the six months ended December 31, 2004 = 140,434"

No "glaring error in arithmetic" that I can see!

> More importantly, there's NO statement on how many
> households have more than one ARRL member so it is difficult
> to quantify Hans' CLAIM of "wrongness."

Not difficult to quantify at all, Len. From the same page you cut-and-pasted from we see that "American Radio Relay League membership, December 31, 2004 = 151,727", and from your cut-and-paste we learn that 138,137 copies were mailed to members (includes life members). Then by simple subtraction we can "quantify" that 13,590 members did not receive their own copy of QST, ergo, there are 13,590 ARRL members who live in the same household with another member who DOES receive a copy of QST.

Sunuvagun!

Reality doesn't care what Len believes.

"Buy" my way into it?

BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHHAA!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Ahem, ANNUAL DUES since first joining in 1973 don't
quite meet Stebies' nasty inferences.

BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHHAA!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Tsk. On reaching a total of chronological years
plus years of membership, a member automatically
becomes a Life Member, NO dues required, SPECTRUM
magazine still arrives every month, etc. NO
extra payment required.

First-time (full) members are automatically
eligible if they are graduates of an approved
college or university. Others must obtain the
written affidavit of at least three current IEEE
members of full or greater membership status. I
did the latter in 1973, had no problem getting
such written confirmation; I'd already had the
responsibility for engineering design for years.

All of that and much more can be confirmed/found
on the IEEE website at www.ieee.org.

IEEE is a PROFESSIONAL ASSOCIATION of a quarter
million members worldwide.

So is the ACM, the Association of Computing Machinery,
the very first-in-the-world professional association
of Information Technologists. For a few years I was
also a member of the ACM.

> IEEE does not, to the best of my knowledge, participate in any
>public service, emergency service or other community-based programs.
>Do they even do any philanthropic work? Scholarships? Even the ARRL
>and CAP have money for kids to go on to advanced education
with....What
>does the IEEE offer kids...???

BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHHAA!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Tsk. One MUST laff and laff at Stebie's IGNORANCE.

Hans Brakob already pointed out what the IEEE does
for public service work, education, etc.

Stebie has merely to access www.ieee.org on the
web and see for himself.

But, Stebie will have to have his own ER team
ready to reattach his tongue and lip when he
sees what goes on. :-)

BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHHAA!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

>
> You allege that one of them "gave (you) permission" to operate
>your Amateur radio station when he did not, in fact, have that
>authority to do so. Some "leadership".

Tsk, tsk, tsk. Stebie keeps on with his MANUFACTURED
wrongness of others.

Stebie is NOT in any position of radio regulation
anywhere. Stebie was NEVER in Somalia. Stebie was
not even in any military service at that time. Yet
Stebie "KNOWS" all the details!!!

BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHHAA!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

> Look, Brain...
>
> Just admit that you don't have the guts to ask the Marine Corps
>what my official duties were during the periods I gave you.

Tsk. The VA doesn't have any individual information
on Stebie's military service!

Sunnuvagun!

> All of my uniforms fir just fine, thank-you. (So says the USAF
>Liasion Officers in front of whom I just stood a SAREX eval...)

Tsk. The VA doesn't have any individual information on
Stebie's Civil Air Patrol service!

Sunnuvagun!

BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHHAA!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

> Since you're challenging me on who looks appropriate in uniforms,
>let's see you post a picture of you in your "Official" Cub scout
>leader's uniform, Brain...

Tsk, tsk, tsk. Stebie's UNIFORM-wearing pictures don't
show him smiling enough to show his teeth. Stebie keeps
denying he is "getting thick in his middle" so maybe
that's why he frowns and looks so serious? :-)

Get your teeth fixed, Stebie.

That will help you chew your thoughts into more digestible
form...not to mention biting your tongue a lot when you
babble MANUFACTURED, FICTITIOUS UNTRUTHS about professional

organizations.

BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHHAA!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

> I wonder, by the way, what the Scouts would have to say about one
>of their "leaders" who publically lies and uses the kind of language
>you use in this public forum, Brain...?!?!

The BSA Chief Council might chew out Brian for being in
this newsgroup with spiteful, hating, ignorant yahoos
like Stebie. That's about it. :-)

So, Stebie, keep up the good work as a Public Relations
Representative in the ARRL's membership drive! You are
a Role Model of today's Amateur Extra Class!

Huzzah and a big ZBM2 to you...

Stebie's WALLET.

That's where he keeps his "records," his data on
"seven hostile actions," his "ANCOIC of MARS"
appointment (by the CG of the 1st MAW), all his
awards and medals, etc.

Stebie won't reveal what is IN that "wallet" so
we have to "take his word" that all he says is
"true."

Tsk, tsk, Stebie MUST make this thread HIS with
his immoderate MODERATION! :-)

>> Two things, perhaps three, come to mind here.
>
> None of them about Amateur radio, I bet.

Nothing about Nursing...nothing about MARS on
Okinawa. Tsk.

>> First of all, the HF military receivers of the 60s era...(SNIP)
>
> Yep...I was right.

Let's all hear it for Stebie's famous "seven hostile
actions" and his LAW-GIVING on Somalian radio! :-)

> Whoa...got through a whole paragraph without using the words "..in
>the 1960's"...way to go Lennie! Think ya can make it to, say, 1973
>anytime soon...?!?!

No problem. In 1973 I became a full member of IEEE
while working on design of the RF section of a 1.6
GHz transponder, part of the RCA Corporation SECANT
R&D program.

> Ahhhhhhhhhhhhhh...back to dissing anyone ELSE'S "story" as being
>just that...a story...Now you'll give us YOUR version of a "true
>story".

No "story" of mine. We are NOT talking about stebie's
"appointment as 'ANCOIC' of MARS on Okinawa in 1981."

Jim Hampton was NOT talking about Stebie's stupendous
technical wizardry and wondrous adventures on Guam.
Disappointed? You should be. Imagine...a whole
thread without Stebie heckling and jeckling like a

crow in a cornfield. :-)

> Dang I'm good!

At WHAT?!? Acting like an ASSHOLE in public? Yes,
you do a credible job of that.

> Here we go with the "jump off the cliff" mode of why Amateur
radio
>should be like Maritime or Armed Forces communications.

Tsk, tsk, tsk. You've forgotten the "memorable"
snarlings of the (late?) W0EX in here on how
GMDSS would NEVER WORK! :-)

> This forum is about A M A T E U R R A D I O....
>
> Wishe we could get that across to ya, Lennie...

"Wishe?" :-) You "wishe-washe?" :-)

Stebie needs to be reminded of something: This
newsgroup is NOT about the USMC, CAP, "SAREX"
whatevers, or being an "ANCOIC" on Okinawa in
the 1981s. It is NOT about "calling the VA to
get the real info on Stebie da wundermurine."
It is NOT about Stebie's "battles" with his
"opponents" and how "bad/wrong/ignorant" they
are. It is NOT about Stebie at all!

> Not by a gutless punk like you, Lennie...At least I got the wings!
>Still got your "student pilot certificate" locked away with that GROL
>that you alleged expired...?!?!

"Gutless punk?!?" :-) :-)

You have "wings?" Gosh, we all thought you were
flapping your keyboard jaw in here... :-)

I got my FIRST CLASS RADIOTELEPHONE (COMMERCIAL)
RADIO OPERATORS LICENSE in 1956 in the Chicago
field office of the FCC. Had Stebie been toilet
trained then? No? Tsk, he still needs that
training...

The FCC turned the Commercial 'Phone classes into a
single General Radiotelephone Operator License many
years later. FCC also decreased the NECESSITY of
requiring any "GROL" for most NON-amateur radio
transmission. I keep my last COMMERCIAL license in
the safety-deposit box...hardly worth keeping now
except as a memento.

> Gee...All the other branches have "emergencies"...Maybe your LACK
>of "emergencies" was due to a lack of proximity to any danger...?!?!

Okay, Last Action Hero, let's all hear about the
When and Where of YOUR "seven hostile actions!"

Let's all hear about how you fought the enemy as
a mighty murine being aircraft ground support at
the airstrip! Get lots of wounds in that "front-
line" FIGHTING? How many medals for "heroism?"

Tsk, tsk. All I got was a Good Conduct ribbon,
didn't even get the medal...and being stationed
in Tokyo, Japan. NOT front-line duty like mighty
murine Stebie. :-)

> Diss, diss, and more diss.

Poor Stebie. Thought the thread was HIS, had to
snarl and growl and heckle and jeckle his
"opponents." :-)

Good luck on your new appointment as U.S. Amateur
Radio Extra recruitment representative. Let's all
hope you get customers at your post office office
and NOT your picture on the posters at the post
office. :-)

Temper fry...

>Novice 2,627
>
>Total members = 152,809

None of us can work without REAL numbers to compare
and we are all stuck with ARRL's own numbers.

One problem is that August 1996 is about 8 1/2
years ago.

Okay, the "proportions will not have changed
'dramatically' since then" but 8 1/2 years is a
rather long time. In the dated March 2005 page
of ARRL's Sworn Statement, ARRL indicates a total
number of members as of 31 Dec 04 of 151,727 or
roughly a thousand LESS than the number in 1996.

Not "dramatic." :-)

>Total Techs = 46,655 or ~30% of the ARRL membership are Techs vs. ~50%
>of all licensees. There's a shortfall of Techs within the membership
>but certainly not any sort of "yawning gap" in the representation of
>Techs at the ARRL (or vice versa) as Hans has implied.

Not "dramatic?" :-)

While it was good that you contacted ARRL folks direct, there's still the problem of trying to connect 1996 numbers with 2005 numbers. Things don't match for either "dramatic" or even mellow-dramatic comparison. :-)

As an example, I quoted www.hamdata.com numbers as of 7 May 2005 in here. On that day there were a total of 723,570 amateur radio licensees (less club calls). The total number of Technician class licensees were, on that day, 350,455. That's 48.43 percent of the total. Compared to the 30.53 percent of Techs as ARRL members of only 30.53% in August 1996, I'd say that comparison IS "dramatic."

But, the "high rank" ham licensees are going to bitch and moan and rationalize the be-jeezus out of those numbers and do some remarkable "numbers" while performing on this stage...a sort of "American Idle" show. :-)

Let's take raw numbers, such as 46,655 ARRL member Techs in 1996. Compare those to 350,455 Techs as of 7 May 05 of 350,455. That's a delta of a "mere" 303,800!

A few years ago, I thought that it would be "remarkable" if just a quarter of all licensees would be Techs. NOW it is edging up to HALF of ALL ham licensees!

ARRL bias, as revealed through the pages of QST, is still towards "working DX on HF with CW." QST still has a column of "The World Above 50 MHz," as if that was still a strange planet. :-)

"Another" area? :-) Tsk, from the way you snarl it is
ALL areas!

> First of all, at least I know who Britney Spears is.

Marvelous. What's her callsign? Have you "worked"
her? How many wet dreams have you had about this
pop star? Did you think YOU got her pregnant? :-)

> Secondly, a person without fantasies is dead...or soon will be.

In that case Stebie will NEVER die! :-)

> And lastly, at least I've had the initiative to chase some of
>mine...You just plopped into that rut and were perfectly happy to stay

>there...happy as long as you could blame anyone else for it...

"Rut?!?" :-) "Initiative?!?" :-)

Tsk. I've never lived on Fantasy Island, haven't even
met Ricardo Montalban although I've seen him play
international football at a charity game. That was
before his auto accident and leg injury. Never met
Herve Villichaize either (the spelling doesn't ring a
bell)...although I've met a few little people.

Tsk, tsk. My "wallet" is empty of fantasies, full
only of money...doesn't have any record of "seven
hostile actions" there. Nor have I been "ANCOIC of
MARS on Okinawa." Haven't even purchased any medals
at a military surplus store to fill a cigar box.

Golly yes, Gomer, I just started out in HF radio
communications at a "little" Army radio station
(merely the 3rd largest in ACAN - STARCOM - DCS)
and did a whole career as an electronics engineer in
the aerospace...taking all those college-credit
night classes you despise so much. Yeah, all that

"rut" of paying off a 24-year mortgage in 20 years and - much later - marrying my high school sweet-heart, both of us now happy and living in the southern house with comfortable income. Terrible "rut" to have both sold articles to and later working part time for Ham Radio magazine. Of course you despise and loath a "defunct" magazine, even if it exeisted for only 22 years as an independent unsupported by a large membership organization. Tsk, tsk, all that without once having to test for morsemanship!!!

Keep dreaming your fantasies, little Stebie. It keeps you almost alive in here, snarling insults at everyone who doesn't like your opinions.

Good luck in your new "rutless" job of being the Role Model for the modern U.S. Amateur Extra! Recruitment of new hams will "skyrocket."
[blow up at launch...]

Toad, I haven't lied, and you are the only one I've called gay, and that's only because of all the lies you have about me on your blog, all you ever say to me is some gay remark. Can't you get Steve out of your head? I have never posted anything on your blog and you have no right to post the multitude of slanderous lies you have about me! Last chance toad, remove it or else. OH I'm not the type of person to netcop or snitch you out, all I'm saying is that by tomorrow it better be removed or else. You claim that you would say all this crap to my face, well toad, that's not true, you wouldn't have the chance to open you mouth and let all those vulgar slanderous remarks out. Saying that I dl kiddy porn, that's accusing me of committing a felony, and we all know why you are such an expert on kiddy porn now don't we toad!
Does Steve have to be in every post you make, and can't you be a little original? Every slam you make is just an echo of some anonymous poster, don't you have a thought of your own?
Stop for a second and think about it toad, look at your post, every ham is an ahole
Slander isn't the same as free speech!
A little hint toad, some people know what real life is and know that you can't just type in caps and hide behind a keyboard and your mommy's dress forever, someday you have to come out.

One more thing idiot, your show IS non existent, it hasn't aired, just because you keep saying "next week", it still is non existent. If you did air it, it won't be up 24/7 as you say, you see toad, more of your lies!
You cry netcop, who's crying to the FCC? You toad, and there is nothing they will do for you. Who cries to the House Subcommittee on Telecommunication? Why toad, you again, as I see it you are a snitch toad, but, nobody cares! You keep saying that Steve is my girlfriend, why would you continue to have these gay thoughts toad? One thing for sure, you better get me out of your gay fantasies and remove the slander from your stupid little blog!

Check out my blog toad.

nothing
>they will do for you. Who cries to the House Subcommittee on
>Telecommunication? Why toad, you again, as I see it you are a snitch
>toad, but, nobody cares!

The only thing I'm doing when it comes to the House Subcommittee of Communication is to have them clarify the rules pertaining to Information bulletins, that's hardly "snitching" anyone can have the FCC clarify the rules, a real amateur operator who know that. I would say they don't care because i recieved a letter back from the House and I'm to send in a consent form and all document to them to investigate the matter, I haven't said much about it on here or on my blog because I was told by someone to keep it quiet. But it is in the works and I will post my report on my blog as soon as all of this done. As for slander You started all this shit by calling me gay...So your just as bad as a me buckaroo. As for my blog I am not going to remove ANYTHING from my blog, but hey that little comment of yours about running two transmitter on either side of my signal IS going to be part of my report so thanks for allow me to prove my point about the problems with information bulletin. One more thing, if you try to remove my blog or me off the internet it too will be recorded in my report, and again will prove my point....that your a netcop just like your little buddy stebie.
GOOD LUCK IN THE CONTEST!!!!!!!

See toad, You're accusing me of something that I never said, that makes you a liar. It's you're, like you are, not "your a netcop". So by you accusing me is proving your point? When the heck did I say I would netcop you, you little weasel? I'm not going to net cop you, what I'll do is a thousand times worse you little fool. You are gay, prove you're not, being gay isn't a sexual thing you idiot. Saying I dl kiddy porn is slander and you have accused me of a felony. You better correct this now or you will pay. For your information, transmitting 3 khz away is legal. Now this is your illiterate interpretation of the law, didn't you say you were going to get me charged with a felony, that you would have a monitoring station listen to your show? Wasn't your words "even saying something like that should get his ass in trouble"? Well toad, I'm

waiting, where's the trouble? Aren't these also your words? "we will see if the FCC thinks their yanking my chain is funny" You snitched me out to the FCC? Did they laugh in your face? The bottom line toad is this, if you snitched to the FCC, well then you're a netcop. If you didn't snitch, well then you are a liar. So what is it toad, are you a netcop or a liar? you are one or the other. So before you call me something, look in the mirror snitch!
Now the next thing moron, news groups aren't moderated, nobody is elected to be the news group spokesman, nobody is going to kick anybody off this news group just because you say to! You call everybody else dumb, you're the moron. Think about this the next time you are operating your appliance, two rigs transmitting at the same time six kHz apart will not do any harm to the front ends ot the receivers!
I'm giving you until tomorrow to remove the slander from your blog, I don't need any more of your stupidity. My rules, my way or you'll pay big time, last warning turd. You can cry all you want sissy boy, you can say the pen is mightier then the sword until somebody sticks a sword up you ass!

Lets talk about this statement toad. I never said anything about me removing anything, get it straight toad. You are saying that you will record and report, is this not net coping? You are a little peon snitch. Steve isn't my buddy, this is just another of your lies toad. Again, do you just echo others? His name is Steve not stebie? Get original toad, come up with some of your own sayings. You say "GOOD LICK IN THE CONTEST!!!!!!!" sheesh, you have the same saying on your blog in 2 places, you are gay. I bet you have never been on HF except that one time to check in to the lambda net. I bet you even have rainbow stickers on your Chevette. Toad, if you need to reply, leave Steve out of it, get over your infatuation of the man, I really don't think he's your type, gay that is. DO the threats or shut up moron!

Oh, final thought, That was you in the picture with the vacuum, and why in the heck did you pick the name "RED PANTIES MAN" ?
The clock is ticking red panties boy!

So I guess the upshot of all this is that the ARRL is going along swimmingly, everything is just great.

Since the League represents its members accurately, we better not do anything to change it. It's all good.

The loss in membership since 1997 is just some kind of aberration, and besides, good riddance - we don't need *those* types anyhow.

An almost 13 percent drop in membership since 1997 is *nothing* to worry about.

Well Jimmy, if it is 3KHz that's ok but, you stated that you were going to run two 1,000 watt transmitters on either side of my station which kind of looks like your trying to cause interference with my legal station. As for the monitoring stations I said nothing about the FCC I have my own monitoring stations out there doing my monitoring for me....so I don't know where you got your paranoid ideas from. As for slander I don't what on my blog is slander, the only thing on there, talking about you is your post from this newsgroup about running the two transmitters on either side of my transmission. So hey go for it, but I don't think it's going to get anywhere. As for slander call me gay, when I am not is also slander but hey go for it.

> It is NOT about Stebie's "battles" with his
> "opponents" and how "bad/wrong/ignorant" they
> are. It is NOT about Stebie at all!

Well. Lennie...YOU are the only one who typically needs to bring up
the USMC. Brain's failed attempts at "dissing" my alleged overweight
status vis-a-vis my pic on QRZ is usually the only references to CAP.
and Okinawa only came up as a result of discussing MARS which IS a
Amateur Radio related topic.

None of those topics are ones in which YOU have any prctical
experience.

> > Not by a gutless punk like you, Lennie...At least I got the
wings!

No bluff. If I didn't want you to "check up" on this, I wouldn't
have given you the information.

be my guest or be known (which you already are, byt the way...) as
a coward.

> >> It's the Marine Corps.
> >
> >Hi! Hi, hi!!!
> >
> >The Marine Corps is silent on the subject.

The Marine Corps is only "silent on the subject" since you didn't
ask the question for them to answer.

> Poor Stebie...he NEEDS to be a PART of something
> "greater" than the ordinary...to "be somebody" in
> his own eyes. He NEEDS to be in a position of
> authority...to have some "belonging" to a mighty
> (in some eyes) organization having lots of trappings
> of patriotism, honor, glory, etc. The military cast
> him out and he probably resents that, begging to
> have a connections again.

Wheeeeeeeeeeeeelp....The Armed forces didn't cast me out, Lennie.

As for "belonging"...Why don't you go wake up Mrs. Correspondence
School shrink and ask her what "Maslow's Hierarchy" is all about.

I know certain aspects of human development are beyond you, Lennie,
so perhaps she can guide you a bit...

> MARS on Okinawa of 1981 was NOT of any importance
> in military communications in the Pacific area.

Ahhhhhhhhhhhhhhhhhhh.....But Army communications in 1953 is important today...Uh huh...Funny how you manipulate what's important and what's not, Lennie....

> "NCOIC" is an old, common military term, an acronym
> for Non-Commissioned Officer In Charge. It refers
> to what would be "foreman" or "superintendent" in
> civilian life. "OIC" (for Officer In Charge) would
> be the responsible commissioned officer.
>
> Stebie did NOT explain what the "A" stood for in
> "ANOIC." That's an unusual acronym and not
> familiar.

I guess "assistant" was beyond you..?!?!?

Even the Army has "ANCOIC" billets, Lennie.

> Stebie is just trying to BLUFF his way out, Brian.
> He will NOT answer you directly (a sure case of him
> doing the bluffing snowjob) and instead tries to
> misdirect the thread onto you and your alleged (by
> him and Heil) "illegal operation."

No "misdirect" lennie.

Unlike Brain, I provided a specific unit, date and place.

Brain has provided nothing.

> 1981 was 24 years ago...(SNIP)

Very good, Lennie.

And 1953 was 52 years ago.

Huge snippage of Lennie's attempts to make an excuse for not following up on my assignements snipped.

Usual dissing of others military service noted.

> Few states have INDEPENDENT "guard"
> organizations and they are NOT under any
> federal command as are Army or Air Guard
> units in times of emergency.

They're not "independant", Lennie. They're under the direct control of the Adjutant General of the responsible state...Just like the National Guard unless federally mobilized.

> As I've written, copying an old, hoary folk maxim,
> "###holes are cheap and plentiful." BLUFFERS
> are that kind of person. They all suffer from
> the malady of EXCREMENTIA...

Then from your assertion I can conclude you have a terminal
case...

The foregoing was a massive bluff...On YOUR part.

Putz.

Nah, no applause Sweetums, it's just and old engineer's trick which
apparently isn't used much these days. "If you don't have the info
simply get off yer butt and ASK somebody who DOES have info."

> > >I tossed an e-mail msg at Dave Sumner requesting a breakdown of ARRL

>
> Not "dramatic." :-)

Yes Sweetums, a lousy 0.7% drop in total membership in 8.5 years is not a dramatic anything. In fact it indicates a rather comfortable level of stability so all is well in Newington.

> >Total Techs = 46,655 or ~30% of the ARRL membership are Techs vs. ~50%
> >of all licensees. There's a shortfall of Techs within the membership

> bitch and moan and rationalize the be-jeezus out
> of those numbers and do some remarkable "numbers"
> while performing on this stage...a sort of
> "American Idle" show. :-)

Sweetums you silly old thing you blew it again, you missed the real kicker in bush-league imbroglio. The gist of Hans' proposal being that the League needs to reshuffle some of it's organization charts. His new program would "fix" what he perceives as some huge lack of Techs' interest in the ARRL and draw them into the Inner Sanctum. Welp, in the end his perception ain't reality at all even with rough passes at rough numbers yes? Fact is that ~17% of the pore downtrodden Techs are League members whilst only around 13% of the "high-ranking" Generals are members. Now what? Hmmm?

> Let's take raw numbers, such as 46,655 ARRL
> member Techs in 1996. Compare those to 350,455
> Techs as of 7 May 05 of 350,455. That's a delta
> of a "mere" 303,800!

Cut your smoke & mirrors act Sweetums, I did not just get off the boat.

> A few years ago, I thought that it would be
> "remarkable" if just a quarter of all licensees
> would be Techs. NOW it is edging up to HALF of
> ALL ham licensees!

Like I said, all is well in Newington. Hiram Percy would be delighted.

> ARRL bias, as revealed through the pages of QST,

Since I've acquired (2) Alinco DX-70 transceivers and (2) Ameritron
AL-82 Amplifiers, I've decided to choose two frequencies on 20 meters
(3
khz either side of toads show) and have a 24/7 news service warning
other amateurs about the toad (freedom of speech). Since I hate the
ARRL
so much, I'll rebroadcast all of their bulletins for amateurs that may
have missed when the ARRL first broadcast them. Frequencies pending on
toads choice of frequency. I hope toad gets a female from Taylorville
to
help him/her/it run the show, they'd have to be smarter them
him/her/it,
you can't get much dumber!

I just placed a HY-GAIN TH3 on both of my 50' towers placed 250' apart
and feeding them with 9914F cable. One station will be my call and the
other station will be my wifes call. I won't use rotors because both
antennas will be pointed South. I'll be doing some testing later today.

If you happen to hear my test on 20 meters later today, please note the

time and frequency and also if you can copy both signals, they should be
6 khz apart. Please forward this information along with signal strength

and your location to todd so that he can place this critical test information on his blog page. Forward any information, even that you didn't hear the test!
Thank you for your time.

Ran the test today and everything worked as planned, I have heard that the toad was a bit concerned that the front ends of the radios might blow? No need to be concerned toad, they won't blow unless you blow them, but it doesn't take a rocket scientist to see that if both rigs are in transmit then the receiver sections are out of the picture, it wouldn't matter anyway as they are only being used as transmitters! Another concern was about malicious interference? Two problems here,

the FCC isn't going to get involved with giving him a monitoring
station
for his own use, nor do they care what happens to his "shows" after
the names he has called them. The other thing is that 3 khz above or
below has been the accepted spacing in Amateur Radio.
Anyway, get those reports in to the toad as soon as possible and
I'll
start to record the ARRL bulletins tomorrow!

So lets see what the FCC says. I'm suprise steve that your still on
here....hmmmm AOL hasn't kick your ass off yet?

Why would they, Todd? I don't use profanity, I don't make threats
of physical abuse, and I don't make ill will towards others deceased
children.

Even if they did (which they won't), I will still be able to post
to RRAP unfettered. AOL is NOT my primary ISP.

Nice try though...

<snip all the redundant crap>
So you are snitching you little cry baby! Same as a netcop.
You know I haven't seen you deny anything except the part about being gay. That would make it true that you are a moron, that you are an illiterate idiot and a snitch. Cry to the FCC, I won't loose any sleep over it red panties boy, that's right, you don't deny that either, or that it's you in the picture that you posted, or that you are an expert on kiddy porn, so all these things must be true. Toad, it's not interference if We don't hear you! So run tell your mommy, cry all you want, and be sure to check that your coax is intact, we wouldn't want to hurt your finely tuned homebuilt transmitter! Besides, who will hear you if you don't post a frequency, as if anybody wants to listen to a gay boy wantabe pirate ramble on about his misinterpretation of broadcast law. I won't laugh at you toad, there's nothing funny about you, I feel sorry for you, and I feel bad about picking on somebody as handicapped as you are. It's just a shame that you can't get the help that you need. Oh by the way, the word is intended because I didn't "attended" anything to do with a low life dead beat like you!

Has ARRL membership EVER gotten as high as a
quarter of all licensed U.S. amateurs?

On "8.5 years is not a dramatic anything," that's
a rather gross fluff-off, "sweetums." A child who
begins public school at age 5 will be almost out
of Middle school in 8 1/2 years. Rather dramatic,
I'd say...but, since you are cheerleading the ARRL,
you will aerily dismiss it when it comes to the
League. :-)

>Sweetums you silly old thing you blew it again, you missed the real
>kicker in bush-league imbroglio.

"Blew" WHAT, you silly old beeper geriatric? :-)

>The gist of Hans' proposal being that
>the League needs to reshuffle some of it's organization charts.

Tsk. It's a LOT MORE than that, "sweetums."

The ARRL has to have its MINDSET realigned and
recalibrated to fit this new millennium. It can't
continue on using the now-very-old standards and
practices of the 1930s in amateur radio...such as
the bias in favor of morsemanship over everything
else...such as the bias in favor of featuring the
HF bands over all other bands.

>His new
>program would "fix" what he perceives as some huge lack of Techs'
>interest in the ARRL and draw them into the Inner Sanctum.

As of 7 May 2005, the actual license numbers from
the FCC database, as shown on www.hamdata.com, show
that 48.43% of all U.S. amateur licensees are in
the Technician class category. [wait a few days
and the percentage will get higher... :-)] At
the present rate of growth of Technicians...and at
the present rate of attrition in all the other
classes, the MAJORITY of U.S. amateur licensees
will be Technicians in another couple of years.

Regardless of not fitting YOUR perplexed paradigm
on What Ham Radio Should Be, the unalterable fact
is that the ARRL only pays lip-service and spins
"approval" of those "lower classes" insofar as
what the League thinks Ham Radio Should Be. If
you would get away from sniping at others not
sharing your concepts of hamdom, you could note
the "survival syndrome" exhibited by the ARRL and
its BoD...they just don't like CHANGE and want to
keep things cozy and comfy as THEY like it in the
hobby.

> Welp, in the
>end his perception ain't reality at all even with rough passes at
rough
>numbers yes?

Using survey numbers of 1996 in the year 2005 isn't
even close to your "engineering way," "sweetums."
It certainly would NOT be good business sense.
Don't forget that the League gets millions out
of their PUBLISHING and product sale/resale end
of operations. [check out their Federal income
tax statements for the real numbers]

> Fact is that ~17% of the pore downtrodden Techs are League
>members whilst only around 13% of the "high-ranking" Generals are
>members. Now what? Hmmm?

Cut your smoke & mirrors act, "sweetums." :-)

>> Let's take raw numbers, such as 46,655 ARRL
>> member Techs in 1996. Compare those to 350,455
>> Techs as of 7 May 05 of 350,455. That's a delta
>> of a "mere" 303,800!
>
>Cut your smoke & mirrors act Sweetums, I did not just get off the
boat.

An aircraft carrier is NOT a "boat." :-)

Your glasses must have fallen in the water then,
since you can't understand that USING 8 1/2 year
old data to make your point (preceding) and now
saying that this data is no good...that only makes
you an intellectual hypocrite. Or a PCTA (they
are very similar in that regard).

>Like I said, all is well in Newington. Hiram Percy would be delighted.

Tsk. You are still mumbling Maxims?

Maxim DIED over a half century ago, "sweetums."

ARRL membership is STILL LESS than a quarter of
all licensed U.S. amateurs. [21.1% to be more
exact]

>> ARRL bias, as revealed through the pages of QST,
>> is still towards "working DX on HF with CW."
>> QST still has a column of "The World Above 50
>> MHz," as if that was still a strange planet. :-)
>
><snore>

Poor baby...strain too much for your ancient bones?
Can't handle controversy? Think you are "better"
than the average ham hobbyist? Of course...you
are morse code tested!!! That makes you "superior!"

[superior...like the lake...all wet? :-)]

Quit chomping them hoagies, old timer, they give
you gas and make you fall asleep in your rocker.

Listen 1 more time you stupid little idiot, if you have something to say
to me, then say it, leave your idol Steve out of every post you make to me.
Your opinion is nothing you fool, a snitch is a snitch, in your opinion
I broke the law because your non existent show might have been
interfered with? You don't know what you are talking about butt wipe.
Better yet fool, quit talking and do the deed, snitch me out! Tell them
that there might be a definite possibility of an absolute maybe that
somebody could be thinking of interfering with your nonexistent illegal
show! What a moron! Pull your tiny head out of the vacuum long enough to
think about it you perv!
Here's something for you to report to your little mommy mr. red panties
man, tell her I'm going to hunt you down on HF and on echolink and cover
your little homemade signal up! I'm going to get you banned from
echolink because I'll let my novice neighbor talk over your 2 meter link
and you being responsible for your stinky bedroom station will pay the
fine! :)
Here, I understand this is too much for you to understand moron, so
answer this.
You said
"I don't think causing interference
to a legal information bulletin should be allow, or even suggesting
causing interference"
Do you make the laws up as you go? Show me where I said I was going to
interfere with you, better yet, show me a law against "even suggesting
causing interference". Have your motoring stations stand by, have your
bodyguard hold your gay hand as you cross the street!
It's a bird, it's a plane, no, it's a gay toad that calls himself the
red panties boy!

I take extreme exception to that. We may not have 100 foot dishes,
but I routinely measured 1.5 db noise (at 432) on the crab nebula to
test
my array - sounds a little like radio astronomy to me. Amateurs
have also produced "detailed" all-sky maps at certain frequencies
and have had them published in technical journals.

> IS ARE CONSUMERS NOT LEDERS OF THINGS. THAT IS WHY THEY NEED
BULETINS

"Real Experts?" How many radio innovations used today are as
a direct result of technical interest and furthering of the radio art
produced by these "amateurs".

> a rather gross fluff-off, "sweetums."

Agreed.

But my math says the drop is more like almost 13%.

Sources are the ARRL annual reports at:

http://www2.remote.arrl.org/announce/annualreport/

1997 (highest membership) 177,396

2003 (last year I have an annual report for) 154,545

22,851 members were lost in that time.

Wouldn't a .7 % drop be more like 1242 members leaving?

Hard to say that that sort of drop isn't dramatic!

As posted on:
http://members.aol.com/_ht_a/k1man14275/myhomepage/business.html

Pecuniary Interest

I have read a lot of articles about one K1MAN and how many amateur radio operators feel, including the FCC, about Glenn Baxter's "broadcast" and how there's some "pecuniary interest," mainly referring to his website www.k1man.com. But many don't talk about W1AW and the American Radio Relay League (ARRL) and its "pecuniary interest," like the fact the ARRL on their web site not only invites you to join as members, but also makes amateurs pay a HIGH membership fee which continues to increase. But they also, on their website, offer for sale books and other stuff. Now many out there would say that is a non-profit organization and that money is used to support the ARRL and support amateur radio. No matter, in my humble opinion, if it's a non-profit organization or for profit; commerce is commerce. So no matter if it's K1MAN or W1AW, "pecuniary interest" should apply regardless of who it is. I mean paying $39 dollars for a "club" (or should I say "Inc.") is not, in my humble opinion, worth it. I mean, what the hell have they done for me? NOTHING! The only place I see that money going is in the pocket of their bosses. So what do you get for that $39??? A crappy magazine which is biased and really is only good as toilet paper. Hell, you would be better off supporting your local ham club which would address issues that affect you, because the ARRL only wants you money. For $39 dollars I would want something more out of club that would benefit me, and I'm not talking some crappy magazine. Now I'm not saying that K1MAN is any better, but before these "die hard" ARRL member start getting on these newsgroups and message boards, look inside yourself and ask yourself what has the ARRL done for me??? The Amateurs have over the last 20-25 years lost bands. The league isn't pushing hard enough for changes regarding BPL or PRB-1. Instead the ARRL would send the paid lackey Hollingsworth to suppress free speech on the air. The ARRL is known for their anti-no-code stand back in 1983. They are known for petitioning the FCC for some rules change that are stupid. But to me it's the ARRL pushing onto it's members the idea that there is no free speech on the radio and their "Legal Advisor" and formal FCC henchman Phil Kane gets on these newsgroups and boards to spread the ARRL propaganda and lies about speech on the airways.

Apologies for being repetitious here but sometimes that's what it takes
. . When I asked Sumner for the by-class breakdown he wrote that the
last available data he has is from August *1996* as reported in the
February 1997 issue of QST.

Extras 38,852
Advanced 39,430

General 25,245
Tech Plus 22,634
Tech 24,021
Novice 2,627

Total members Aug. 1996 = 152,809

If you have a problem with this don't bore me with it, take it up with Sumner.

That's because hamfests have been taken over by computer folks; almost no radios to be found these days.

From the ARRL Annual Report for 1996 source

http://www.arrl.org/announce/annualreport/

On page 5, they announce the numbers:
175,023 members

The following year was the year that the ARRL experienced its all time
peak membership:

177,396.

So whether I'm boring you or not, you were the one bragging about your
smarts in going to "the source". I went to a source too. Mine aren't
broken down by class, but you would have to admit that 22,214 is a
significant difference when the total numbers are compared.

One of us is wrong with the numbers. Maybe your source made a mistake?
Or maybe *all* those annual reports were wrong. Which do you think more
likely?

Actually, it's an ultralight...Or it WAS an ultralight until your illegal modification with a 10 gallon tank which invalidated it's blanket coverage under Part 103 of the FAA's rules and regulations.

It's not presently licensed as either an "experimental" or as a "light sport aircraft" either, so if you fly it, you are doing so illegally.

And you're not licensed either, Todd...as of this morning's ACB update, there's no "Todd E Daugherty" in their database...No medical...No airman's certificate...No nothing...

Go figure.

> http://216.176.81.228/n9ogl.htm

I had to look, Jim, since you brought it up!

I followed the links to "pictures"...I learned a couple things...

I now know why Todd is so intent on running his broadcasts on 20 meters...Every picture of a female family member was taken with at least one of them with their mouth in gear...this is obviously Todd's only way to get a word in without sputtering "But Auntie...but Auntie...but Auntie..."

Also, I will have to compliment Todd's dad, seen in the last (or next to last?) pic on the page. Pretty fit-looking fella for his age...I am guessing around 58-62...

Of course I am sure he stays that way working the hours he has to in order to support his deadbeat stay-at-home adult son...bad enough he has to feed, clothe and house him, now he's going to have to pony-up the funds to pay for at least 2 radio transmitters running 24/7.

But what does Todd care...

No picture of his alleged Japanese girlfriend. I (really don't) wonder why...

So tell me just what name or other search criteria you are using to
look for it. It's there wogie, if you know what to look for.

Poor wogie, had to retake the amateur radio exam because Riley caught
him red handed violating the rules, so now he has the welfare extra-lite
ticket he obtained by taking the exam at a license give-away VE session
where all the answers to all the questions are available. No knowledge
necessary, just memorize the answers. So tell us all about negative SWR
and RMS voltage wogie.

And then wogie braggs about having an RR Operator *Permit*, no test
necessary, just fill out an FCC form. Whaaa-hoooo, big deal!!! What
happened to that 2nd Class ticket you claim to have had wogie?

'Scuse me?? Where, exactly, did I brag about any of it? I simply fired off another request for some info to a League management type and Sumner responded as usual. Which is typical of the sorts of things he and the rest of the folk at HQ get paid to do. I've done it any number of times in the past and I expect I'll do it many more times in the future. This is "bragging" on my part??

> I went to a source too. Mine aren't
> broken down by class, but you would have to admit that 22,214 is a

Uh-huh. As if an 11% discrepancy in some arcane data in a hobby NG
actually matters.

> One of us is wrong with the numbers.

Makes no sense.

> Maybe your source made a mistake?
> Or maybe *all* those annual reports were wrong. Which do you think
more
> likely?

I don't "think about" such things Michael, I don't take offhand
potshots at whether or not a specfic dataset is right or wrong and
neither do the rest of us who are expected to responsibly process data
and crunch numbers. We chase down the data to it's source and
straighten out discrepancies by the numbers. Yeah, I know. "Not your
field". Obviously. Not my problem. His e-mail address is
<k1zz@arrl.org>.

Why is Steve so fixated on "female family members" of other rrap'ers?

A member of my family called his attempts at familiarity "creepy".

>
> Embarrassing, ain't it...

Tsk, tsk, tsk. NO "embarrasment" at all...to me.
I've been a working PROFESSIONAL in radio-electronics
since 1952, passed a First 'Phone test in 1956, been
co-owner of a business radio in what is now called
Private Land Mobile Radio Service, and have legally
OPERATED on many MORE parts of the EM spectrum than
is permitted to just amateur radio licensees.

However, Robeson's post is just more of the puerile
junior-high school babbling by the Avenging Angle of
Dearth, Stebie Robeson, off on another tangent
of hatred, trying to mouth-off more abuse. Tsk.
It does indicate that the mindset of some amateur
extras hasn't gone much beyond age 13 1/2.

At question is NUMBER DATA on/from ARRL and the
DATE of such numbers. Kelly contends that an
8 1/2 year period is inconsequential to the
discussion. Coslo disagrees with that. I disagree
with Kelly's contention. Robeson can only jeer and
heckle the participants in that discussion, not
being able to think while in the midst of his
unstable emotional volatility.

Kelly thinks that the ARRL is "going along
swimingly," no problems there, everything just
fine.

Not the case in reality. Brakob realizes that and so does Coslo. Note the statements on the www.hamdata.com webpage in regards to statistics: TECHNICIAN class license totals have been increasing at a rate of 26 per day! [that's about four times faster than the combined General and Extra class increases of 6 per day]

On the license class totals, it is interesting to compare (via Hamdata) those of 11 May 05 versus those of two years prior:

2005 2003
Both Tech Classes - 350,566 348,749
All four others - 373,171 378,994
Total, all classes - 723,737 727,743

Percentage of Techs - 48.44 47.92

Comparison of Growth, 2005 v. 2003

Gain or Loss, Techs - +1,817
Gain or Loss, other four - -5,823

Gain or Loss, all licensees -4,006

It should be noted that the peak of U.S. amateur radio license numbers was on 2 Jul 03 with a total of 737,938 then (number of club calls not known). The Hamdata statistics are derived automatically by downloading the publicly-available FCC database (massive in size) and sorting for classes.

The increase in both Technician classes is not "dramatic" but it IS an increase and has NOT stopped as some amateur extras claimed "would happen" after the 12-year elapse from the 1991 creation of the (no-code-test) Technician class. At 48.44 percent of ALL current licensees, that IS a very large percentage and is constantly approaching a MAJORITY (it hasn't stopped increasing in 14 years).

It should be obvious (but is not to some closed mindsets) that the "other four" classes (Novice, General, Advanced, Extra) have had their totals DROP in numbers. The "other four" all require morse code testing. The no-longer-issued-new Novice and Advanced classes dropped by 11,649 but the General and Extra classes gained only 5,826. The net change in the "other four" is -5,823. The two-year growth in both Technician classes is NOT enough to stem the 4,006 loss in licenses overall in two years.

The (no-code-test) Technician class licensee is FORBIDDEN to operate below 30 MHz. A Technician Plus licensee is permitted below 30 MHz only if they have taken a morse code test. Old paradigms of "the majority of hams work in the HF bands" is rapidly approaching oblivion. The "World Above 50 MHz" may soon be the majority-use spectrum in amateur radio. The ARRL may not be tuned in to that band...

Sweetums you old dear why don't *you* get off your butt and chase down more current data than I've been able to come up with. Then maybe you'd be able to rub it in my face when it turns out that your newer by-class ratios are "dramatically different" from the 8.5 year old data I posted.

. . . nah, you don't have the gonads . .

Thank you, senior, but I'd prefer to get data direct
from the FCC...even if it has to be through Hamdata.
It is daily, it is honest, it isn't "massaged."

...and quit coming on to me with those endearing
terms like "sweetums." I'm straight. :-)

>. . . nah, you don't have the gonads . .

"Gonads?" :-)

Kellie equates sex with Sumner?!? :-)

Kellie doesn't have the GUTS to admit he might have
made a mistake, "screwing around" with things he
apparently can't handle. :-)

Tsk. Kellie is looking for "love" in all the wrong
places...

[practice safe eating - use condiments...]

>Look at the bright side Steve, with Sweetums on the outside looking in

>we have less spectrum pollution to deal with.

Good grief, Kellie, you two already create more POLLUTION than any one government agency can control! :-)

You really CAN'T bother to consider the hobby for anyone else but yourself, can you?

Hmmmm...a matched pair, those two...role-models for the U.S. amateur extra class.

Say "Hi" to Dave S. next meeting you attend in the "Residence Radio Club" he is the trustee for...

If you read the reports, it doesn't appear that ARRL thinks the
membership numbers are arcane.

They are *very* much concerned about the membership drop. It isn't too
hard to figure out what happens to an organization that loses 13% of its
members in 6 years (1997-2003)

> and crunch numbers.

Do people who responsibly process data (as opposed to say me?...)
happily process data that is wrong?

> We chase down the data to it's source and
> straighten out discrepancies by the numbers.

Cool. I don't feel much need to chase my numbers down much further, as the annual reports, while not unimpeachable, are an audited instrument. Bad membership figures in an annual report would be bad indeed.

> Yeah, I know. "Not your
> field". Obviously.

I don't understand this at all. Are you arguing from authority?

> Not my problem. His e-mail address is

No thanks.

I don't know why you're worked up about this. Show me the location of my rudeness and "offhand potshot" behavior, and I'll be happy to apologise here in the group.

I wonder why it is that YOU are the only one who can jerk Lennie's
chain about his "redirections", but when I do it it's subject for
ridcule, Hans...

Could it be a bit of that two-facededness coming out again...???

I bet it is!

Oh my. At first I didn't notice the post. Woger is so short that his posts are easily missed. As I recall, you can find Woger's height by taking the square root of two. That turns out to be Woger's height in meters.

I wonder if Woger has finally found out what the square root of two has to do with r.m.s. voltage and current calculations?

Source record: 107914

ARRL blunders have added up over the years, and many
ARRL blunders were the result of their superior-than-thou
attitude toward their members. It is no surprise the
pigeons are now coming home to roost.

One example. In the mid 80s, ARRL members in Hawaii
requested the ARRL to bulk air mail QST to Hawaii to avoid
the three month delays in receiving QST. Virtually all
magazine publishers bulk air mail their publications to Hawaii,
but not the ARRL. Their attitude was To Hell With their
Hawaii members. Hawaii ARRL members responded by canceling
their ARRL membership. Cost to the ARRL would have been
pennies, instead the ARRL permanently lost members, and those
former members continue to curse the ARRL in Hawaii to this
day.

Loudmouth dumbo Mr. Nescio doesn't seem to know that radio astronomy was
invented by a ham.
IIRC hams were also involved in the development of SSB and FM too.

Isn't it great that half-truths gets posted every day.

I (as well as others) were on the ARRL's Pacific Division committee
that looked into this. The problem was that CERTAIN Pacific Section
(Hawaii) members wanted their issues sent either by first-class mail
from the stsateside printing plant or alternatively bulk-mail from
the same source. In either case, they did not want to pay the
additional costs. "Pennies" it wasn't. By that time most magazines
were being printed on the Island but the very small circulation of
QST there didn't make that economical either. Bulk mail would have
required additonal sorting in Honolulu which was an additional
charge over and above the shipment.

The best recommendation was the bulk shipment with the members
paying the "offshore" rate to cover the additonal cost. This didn't
sit too well, and lots of "Hawaii IS in the United States" shouts
were heard. In the end, the members affected were given the choice
of status quo (surface mail at "basic" rate) or first-class airmail
delivery paying the extra charge. Some picked one, others picked
the other. Still others used that as an excuse to not pay ARRL dues
but still benefit from the regulatory work that the League did and
still does on behalf of all radio amateurs, members or not.

Case closed.

BULLSHIT! The ARRL did not want to even discuss the
matter. The ARRL's "solution" was to tell individual members
to pay for air mail delivery.

CASE CLOSE (now)

and nobody benefited from any "regulatory" work
more BULLSHIT!

Results speak loudest. The league is an organization which is
rapidly fading into history, due to the very attitude you display
here. Let me spell it out for you:

A R R O G A N C E

Untruthful as in your opinion.

Truthful as in according to the pictures that you recently posted,
you have too much 'sides'...

And since when are YOU concerned about "...the merit of the
facts...", Hans...???

YOU are JUST as quick to slide in a personal poke as anyone in
here, so don't even TRY to 'look innocent' !

You show much aggression.
That is no way to win members for an organization.
A contrite approach would be more effective.

Dr Hambone

Methinks you a liar, Anonymous Coward.

> CASE CLOSE (now)

Guess not, since you're here discussing it. And if you mean "in
this forum", you don't have the power to "close" anything except your
mind.

> and nobody benefited from any "regulatory" work
> more BULL#####!

And you demonstrate your I G N O R A N C E.

> Results speak loudest. The league is an organization which is

>
> CASE CLOSED

The A R R O G A N C E here is that you think you have the power
to "close" anything other than your mind. And the ARRL is "rapidly
fading" anywhere....

No, I've deiced not to run 24 hours because it would be a burden for
one person to do for the time being. I am however going to extended it
on HF from one hour to three hours. But that's not to say I will be
going 24 hours in the future.

Does that 26 per day include Technician Pluses renewed as
Technicians? Does it include the Novices who pass Element 2 and get
a "Tech-with-HF"?

Very interesting!

But note that the hamdata.com numbers include licenses
that are expired but in the grace period. They also
include club and other non-operator licenses. The numbers I
post here twice a month include only current, unexpired licenses
held by individuals.

I think the totals I post are a more accurate snapshot of the
license situation than the numbers on hamdata.com, because the
inclusion of expired-but-in-the-grace-period licenses skews the
totals considerably.

> It should be noted that the peak of U.S. amateur

How massive?

Let's look at some other numbers:

These are the numbers of current, unexpired amateur licenses held
by individuals on the stated dates:

As of May 14, 2000:

Novice - 49,329 (7.31%)
Technician - 205,394 (30.44%)
Technician Plus - 128,860 (19.09%)
General - 112,677 (16.70%)
Advanced - 99,782 (14.79%)
Extra - 78,750 (11.67%)

Total Tech/TechPlus - 334,254 (49.53%)

Total General/Advanced/Extra - 291,209 (43.16%)

Total Novice/General/Advanced/Extra - 340,538 (50.47%)

Total all classes - 674,792

As of April 30, 2005:

Novice - 28,604 (decrease of 20,725) (4.29%)
Technician - 268,116 (increase of 62,722) (40.23%)
Technician Plus - 49,987 (decrease of 78,873) (7.50%)
General - 136,783 (increase of 24,106) (20.52%)
Advanced - 76,410 (decrease of 23,372) (11.46%)
Extra - 106,577 (increase of 27,827) (15.99%)

Total Tech/TechPlus - 318,103 (decrease of 16,151) (47.73%)

Total General/Advanced/Extra - 319,770 (increase of 28,651) (47.98%)

Total Novice/General/Advanced/Extra - 348,374 (increase of 7,836)
(52.27%)

Total all classes - 666,477 (decrease of 8,315)

> The increase in both Technician classes is not
> "dramatic" but it IS an increase and has NOT
> stopped as some amateur extras claimed "would
> happen" after the 12-year elapse from the 1991
> creation of the (no-code-test) Technician class.

Who claimed that would happen? I sure didn't.

> At 48.44 percent of ALL current licensees, that
> IS a very large percentage and is constantly
> approaching a MAJORITY (it hasn't stopped
> increasing in 14 years).

Not really.

The number of current Tech/Tech Plus licenses held by
individuals is now over 16,000 *less* than it was just
5 years ago. It is trending *away* from a majority - if you look
at the number of current, unexpired licenses.

The percentage of US hams with a current, unexpired Tech or Tech Plus
license has dropped by 1.8% in the past 5 years. The percentage of US
hams with a current, unexpired General, Advanced or Extra license has
grown by 4.82% in the same time period.

Of course some of that growth is Novices and Tech Pluses upgrading
to General or Extra. And some of it is new hams who don't let the
current license requirements stop them.

> It should be obvious (but is not to some closed
> mindsets) that the "other four" classes (Novice,
> General, Advanced, Extra) have had their totals
> DROP in numbers.

Yet in the 5 years since restructuring, the opposite is true - the
number of Techs/Tech Pluses has dropped and the number of the "other
four" has increased.

> The "other four" all require
> morse code testing.

So does a Tech Plus, but you count them as Techs. You also count
licenses that are expired but in the grace period as if they were
current licenses.

> The no-longer-issued-new
> Novice and Advanced classes dropped by 11,649 but
> the General and Extra classes gained only 5,826.
> The net change in the "other four" is -5,823.
> The two-year growth in both Technician classes
> is NOT enough to stem the 4,006 loss in licenses
> overall in two years.

And the significance of this is?

> The (no-code-test) Technician class licensee is
> FORBIDDEN to operate below 30 MHz.

Only if they have not passed Element 1.

> A Technician
> Plus licensee is permitted below 30 MHz only if
> they have taken a morse code test.

Of course Technician
Pluses who renew as Technicians keep their HF privileges, and
Technicians who pass Element 1 get them, even though their
licenses don't change class.

So an unknown number of "Technicians" can legally operate on some HF
amateur bands. Also, any amateur with a Technician Plus or Novice
license, current, grace period, or expired, can get a General or Extra
without any further code testing.

What's your point in all this, Len? You give a lot of numbers but never
seem to say why they matter.

And why does all this concern you so much? You're not a radio
amateur, and it appears that you'll never become one either -
your "out of the box" claim of almost 5-1/2 years ago notwithstanding.

The Microcephalic Dwarf and Etiquette During an Amateur Radio and Newsgroup etiquette class, Riley Hollingsworth says to his students: "If you were QSO'ing with a well educated Ham such as David Heil and during the QSO you needed to go to the toilet, what would you say to him?"Mike replies "Be right back, I gotta go pee."Riley says: "That would be very rude and improper on your part."Lloyd replies: "I'm sorry I need to go to the toilet, I'll be back in a minute."Riley says: "That's much better, but to mention the word ''toilet'' during a QSO is still unpleasant." And little Rogie says: "My friend Dave, please excuse me for a moment. I must go shake hands with a personal friend, whom, I hope, to be able to introduce to you after dinner." Riley made Roger retest.

Information Bulletins

Ok, this is for those fucking whinny little amateur radio operators who have a fucking hard time reading the rules and regulations and are to busy breastfeeding off of there mama's tit. I know due to their fucking inbreeding that they don't have the mental capacity to read anyway, and for fucking morons who are going to post off the subject material don't waste my fucking time, I will delete that shit from my blog. I know you all are my "FANS" but I'm fighting a war here against assholes who is want to suppress my right to free speech. So for you fucking retarded C.B. operators (and you know who you are) take that dildo out of each other's ass and listen up. I know those fat bastards on rec.radio.amateur.policy don't have a clue when it comes to rules and regulations so let me spell it out for you.

An information bulletin is "A message directed only to amateur radio operators consisting solely of subject matter of direct interest to the amateur service." (47 U.S.C. 97.3(a)(26) The FCC has even gone farther on their website stating "The control operator of the station transmitting an information bulletin is responsible for determining that the subject matter is of direct interest to the amateur service."
(http://wireless.fcc.gov/services/amateur/about/communications.html#s3).
Unlike some amateur radio operators who believe that the receiving station, or even the amateur radio community as a whole can determine what the station transmits.

An information bulletin and a broadcast are two different things. As stated above an information bulletin is "directed to amateur radio operators consisting solely of subject matter of direct interest to the amateur radio service". While a broadcast is "A transmission intended for reception by the general public either direct or relayed." (47 U.S.C. 97.3(a)(10). That's the difference one is attended for the reception of the general public while the other is aimed at a certain group (amateur radio operators)

One of the things I hear from those little crybabies on rec.radio.amateur.policy is that an information bulletin has to be a "newscast" yet, no where in the FCC rules does it state that nor is there any ruling by the FCC that states that it has to be a newscast. As a matter of fact in a warning letter sent in 2004 to one K1MAN, who also transmits news and talk programming directed to the amateur radio service. The FCC informed Mr. Baxter K1MAN, that his transmissions were legal
"It is the finding of this office that you are, with some exceptions,

generally in compliance with the Commission's rules in the amateur service related to broadcasting and information bulletin, and we will explain as followed. Broadcasting is prohibited in the amateur radio service, with some exceptions. Section 97.3(a)(10) defines broadcasting as "transmissions intended for the reception by the general public, either direct or relayed." One-way transmissions are limited in the amateur service, but an exception is allowed in 97.111(b)(6) for "Transmissions necessary to disseminate information bulletins." Information bulletins are defined by Section 97.3(a)(26) as messages "directed only to amateur operators consisting solely of subject matter of direct interest to the amateur service." There is no specific time limit placed upon information bulletins by the Commission rules. A review of your programs at random times since March 3, 2003 indicates that your transmissions were directed to amateur radio operators, not to the general public, and that the individual bulletins were related to the amateur radio service. The only notable exception was the offering of a award for information leading to the identity of parties making threatening telephone calls to you" (letter to Glenn Baxter K1MAN from the Federal Communication Commission April 14, 2004)

My information bulletins are directed to the amateur radio service and consist solely of subject matter of a direct interest to the amateur radio service. So those whinny little assholes on rec.radio.amateur.policy can bitch and whine all they want the fact is my station is legal. So K4YZ can cry little the big baby he is to who ever, the fact is they won't do anything about it.

Toad wasn't it just a week ago you said that Steve got your ISP to boot
you off the news group? Why are you still here if that's true? Was that
just another of your lies?
You know something, if you didn't come here calling just about
everybody names, such as MF AHOLE, moron, dumba## appliance operators,
the list goes on, stop acting like you're smarter then everybody else,
well toad, you just might have been accepted. Why makeup lies? Where
does it get you ? Some people have made some good suggestions to you,
and all you do is put them down and call them names.
One thought toad, look at your blog, if you had children that might be
interested in amateur radio and they did a search, would you truly want
them to stumble across a page so full of hate and vulgar language? I
know I doni¿½t want my children or grand children to see that! The garbage
you spew on your blog is an embarrassment to American ham radio operators!

You have as much right as anybody to be here, I never said you didn't. I
am saying that you have no right to be calling me names like you are here!
Did you say get my head out of my butt? OH, let me quote you moron
"and for fucking morons who are going to post off the subject
material don't waste my fucking time, I will delete that shit from my
blog."
That's censorship if I've ever seen it!
Next thing. Please answer the question with out going of on a nut!
You said
"As for being booted off this newsgroup you fucking nazi I
have the papers to prove it"
Well idiot, WHY ARE YOU HERE THEN? Last week you said they didn't send
you a registered letter? What papers? One lie after another! Don't you
see the counteraction? Calling me names doesn't prove you right!
Please, if you want to answer me, leave you fascination with steve out
of it! Is everybody who doesn't agree with you a nazi?
You know freedom of speech only goes so far, like I can say I'd slap you
silly if I saw you on the street, and to tell you the truth toad, if you
talked to me like that to my face I would. But you aren't worth the time
to look up. You don't know who I am, you don't know who I know, you
don't know if I'm big or little, tough or a wimp. We do know you are a
wimp and think you can hide behind a keyboard, but someday, somewhere,
you'll mouth off to the right person and you'll be eating food through a
straw.
NOW, show me one person here who respects you, one person who will back
you up. Tell me why you are here if you were booted. I know the true
answer toad, you're a liar!

>
> Todd N9OGL

You read too much into everything and you still never answered the
questions! I didn't ask you to respect me, and I'm not calling you a
f##### ahole.
Lets take this a step at at time.
1) I said to name 1 person here who want's to read your blog stuff here,
you have it posted on your blog, so why post it here if nobody want's
to see it?
2) If you were booted from here, why are you here? Don't read too much
into this, just a question, I'm not saying you can't be here!
3) If you had children, would you want them to stumble across your blog?
Again, just a question.
Calling me every name you can come up with doesn't explain or answer
anything.
4) I'm not being a nazi, you can go broadcast, put on a show, call it
information, I don't care. BUT you keep accusing me of stuff I didn't
do, some being felonies. NOT GOOD dude. I never said you broke the law,
it's not my problem. I didn't post on your blog, it's not my style. BUT
if you talked to me in person like you do here, I'd hit you so hard your
whole family would hurt!
So just answer the questions like a human, leave all the put downs and
all the ahole remarks out of it, just make some sense, if you're booted,
why are you here? simple question. If you didn't get a registered
letter, what papers? Now slowly, don't blow a gasket, calm done and tell
the truth, see how refreshing it can be.
I don't care what you think of me or anybody else, just think about
why you want to post the stuff that gets you kicked around?
I haven't seen any positive replies on your blog, not that I care, but
do you ever wonder if it's really the rest of the world or is it just you?

I certainly am. Len can't work any French amateurs in or out of any amateur radio band. If he should ever obtain an amateur radio license, he only need worry about keeping his station where it should be. He is under no obligation to police the operating of foreign amateurs.

> blog.

Guess your expressed intent to "delete that @@@@ from my blog" now
makes you a confirmed liar since you insisted you'd never do that, even
when you yourself admitted you knew there were bogus posts made in
other people's names.

Not that I am surprised...

> I know you all are my "FANS" but I'm fighting a war here
> against ###holes who is want to suppress my right to free speech.

You're not fighting anything, Todd.

You're a profane, loudmouth punk who intends to QRM an already
overcrowded Amateur band for the sole purpose of sating your ego.

And since you jsut stated your intent to "...delete that @@@@ from
my blog", you have no business whining about anyone trying to impede
YOUR "free speech".

> So for you ####ing retarded C.B. operators.....(SNIP)

Anyone who usess the "f" word in a sentence where he also accuses
someone of being retarded is an weak minded fool.

>(and you know who you are)

Yes...We know who you are, Todd...

> take that dildo out of each other's ### and listen up.

You'd better be the one doing some listening, Todd...

> I know those fat
> bastards on rec.radio.amateur.policy don't have a clue when it comes
> to rules and regulations so let me spell it out for you.

You forget, Todd...We've seen your picture...You ahve no business
accusing anyone else of being "fat", Todd.

> An information bulletin is "A message directed only to amateur radio
> operators consisting solely of subject matter of direct interest to
the
> amateur service."

Yes Todd...we get that part. The part YOU don't understand is that
there is no support, need or desire for a Wannabe Junior Disc Jockey on
the 20 meter band.

Also, you have blatantly stated that you have absolutely no
interest or concern for "...those morons who are listening..."

Big snip...

> An information bulletin and a broadcast are two different things.

You keep saying that but you don't get it.

> One of the things I hear from those little crybabies on
> rec.radio.amateur.policy is that an information bulletin has to be a
> "newscast" yet, no where in the FCC rules does it state that nor is
> there any ruling by the FCC that states that it has to be a newscast.

No one has said it has to be a "newscast".

Yet another big snip of usual rantings...

> My information bulletins are directed to the amateur radio service
and
> consist solely of subject matter of a direct interest to the amateur
> radio service.

...the SAME Radio Service that you have called "...those morons
who are listening..."

> So those whinny little assholes on
> rec.radio.amateur.policy can bitch and whine all they want the fact
is
> my station is legal. So K4YZ can cry little the big baby he is to who
> ever, the fact is they won't do anything about it.

Don't bet your daddy's house on that one, Toddie.

> Todd Daugherty N9OGL
> The N9OGL Show

You never answered Hans' question...Are you broadcasting a
bulletin or a show...?!?!

> "The Voice of Amateur Radio"

You're NOT "The Voice of Amateur Radio" any more than you're an
English major.

Hi all,

Well, I am jazzed about field day this year, however, I have additional responsibilities this year that I have not had in the past. I am signed up to work the club site, but I cannot stay the whole time. I would also like to have a station at home with dipole thrown in trees and generator kicking (Hopefully neighbors are ok with this for apprx. 8 hours. Can I work the club and then come home and work the home station and submit a log on my behalf as well? I would be a 1D station at home.

Thanks
Greg

Tomorrow, Friday May 13th, the Tonight Show with Jay Leno will feature a message sending/receiving contest between a cell phone text messaging team and a Morse code team.

The Morse code team will consist of Chip Margelli K7JA and Ken Miller K6CTW.

Chip and Ken do a lot of contests and DXpeditions. Joe Drago, props manager for the show is KF6OCP.

This should result in some excellent PR for ham radio.

73 De Don KA9QJG

Yes, you can operate both. You cannot, however, work the club station
from your home station and give them a point.

If you use a generator (emergency power) at your home you would be
operating Class "E", not Class "D". Class "D" is for home stations on
commercial power.

Finally, remember that any contact on any band counts, except for the
WARC bands (30, 17 and 12) and contacts on 146.520 mHz.

See the ARRL website at http://www.arrl.org/contests/forms/ for the
Field Day rules or a complete packet of the rules and other useful
information.

73, Greg, and I'll be looking for you during Field Day.

Thanks for the info. Just what I needed. Listen for the clarity of the
6146 tubes I'll be burning up at night. I am contemplating taking the cover
off of the ts 520 so I can watch the tubes glow, HOWEVER, with my three year
old daughter watching and camping in the backyard, I may just leave it all
together. I don't need her being thrown into a tree from the jolt!

Well gee whiz, Todd...ya think that your use of the "f" word,
frequent suggestions of improper use of the rectum and other sexually
suggestive language MIGHT have something to do with it...?!?!

You're only reaping what you have sewn.

And if you remove one word of anyone elses posts from your blog,
you've proven that you are an untrustworthy liar.

> >Two-faced coward.
>
> And your pond scum hell your below pond scum.

Pond scum doesn't insult deceased children. You do, however.

From: KC8GXW <KC8GXW@centurytel.net>
Message-ID: <N-qdnUHfYOTjQRnfRVn-qg@centurytel.net>
Source record: 108065

From http://myrockport.com/world.htm

A three-judge panel of the Michigan Court of Appeals declared that the talking penis, nicknamed Dick Smart, telling "purportedly humorous" jokes on a Grand Rapids, Michigan, public access cable television channel constituted indecent exposure.

The court let stand a one-day jail sentence already served by the show's creator, Timothy Huffman.

Wednesday's ruling contained a transcript of the three-minute segment that aired twice in 2000, including the voice-over lines delivered in the style of the late comedian Rodney Dangerfield: "Hi, I'm Dick Smart. I am a comedian, yeah, stand up, ha."

Huffman could not immediately be reached for comment but he told the Detroit Free Press newspaper he planned to appeal in defence of his right to freedom of speech.

,,,,and another link

http://www.freep.com/news/latestnews/pm4130_20050511.htm

he's going to file an appeal to the Michigan Supreme Court....Wait unit
it hit's the federal Court, they will throw the state's ruling out. The
Supreme Court has already ruled on indcency on public access back in
1996. (See Denver Area Educational Telecommunications Consortium Inc.
vs. FCC)
In that case the U.S. Supreme Court rulied that indecent material on
public access was protected by the First Amendment.

At first I thought somebody was faking the toad (like anybody would want to). But then I saw "Wait unit" did he mean "weight unit? Pounds? ounces? Grams? Maybe the toad can come to Michigan and represent Mr. Timothy Huffman, since the toad is always the expert.

What's disturbing is your failure to find the alleged
"terrorizing" comments and re-cite them.

I have, of course, addressed it several times, but you continue to
misrepresent the truth.

That's why we know that Brian P Burke is a habitual liar. he
proves it for us.

So sayeth the Keeper of the Amateur Census. :-)

>I think the totals I post are a more accurate snapshot of the
>license situation than the numbers on hamdata.com, because the
>inclusion of expired-but-in-the-grace-period licenses skews the
>totals considerably.

I don't think so. Many others don't think so.

Now PROVE you are the ONLY ACCURATE voice of
what goes on in this "amateur community."

The FCC doesn't appear to think as you do, Jimmie.
If a licensee is in their grace period and then
renews their license before that period is up,
it just resets the FCC data. The licensed amateur
still retains his/her license after renewal.

>> It should be noted that the peak of U.S. amateur
>> radio license numbers was on 2 Jul 03 with a total
>> of 737,938 then (number of club calls not known).
>> The Hamdata statistics are derived automatically
>> by downloading the publicly-available FCC database
>> (massive in size) and sorting for classes.
>
>How massive?

You have to ask?!? :-) MANY megabytes, Jimmie.
The information is THERE, publicly accessible.
As Kellie exhorts, "get off your duff and go find
it!" :-)

Hint: The actual numbers change on database size.

>Who claimed that would happen? I sure didn't.

Tsk, tsk. My posting was NOT directed to you. :-)

You are NOT on trial. Tell your legal counsel to
quit billing you for legal representation. This
is NOT a court. :-)

>Of course Technician
>Pluses who renew as Technicians keep their HF privileges, and
>Technicians who pass Element 1 get them, even though their
>licenses don't change class.
>
>So an unknown number of "Technicians" can legally operate on some HF
>amateur bands. Also, any amateur with a Technician Plus or Novice
>license, current, grace period, or expired, can get a General or Extra
>without any further code testing.

Tsk, tsk, tsk. Jimmie Noserve is still trying to foist
off his OWN concept of "the real amateur community"
where the Technician classes are "not real hams"
(REAL hams work DX on HF with CW?).

Jimmie boy, give us your EXACT numbers on those Tech
class licensees who ONLY "work" above 30 MHz. Then
PROVE that they all hunger for or desire to "work CW"
on the HF bands...as all "real hams" should. :-)

>What's your point in all this, Len? You give a lot of numbers but
never
>seem to say why they matter.

"Sweetums," I don't INTERPRET raw data. I just quote
it from the public database downloaded by one website
from the FCC.

I HAVE said "why it matters." You don't want to listen.
You don't want to believe anything contrary to your
immaculate concept of "real ham radio."

Why does that bother you so much, Jimmie? Do you suspect
I gored your sacred cow or something? Has your "honor"
been sullied? Are you "appealing a court ruling" in
here? Must be. You take things SO seriously!

>And why does all this concern you so much?

I dunno, Jimmie, YOU are going to TELL me WHY "I am so
concerned" because you KNOW everything. :-)

Maybe I might want to get a ham license someday? Or
maybe I just like to get to the TRUTH of matters
without all the smoke and mirrors of some fanatics
who take their HOBBY as a Life Calling?

> You're not a radio
>amateur, and it appears that you'll never become one either -

Tsk, tsk. Jimmie boy, YOU don't CONTROL anything or
anybody.

I'm a PROFESSIONAL in radio-electronics. Have been for
53 years. I'm a HOBBYIST in radio-electronics too,
have been for about 57 years.

[sunnuvagun!]

>your "out of the box" claim of almost 5-1/2 years ago notwithstanding.

Poor baby. Poor Brother Jimmie, monk at the Church of
Saint Hiram, having doubts about his LIFE CALLING in
the AMATEUR ORDER. Tsk, tsk, tsk.

A HOBBY is NOT a Life Calling, Jimmie. It doesn't
require LIFELONG DEVOTION and Absolute Adherence to
the VOWS taken when one entered the Order.

I never made a SACRED VOW in HERE on anything,
"Sweetums." You are trying to MANUFACTURE that
condition. Nice misdirection on what HAD been a
discussion of public database numbers versus Bro.
Jimmie's concept of U.S. ham radio (as seen from
the insides of his mind's monastery).

I've taken ONE VOW absolute. In my marriage
ceremony. I wear only ONE ring, a wedding ring.
I've taken ANOTHER VOW absolute...that of defending
the U.S. Constitution when I was inducted into the
U.S. Army. I still hold to BOTH those vows.
NO problem to me. Those are absolute.

You apparently think some newsgroup content is
EQUIVALENT to such an absolute VOW to be held
forever. If so, you are as nuts as your buddy
and amateur extra role-model for all hams, Stebie
the Avenging Angle of Dearth.

Go step out of your monastery, Bro. Jimmie.

Peace be unto you.

You didn't make fun?

Toad said "That was a state court hahahaha"
Looks like making fun to me!

The toad caught in yet another lie.
I didn't need to interpret the law toad, And It says in my post that he planned to appeal in defense of his right to freedom of speech. I didn't need to post the laws and the producers names of the shows, and I bet if We look at goggled would find at least 20 sites with info! That's part of your problem, redundancy. Every time you post something should I c&p the info from the ARRL also?
The main question for you to answer is WHAT EDUCATIONAL VALUE IS A TALKING PENIS? You going to put one of those on your show?
Shifting to toadebonics:
OH weight, you already dew have one.

I had a novice ticket with 2meter phone privledges on it also. Way way back
there in 1961. Your right....nitwits.

If you don't want to look bad, perhaps you could learn to spell, observe
some basic grammar and abandon expletives.

Just a suggestion.
Your humble servant,
O.G.

Dan/W4NTI

874. Jesus said, "I am the way, the truth and the life: no one can come to the Father(God)(in Heaven), but by me." (John 14:6) This means that if you die without trusting in Jesus Christ as your Lord and Saviour you will die in your sins and be forever separated from the love of God in a place called Hell. The Holy Bible descibes Hell as a place of eternal torment, suffering, pain and agony for all those who have rejected Jesus Christ. The good news is that you can be sure you are going to Heaven when this life is over if you allow Jesus Christ to save you today. Do not wait until later to be saved because you do not know exactly when you will die. [Posted by: RonaldGrossi3826@yahoo.com on May 13, 2005] [6:27:43 pm]

But the text message whiz kids were probably certain that text
messaging, being the latest technology, would just have to blow away
something as ancient as Morse code. Guess they found out differently.

I've been in and around military organizations between
1952 and 1989 and have NEVER seen, not even heard
mentioned, of any "Assistant" NCOIC (Non-Commissioned
Officer In Charge) TITLE.

That may be a "new" title in military hierarchy?

Could be that the USMC does things "differently." They
like to call the equivalent of a Private First Class as
"Lance Corporal." Much more "important" a title.

I'm still waiting for the Avenging Angle of Dearth to
supply his "authority" ("assistant" or otherwise) on
Somalian Radio Regulations...and of the USAF command
functions in regards to communications.

I've sort of given up on the Assistant to supply his "authority" to "just pick up a phone and, using his 'medical qualifications', have anyone else 'picked up' [by other authorities]."

MARS on Okinawa must have gotten a lot bigger since the 60s. Perhaps they added a second cushion to the Operating Office single desk chair? Sort of an "Assistant" cushion? As is common in the military, that second cushion would be abbreviated "Ass." [seems to fit him somehow...]

They utterly smoked the text messaging folks. The look on the
text-message guy's face when the receiving Morse op put up his hand
(signaling that he had the message complete) was priceless.

And the Morse ops weren't even going that fast...

I held the title of "Assistant Chief, Weather Station Operations" while
chopped to the 2nd Infantry Division, Camp Casey AIN, ROK.

It was not a rank, and it was not an "NCOIC" billet. It was a
"weather" thing.

> Could be that the USMC does things "differently."

No doubt. The USMC probably did things "differently" than Steve
remembers.

They
> like to call the equivalent of a Private First Class as
> "Lance Corporal." Much more "important" a title.

Ah, yes. The "jousting" Corporals.

> I'm still waiting for the Avenging Angle of Dearth to

Don't. He has none. He doesn't even have the documents for the things
he claims of himself. He's one doc shy of a load.

> I've sort of given up on the Assistant to supply his
> "authority" to "just pick up a phone and, using his

> up' [by other authorities]."

I remain a free man. He must of been smoking crack when he made those
unsubstantiated claims of absolute authority.

Some of the guys probably thought that of me. Goes with the job.

But it sure took Stevie Wonder a long time to remember what the "A"
stood for. Medication?

>
> I read it the first time around and I've reposted it several times.

No, you've reposted YOUR assertions that I was suggesting
"terrorizing wives" and "slashing tires".

I never stated that.

I DID state that there have been people who have suffered those
crimes when they made it a point of being a newsgroup or chat room
antagonist...Like your buddy Lennie.

I have REPEATEDLY stated that that is unacceptable behaviour.

You, on the otherhand, have only been repeating your claims
WITHOUT substantiation.

> You address it by pretending it doesn't exist. You lie to yourself,
> and you lie to people on RRAP. Who else do you lie to?

No one. Your're the liar, Brain, and you will prove it by not
quoting the item YOU claim is my "threat" to "terrorize" family members
and "slash tires".

Brian P. Burke, N0IMD, is a habitual liar.

Period.

It's "intend", Todd...And you got the attributes wrong.

But I am sure glad to hear that you're not going to teach
English...If you are as "good" at "computer science" as you are
English, then I'd bone up on these phrases:

"Would you like to super size that order?"

"Be careful there Sir...I just laid fresh wax there..."

Because they know the difference between a "bulletin" and a
"show".

W1AW's information is generally timely, is to the point, is
without editorialization, can be heard from across the street to across
the world, and is DEPENDABLE.

You, on the otherhand, are poorly informed, loudmouthed, profane,
can't get enough RF out to illuminate a lightbulb, and tend to
"broadcst" whenever whatever "obligations" you have allow you to try.

>Bteve said
>W1AW's information is generally timely, is to the point, is
>without editorialization, can be heard from across the street to
across
>the world, and is DEPENDABLE.

First off there is no rule that states a bulletin can't be a editoral, if there is show me, because frankly you have yet to show me a rule or an FCC decision that states that. So until you do, I've come to the conclusion NOT to read or even respond to your post until you can prove me wrong. Oh by the way if a newscast isn't suppose to be a editorial then I suggest you get hold of the Fox News Network Because the "MAJORITY" of their "NEWSCAST" are editorial.

I would also Like you prove me wrong (in my program) that I am "uninformed" as for not getting enough power to light a lightbulb, I have at my disposal a assortment of RF Transmitter which are able to get me out (Some are as high as 10 Kw) I have collected a huge assortement of radio transmitters over the last 14 years so don't worry if you think I can't get out. As for time the FCC has never stated there is a time limit on how long a bulletin may be. Again prove me wrong Until you prove me wrong I am not going to respond to any of your post unitil you proven me wrong

"Scare" yourself, Silly Gunny.

But do post authentic documentation of your claimed appointment to "A"
NCOIC Okinawa MARS. Post 'em if you've got 'em!

> Dates...times...Places...

Heresay. Post authentic documentation.

> What's missing is adequate testosterone levels in the Burke
> residence to verify them.

Verifying your preposterous claims is not my job.

> This would be directly due to Brian P Burke being a coward.

Got anything better than that?

> Not my problem.

Lack of AUTHENTIC documentation is your problem. Put Up or Shut Up.

Remember your own words, "No documentation means it never happened."

Hi!

For future reference, stop making claims that you can't prove. Makes
you look even more stupid than you already are. Best of Luck.

915. Robeson will say just about anything...

>
> Steve, K4YZ

Sorry, no make believe friends, make believe phone calls, make believe
MARS appointments, nor make believe hostile actions.

That is entirely your make believe arena.

You eat with that mouth? You are off your meds again toad.
1) You said you never got a letter.
2) You said Steve got you booted off the internet
3) Last week you said it was this newsgroup you were kicked off
4) Above you state " they would remove me if I continued doing what i
was doing"
They WOULD remove you is different then you were booted.
Make up your mind idiot, it's a small thing to make up, are you posting
or are you not here posting? Which is it. Don't call me a liar, I'm just
repeating what you said gay boy. Now go take your meds and kiss your
mommy goodnight, perv.

The thing is, Todd, no one here supports you.

You're filthy, you're foul, and you're ignorant. You MIGHT have
had some supporters here up until the time you took that cheap shot at
my daughter. Even the other net denizens dropped out after that.

You're the Communist, Todd...

You want to bring everything down to your level rather than try to
rise to excellence...Or at least try to get there...

Communism was all about living at the least common denominator.

That's what YOU are about.

> Your the one lying calling me gay when I am not, your not only a liar

Well, Todd, if I ever start using your kind of language, attack
diseased children, and basically begin to act like a ripe diaper, like
you, then I imagine they will.

But since that won't happen, I guess you're just out of luck.

Why, Len? I don't claim to be the only accurate voice. Just more
accurate than you.

> The FCC doesn't appear to think as you do, Jimmie.

Sure they do.

> If a licensee is in their grace period and then
> renews their license before that period is up,
> it just resets the FCC data. The licensed amateur
> still retains his/her license after renewal.

That's right. Also irrelevant.

I've pointed out that the numbers I post are of currently-licensed
individuals. You fail to mention that the numbers
on hamdata.com include clubs and other non-individual licenses
(over 9,000 of them) and expired-but-in-the-grace-period
licenses.

> >> It should be noted that the peak of U.S. amateur

That's simply not true, Len.

You're just making up bullshit. Typical jackass behavior for you.

;-)
;-);-);-);-);-);-);-);-);-);-);-);-);-);-);-);-);-);-)

I've repeatedly said that "radio amateur" means anyone licensed
in the Amateur Radio Service. License class, band and mode don't
matter. VHF/UHF is as much "real amateur radio" as HF.

> >What's your point in all this, Len? You give a lot of numbers > >but
never seem to say why they matter.

>
> "Sweetums,"

I'm not your sweetums, Len.

> I don't INTERPRET raw data.

That's true. You MISINTERPRET raw data...

> I just quote
> it from the public database downloaded by one website
> from the FCC.

So you accept hamdata.com without question...
>
> I HAVE said "why it matters."

Where?

> You don't want to listen.

Sure I do. But I don't wade through the mountains of posts you
make here.

Tell us again "why it matters", Len. You've got plenty of time
and no shortage of verbiage to spout.

> You don't want to believe anything contrary to your
> immaculate concept of "real ham radio."

Just tell us why it matters.

> Why does that bother you so much, Jimmie? Do you suspect
> I gored your sacred cow or something? Has your "honor"
> been sullied? Are you "appealing a court ruling" in

From N8WWM@arrl.net

Hey CUNT,
Wanna meet at Dayton or before? I will whip your gayboy ass like a red headed step-child. You are a punk-suck fagboy hiding behind an assumed name who dont have any balls. Come on, you lap likkin shit hunk...wanna party? I will kick your fukkin ass. You are a sissyboy faggot ILLEGAL KEYCLOWN.
Go hump your wife Dweebo faggot. You can only talk smoke...I can bring it into your life.
I think you have never opened a can of whip ass.
I volunteer to show ya how.
CUNT
Your turn, CUNT!

From N8WWM@arrl.net

You pissbag, I hope you go to Dayton. I will be wearing a sign with my call on it, front and back. Come up and introduce yourself and get a lunger hawked on your faggot ass, just like your wife pus bag twistie. I fukkin dare ya. Looks like I am gonna hafta start smokin cigars or something to generate enough flegm for all you mutant nuttsak slurpers.
By the way, have you stopped molesting hamsters yet?

From:N8WWM@arrl.net

Hey Peepeeholic:
Yes I am in Toledo. I have plenty of down home hospitality for you or ANY of the other queens in here who wish to stir up some mess.
You wanna come by and visit? I will be delighted to send you back to the MISTAKE ON THE LAKE with a thought in your mind that it was a real dumb idea.
Imagine, Peepeeholic...Imagine...You come to my place and star some junk...I put you face down and hurtin extreme, take pics of you laying there with a bumped up noggin, and post 'em to the NG. I relish you coming by. I am good in the callbook, just as I told your wife, the trainedpuppet.
Have not had this much fun since I used to go cuttin' coax and building jamming oscillators back when I was 16 yrs old.
----------�----------
From N8WWM@arrl.net

Be forewarned: I like the kinda rumbles where there are cuts and broken bones. If you have never deliberately broken someones bones, or don't have the heart to cut, be civil. I have.

Get a book of paper and write Steve 1,000,000,000,000 and maybe you can
then get his name off your gay mind. Again mr. untruth, if you ARE
booted off the internet, why are you still posting. See toad, the
biggest lie of all!

Psychic Spasmophilia and Mystical Experience In Psychoneurosis is Not an Illness, Dabrowski refers to a condition identified as "spasmophilia," defined as "the tendency toward muscular twitching, spasms, or convulsions from even slight mechanical or electrical stimulation" (pp.304-305), and a type of personality, called the "tetanoidal personality," defined as a "personality type...characterized by muscular twitching, spasms, tendency to convulsions, etc., as in tetany" (p.305).

Roger Wiseman is 49. He studied the history of Dwarfism at DeVry on weekends.

For some years he had symptoms of excessive nervous excitability, he was depressed and began to think of the danger of mental illness. In a few months his condition became more aggravated. He went through periods of "mental spasms." On one hand he considered himself normal; on the other hand he thought of himself as one overly concerned with menial issues.

He went to look at places of concern (he lives in West Virginia after the Divorce); he experienced the tragedies of the past as something of actual validity, something authentic. He was hypersensitive to successful people. He thought that those who pass him by are being shown more respect than him, so he becomes responsible for the ruination of their lives... (p.82)

Roger says, "I have been experiencing muscle twitching and spasms all over my body for a few years now. It started in my left eye. At first, I would notice it after I sneezed, flinched or got under the shower. Then it started to do it on a more frequent basis. Then I started noticing small twitches in my arms, then my back, then in my legs. By the end of the week I felt them going off every few seconds, randomly, from head to toe. I have gone to Dr. Phil, had EMG, and they found nothing! I admit I suffer from anxiety, I decided to try Zoloft to see if this would stop the spasms. So far it hasn't helped. I sleep pretty well, and have no other health problems or ill feelings. I am wondering if anyone else has had this, or could shed some light?"

From: N2EY@AOL.COM
Message-ID: <1116189969.990267.24810@z14g2000cwz.googlegroups.com>
Source record: 108241

These are the numbers of current, unexpired amateur licenses held
by individuals on the stated dates:

As of May 14, 2000:

Novice - 49,329
Technician - 205,394
Technician Plus - 128,860
General - 112,677
Advanced - 99,782
Extra - 78,750

Total Tech/TechPlus - 334,254

Total all classes - 674,792

As of May 14, 2005:

Novice - 28,604 (decrease of 20,832)
Technician - 268,529 (increase of 63,135)
Technician Plus - 49,553 (decrease of 79,307)
General - 136,683 (increase of 24,006)
Advanced - 76,274 (decrease of 23,508)
Extra - 106,577 (increase of 27,913)

Total Tech/TechPlus - 318,082 (decrease of 16,172)

Total all classes - 666,199 (decrease of 8,593)

Note that these totals do not include licenses that
have expired but are in the grace period. They also
do not include club, military, RACES or other
station-only licenses.

Note also that effective April 15, 2000, new Novice, Technician Plus or
Advanced licenses are no longer issued, and that all existing
Technician Plus licenses are being renewed as Technician.

I never threatened Toad's life...even "suggestively".

And he's here, so obviously he DIDN'T get "kicked off" the
Internet. His ISP >>DID<< warn hom that his continued behaviour would
result in that action.

> If toads not a liar then these things must be true, I'm still very
> confused as to why he is still here? Could he be using his time
machine.

Must be. I don't think it's news to anyone with an IQ over 70
that Todd Daugherty is a very disturbed, very lonely little man. Hos
outbursts here are pretty evident.

I have no dubt that if any one of us said "boo" to him in an open,
public venue that he'd be wringing urine out of his torusers for a
week.

> I figured since he is so obsessed with you and looks to you as a
> father figure, you just might have an answer.

I'd castrate myself if I were the progentiator of a worm like
that.

> TIA for any light you could shed on this matter.

Not much light, I am afaid. Like I said, he's distrurbed and
lonely. No doubt that "Japanese" girlfriend (who doesn't appear in any
of the many pics on Todd's various sites) doesn't exist. Also, the
"other hams" who are so anxious to help him with his broadcasts are
fictional, too.

Tsk. Typical Robeson IMPLICATION. NO details of

1. The actual authority in this "Fairfield County."

2. What was said. [Robeson will cite some alleged
"privacy" ergo he will not have to reveal anything]

3. Nothing at all on the "interesting" part.

4. All of the above is just total nonsense, a
fantasy on Robeson's part.

>> > You fit right in with Brian Burke and Lennie Anderson! They

Actually, Robeson is "taking the chance" by NOT finding
out anything in detail. He is BLUFFING without having
done any research.

> Take a chance, Oh Cowardly One...

Robeson seems to be the "coward." Having had over five
years to "research" ANYTHING I've mentioned in regards
to employers OR currently-living amateur radio licensee
friends, he has FAILED to do so.

Instead, Robeson FABRICATED an entirely FALSE person
who allegedly "knew me" at NADC (closed for a decade)
back in 1971. Robeson MANUFACTURED a FALSITY that I
"was seeking employment there" even though I've
explained otherwise (I was, and continued to be, an
employee of RCA Corporation until 1975). Robeson
took a "coward's" route by MANUFACTURING A FALSITY.

> Chief AF MARS. (Need the address?) Can get you the address for
>the administrative officer at 1st MAW or MCB camp Butler if you'd
like.

The USAF Communications Headquarters is at Scott AFB,
isn't it? Why is Stebie mentioning Air Force? :-)
Stebie might think that Scott AFB will close its doors
quickly since it is on the DoD closure list...then
"nobody can find out." :-)

In reality, DETAILED unit records in the U.S. military
are NOT kept forever. This is particularly true for
enlisted personnel. Few military units and installations
remain intact in one place with "personnel departments"
equivalent to civilian employers. Units can be
deactivated, reactivated, or merged with other units on
a rapid basis, their names and nomenclatures changed
(seemingly at whims of higher commanders) as fast as
orders can be "cut." :-)

Stebie is BLUFFING when he expects an old unit of "his"
to be intact 24 years after his claim of service there.
Not only that, but he is ignorant of the Privacy Act of
1974. Requests for information must be in writing.
Legal cites: 5 U.S.C. 552a(3)(3)on writing plus
authority on information in 44 U.S.C. 2907, 3101, and
Public Law 104-134 (April 26, 1996).

The best bet for a response is through NARA at the
NPRC [National Archives and Records Administration,
National Personnel Records Center at St. Louis, MO]
Website: www.nara.gov (click on links to get NPRC)

Requests for information BY veterans or approved
family relatives is free but can take up to 12 weeks.
Requests for information MUST be done in WRITING,
sent by mail or FAX. There IS a charge for others,
such as employer personnel departments, but costs
will have to be determined for that first before

any information is returned.

Since the NPRC has some 70 million records, they require detailed information such as an SN or SSN. [my ASN was RA16408336 but the USA and USAF changed over to SSN on 1 Jul 69, USN on 1 Jan 72, and USCG on 1 Oct 74] To submit ANY request for information, Standard Form 180 must be used whether by mail or FAX (form available for download on website or by writing NPRC at 9700 Page Ave., St. Louis, MO, 63132-5100). A veteran's SSN (Social Security Number) MUST be included whether or not a Service Number (SN) is included in the form.

Such corroborating request data is necessary in WRITING to put a damper on bluffers, blackmailers, fraud and scam artists or other perverse individuals out to "get" others. However, the bluffers can just manufacture their own "records" and use others' lack of their SSN to verify the bluffers' service record CLAIMS. Since those records do NOT contain EVERYTHING, CLAIMS cannot be ascertained fully...so the CLAIMANT can go on their outraged, high-horse attitude against anyone doubting them! :-)

One way to ascertain and verify another's claims is to cite friends and acquaintences who served together in the same unit...as I did with Gene Rosenbaum, N2JTV. Or have an interview done with an unbiased third party such as the Pacific Stars & Stripes (visible on estripes archives for 10 Nov 2002). Or have in possession documents from the unit or by the unit (as I do, two of which are posted at another's website)...or have official service branch photographs marked by the distinctive back-of-photo information (as I do).

Apparently Robeson doesn't accept any mention of friends who have amateur radio licenses (as I have with W6MJN or KD6JG). Robeson thinks such are "make-believe." :-) In that case the Los Angeles County Registrar-Recorder is "also wrong" since Al Walston (W6MJN) and his signature is on my marriage certificate as a witness (he was my best man). It's ALL a "make-believe" to Robeson if he doesn't accept it or hates someone.

> No cajones?

Tsk, tsk, tsk. "He-man challenges" oriented towards overloaded testosterone levels and/or sexual ability?

In that case, Robeson has "no cojones" (nor ability to spell any better in Spanish) since he hasn't gotten up the courage to check out anything of mine, not after five years of finding it out. He has gotten that information more than once, publicly, in here.

Stebie would seem to prefer sitting around, doing NOTHING but personal insults, denigrations, fake humiliation-laughter, and almost countless BLUFFS which are just LIES. He will NOT hesitate to call others for "liars," perhaps because he has done so much LYING of his own in the past?

Stebie is the ROLE-MODEL of today's U.S. amateur radio Extra class licensee? [he is not chastised by fellow Extras so he must be "approved by the amateur community!"]

NOT a good role-model. Does NOT arouse any "interest" (other than masochism) in joining the "ranks" of amateur radio.

>individuals. You fail to mention that the numbers
>on hamdata.com include clubs and other non-individual licenses
>(over 9,000 of them) and expired-but-in-the-grace-period
>licenses.

Tsk, tsk. Early symptoms of Alzheimer's?

I've written "exclusive of club calls" on quoting
the Hamdata statistics.

Jimmie, get your definitions correct. Those amateur
licensees who are IN the 2-year grace period for
renewal are NOT "expired." The FCC doesn't call them
that. If those renewals are done within that grace
period, they retain their old call.

"Expired" applies AFTER the total 10-year plus 2-year
grace period.

>Just answer the question, please.

No. :-)

>That's simply not true, Len.
>
>You're just making up bullshit. Typical jackass behavior for you.

Tsk, tsk, very Very VERY WRONG, Jimmie Noserve.

Try to use CIVIL language in here...or are you

>
>That's true. You MISINTERPRET raw data...

Poor baby...I do NOT INTERPRET as Jimmie Noserve
"interprets." That's why you are so disturbed and
angry, compelled to try to "put me right." :-)

>> I just quote
>> it from the public database downloaded by one website
>> from the FCC.
>
>So you accept hamdata.com without question...

NO. You are WRONG!

I question almost everything. I accept Hamdata figures
for the simple reason that they do NOT go into ARRL-
style sinning-by-omission on radio history and their
minority viewpoint on How Amateur Radio SHOULD Be.

Does the ARRL download the daily FCC database on
U.S. amateur radio licensees? No? Tsk, tsk.

>> You don't want to listen.
>
>Sure I do. But I don't wade through the mountains of posts you
>make here.

No, Jimmie, you do NOT want to listen to anything but
the fantasy you've come to believe about a hobby.

Jimmie, do NOT engage in word "food fights." Your
aim is WAY off and you cause too much collateral
damage.

>I don't take you seriously at all, Len.

No sweat, Jimmie Noserve. I've never taken you as anything
but a Believer, a toady to ARRL group-think, and a liver in
the past before your time.

> But I do point out
>the holes in your arguments, and your factual/logical mistakes,
>which seems to enrage you no end..

No, No, NO, Jimmie, you got it WRONG again.

All you do is engage in some odd word play to try
and "justify" your rationalizations of your fantasy
ideas about a hobby. That is NOT "correcting
mistakes."

>> Maybe I might want to get a ham license someday?
>
>Nope. We can rule that right out.

Who are YOU to judge?

You are NOT in the FCC.

You are NOT an official in the ARRL.

All you are is acting like a snide little hamlet who
can't accept that you do NOT "rule" anything (except
with a pencil and paper).

>Nope. Truth is one thing you avoid....

WRONG...WRONG...WRONG...WRONG...

>> Tsk, tsk. Jimmie boy, YOU don't CONTROL anything or
>> anybody.
>
>Sure I do. I don't control everything or everybody, though.

Tsk, you've LOST CONTROL of YOURSELF there... :-)

>>So what? You're not a radio amateur, never been one, and it appears
>>that you'll never become one either. That's the TRUTH.

WHO said "I will never become one?" :-)

Jimmie Noserve predicts the future? Should he be
called Jimmie Nostradamus? :-)

Jimmie, I've been an UNLICENSED radio-electronics
hobbyist longer than you've been alive...and that IS
the truth...in REALITY.

I've been a LICENSED PROFESSIONAL in radio-electronics
about as long as you've been alive...and that IS the
truth...in REALITY.

I was OPERATING on HF BEFORE you were born, Jimmie,
IN the military...the military you've NEVER been in.
That is reality...whether or not you care to accept it.

Don't even ATTEMPT to CONTROL what I am "allowed" to
do in the FUTURE...because you CANNOT and you do NOT
know the future.

Quit acting like a spoiled child who demands obediance
to you and your ideas.

>Why no, Len, it's not about me at all.

This thread is about the ARRL and the FUTURE, Jimmie.

It isn't about the PAST that you glorify.

It is about NUMBERS and who is getting what license
in amateur radio. [the Technicians are getting the
overwhelming majority of new licenses, upsetting
your cherished ideals of How Amateur Radio Should Be]

>> I never made a SACRED VOW in HERE on anything,
>> "Sweetums."
>
>No, you didn't. I never claimed you did.
>
>> You are trying to MANUFACTURE that
>> condition.
>
>Nope - I'm simply pointing out what you claimed you would do,
>but haven't done yet.

You aren't being CONSISTENT. Try to get it straight.
Is it what *I* "might" do or is it about "what I will
'never' do?"

You are (seemingly) bringing up an OLD piece of a
posting to IMPLY that I "must" do it...EXACTLY as
I wrote it. :-) YOU be the "jackass" when you keep
on doing that.

Jimmie, this thread is NOT about me. Why do you want
to convene a kangaroo court? Are you that unhappy
with things that you NEED to antagonistically "pick
on" others? Get CONTROL of YOUR life. Get OFF of
mine.

>Nope. I'm simply pointing out what you claimed you would do,
>but haven't done yet. And will probably never do.
>
>That TRUTH appears to bother you a lot.

See, that OLD piece of posting is still sticking to the
roof of your brain. Are you an Effluent?

FANTASY doesn't bother me. You have much FANTASY going...especially when you come up with What Amateur Radio Should Be (according to your god-like perceptions and beliefs). Fantasy can be FUN as entertainment. FANTASY should NOT be any basis for REGULATIONS...yet that is what you think is "truth."

TRUTH is what the FCC database has...the FCC grants the licenses, can tally up what it grants. The TRUTH is that the increase in NEW Technician licenses in the USA is averaging about 26 per day, over four times the total of other-class licenses put together. The ARRL is still busy keeping up the charade that U.S. ham radio is like it was many decades ago. It isn't. They aren't really trying to entice Technician class licensees into League membership. The post that Hans Brakob made addresses that FACT.

YOU don't seem to like that TRUTH. You want to call such facts "wrong" because they are against your BELIEFS. You want to "strike back" at those that present the TRUTH because such TRUTHs are uncomfortable to your fantasy.

Not in me.
>
> I've written "exclusive of club calls" on quoting
> the Hamdata statistics.

> Jimmie, get your definitions correct. Those amateur
> licensees who are IN the 2-year grace period for
> renewal are NOT "expired."

The licensees may or may not have expired. Their
licenses *have* expired.

> The FCC doesn't call them that.

Yes, they do.

Quoting FCC rules, 97.21 iii:

"b) A person whose amateur station license grant has expired may apply
to the FCC for renewal of the license grant for another term during a 2
year filing grace period. The application must be received at the
address specified above prior to the end of the grace period. Unless
and until the license grant is renewed, no privileges in this Part are
conferred."

The licensee may not have expired but the license sure has.

I suggest you actually read Part 97, Len.

> If those renewals are done within that grace
> period, they retain their old call.

Of course. But until FCC acts on the renewal application,
the license is expired.

> "Expired" applies AFTER the total 10-year plus 2-year
> grace period.

No, it doesn't. See 97.21. FCC also uses the term "expire"
elsewhere in Part 97, to refer to licenses that have reached
the end of the 10 year term, but not the grace period.

> >Just answer the question, please.
>
> No. :-)

Then why should I answer any of yours?

> >That's simply not true, Len.
> >
> >You're just making up bullshit. Typical jackass behavior for

>
> Tsk, tsk, very Very VERY WRONG, Jimmie Noserve.

No Len. Would you prefer if I called you a diminutive nickname?

> Try to use CIVIL language in here...

I have - for years. It doesn't work with you, Len. You exhibit
jackass behavior in accordance with a predictable profile
regardless - if a person disagrees with your opinions and/or
points out errors in your postings here.

> >I've repeatedly said that "radio amateur" means anyone licensed

I see, You use ad-hominem criteria.

> Does the ARRL download the daily FCC database on
> U.S. amateur radio licensees?

Yes.

> > But I do point out
> >the holes in your arguments, and your factual/logical mistakes,
> >which seems to enrage you no end..
>
> No, No, NO, Jimmie, you got it WRONG again.
>
> All you do is engage in some odd word play to try
> and "justify" your rationalizations of your fantasy
> ideas about a hobby. That is NOT "correcting
> mistakes."

See above about the word "expire" as used by FCC in Part 97.
You made a mistake, Len. I pointed it out.

> >> Maybe I might want to get a ham license someday?
> >
> >Nope. We can rule that right out.
>
> Who are YOU to judge?

Who do I have to be? You judge everyone else here, why shouldn't I?
>
> You are NOT in the FCC.

Neither are you.

> You are NOT an official in the ARRL.

Neither are you.
>
> All you are is acting like a snide little hamlet who
> can't accept that you do NOT "rule" anything (except
> with a pencil and paper).

That's more a description of you than me, Len.

>
> >>So what? You're not a radio amateur, never been one, and it
> >>appears
> >>that you'll never become one either. That's the TRUTH.
>
> WHO said "I will never become one?" :-)

It appears you will never become one. Just an observation.

> Jimmie, I've been an UNLICENSED radio-electronics
> hobbyist longer than you've been alive...and that IS
> the truth...in REALITY.

So what? All that means is that you are old and that you
have fooled with some electronic stuff. Lots of people
can say the same thing.

> I've been a LICENSED PROFESSIONAL in radio-electronics
> about as long as you've been alive...and that IS the
> truth...in REALITY.

So what? All that means is that you are old and that you
passed a written test for an FCC *commercial* license once upon a time.
Lots of people can say the same thing.

> I was OPERATING on HF BEFORE you were born, Jimmie,
> IN the military...the military you've NEVER been in.
> That is reality...whether or not you care to accept it.

So what? All that means is that you are old and that you
once served in the Army, where you were trained to do certain
transmitter adjustments, as part of a large team of specialists. Lots
of people can say the same thing.
>
> Don't even ATTEMPT to CONTROL

Control? Another mistake by you. I just observe and predict.

> what I am "allowed" to
> do in the FUTURE...because you CANNOT and you do NOT
> know the future.

I do know your behavior here, though, and that's a clear predictor of
what you will and won't do. For example, I've
predicted that you'll make up insulting nicknames for those
who disagree with you no matter how they address you. So far
you've proved that prediction 100% correct.

> Quit acting like a spoiled child who demands obediance
> to you and your ideas.

"Don't even ATTEMPT to CONTROL what I am "allowed" to
do in the FUTURE...because you CANNOT and you do NOT
know the future." - Len Anderson

Apply your own rules for others to your own behavior, Len.
>
> >Why no, Len, it's not about me at all.
>
> This thread is about the ARRL and the FUTURE, Jimmie.

"Don't even ATTEMPT to CONTROL what I am "allowed" to
do in the FUTURE...because you CANNOT and you do NOT
know the future." - Len Anderson

> It isn't about the PAST that you glorify.
>
> It is about NUMBERS and who is getting what license
> in amateur radio. [the Technicians are getting the
> overwhelming majority of new licenses,

That's true. But so what?

> upsetting
> your cherished ideals of How Amateur Radio Should Be]

Not true.

The fact is that a lot of those Technicians are going on to other
licenses.

Some time back you posted the snippet that the Technician class was
growing at a rate of 26 per day. I asked how many Technician Pluses
were being renewed as Technicians, but you didn't answer.

It turns out that the Technician Plus class is *losing* about 26 per
day. Of course not all of them are renewing as Technicians - some are
upgrading and some are being removed from the database. (the above is
from hamdata.com)

> >> I never made a SACRED VOW in HERE on anything,
> >> "Sweetums."
> >
> >No, you didn't. I never claimed you did.
> >
> >> You are trying to MANUFACTURE that
> >> condition.
> >
> >Nope - I'm simply pointing out what you claimed you would do,
> >but haven't done yet.
>
> You aren't being CONSISTENT. Try to get it straight.
> Is it what *I* "might" do or is it about "what I will

> 'never' do?"

You claimed you were going for Extra "right out of the box". January
19, 2000, more than 5-1/4 years ago. But you haven't even got a
Technician license yet.

As I wrote before:

You're not a radio amateur, never been one, and it
appears that you'll never become one either. That's the TRUTH.

Note the phrase "it appears that you'll never".
>
> You are (seemingly) bringing up an OLD piece of a
> posting to IMPLY that I "must" do it...EXACTLY as
> I wrote it. :-)

Not at all, Len. I'm simply pointing out what you said you would
do, but haven't done yet. And that it appears you'll never do it.

> YOU be the "jackass" when you keep
> on doing that.

Hmmm...now who doesn't like the truth?
>
> Jimmie, this thread is NOT about me. Why do you want
> to convene a kangaroo court? Are you that unhappy
> with things that you NEED to antagonistically "pick
> on" others? Get CONTROL of YOUR life. Get OFF of
> mine.

Sounds like you're telling me to shut up. Here's a clue, Len:

"Don't even ATTEMPT to CONTROL what I am "allowed" to
do in the FUTURE...because you CANNOT and you do NOT
know the future." - Len Anderson
>
>
> >Nope. I'm simply pointing out what you claimed you would do,
> >but haven't done yet. And will probably never do.

See? That's what you want to control.
> >
> >That TRUTH appears to bother you a lot.
>
> See, that OLD piece of posting is still sticking to the
> roof of your brain. Are you an Effluent?
>
> FANTASY doesn't bother me. You have much FANTASY

>
> TRUTH is what the FCC database has...the FCC grants
> the licenses, can tally up what it grants. The TRUTH
> is that the increase in NEW Technician licenses in the
> USA is averaging about 26 per day, over four times the
> total of other-class licenses put together.

No, that's not what hamdata.com says. You're wrong, Len.

Hamdata.com says that the number
of Technician licenses is increasing at the rate of about 25
per day - *from all sources*. Not just new licenses - *ALL* sources.
Got that?

It means Technician Pluses
renewed as Technicians, Novices who pass Element 2, and new
licenses.

Hamdata.com also shows that the Tech Plus license class is
decreasing by about 25 per day over the same time period.

You misinterpreted hamdata.com.

> The ARRL
> is still busy keeping up the charade that U.S. ham
> radio is like it was many decades ago.

How are they doing that?

> It isn't. They
> aren't really trying to entice Technician class
> licensees into League membership.

How do you know?

> The post that Hans

> BELIEFS. You want to "strike back" at those that
> present the TRUTH because such TRUTHs are uncomfortable
> to your fantasy.
>
Not me.

You're simply saying that your *opinions* about ARRL are "THE TRUTH".
That's just bullshit on your part. No other word to describe it.

> demise. And who knows who will be next...?!?!

Yep. That's exactly what I wrote.

And it was in the same post wherein I lamented the loss of my
daughter and her untimely death. And everything I said in it is true.

E V E R Y DAY of the week there are articles about people who
"died suddenly", people killed in automobile accidents, and innocents
sitting in their own living rooms kiled by a stray bullet.

Not one word of it untrue.

Maybe next you'll be telling us about the black helicopters taking
pictures of your house, Todd?

Or are you just taking lessons from Brian "Habitual Liar" Burke?
He likes to take bits and pieces of other peoples posts and try to make
threatening sounding posts too.

It doesn't work for him either...It only makes him look all the
more foolhearty...Not that you need much help in THAT department, Todd.

Now THAT would be refreshing...

Of course you've cited that exact same paragraph to Lennie on
several occassions before when he's made the same error, yet he
continues to make THE SAME ERROR.

> > >Just answer the question, please.
> >
> > No.
>
> Then why should I answer any of yours?

Indeed.

Lennie's been asked MANY questions by many persons on numerous
subjects...The only answer (paraphrased) "I don't have to answer the

questions of mighty morsemen".

But he has point-blank DEMANDED answers from us...Hence my refusal
to further address my Armed Forces service outside the realm of
radio...I love seeing him twist in his seat...Burns him up to know he
doesn't have control.

> > Try to use CIVIL language in here...

Deregulation that is!

On 26th of May OfCom the UK radio Authority will issue a consulation document on the future of amateur radio licensing in the UK. The consulation is open to all and will ask a number of questions on options such as licence for life, de-regulation and:

"..options to make the (UK) amateur radio service WT Act licence-exempt" [#1] - That's all amateur radio exempt from licensing under the UK Wireless Telegraphy Act, it'll be a nightmare on the bands, HF included.

Just so you do not miss this important event in world amateur radio, add yourself to the mailing list here:

http://www.ofcom.org.uk/static/subscribe/radiospectrum.htm

and have your say. You will be emailed immediately the consulation is published. Have your say!

>

no matter how many times I read it:

"For the avoidance of doubt, whilst the formal public consultation will put
forward a number of other options for the future, those options are
explicitly not recommended by Ofcom. Specifically, Ofcom will not recommend
any options to make the amateur radio service WT Act licence-exempt;
however, for transparency and completeness, this will be put forward as an
option in the public consultation in order to gather the community's views "

....something still stinks.

> The USAF Communications Headquarters is at Scott AFB,
> isn't it? Why is Stebie mentioning Air Force?

I didn't mention the Air Force. I mentioned AF MARS.

I was a member of USAF MARS at one point. Gave everyone here the
callsign and dates I was a member. Your puppetboy asked for
information. That was part of it. Now he's trying to worm his way out
from under having to actually find out that, yes, Steve was telling the
truth.

> Stebie might think that Scott AFB will close its doors
> quickly since it is on the DoD closure list...then
> "nobody can find out."

Nope.

Those records will be in tact somewhere. And all of my various
MARS callsigns have been "public" knowledge on my QRZ "bio" for YEARS.

You and your PuppetBoy have missed a prime opportunity to try and
prove me wrong, but have never taken it....Oh yeah...I forgot...It was
all TRUE! Screws up THAT rant!

> In reality, DETAILED unit records in the U.S. military
> are NOT kept forever.

But the records I am telling YOU about are.

> Stebie is BLUFFING when he expects an old unit of "his"
> to be intact 24 years after his claim of service there.

That "old unit" was a Marine Corps Air Wing and a Marine Corps
Base. Two minutes with Google will prove they are still there.

As are all of the units I ever served with EXCEPT NAMTD 1032 at
MCAS Tustin.

> Not only that, but he is ignorant of the Privacy Act of

Sheesh, Lennie!

I told you over and over years ago that I'd sign a release for you
when you brought that up the FIRST time.

You never took advantage of THAT offer, either.

Big snip of snow job on recovering military records.

The fact is Lennie will never follow up on ANY of the facts I have
given him because they will prove him wrong...Again...

> Apparently Robeson doesn't accept any mention of
> friends who have amateur radio licenses (as I have
> with W6MJN or KD6JG). Robeson thinks such are
> "make-believe."

There you go lying again, Lennie.

I think they are real. They are also personal friends of yours.
They'd be pretty WEAK friends if they didn't stand up for you, right or
wrong.

On the other hand, I HAVE spoke with at least one person who no
reason to misrepresent an opinion about you.

Very telling.

> In that case the Los Angeles
> County Registrar-Recorder is "also wrong" since Al
> Walston (W6MJN) and his signature is on my marriage
> certificate as a witness (he was my best man).

Judging from what we've seen of your behaviour in this forum, he
was the ONLY man in your wedding party.

> In that case, Robeson has "no cojones" (nor ability to
> spell any better in Spanish) since he hasn't gotten
> up the courage to check out anything of mine, not

As I said...You've already been "outted". By a thrid party with no
reason to misrepresent his opinion.

> Stebie would seem to prefer sitting around, doing
> NOTHING but personal insults, denigrations, fake
> humiliation-laughter, and almost countless BLUFFS
> which are just LIES. He will NOT hesitate to call
> others for "liars," perhaps because he has done so
> much LYING of his own in the past?

No...because you've BEEB CAUGHT LYING so often, Lennie.

Don't lie and you won't be called a liar.

> NOT a good role-model. Does NOT arouse any
> "interest" (other than masochism) in joining the
> "ranks" of amateur radio.

I guess you've missed the big message here, Lennie.

We don't want you. You have nothing to offer...You've offered
nothing, you've DONE nothing of any value to or for Amateur radio.

It really is THAT simple.

> 73 de Jim, N2EY

Pretty much a no brainer that the text messaging would lose. Sending text
from a cellphone is pretty clumsy and slow. After each character is
inputted
sender must wait a second or so for the character to be accepted and for
the "cursor" to move to the next position indicating it is ready for the
next
character to be inputted. Also, different characters take several repeated
"pushes" of the key associated with that character to get to that
character...
Example: The letter 'S' is on keypad number 7 (along with P, Q and R)
and to get an 'S' into the text message you must hit the 7 button four times
to cycle the character selection first to P, then to Q, then to R and then
to S.

Even after the text message is completed and sent, there is a latency and
delay in actual delivery from the cellphone of the sender to recipt
at the cellphone of the individual intended to receive the test message.

Cheers,
Bill K2UNK

You continue to pull words out of paragraphs and then try to make
them into something I never said.

THAT being the case, I can put together some rather ribald "posts"
of "yours" IRT "pornography", "mental weakness", "lying" and "child
molestation".

> > I DID state that there have been people who have suffered
those

So...Knowing that your "airplane" is illegal, you still intend to fly it? License or not, Todd, when you operate ANY aircraft authorized by the FAA, you are bound by FAA Rules and Regulations, and hence are subject to FAA punitive actions.

You've admitted that your ultralight is NOT in complaince with Part 103. Do you intend to knowingly violate FAA R&R's like you do FCC R&R's...?!?!

It would be a real shame for you to wind up getting sanctioned by the FAA before you get that Sport Pilot license, now wouldn't it...?!?!

The _EXACT reference is worse than that Walt:

"For the avoidance of doubt, whilst the formal public consultation will put forward a number of other options for the future, those options are explicitly not recommended by Ofcom. Specifically, Ofcom will not recommend any options to make the amateur radio service WT Act licence-exempt; however, for transparency and completeness, this will be put forward as an option in the public consultation in order to gather the community's views"

Q1- who is doubting and why?
Q2- when exactly is the "future" and if they are not recommended then why put the forward?
Q3- why are they putting WT Act Licence-exemption down as an option? Why even mention it? Why ask for a raise of hands even if the do not "recommend".
Q4-who are they "recommending" it to?

Incidentally - what do you make of this job advert, currently running on OfCom's website?

http://tinyurl.com/bnoqk

"Change Management Senior Associate: Deregulation and Contracting out unit - Riverside House

The Deregulation and Contracting Out Unit is responsible for managing contracts to deliver licences for Citizens' Band, Amateur Radio, Maritime and Aeronautical users (presently circa 160,000 licences each year) and planning for the deregulation of relevant licence classes. The team also deals with technical queries from licence-holders, provides international representation on spectrum access groups, develops new licence schemes to improve customer service, negotiates spectrum access for special events and manages the contract for broadcasting and special events licensing.

The successful candidate will support the Unit Head in implementing deregulation in these bands as well as contributing to plans to reform the management of Programme Making and Special Events (PMSE) spectrum....................."

I could go on. Looks like it's all decided

Well yes it does if this job description [#1] is anything to go by:

As Change Management Senior Associate for the Deregulation and Contracting
out unit you will be responsible for:
. Liaising with colleagues throughout Ofcom (including IS) to ensure that
the reformed licensing systems are delivered on time.
. Developing plans to reform the management of PMSE spectrum by introducing
a Spectrum Management Organisation (SMO).
. Liaising with colleagues within Ofcom and with external stakeholders to
establish SMO spectrum property rights in sufficient detail for an auction
to be viable.
. Negotiating sufficiently liberal coexistence agreements with primary
spectrum users to enable Ofcom to withdraw from the current licence by
licence clearance process.
. Liaising with colleagues throughout Ofcom to identify issues arising from
policy and market reviews, which affect the Citizens' Band, Amateur,
Aeronautical, Maritime or PMSE spectrum sectors.

Not on my cellphone.

>Also, different characters take several repeated
> "pushes" of the key associated with that character to get to that
> character...

Of course - but the same is true of some Morse characters, too.

> Example: The letter 'S' is on keypad number 7 (along with P, Q and R)
> and to get an 'S' into the text message you must hit the 7 button
four times

The text-message sender was the *world champion*. He's in the Guinness book for 160 characters in 57 seconds.
>
> Even after the text message is completed and sent, there is a latency and
> delay in actual delivery from the cellphone of the sender to recipt
> at the cellphone of the individual intended to receive the test message.

That didn't matter in this test because the text messager hadn't even finished inputting the message when the Morse ops were done - with hard copy (pencil and paper).

The audience was confident the text-message folks would win. They made a heck of a racket but the Morse ops were unfazed.

Did you see the clip, Bill? You can download it from a number of websites, in .wmv format.

You really don't think that a large number of UK Hams will vote for
deregulation, just to spite "the heavy handed" RSGB? Turn 20m into
"Familiy radio"???

If that's the case, then we must make sure that everyone around the
world with an interest in amateur radio, submits a response to the
consultation!

Failure to consider the details? There's no accounting for stupid
decisions or apparently the Text Messgae
champion didn't do his homework. If he had, he'd know
morse code experts exceed his own 160 character per minute
Guiness World Record rate.

But three dits for an S is still likly faster than a cellphone keypad
response.

Thats roughly 32 wpm. No real threat to many "high-speed"
morse code folks. Isn't the morse code record well over 50wpm
(50 wpm = 250 characters/min)?

>> Even after the text message is completed and sent, there is a latency

No accounting for lack of knowledge on the audience's part.

Who's rationalizing? I just stated the obvious
as I see it. The winner being morse is not
surprising to me. Personally I'm glad it happened.
It gives amateur radio, and CW in particular,
a rare opportunity to get national attention.

Cheers,
Bill K2UNK

The official record is over 70wpm (see The Art & Skill of Radiotelegraphy)
and that would be a blazing 350+ characters per minute.

Hi gang!

Just for some grins, check this out:
http://www.lildobe.net/video/

It will take a bit of time for the folks on dial-up, but it is worth remembering that those two guys were not setting any speed records. It sounded about like the commercial CW circuits on the marine bands I listened to about 37 years ago ....

The more things change, the more they stay the same.

73 from Rochester, NY

When he read what was on the paper it did not include a callsign, where
these legit ham radios? Did another fast code reader get a call sign in
there?

Here's some nuts & bolts details on the skit via the Elecraft & FRC
reflectors:

- - - -

In case anyone is interested, here's something K6CTW posted on the
Elecraft list last night. K3PH:

- - - -

Well to answer some of the questions I have received:

1. Ben was just getting ready to start entering the last 2 words when I
was done.

2. None of us had any idea of the text we would be sending, not only
for the "show" but also for the 3 rehersals (in which we smoked em
every time)

3. Chip, K7JA was sending and I, Ken, K6CTW was receiving.

4. The radios were FT-817's provided by Chip's company Yaesu and HRO.
Reason for that choice was that we needed the most frequency agile
radios we could get. When I talked to the technical folks, they
recommended we START at 2 meters and go up because of all of the lower
frequency noise and RFI from the other TV equipment. When I got there,

we took out a spectrum analyzer and studied all of the interference possibilities. I ended up choosing 432.200 MHz because that guaranteed no RFI from their equipment and we were high enough not to overload their front ends either. This was then verified and it was what we were using at the FT-817's lowest setting.

5. I already knew that 28-30 wpm would easily keep us in front of even the current world record holder, and also it is the fastest speed that I can make nice readable copy on paper with a "stick".

6. The telegrapher "costumes" were the producer's idea but it was fun for both Chip and I.

7. In rehersal I, K6CTW had a number of lines which would have really done a nice job of plugging ham radio and telegraphy however at our last dress rehersal, they decided to cut them out to make the segment "fit". (maybe next time).

8. I decided that I would be the receiver because I'm not bothered by crowd noise etc. If you enjoyed the segment, PLEASE email, write, etc. to let "The Tonight Show" know about it. That way we may have a chance for a bigger segment next time. Thanks for the kind comments from all and let's keep on having fun! (It is a hobby after all). 73, Ken, K6CTW

- - - - -

*A few more points for clarification: When my XYL, Connie, originally answered the call, at my home, from the producers of the show, she explained that I operated both codes and that I considered myself to be a good but not exceptional operator. However, she is the one who "sold" the producers that the skit could work. She also did a VERY credible job of explaining Morse telegraphy and the radio code and its uses. (You all might think to send her a thanks too as without her, this would never have happened cjcarroll2 at earthlink.net) When they contacted me later that afternoon, I explained that my wife was correct, I am a competent CW and Morse operator.

Your point is interesting in that they did try and get the fastest text messengers they could fly in. I did however explain that if the Tonight Show folks had been able to get the equivalent world record holder in CW to do this, it would have been at lmost TRIPLE the speed we were going at.

The reason, as I have explained before, that we worked at about 28 or so wpm is that this is the fastest speed that I can make nice readable copy with a pencil as they did not have the ability to let me use a typewriter for copy (and I thought they were going to do a camera shot of my copy for verification).

Also, since we did not have the time to set up headphones, I just added some extra volume for me, had the stage folks cut my mike (to prevent feedback and overload) and copied off of the speaker. To re-emphasize the point, I'm just an average CW op who ccasionally operates the CW SS

QRP, whith my K2 of course, and really enjoys CW, and traffic handling.
By the way, the radios used were Chip's not from Yaesu and the backup
radios were from HRO. 73, Ken, K6CTW *

You'd think the Guinness World Record Holder for text messaging
would have looked up the equivalent record for Morse code....

> (50 wpm = 250 characters/min)?

It's over 75 wpm.

The limiting factor experienced by the two Morse Code ops was how fast
the
receiving op could block-print with pencil on paper. They wanted to be
able to hold up the received copy so there'd be no question of
reception.

Try this one:

http://www.kkn.net/~n6tv/Text_vs_Morse_Leno_2005_05_13.wmv

It's an 8 MB .wmv file. Other sites have bigger files but they don't
show any more of the clip.

Best bet is to leftclick, then choose "Save Target As" so you don't tie
up the server. With dialup, that's about the only way. Worth the wait.

What you see on TV is taped and edited. They cut out things like the
ID.

FCC requires that you ID at the *end* of a QSO, and every 10 minutes if
the QSO goes on longer than 10 minutes. The clip is only 3 minutes
long.

> continues to make THE SAME ERROR.

Not really. You are mistaken, Steve.

Back around the end of last year, Len posted here that *all* licensees
were perfectly legal to operate in the grace period. That's simply not

true.

The way it works is that if someone files for renewal in a timely fashion (meaning during the 90 day window at the end of a license term), FCC allows them to keep their license privileges (and keep operating legally) while the renewal action is pending. But if the end of the 10 year license passes - even by one day! - the licensee is *not* allowed to operate until the renewal is actually processed by FCC.

So there are some licensees who can "legally operate in the grace period" - those who filed their renewals in a timely fashion. The rest cannot. Len wrote that all licensees could legally operate in the grace period - that's simply wrong.

His mistake this time is different - he claims FCC doesn't use the term "expired" to mean licenses whose 10 year term is past but which have not
been renewed. That's wrong too - the term "expired" is used by FCC for just that purpose.

Len made two different mistakes on the same section of Part 97, Steve, not one.

I guess I am getting there. After our last "rounds" it appeared
that Brian might actually be open to communication, however he started
right back into the same rants, the same lies, and the same refusal to
substantiate his own claims.

Pity that. Pity what his kids will see someday.

> > And obviously not very proud of what he's allegedly done...No

I'm not going to dig it out, Jim, but Lennie DID use the exact words "...the ARRL BoD is dishonest..." on several occassions. I quoted and requoted his comments on numerous occassions asking him to validate that claim...Needless to say, he never did.

Check your authentic Air Force MARS documentation. The address is on
it. Of course, you didn't know that because you've never had authentic
Air Force MARS documentation, because you've never been a member of Air
Force MARS.

You knowledge of any service's MARS communications is grossly lacking.

"Sorry Hans, MARS >>>IS<<< Amateur Radio!" Hi, hi!

Hello, Mopar

Some call it binary, but the fact that there are both short and long characters as well as short and long spaces (spacing between characters is shorter than spacing between words) leads me to not consider it "binary". When I wrote a Morse code decoder, I was using a base 3 system to decode it. At least if I recall correctly. I still have the source code but haven't looked at it for about a decade.

I am *loving* this new pipe! I booted the computer, the wave file played as Windows started up, I hadn't clicked on Explorer, I bent over to pick up a magazine, and when I looked at the computer, the anti-virus had already downloaded and installed the update! :))

Broadband is very nice. Once you get a taste of it, you'll never go
back. Combined with wireless access points, I can move all over the
house and access the internet with my laptop. I can access streaming
audio to pipe to my computer and stereo in my garage, when I'm outside
working. Internet video content can be viewed on the TV. I can even
monitor the environmental controls in the house from remote locations.
Technology is great. The future is now.

Poor lil Stebie doesn't understand that "AF" is a common
abbreviation for AIR FORCE.

I think the Internet needs some kind of yellow highlighter
for the brain-dead readers. :-)

>> I was a member of USAF MARS at one point.

>Alleged member.

An "Assistant" member? Just like an "Assistant NCOIC?" :-)

Stebie has the "proof in his wallet." :-)

>>Gave everyone here the callsign and dates I was a member.

>Alleged member.

Tsk. His "member" needs a little blue pill...?

Do modern - or even older - callbooks include MARS
callsigns?

Stebie will probably babble about "calling the VA" for
"verification" on that. :-)

Stebie has BEEN to Mars? Many times? Probably Seven times?
Hostile planet, but not much Action.

About the best way Stebie could be "in" AF MARS is to have
him stuffed and mounted in a case at the museum-lobby of the
USAF Communications Command at Scott AFB. He could become a
static display. [fits his "static" in here...lots of QRM]

I'll have to go back to www.grunt.com ("Sgt Grit's" store
"If we don't have it, Chesty wouldn't want it...") and see
if they have some authentic Stebie MARS authentications.
QRZ doesn't have his MARS calls. Does Buckmaster?

Maybe the "Tonight Show" with Jay Leno will have him as a
"guest?" Kind of fits in with their "morse code triumphant"
sort of "contest." Hi, hi!

Meanwhile, back to the Extra Double Standard newsgroup where
mighty macho morsemen can call their opponents "jackass" and
"horse's ass" and "penis head" (in Yiddish) but their
opponents must be oh-so-polite and civil back to them. That
kind of talk is "approved" by Jimmie Noserve...

Good old Jimmie Noserve jumping in as the "expert" on
TV broadcast production (years of work in that...). :-)

When is the actual NBC "Tonight Show" taped, Jimmie?
At what time? How long before the NBC TV network
feed?

You've been there, right? Waiting in line along
Alameda with the other tourists? Or do you have
"insider information" again? :-)

>FCC requires that you ID at the *end* of a QSO, and every 10 minutes
if
>the QSO goes on longer than 10 minutes. The clip is only 3 minutes
>long.

Oh, my, yes, I'm sure the producers were most extremely
careful to NEVER break any amateur radio regulations!
[they might ALL lose their JOBS over such a gaffe!] :-)

=======

The "Tonight Show" is ENTERTAINMENT. It isn't a
journalism show. It isn't a documentary show. With
the new production company featuring Jay Leno, the
tone of the "Tonight Show" has taken on a sharper edge,
more biting, as compared to De Cordova's company with
the late, great Johnny Carson. Leno likes to twit fads
and ignorant people.

A current fad is "TXT-ing," that of sending short text messages over cell phones having that feature. It's a big thing among teeners all over the country now. [the USA has over 100 million cell phone subscriberships]

Cell phones were never designed or implemented with text messaging in mind. They were done to extend the wired VOICE telephone. However, as the original analog cell phone converted to digital, a limited form of text messaging was possible and that was incorporated into subscribers' sets. Teeners picked up on that as a form of "very personal, like 'private talk' communication" that grown-ups and others couldn't immediately overhear. That 'privacy' thing is a big hit with teeners. ;-)

"Morse code" is the first BIG instant-communications means and debuted 160 years ago. The On-Off signalling of "morse code" was the ONLY PRACTICAL means of using radio for communications, demonstrated 109 years ago. [most people are AWARE of "morse code" through the entertainment media and most have never experienced first-hand any live communications with that...they know it is OLD and obsolete for practical communications]

It is a no-brainer that old, obsolete "morse code" is faster than the new fad of "TXT-ing" messages via a cell phone. The "demonstration contest" on the Leno show was a SETUP to deliberately POKE FUN at the fad of "TXT-ing." It wasn't anything else...just one more item of "humor" a la the Leno company to get the audience amused by poking fun at current fads.

Ham radio morsemen Lifestylers want to wave flags about "morse code" and how triumphant was their "success" in that show-biz SETUP that was a guaranteed pratfall by the "TXT-ers." That short Entertainment bit was NEVER intended as a true contest.

For a REAL contest, live, [rehearsed or not] manual communications means, pit an experienced typist pair using old, surplus 60 WPM teleprinters against a pair of experienced morsemen using either pencil-and-paper or manual typewriters to record received "morse code." Use "over-the-shoulder" live TV camera angles to show the "incoming" text for the audience...and to show the errors made by the morsemen.

Will TV Entertainment shows ever consider such? No. There's no real Entertainment value except for a very small niche-interest fraction of an audience. This is less of a show-biz SETUP than modern "TXT-ing" versus 160-year-old manual "morse code." Audiences won't have anything to LAUGH at. Teleprinters are going to

win out eventually since their throughput is sustainable and less error-prone than manual "morse code" means.

The radio world has LONG AGO done the "contest" bit in actual practice and found "morse code" to be the LOSER. The rest of the radio world has GIVEN UP on "morse code" for communications. The die-hard fanatics in amateur radio still cling to "morse code" as "good" or even "best" because they are still lost in the fantasy and mythology of olden times.

That's not SHOW-BIZ, Jimmie, that's REALITY. Show's over. Get a grip. Go home.

> "guest?" Kind of fits in with their "morse code triumphant"
> sort of "contest."

I was wondering how long it was going to take you to get to
that...

Sucks to have your rants ruined on network TV, doesn't it,
Lennie...?!?!

> Meanwhile, back to the Extra Double Standard newsgroup where

You got all the "civility" due to you and then some for a long
time, Lennie. You got exactly what you wanted.

This road was paved by you. Enjoy the trip.

You're a liar.

You're a fool.

And yes, you're a putz.

It really is THAT simple.

Steve, K4YZ

yep, self assigned cb calls. the first number is the country number, then the IR is the club name, then the number after that is the member number. they have their own dxcc awards to give themselves and iota and all that stuff for illegal activity.

Then who was the man taking the pictures of you, Todd?

I have remained quiet on Jim's "gayboy" claims IRT you, Todd, but since you've now admitted that YOU didn't take the pictures, someone else HAD to...

> Secondly I'm
> not violating Federal Law you ####ing sack #####!!!!!

Not sitting in front of your computer, you're not, Todd...

But fire up that illegal ultralight for a flip around the patch and you are.

Also, you've already admitted to OTHER federal rules infractions, so you are just adding fuel to the fire.

> YOUR ONE OF THE BIGGEST LIARS ON HERE!!!!!!!!

No I'm not. I just twist your bolts by pointing out all of your assinine rantings as the foolhearty endeavors that they are.

If hams are so scared of you then why are you too sissyboy to say where you are camping, nutjob? You are just a sick freak with a tiny brain who just can't stand not to be taken seriously. Face it, you can't do squat about the AKC. You are just a pathetic little wimp who won't accept that he is powerless over the Anti's. LOL!

Tell us where you are camping and we will come say it to your face, sissyboy. Will you? NOPE! LOL! COWARD!

The memo that has "IMPEACH HIM" written all over it.

The top-level government memo marked "SECRET AND STRICTLY PERSONAL", dated eight months before Bush sent us into Iraq, following a closed meeting with the President, reads, "Military action was now seen as inevitable. Bush wanted to remove Saddam through military action justified by the conjunction of terrorism and WMD. But the intelligence and facts were being fixed around the policy."

Read that again: "The intelligence and facts were being fixed...."

For years, after each damning report on BBC TV, viewers inevitably ask me, "Isn't this grounds for impeachment?" -- vote rigging, a blind eye to terror and the bin Ladens before 9-11, and so on. Evil, stupidity and self-dealing are shameful but not impeachable. What's needed is a "high crime or misdemeanor."

And if this ain't it, nothing is.

The memo uncovered this week by the TIMES, goes on to describe an elaborate plan by George Bush and British Prime Minister Tony Blair to hoodwink the lanet into supporting an attack on Iraq knowing full well the evidence for war was a phony.

A conspiracy to commit serial fraud is, under federal law, racketeering. However, the Mob's schemes never cost so many lives. Here's more. "Bush had made up his mind to take military action. But the case was thin. Saddam was not threatening his neighbors, and his WMD capability was less than that of Libya, North Korea or Iran."

Really? But Mr. Bush told us, "Intelligence gathered by this and other governments leaves no doubt that the Iraq regime continues to possess and conceal some of the most lethal weapons ever devised."

A month ago, the Silberman-Robb Commission issued its report on WMD intelligence before the war, dismissing claims that Bush fixed the facts with this snooty, condescending conclusion written directly to the President, "After a thorough review, the Commission found no indication that the Intelligence Community distorted the evidence regarding Iraq's weapons." We now know the report was a bogus 618 pages of thick whitewash aimed to let Bush off the hook for his murderous mendacity. Read on: The invasion build-up was then set, says the memo, "beginning 30 days before the US Congressional elections." Mission accomplished. You should parse the entire memo -- reprinted below -- and see if you can make it through its three pages without losing your lunch. Now sharp readers may note they didn't see this memo, in fact, printed in the New York Times. It wasn't. Rather, it was splashed across the front pages of the

Times of LONDON on Monday.

It has effectively finished the last, sorry remnants of Tony Blair's political career. (While his Labor Party will most assuredly win the elections Thursday, Prime Minister Blair is expected, possibly within months, to be shoved overboard in favor of his Chancellor of the Exchequer, a political execution which requires only a vote of the Labour party's members in Parliament.)

But in the US, barely a word. The New York Times covers this hard evidence of Bush's fabrication of a casus belli as some "British" elections story. Apparently, our President's fraud isn't "news fit to print."

My colleagues in the UK press have skewered Blair, digging out more incriminating memos, challenging the official government factoids and fibs. But in the US press nada, bubkes, zilch. Bush fixed the facts and somehow that's a story for "over there."

The Republicans impeached Bill Clinton over his cigar and Monica's affections. And the US media could print nothing else. Now, we have the stone, cold evidence of bending intelligence to sell us on death by the thousands, and neither a Republican Congress nor what is laughably called US journalism thought it worth a second look.

My friend Daniel Ellsberg once said that what's good about the American people is that you have to lie to them. What's bad about Americans is that it's so easy to do.

- discovered by the Times of London. - GP]

SECRET AND STRICTLY PERSONAL - UK EYES ONLY
DAVID MANNING

From: Matthew Rycroft

Date: 23 July 2002 S 195 /02

cc: Defence Secretary,Foreign Secretary, Attorney-General,
Sir Richard Wilson, John Scarlett, Francis Richards, CDS, C,
Jonathan Powell, Sally Morgan, Alastair Campbell

IRAQ: PRIME MINISTER'S MEETING, 23 JULY

Copy addressees and you met the Prime Minister on 23 July to discuss Iraq.

This record is extremely sensitive. No further copies should be made. It should be shown only to those with a genuine need to know its contents.

John Scarlett summarised the intelligence and latest JIC assessment. Saddam's regime was tough and based on extreme fear. The only way to overthrow it was likely to be by massive military action. Saddam was worried and expected an attack, probably by air and land, but he was not convinced that it would be immediate or overwhelming. His regime expected their neighbours to line up with the US. Saddam knew that regular army morale was poor. Real support for Saddam among the public was probably narrowly based.

C reported on his recent talks in Washington. There was a perceptible shift in attitude. Military action was now seen as inevitable. Bush wanted to remove Saddam, through military action, justified by the conjunction of terrorism and WMD. But the intelligence and facts were being fixed around the policy. The NSC had no patience with the UN route, and no enthusiasm for publishing material on the Iraqi regime's record. There was little discussion in Washington of the aftermath after military action.

CDS said that military planners would brief CENTCOM on 1-2 August, Rumsfeld on 3 August and Bush on 4 August.

The two broad US options were:

(a) Generated Start. A slow build-up of 250,000 US troops, a short (72 hour) air campaign, then a move up to Baghdad from the south. Lead time of 90 days (30 days preparation plus 60 days deployment to Kuwait).

(b) Running Start. Use forces already in theatre (3 x 6,000), continuous air campaign, initiated by an Iraqi casus belli. Total lead time of 60 days with the air campaign beginning even earlier. A hazardous option.

The US saw the UK (and Kuwait) as essential, with basing in Diego Garcia and Cyprus critical for either option. Turkey and other Gulf states were also important, but less vital. The three main options for UK involvement were:

(i) Basing in Diego Garcia and Cyprus, plus three SF squadrons.

(ii) As above, with maritime and air assets in addition.

(iii) As above, plus a land contribution of up to 40,000, perhaps with a discrete role in Northern Iraq entering from Turkey, tying down two Iraqi divisions.

The Defence Secretary said that the US had already begun "spikes of activity" to put pressure on the regime. No decisions had been taken, but he thought the most likely timing in US minds for military action to begin was January, with the timeline beginning 30 days before the US Congressional elections.

The Foreign Secretary said he would discuss this with Colin Powell this week. It seemed clear that Bush had made up his mind to take military action, even if the timing was not yet decided. But the case was thin. Saddam was not threatening his neighbours, and his WMD capability was less than that of Libya, North Korea or Iran. We should work up a plan

for an ultimatum to Saddam to allow back in the UN weapons inspectors. This would also help with the legal justification for the use of force.

The Attorney-General said that the desire for regime change was not a legal base for military action. There were three possible legal bases: self-defence, humanitarian intervention, or UNSC authorisation. The first and second could not be the base in this case. Relying on UNSCR 1205 of three years ago would be difficult. The situation might of course change.

The Prime Minister said that it would make a big difference politically and legally if Saddam refused to allow in the UN inspectors. Regime change and WMD were linked in the sense that it was the regime that was producing the WMD. There were different strategies for dealing with Libya and Iran. If the political context were right, people would support regime change. The two key issues were whether the military plan worked and whether we had the political strategy to give the military plan the space to work.

On the first, CDS said that we did not know yet if the US battleplan was workable. The military were continuing to ask lots of questions.

For instance, what were the consequences, if Saddam used WMD on day one, or if Baghdad did not collapse and urban warfighting began? You said that Saddam could also use his WMD on Kuwait. Or on Israel, added the Defence Secretary.

The Foreign Secretary thought the US would not go ahead with a military plan unless convinced that it was a winning strategy. On this, US and UK interests converged. But on the political strategy, there could be US/UK differences. Despite US resistance, we should explore discreetly the ultimatum. Saddam would continue to play hard-ball with the UN.

John Scarlett assessed that Saddam would allow the inspectors back in only when he thought the threat of military action was real.

The Defence Secretary said that if the Prime Minister wanted UK military involvement, he would need to decide this early. He cautioned that many in the US did not think it worth going down the ultimatum route. It would be important for the Prime Minister to set out the political context to Bush.

Conclusions:

(a) We should work on the assumption that the UK would take part in any military action. But we needed a fuller picture of US planning before we could take any firm decisions. CDS should tell the US military that we were considering a range of options.

(b) The Prime Minister would revert on the question of whether funds could be spent in preparation for this operation.

(c) CDS would send the Prime Minister full details of the proposed military campaign and possible UK contributions by the end of the week.

(d) The Foreign Secretary would send the Prime Minister the background on the UN inspectors, and discreetly work up the ultimatum to Saddam. He would also send the Prime Minister advice on the positions of countries in the region especially Turkey, and of the key EU member states.

(e) John Scarlett would send the Prime Minister a full intelligence update.

(f) We must not ignore the legal issues: the Attorney-General would consider legal advice with FCO/MOD legal advisers. (I have written separately to commissionthis follow-up work.)

SECRET AND STRICTLY PERSONAL - UK EYES ONLY
DAVID MANNING

From: Matthew Rycroft

Date: 23 July 2002 S 195 /02

cc: Defence Secretary,Foreign Secretary, Attorney-General,
Sir Richard Wilson, John Scarlett, Francis Richards, CDS, C,
Jonathan Powell, Sally Morgan, Alastair Campbell

IRAQ: PRIME MINISTER'S MEETING, 23 JULY

Copy addressees and you met the Prime Minister on 23 July to discuss Iraq.

This record is extremely sensitive. No further copies should be made. It should be shown only to those with a genuine need to know its contents.

John Scarlett summarised the intelligence and latest JIC assessment. Saddam's regime was tough and based on extreme fear. The only way to overthrow it was likely to be by massive military action. Saddam was worried and expected an attack, probably by air and land, but he was not convinced that it would be immediate or overwhelming. His regime expected their neighbours to line up with the US. Saddam knew that regular army morale was poor. Real support for Saddam among the public was probably narrowly based.

C reported on his recent talks in Washington. There was a perceptible shift in attitude. Military action was now seen as inevitable. Bush wanted to remove Saddam, through military action, justified by the conjunction of terrorism and WMD. But the intelligence and facts were being fixed around the policy. The NSC had no patience with the UN route, and no enthusiasm for publishing material on the Iraqi regime's record. There was little discussion in Washington of the aftermath after military action.

CDS said that military planners would brief CENTCOM on 1-2 August, Rumsfeld on 3 August and Bush on 4 August.

The two broad US options were:

(a) Generated Start. A slow build-up of 250,000 US troops, a short (72 hour) air campaign, then a move up to Baghdad from the south. Lead time of 90 days (30 days preparation plus 60 days deployment to Kuwait).

(b) Running Start. Use forces already in theatre (3 x 6,000), continuous air campaign, initiated by an Iraqi casus belli. Total lead time of 60 days with the air campaign beginning even earlier. A hazardous option.

The US saw the UK (and Kuwait) as essential, with basing in Diego Garcia and Cyprus critical for either option. Turkey and other Gulf states were also important, but less vital. The three main options for UK involvement were:

(i) Basing in Diego Garcia and Cyprus, plus three SF squadrons.

(ii) As above, with maritime and air assets in addition.

(iii) As above, plus a land contribution of up to 40,000, perhaps with a discrete role in Northern Iraq entering from Turkey, tying down two Iraqi divisions.

The Defence Secretary said that the US had already begun "spikes of activity" to put pressure on the regime. No decisions had been taken, but he thought the most likely timing in US minds for military action to begin was January, with the timeline beginning 30 days before the US Congressional elections.

The Foreign Secretary said he would discuss this with Colin Powell this week. It seemed clear that Bush had made up his mind to take military action, even if the timing was not yet decided. But the case was thin. Saddam was not threatening his neighbours, and his WMD capability was less than that of Libya, North Korea or Iran. We should work up a plan

for an ultimatum to Saddam to allow back in the UN weapons inspectors. This would also help with the legal justification for the use of force.

The Attorney-General said that the desire for regime change was not a legal base for military action. There were three possible legal bases: self-defence, humanitarian intervention, or UNSC authorisation. The first and second could not be the base in this case. Relying on UNSCR 1205 of three years ago would be difficult. The situation might of course change.

The Prime Minister said that it would make a big difference politically and legally if Saddam refused to allow in the UN inspectors. Regime change and WMD were linked in the sense that it was the regime that was producing the WMD. There were different strategies for dealing with Libya and Iran. If the political context were right, people would support regime change. The two key issues were whether the military plan worked and whether we had the political strategy to give the military plan the space to work.

On the first, CDS said that we did not know yet if the US battleplan was workable. The military were continuing to ask lots of questions.

For instance, what were the consequences, if Saddam used WMD on day one, or if Baghdad did not collapse and urban warfighting began? You said that Saddam could also use his WMD on Kuwait. Or on Israel, added the Defence Secretary.

The Foreign Secretary thought the US would not go ahead with a military plan unless convinced that it was a winning strategy. On this, US and UK interests converged. But on the political strategy, there could be US/UK differences. Despite US resistance, we should explore discreetly the ultimatum. Saddam would continue to play hard-ball with the UN.

John Scarlett assessed that Saddam would allow the inspectors back in only when he thought the threat of military action was real.

The Defence Secretary said that if the Prime Minister wanted UK military involvement, he would need to decide this early. He cautioned that many in the US did not think it worth going down the ultimatum route. It would be important for the Prime Minister to set out the political context to Bush.

Conclusions:

(a) We should work on the assumption that the UK would take part in any military action. But we needed a fuller picture of US planning before we could take any firm decisions. CDS should tell the US military that we were considering a range of options.

(b) The Prime Minister would revert on the question of whether funds could be spent in preparation for this operation.

(c) CDS would send the Prime Minister full details of the proposed military campaign and possible UK contributions by the end of the week.

(d) The Foreign Secretary would send the Prime Minister the background on the UN inspectors, and discreetly work up the ultimatum to Saddam. He would also send the Prime Minister advice on the positions of countries in the region especially Turkey, and of the key EU member states.

(e) John Scarlett would send the Prime Minister a full intelligence update.

(f) We must not ignore the legal issues: the Attorney-General would consider legal advice with FCO/MOD legal advisers. (I have written separately to commissionthis follow-up work.)

Indeed. Jim could have volunteered to serve in the Unites States
Military. He had other more important things to do like pursue a
degree in engineering, and looking out for himself. And the military
still needs engineers, even if they are civilians. Go to
WWW.USAJOBS.OPM.GOV and select "Middle East."

> Guess they shudda consulted with you two first, eh...?!?!
>
> Steve, K4YZ

I'm good with volunteerism in the U.S. armed services. Tell Jim to let
us know how it's going when he gets there.

Right. You lie a whole lot.

> I agree that you don't LIKE what I say...Mostly because what I
> ahve to say shreds your silly rants to bits, but that doesn't make it
> lies.

Still waiting on that "authentic" MARS documentation. Got any?

You know what you say of people without "authentic" documentation?

Your words, your rules, your embarassment.

> > > Sorry it's annoying to you. I've told you before if you'd
> stop
> > > lying people would stop calling you a liar.

>
> The abbreviation is "ANCOIC", Brain, and it's waiting for you to
> go first...Afterall, I've had questions in front of you for YEARS.

But I've already been labeled a liar.

So you produce your authentic documentation or forever be known as a
liar and a gay man.

> Unlike YOU, however, I've given specific dates, times, details,
> locations, etc...More than enough for any reasonable person to make a
> solid third party determination.

And I have given such information previously. Additionally, had you
had a QSO with me, you'd have my QSL card with exact GMT date/time and
frequency hand written by me on it. Unfortunately for you, you were

unable to make the trip.

Since you didn't get one of my cards, you have labeled me a liar and a gay man.

So it is your turn to provide authentic documentation of your alleged MARS appointment to "A" NCOIC MARS/Okinawa, or will will forever be known as a liar and a gay man.

> You, on the otherhand, continue to be devious, deceitful and
> deceptive.
>
> In otherwords...a liar.

Got papers? No papers = LIAR!

Your words, your rules, your embarassment.

> > > > > > You address it by pretending it doesn't exist. You lie to

If the CEO of NEXTEL had to pass a Morse Code exam to get his company
licensed, we wouldn't have a NEXTEL.

None of that makes any sense at all. The crap on your blog you put there, any your gay self is lucky that you took it off.
You said you won't answer me, so you posting this is another of your gay lies. Go do your show and don't forget you are net control on the lambda net tonight.
FIRST, If you were kicked off the internet, why is your gay post here?
Second, Why do you know so much about porn, kiddy porn and being a pedophile?
Third, the term is not "your a sociopath liar" It's YOU'RE a PATHOLOGICAL liar, so if YOU'RE going to call names idiot, get it right!
Forth, Where's the mail you sent?
Fifth , Did you ask your FBI buddy yet?
Until you get your gay head out of your ass and answer these questions, don't talk to me!

Moron? here's what you said, with no attributes.

"BTW your is in the mail I hope you and your boyfriend Steve are happy
together

Todd N9OGL"

You added to what? I believed what? My what's in the mail? You're (your)
the moron, none of what you said in the first post makes sense, so the
second post doesn't add up either. But I'm glad that you finely admit
that you lie!

"you tell a lie and i added to it and you fucking believed it."

So toad, your ISP said you can't be here, what's keeping you here?
You're not a moron toad, a moron is handicapped and needs a little help.
You on the other hand are an illiterate idiot and beyond any help.

There was nothing about the French in your post, Brian. Tell us how a
five word per minute code exam would have stymied the CEO of Nextel.
Nothing would have ever been accomplished if a morse test was involved.

You're almost as pathetic as Leonard.

>>
>> =======

The "Tonight Show" is ENTERTAINMENT. It isn't a journalism show. It isn't a documentary show. With the new production company featuring Jay Leno, the tone of the "Tonight Show" has taken on a sharper edge, more biting, as compared to De Cordova's company with the late, great Johnny Carson. Leno likes to twit fads and ignorant people.

A current fad is "TXT-ing," that of sending short text messages over cell phones having that feature. It's a big thing among teeners all over the country now. [the USA has over 100 million cell phone subscriberships]

Cell phones were never designed or implemented with text messaging in mind. They were done to extend the wired VOICE telephone. However, as the original analog cell phone converted to digital, a limited form of text messaging was possible and that was incorporated into subscribers' sets. Teeners picked up on that as a form of "very personal, like 'private talk' communication" that grown-ups and others couldn't immediately overhear. That 'privacy' thing is a big hit with teeners. ;-)

"Morse code" is the first BIG instant-communications means and debuted 160 years ago. The On-Off signalling of "morse code" was the ONLY PRACTICAL means of using radio for communications, demonstrated 109 years ago. [most people are AWARE of "morse code" through the entertainment media and most have never experienced first-hand any live communications with that...they know it is OLD and obsolete for practical communications]

It is a no-brainer that old, obsolete "morse code" is faster than the new fad of "TXT-ing" messages via a cell phone. The "demonstration contest" on the Leno show was a SETUP to deliberately POKE FUN at the fad of "TXT-ing." It wasn't anything else...just one more item of "humor" a la the Leno company to get the audience amused by poking fun at current fads.

Ham radio morsemen Lifestylers want to wave flags about "morse code" and how triumphant was their "success" in that show-biz SETUP that was a guaranteed pratfall by the "TXT-ers." That short Entertainment bit was NEVER intended as a true contest.

For a REAL contest, live, [rehearsed or not] manual communications means, pit an experienced typist pair using old, surplus 60 WPM teleprinters against a pair of experienced morsemen using either pencil-and-paper or manual typewriters to record received "morse code." Use "over-the-shoulder" live TV camera angles to show the "incoming" text for the audience...and to show the errors made by the morsemen.

Will TV Entertainment shows ever consider such? No. There's no real Entertainment value except for a very small niche-interest fraction of an audience. This is less of a show-biz SETUP than modern "TXT-ing" versus 160-year-old manual "morse code." Audiences won't have anything to LAUGH at. Teleprinters are going to win out eventually since their throughput is sustainable and less error-prone than manual "morse code" means.

The radio world has LONG AGO done the "contest" bit in actual practice and found "morse code" to be the LOSER. The rest of the radio world has GIVEN UP on "morse code" for communications. The die-hard fanatics in amateur radio still cling to "morse code" as "good" or even "best" because they are still lost in the fantasy and mythology of olden times.

That's not SHOW-BIZ, Dannyboy, that's REALITY. Show's over. Get a grip. Go home.

In all of Title 47 C.F.R., the term "service" is a regulatory
one denoting the type and kind of radio activity being
regulated. Stebie doesn't understand that. He thinks that
the amateur service is some kind of "national service" or
"service to the country." :-)

In that case, the Citizens Band Radio SERVICE will have all radio
amateurs outnumbered by a large ratio. :-)

>Indeed. Jim could have volunteered to serve in the Unites States
>Military. He had other more important things to do like pursue a
>degree in engineering, and looking out for himself. And the military
>still needs engineers, even if they are civilians. Go to
>WWW.USAJOBS.OPM.GOV and select "Middle East."

Doesn't matter. Jimmie Noserve is an EXPERT on the military.
He KNOWS how military men feel/act/etc. Jimmie can "correct"
any veterans' "mistakes." He's read several books on the subject...

>> Guess they shudda consulted with you two first, eh...?!?!
>>
>> Steve, K4YZ

>known as a liar and a gay man.

Sounds fair enough to me.

Tsk. I'll bet Stebie doesn't have name/rank of the NCOIC he
was "assistant" to. :-) Or of the OIC in charge of the
MARS station. Or of the equipment at that mighty MARS station.

With all his multiple personalities working hard, he has us
outnumbered, Brian! :-)

But, psychological projection he DOES do in here. He can't
admit it without "losing face" so he waltzes around every
claim, trying to blame others for his own faults. He can't
help himself at this stage.

>
>Are you really that stupid?

I don't think Jimmy Noserve is "stupid" exactly. He's so
brainwashed by amateur morsemanship that he can't come to
any intellectual decision...for him there is NO decision to
make. :-)

Some just can't think out of their little box. It's like the
retired engineer who came on Johnny Carson's "Tonight Show"
with a powered unicycle. One-wheeled cycle, powered by a
small gas engine used in lawn mowers. Johnny had some good-
natured fun with the guest and, when the guest had trouble
starting the gas engine (with a pull rope), Johnny got in and
pulled several times. The rope BROKE. All kinds of laughter
from the audience. [most "knew it couldn't be done" years
before the Segway debuted...]

Carson invited the guest back later...this time with a new
pull-start rope. The electronically stabilized powered
unicycle did indeed work and the guest tooled around the

small stage to well-deserved applause. This might have been one of the last shows of "Tonight" in New York City before moving to Burbank...don't have an exact air date on it.

So, all the amateur morsemen "knew" that morse code would "triumph" in this non-contest twit of the TXT-ing fad. :-)

Indeed, all the amateur morsemen in here do the cheering and "morse-patriotism" thing because they, too, have been brainwashed into thinking that morsemanship is "real operating" in radio. They will leap and embrace the slightest thing that makes morse "better" than any other mode. :-)

Yep. And yo STILL have the facts peraining to my prior
membership.

> You know what you say of people without "authentic" documentation?
>
> Your words, your rules, your embarassment.

I'm not embarrassed, Brain.

I gave you exact details. More than YOU have ever given on ANY
topic.

YOU remain an unrepentant liar and deceiver.

Not MY problem, Brain.

> > > > Sorry it's annoying to you. I've told you before if you'd

I've made the trip to ALL of the places EXCEPT Somalia that you've
purported to have been, Brain.

And had I "worked" you while you were IN Somalia, it wouldn't be
worth anything more than a curiostiy.

You were not properly authorized to operate there. So the effort
would have been wasted.

> Since you didn't get one of my cards, you have labeled me a liar and
a
> gay man.

I've never called you gay, Brain.

Please site the post wherein you thing I said "your're gay".

> So it is your turn to provide authentic documentation of your alleged
> MARS appointment to "A" NCOIC MARS/Okinawa, or will will forever be
> known as a liar and a gay man.

Hey, Brain, Like you said...You're already known for lying...

I wouldn't expect you to change anything today.

> > You, on the otherhand, continue to be devious, deceitful and
> > deceptive.
> >
> > In otherwords...a liar.

>
> Got papers? No papers = LIAR!

Nope.

> Your words, your rules, your embarassment.

I'm not embarrased, Brain.

You're not even telling the truth about 'documentation".

I've asked you for FACTS before, Brain...Some tidbit of
information that could be independently verified.

YOU are the one stressing "documentation"...Not me.

You're welcome to site the post wherein I said otherwise...As a
matter of fact, we'll put all this demand for 'documentation' right
where it belongs...In YOUR lap.

You say I insist on "papers"...Prove it.

Its closer than you think. Once we create a WIFI-like wireless data
network to blanket most areas, this will become a reality. Cellular
can already do this to some extent, but the cellular network cannot
handle the increased bandwidth required for full motion video.

Dave

Surrrrrrrrrrrrrrrrrrre it was.....

I guess the fact that the Morse guys did it faster and with 100%
accuracy doesn't account for anything, eh?

> Ham radio morsemen Lifestylers want to wave flags about
> "morse code" and how triumphant was their "success" in

I >>K N E W<< that Lennie would try to talk his way out of this
one...!

> For a REAL contest, live, [rehearsed or not] manual
> communications means, pit an experienced typist pair
> using old, surplus 60 WPM teleprinters against a pair
> of experienced morsemen using either pencil-and-paper
> or manual typewriters to record received "morse code."
> Use "over-the-shoulder" live TV camera angles to show
> the "incoming" text for the audience...and to show
> the errors made by the morsemen.

They didn't do "over the shoulder" video on Leno, Lennie, however
the Morse guys apparently did 100% copy.

I was able to hear 90% from TV audio, and the receiving guy
apparently got it 100% right.

> The radio world has LONG AGO done the "contest" bit in
> actual practice and found "morse code" to be the
> LOSER. The rest of the radio world has GIVEN UP on
> "morse code" for communications. The die-hard

"fantasy"...?!?! "mythology"...?!?!

The Leno program shot a BIG hole in THOSE adjective for you,
Lennie.

> That's not SHOW-BIZ, Jimmie, that's REALITY. Show's
> over. Get a grip. Go home.

Lame Loser Lennie...Barking orders again...

Mad when no one listens or heeds him....

Maybe because he's wrong so often...???

(SNIP of Unicycle story)

> So, all the amateur morsemen "knew" that morse code would
> "triumph" in this non-contest twit of the TXT-ing fad. :-)

Len,
I don't consider myself an "amateur morseman" but I
could see that morse would win out over current text
messaging via cellphone. Now if the input device for
text messaging had been a full keyboard, then I'd expect
the text messaging to win out as I belive records for
typing/keyboarding (100+ WPM I think) do exceed
the morse record (70+ per someone else's post).

> Indeed, all the amateur morsemen in here do the cheering
> and "morse-patriotism" thing because they, too, have been
> brainwashed into thinking that morsemanship is "real

> operating" in radio.

Sorry Len, I can't agree with your statements here.
Like it or not, morse operating IS real operating radio...
just as driving my antique cars is real automobile driving.
Is morse commonplace outside of ham radio? No
it isn't, but that does not make the use of morse by
hams any less "operating radio" then any other mode.

Given that you (Len) believe morse is NOT operating
radio, would it be your desire to see morse banned
as a mode of use by amateurs?

> They (amateur morsemen) will leap and embrace the
> slightest thing that makes morse "better" than any other
> mode. :-)

I don't see anything in the morse win over text
messaging that suggests that. The morse win over
text messaging was a specific comparison only.
The win did not prove nor did I see any amateur
in this newsgroup suggest that the win showed
that morse was "better than any other mode."

Yes, I've been around
this newsgroup long enough to know that there is
a handful (or at least was at one time) of hams that
might have held such "morse is better than any other
mode" perspective, but I think the issue has
ckarified significantly in recent years to the point that
the issue is the TEST and only the test for most
hams.

As such, I applaud the morse win over Text
messaging because it was a good opportunity to
get some publicity for ham radio. Will text messaging
always be second (speed wise) to morse...who knows,
but without a full keyboard for entry, I suspect it
will be...but maybe someday there will be telepathic
input of text at which point all bets are off :-) :-)

Cheers and congrats again to the morse winners.

Hans has it nailed pretty much. The value of the Leno Sjow contest was the publicity for ham radio. Beyond that, it was just a mildly interesting win for the hams. Other than that, what else does the morse vs text messaging contest win "account for"?

Cheers,
Bill K2UNK

The reason that lennieboy believes Morse is not operating radio is
because he can't do it.

Gee, thanks, Len....;-)

> He's so
> brainwashed by amateur morsemanship that he can't come to

> make. :-)

That's simply not true, Len. Not funny either, smiley or no
smiley.

> Some just can't think out of their little box.

That's true. You're describing yourself again. Your fear of
change is showing.

> It's like the
> retired engineer who came on Johnny Carson's "Tonight Show"
> with a powered unicycle. One-wheeled cycle, powered by a

> from the audience. [most "knew it couldn't be done" years
> before the Segway debuted...]

Carson retired from "The Tonight Show" several years ago, Len. The
appearance you describe happened many years ago. Why are you still
living in the past?

btw, the Segway is neither a unicycle nor powered by a gas engine.
>
> Carson invited the guest back later...this time with a new

Is there a point to your story, Len?

> So, all the amateur morsemen "knew" that morse code would
> "triumph" in this non-contest twit of the TXT-ing fad. :-)

Considering that the Morse Code team beat the text-message team
in all three rehersals and on the taped show, it was kind of a
safe bet....

It really seems to bother you that the Morse Code team won, Len.
Why is that?

> Indeed, all the amateur morsemen in here do the cheering
> and "morse-patriotism" thing because they, too, have been
> brainwashed into thinking that morsemanship is "real
> operating" in radio.

That's simply not true, Len.

The truth is that using Morse Code *is* real radio operating. So is
the use of lots of other modes.

> They will leap and embrace the
> slightest thing that makes morse "better" than any other
> mode. :-)

The plain, simple fact is that the Morse Code team, using the mode
at a speed about 1/3 that of the world record, beat the *world
record holder* in text messaging every time the test was run.

I suspect that if the text message team had won, we'd never hear
the end of it from you.

--

It's really telling that some people let an established, proven technology hold them back, just because it's not brand-new and requires learning a new skill to use. Rather than learn it, they seek to change a system that has worked well for decades. They fear change, and most of all they fear the change in themselves that learning causes.

I do too. Superior Extra's making yet more BS claims of things they've
never done.

> A rear-area weather-guesser chiding others on 'military
service".

Do detail -your- claims of your service, oh Silly Gunny.

The guys who got kicked out of boot camp for sleep-walking have more
"real military experience" than Brian Kelly/W3RV.

Not at all. You give all of the signs of a stalker. Always needing to talk to my wife, and wanting equal time with my son. After posting my street number "430" in one of you last posts, I thought you might have stopped by on your way to the Dayton Hamfest.

So did she swing a nasty rolling pin or did she wave her revolver?

1176. Didn't see Robeson at Dayton

Lloyd,
I don't use anonymous remailer if I have something to say I aint't going to hide behind an anonymous remailer. I can't run shoutcast i don't have the right type of computer and There is too many "web radio's" out there. As for echolink, the Mac version isn't like the windows version and is unable to run confernce...as for buying a server the majority of funds are going for my education. The point is my information bulletin is legal and no matter what steve and his little buddies think they can complain all they want but information bulletins are legal on the amateur bands,

>messaging via cellphone.

Agreed, Bill. :-) That bit of entertainment, and of twitting the TXT-ers on their cell phones, was never any "contest." :-)

> Now if the input device for
>text messaging had been a full keyboard, then I'd expect
>the text messaging to win out as I belive records for
>typing/keyboarding (100+ WPM I think) do exceed
>the morse record (70+ per someone else's post).

Agreed again, but - again - that bit on the "Tonight Show" was never any "contest" to "prove" anything.

A few things are evident in this newsgroup. Firstly, there are the cast-in-concrete conservatives who have been brainwashed into believing that the ULTIMATE skill in amateur radio is morsemanship. Secondly, there is that handful of irregular regulars in here trying to "win out" over anyone expressing any opinion other than theirs...those stop at nothing to attempt damaging their "opponents" credibility through the usual attempted intimidation and personal insults.

It matters not - in this newsgroup environment - that the rest of the radio world has "put morse to the test" and found it wanting in favor of better communications modes. The only practitioners of morsemanship still active and USING it are in amateur radio in the USA. All the other radio services in the USA have given up on using any form of morse code for communications. [automated station IDs in morse tones is not communications]

>> Indeed, all the amateur morsemen in here do the cheering
>> and "morse-patriotism" thing because they, too, have been
>> brainwashed into thinking that morsemanship is "real

>> operating" in radio.
>
>Sorry Len, I can't agree with your statements here.
>Like it or not, morse operating IS real operating radio...
>just as driving my antique cars is real automobile driving.

Bill, in all honesty, I was talking about the PCTA Extra Double Standard brainwashed diehards in here...NOT yourself...OR driving antique cars.

Witness the constant statements of that "expert military communicator" who keeps insisting I was "only a radio mechanic" or the critic who never served but "had dinner with the Captain (of an aircraft carrier)." :-)

Morsemanship IS PART of radio operating...but ONLY of a radio that actually DOES USE on-off keying of the RF carrier with morse code. Morsemanship is NOT REQUIRED by anyone operating an aircraft radio - either civilian or military. Morsemanship is NOT REQUIRED of anyone operating a broadcast services transmitter. Morsemanship is NOT REQUIRED for anyone sending a GMDSS distress or safety message. Morsemanship is NOT REQUIRED of any of the radios (in the millions) used in Public Safety or Private Land Mobile Radio Service. Not in the FCC regulations for those radio services...and others.

>Is morse commonplace outside of ham radio? No
>it isn't, but that does not make the use of morse by
>hams any less "operating radio" then any other mode.
>
>Given that you (Len) believe morse is NOT operating
>radio, would it be your desire to see morse banned
>as a mode of use by amateurs?

Bill, that's NOT a "given." IF and only IF morse code skills ARE REQUIRED in radio operation, then morsemanship IS a PART of radio operation.

Do not try to put words in there that I am "banning morse code operation" in amateur radio. I am NOT.

Others - in here - have already tried that. They have failed...but they keep persisting in their misguided attempts to suppress the real subjects by their personal attacks and misstatements against others.

You haven't posed a viable question.

>> They (amateur morsemen) will leap and embrace the
>> slightest thing that makes morse "better" than any other
>> mode. :-)
>

>I don't see anything in the morse win over text
>messaging that suggests that. The morse win over
>text messaging was a specific comparison only.

Call it a "loaded test" akin to a "loaded question."
A SETUP.

Cellular telephony does not, nor was it ever designed, to
send textual communications. Cellular telephony was
designed and implemented to communicate by VOICE.

>The win did not prove nor did I see any amateur
>in this newsgroup suggest that the win showed
>that morse was "better than any other mode."

Bill, I will have to put you down as a LITERALIST then.
A "literalist" is one who takes all written text as it
is, unable to read in anything "between the lines" and
acting like some "language purist."

I'm sorry you've turned into that.

>Yes, I've been around
>this newsgroup long enough to know that there is
>a handful (or at least was at one time) of hams that
>might have held such "morse is better than any other
>mode" perspective, but I think the issue has
>ckarified significantly in recent years to the point that
>the issue is the TEST and only the test for most
>hams.

This newsgrope group is NOT "most hams." :-)

It is a handful of PCTA Extra Double Standard bearers
on some personal "mission" to "win supremacy" in a
newsgroup. They will readily fall-to anyone speaking
against the league-speak and attack them like starving
vultures after ripe carrion. :-)

>As such, I applaud the morse win over Text
>messaging because it was a good opportunity to
>get some publicity for ham radio.

"Publicity," yes. But at what price? By putting other
means of communications DOWN in a rigged test?

If that's the only means of "getting publicity" nationally,
then it is of rather low taste.

WHERE has any ardent radio amateur run with this "victory
for morse code?" The only talk seems to be WITHIN amateur
radio circles. Does the general public give a damn one
way or another? The general public has seen morse code "in
action" in many western movies and TV shows, set in periods

well before anyone's time. The general public is bound to have seen "TXT-ing" by teeners and others in the present time, eye-witnessing it in person. Right now TXT-ing is part of at least three commercial ads on TV...that I've seen today. Haven't seen a thing on amateur radio lately (discounting that non-contest "contest" on "Tonight").

Bill, it's NOT my job to promote amateur radio. I don't have an amateur radio license nor any vested interest in amateur radio. My purpose in here has been to argue against the morse code TEST for any amateur radio license. My "opponents" in here have generally been an insulting little group of hypocritical moralsts "representing" the "highest class" of USA radio amateurs. As EXAMPLES, they've been far from good for the "amateur community."

> Will text messaging
>always be second (speed wise) to morse...who knows,
>but without a full keyboard for entry, I suspect it
>will be...but maybe someday there will be telepathic
>input of text at which point all bets are off :-) :-)

Why do you bring up "telepathy" as a communications mode? You have to understand that the PCTA Extra Double Standard bearers ALREADY KBNOW that all amateurs "must" test for morse code. They don't NEED "telepathy" when they have proven morsemanship skills. ["CW gets through when nothing else will"...probably including telepathy and electric power]

The discussions should be about the TEST for morsemanship. It isn't. The contents of these newsgroper's messages is a comical set of middle-school juvenile posturing and adolescent cuss words...especially those of other languages and dialects not native to those middle-aged adolescents.

So, 91 years after the ARRL was formed, the best national-exposure "publicity for amateur radio" is a rigged late-night TV show segment ridiculing cell phone TXT-ing?

According to the U.S. Census Bureau figures for 2004, there are 100 million cell phone subscriptions in the USA. How many morse code operators are there in radio in the USA?

Personally, if someone wants to believe that morse
is THE ULTIMATE skill in amateur radio, that's
their right and opinion. Clearly neither you nor I
agree with that.

> It matters not - in this newsgroup environment - that
> the rest of the radio world has "put morse to the test"

Actually there are others in amateur radio "outside"
the USA that also embrace morse as a favored mode.

>>> Indeed, all the amateur morsemen in here do the cheering

I try to avoid all personal attack commentary.

> Morsemanship IS PART of radio operating...but ONLY of a
> radio that actually DOES USE on-off keying of the RF
> carrier with morse code.

Which covers a considerable amount of radios. Additionally,
it is not simply CW (on-off keying of carrier) that allows
use of morse. I can send morse as an on/off tone via any
FM capable transmitter.

> Morsemanship is NOT REQUIRED
> by anyone operating an aircraft radio - either civilian

Well at this point, morse as a requirement is only
required for General and Extra class licenses...which
is a requirement I am totally on record as opposing.

> Do not try to put words in there that I am "banning
> morse code operation" in amateur radio. I am NOT.

Good...thanks for the clarification.

The newsgroup has "some" folks that might fit your
description...but they are fewer today than before and
they are not sole participants in the newsgroup as
others (you, me, etc) clearly have differing viewpoints.

>>As such, I applaud the morse win over Text
>>messaging because it was a good opportunity to
>>get some publicity for ham radio.
>
> "Publicity," yes. But at what price? By putting other
> means of communications DOWN in a rigged test?

Should we have a pity party for the poor text messaging
record holder. If the text message folks feared a put
down then they had the option to not play. They decided to
play and they lost....fair, square, contrived or how ever
you feel it was inevitable that text messaging would lose.

> If that's the only means of "getting publicity" nationally,
> then it is of rather low taste.

Why is it of low taste? Did the losers get razzed by the morse
winners?

> WHERE has any ardent radio amateur run with this "victory
> for morse code?" The only talk seems to be WITHIN amateur
> radio circles. Does the general public give a damn one
> way or another? The general public has seen morse code "in
> action" in many western movies and TV shows, set in periods
> well before anyone's time.

When was the last time you saw morse used on any TV
show...especially as a mode used by hams? I watch a fair
amount of TV and can't recall it. But the issue of publicity is
simple. The airing of the morse vs text messaging contest
was a brief opportunity to expose amateur radio to
the public. I have no doubt that there would not be a sudden
wave of new interest because of that airing, but perhaps
it stirred some interest in a few...which is fine by me.

> The general public is bound to
> have seen "TXT-ing" by teeners and others in the present
> time, eye-witnessing it in person. Right now TXT-ing is
> part of at least three commercial ads on TV...that I've
> seen today. Haven't seen a thing on amateur radio lately
> (discounting that non-contest "contest" on "Tonight").

Agreed which is why the contest at least was a positive
exposure for ham radio...whether one like or dislikes
morse code.

> Bill, it's NOT my job to promote amateur radio. I don't
> have an amateur radio license nor any vested interest in
> amateur radio. My purpose in here has been to argue
> against the morse code TEST for any amateur radio license.

Then argue against the test. Your post appeared to be
far more focused against morse use in general rather
than specifically the test requirement.

> My "opponents" in here have generally been an insulting
> little group of hypocritical moralsts "representing" the
> "highest class" of USA radio amateurs. As EXAMPLES, they've
> been far from good for the "amateur community."

As before, I try to stay out of the personal attack
commentary that I've seen some of these discussions
reduced to.

>> Will text messaging
>>always be second (speed wise) to morse...who knows,
>>but without a full keyboard for entry, I suspect it
>>will be...but maybe someday there will be telepathic
>>input of text at which point all bets are off :-) :-)
>

> Why do you bring up "telepathy" as a communications mode?

Please note the two smilies at the end of the statement.

> You have to understand that the PCTA Extra Double Standard
> bearers ALREADY KBNOW that all amateurs "must" test for
> morse code.

But we already know that morse is NOT a requirement for
every ham license and in more and more countries it is
being dropped completely. The USA will surely follow...it
is just a matter of time. It's not happening here fast enough
(IMHO), but it will.

> They don't NEED "telepathy" when they have
> proven morsemanship skills. ["CW gets through when nothing
> else will"...probably including telepathy and electric power]

And we already know the FCC doesn't accept that argument.

> The discussions should be about the TEST for morsemanship.
> It isn't. The contents of these newsgroper's messages is a
> comical set of middle-school juvenile posturing and
> adolescent cuss words...especially those of other languages
> and dialects not native to those middle-aged adolescents.

This discussion started when the contest was reported.
No one that I recall claimed it proved or otherwise
served to support justification of continued morse testing.
From my reading it was simply a bit of positive publicity
on a national TV show.

> So, 91 years after the ARRL was formed, the best national-
> exposure "publicity for amateur radio" is a rigged late-night
> TV show segment ridiculing cell phone TXT-ing?

Who said it was "the best" publicity? It was a brief one-shot
opportunity. That's it.

> According to the U.S. Census Bureau figures for 2004, there
> are 100 million cell phone subscriptions in the USA. How
> many morse code operators are there in radio in the USA?

Your point?

Cheers,
Bill K2UNK

Todd N9OGL

You better go to skool some more Toddie. Go to Devry like me. Learn to spell
and go for a master degree.
When you move out of your daddys house you better be workning toward a
Master Degree like me. I don't want any illaterate moving in with me sincse
that would look bad.
and I have a Extra license too. If you want to move in with me you wll have
to be a Extra also. Easy to get. Just ask me.
I have a spare bedroom and room in my drive for your Yugo, so come on over
when you get $500 for a deposit.

Your freind, roger.

Sure it was. The Morse Code team handled the message faster than the
text messaging team.

Did you see the segment, Len?

> > Now if the input device for
> >text messaging had been a full keyboard, then I'd expect
> >the text messaging to win out as I belive records for
> >typing/keyboarding (100+ WPM I think) do exceed

Of course. But that wasn't the point..
>
> Agreed again, but - again - that bit on the "Tonight
> Show" was never any "contest" to "prove" anything.

Sure it was. In fact it proved a couple of things. Not only
was Morse Code faster, the audience thought text-messaging
would win, and was surprised by the outcome.

> A few things are evident in this newsgroup. Firstly,
> there are the cast-in-concrete conservatives who have
> been brainwashed into believing that the ULTIMATE
> skill in amateur radio is morsemanship.

Who are they, Len?

Is there something wrong with being "conservative"?

How about cast-in-concrete liberals who believe the opposite?

> Secondly,
> there is that handful of irregular regulars in here

> trying to "win out" over anyone expressing any
> opinion other than theirs...those stop at nothing to
> attempt damaging their "opponents" credibility
> through the usual attempted intimidation and personal

Well, Len, considering the way you address your opponents
with demeaning diminutive nicknames, make fun of their
education, work experience, military service, age, physical
appearance and any other characteristics you know of, I'd
say that you've just done a great job of describing yourself.

> It matters not - in this newsgroup environment - that
> the rest of the radio world has "put morse to the test"
> and found it wanting in favor of better communications
> modes.

Text messaging wasn't better than Morse Code in the contest.

> The only practitioners of morsemanship still
> active and USING it are in amateur radio in the USA.

And the rest of the world. Not just the USA.

> All the other radio services in the USA have given up
> on using any form of morse code for communications.
> [automated station IDs in morse tones is not
> communications]

It's communicating the identity of the station...

So what's your point, Len? Do you think amateurs should stop
using Morse Code because other radio services have stopped?

> >> Indeed, all the amateur morsemen in here do the cheering
> >> and "morse-patriotism" thing because they, too, have been

>
> Call it a "loaded test" akin to a "loaded question."
> A SETUP.

How was it a setup, Len? The Morse ops didn't even use abbreviations.
They went about 1/3 the world-record speed.
The audience made a lot of noise, too. Yet they still won,
with 100% perfect copy.

> Cellular telephony does not, nor was it ever designed, to
> send textual communications. Cellular telephony was
> designed and implemented to communicate by VOICE.

Not true. The text messging feature is built into the phones.
It's part of the design - as are the ability to send pictures
and other data, access the internet, etc.

>From my cell phone I can do things like check my available
free minutes and the balance on the bill for cellular service.

Most cell phones in the USA aren't analog anymore, Len.

Did you know that Nokia is trying to patent a cell phone that
uses Morse Code?

> >The win did not prove nor did I see any amateur

> Other than that, what else does the morse vs text
> messaging contest win "account for"?

Actually, Bill, I think the main focus of the Leno show contest and its Australian predecessor wasn't ham radio at all.

There's a certain mindset that automatically connects "newer" with "faster/better/easier". There's even a word for it: "neophilia", meaning unreasonable love of new things.

The Leno clip shows that mindset in action in the way the woman being interviewed by Jay Leno immediately assumes text messaging will be faster than Morse Code. You also see it in the way the audience agrees. Text messaging is more than 150 years newer than Morse code - it must be faster, right?

Of course Jay knows the outcome is almost certain to be very different - that's the whole point of the segment. And when the Morse Code team wins the contest, the point is clear: Newer isn't always better, and old isn't always bad or useless.

--

There was a segment on the NPR radio quiz show "Wait, Wait, Don't Tell Me" on May 14, in which a caller was asked to identify the one true story out of three. One story was about the Australian text-vs.-Morse contest, and the other two were made-up along the lines of a new product having some surprising characteristics, like tomatoes that were flammable. (The caller got it right).

Nope.

If I was a "stalker", you'd never know it until it was too late.

> Always needing to talk to my wife, and wanting equal time with my
son.

Wrong on the "needing" to talk to your wife OR son.

Just interested to see what kind of hair I raise on your neck when
I suggest what THEIR reaction might be if they got ahold of YOUR posts
from this forum.

I think we ALL have a pretty clear picture of what THAT would be
like.

You're scared to death that she'll see what your alter-ego does on
the computer.

A revolver...?!?!

You leave your wife home alone with a REVOLVER...?!?!?!

BBBWWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
! ! !

Brain, I doubt she'd do either.

She married YOU, so with the exception of a few like Lloyd, Roger,
Todd and Lennie, the only way left for her is up.

Sheeeeeeeeeeeeeeeeeeesh.

Uh....Brain....???

His comment addressed "144 mhz".

That is very clearly within the scope of his license.

And although he didn't mention it, six meters is within the scope
of his license too. As are the "higher local" frequencies.

He didn't address any comments to the 20 meter frequency.

Sheeeesh......

^^^^^^
It's ok (both caps wrong) isn't period .
This is from a collage education?

No code? Where does it say that? Is this info from your FBI butt buddies? Toad, you are the only one here bad mouthing, you started with calling ALL hams idiot appliance operators and saying how much smarter you are then everyone else here. Does your class of license make you better then me, smarter then me? I might have gone from Novice to Tech, meaning I had the same theory test that you had and just 5 wpm code. BUT toad if a higher license class makes you better, so be it, just remember that Steve and Dave and Dan all are a higher class then you. Heck, everybody here is higher class then you! :)
Also remember, after the extensive search you did to find a post or two that somebody with this call made on QRZ, you still didn't know the class of license until I pointed it out to you, idiot!
Toad, go vote on the other pole, everybody here is interested in what you think, NOT.
Another thing idiot, I never saw a post on your perv blog that praised you either, explain that?

It was an enjoyable stunt pulled together by the show's producers and
nothing more and none of us "Morsemen" have taken it any further
either. He's taking the leap simply to generate dissention. Which is
normal behavior on his part and is the only reason he lurks in this NG.
.

> hams.

Of course and I'm one of those. The sky will not fall if eventually
nocode Extras show up on the bands and I suspect that most if not all
us PCTAs hold the same view. At no point thru the years have I for one
ever made any all-inclusive statements like "Morse being better than
any other mode", this nonsense is 100% of his making to serve his own
strange purposes.

> As such, I applaud the morse win over Text

Uh, no that's not the way it works at all, has nothing to do with
"brainwashing", has to do with CW being a very attractive mode for a
number of reasons for those of us who use the mode and nothing more.
Fact is that with a couple possible exceptions I don't believe there's
a CW op in this NG who doesn't use other modes too. So blather like
your "ULTIMATE skill in amateur radio is morsemanship" are simply
screwball contrivances on your part which you post in hopes that
they'll provide a platform which focuses attention on you.

> Secondly,
> there is that handful of irregular regulars in here

Bwaahaha! From the master of all of the above! Hypocrite.

> It matters not - in this newsgroup environment - that
> the rest of the radio world has "put morse to the test"
> and found it wanting in favor of better communications
> modes. The only practitioners of morsemanship still
> active and USING it are in amateur radio in the USA.

That's simply bullshit. Hams from upwards of 200 DXCC countries show up regularly in the two major annual CW DX contests. Many if not most of those countries require that their hams pass code tests in order to operate in the HF bands and in the contests.

> >Sorry Len, I can't agree with your statements here.

By the military definition were you or were you not ever a U.S. Army radio operator?

> or the critic who never served but "had dinner
> with the Captain (of an aircraft carrier)." :-)

Any number of times actually. In fact every Friday nite while underway. Do you have a problem with it?

Maybe this is the point in history when you can uncork an ongoing mystery for me. There's been piles of bafflegab from all quarters in this NG over the years about who done what in the military and who didn't, etc. Looming over all this is my complete failure to understand what anybody's military service or a lack thereof has to do with ham radio policies in general and more specifically with discusssions about retaining the code tests in Part 97. I just don't see any logical connection betweem the two basic topics. If you have a few spare moments would you be kind enough to explain this linkage in terms I might be able to grasp?

> Morsemanship IS PART of radio operating...but ONLY of a
> radio that actually DOES USE on-off keying of the RF
> carrier with morse code. Morsemanship is NOT REQUIRED
> by anyone operating an aircraft radio - either civilian
> or military. Morsemanship is NOT REQUIRED of anyone

What makes the toad a better person then the rest of the people here?
His class of license?
His 1 year a gaylerville Community Collage?
His good upbringing?
All his knowledge and inventions?
Could it be his large vocabulary?
His sense of fairness?
How about his ability to C&P info from the FCC rules?
His willingness to express his thoughts, even though they sound like
an echo of some other idiot?
His source of never ending funds in which he buys an unlimited amount
of home built equipment, but alas, there's not enough to buy a cheap
windows machine, or an apartment of his own.
His endless lies, or his typing profanities in CAPS every time he's caught?
Could it be his snappy, well thought out comebacks? OR maybe, just
maybe his gay looks and cloths?
Maybe it's where he lives in a small town where you can't put a line
between the business district and the residential area?
Tell us toad, what makes you so much better then everybody else?

>agree with that.

Agreed on that agreement. Others go way over the line
of the subject on their "replies." That isn't deniable.
It's archived in Google (for those that want to relive
past messaging, seeking to "avenge their wrongs").

For years and years the ARRL has emphasized morsemanship
over and above all other skills in amateur radio. The
Why of that is rooted in a time before us, back in the
30s when T.O.M. ruled. Three-quarters of a century later
times have changed.

>> It matters not - in this newsgroup environment - that

>

>Actually there are others in amateur radio "outside"
>the USA that also embrace morse as a favored mode.

Fine for them. However, that doesn't have any bearing on
morse code use OR testing IN the United States of America.

>>>Sorry Len, I can't agree with your statements here.
>>>Like it or not, morse operating IS real operating radio...
>>>just as driving my antique cars is real automobile driving.
>>
>> Bill, in all honesty, I was talking about the PCTA Extra
>> Double Standard brainwashed diehards in here...NOT
>> yourself...OR driving antique cars.
>
>OK, but that's not how it read.

Tsk. You are "not able" to recognize these PCTA Extra
Double Standard bearers parroting the ARRL over-
emphasis on morsemanship?!? That's surprising. Most of
their myths seem self-evident.

I was NOT speaking of driving antique cars. Were there
any actual running "cars" ("horseless carriages" self-
contained, carrying people and driven by people) in 1844
when the first Morse-Vail Telegraph System began operating?

>> Witness the constant statements of that "expert military
>> communicator" who keeps insisting I was "only a radio
>> mechanic" or the critic who never served but "had dinner
>> with the Captain (of an aircraft carrier)." :-)
>
>I try to avoid all personal attack commentary.

If time permits, I'll meet it head-on...and usually defeat
the insulters...whether they admit it or not (very few have
the courage to do anything but harass, heckle, and insult
in "replies").

The big difference is that I DO have documentary evidence
on what I write...and it is referenced elsewhere.

>> Morsemanship IS PART of radio operating...but ONLY of a
>> radio that actually DOES USE on-off keying of the RF
>> carrier with morse code.
>
>Which covers a considerable amount of radios. Additionally,
>it is not simply CW (on-off keying of carrier) that allows
>use of morse. I can send morse as an on/off tone via any
>FM capable transmitter.

You have now entered the area of reducto ad absurdum.

Yes, you CAN whistle morse code characters on any voice
transmitter. Or use a little code practice oscillator set
with a speaker beeping into the microphone...if there isn't
any pucker left in your whistle. :-)

But WHY? Because you "can?" :-) How does that demonstrate
"real operating?"

Bill, to venture into the absurd, I can rig up an AFSK kluge
to send Data over a voice transmitter...and "read" it via
most any available audio-connected-only commercial "TOR" modem.
All that "proves" is that kluges are possible. It is much
better to connect them electronically, follow the technical
requirements in Title 47, and do it properly.

On that alleged "contest" of morse code versus TXT-ing on TV,
it would have been more fair to have the morsemen whistle or
beep or make whatever sound-equivalent to a morse code signal
over cellphones rather than using ham radio equipment. Or
use VOICE on the cell phones in a competition with morse code
over ham radios. But...that would defeat the purpose of this
"test" which was intended as a "funny" put-down of a popular
fad among young people of today.

>> Morsemanship is NOT REQUIRED
>> by anyone operating an aircraft radio - either civilian
>> or military. Morsemanship is NOT REQUIRED of anyone

>

>Good...thanks for the clarification.

WHAT "clarification," Bill?

You made a most-definitely-LOADED statement. It was akin
to "when did you stop beating your wife" kind of thing.

I've said before that I am NOT for "banning morse code
operation by amateurs." Look all over in Google as you
wish and you will see that.

By the way, when did YOU stop beating your wife? :-)

[see how easy it is? :-)]

>> Others - in here - have already tried that. They

>
>The question was posed to see what role, if any,
>you accept as valid via amateur radio.

It was? :-)

Tsk. I thought you were simply trying a "civil" rejoinder
or something about my alleged "hatred of amateur radio." :-)

Lots in amateur radio are into "role" playing. Several of
those are in here, all busy busy making "claims" of radio
experience (not to mention "hostile action" participation
in the military) that they can't back up. Several in here
put on self-appointed robes of "jurists" busy trying to
"sentence" all who disagree with them. :-)

>> Call it a "loaded test" akin to a "loaded question."
>> A SETUP.
>
>Call it whatever. It makes no difference as I see it.

I didn't see the Friday night episode of the "Tonight Show"
and had to ask a friend over at NBC on Alameda about it.
Quite a different take on it, but supporting my
contention, when information is gathered from the show's
production people. [NBC Western Hq is on Alameda Blvd
in Burbank, CA, about a few miles away from my house]

>> Cellular telephony does not, nor was it ever designed, to

>
>I will wear the badge of "literalist" with pride. Frankly
>there's too much reading between the lines anyway.
>If people can't be straight-up, then I'm not here to
>second guess their true intentions.

Okay, so EVERYONE has to dot their "i" and cross their "t"
properly and BELIEVE what the ARRL tells them is true? :-)

Very little "second guessing" is needed with this bunch.
Their agendas are clear and easy to see as a neon sign.

>>>Yes, I've been around
>>>this newsgroup long enough to know that there is
>>>a handful (or at least was at one time) of hams that

>>>hams.
>>
>> This newsgrope group is NOT "most hams." :-)
>
>I didn't say it was.

Ah, but the handfull of PCTA Extra Double Standard bearers
seem fond of using their royal "we" (of the "amateur
community") is "critiquing" those that don't agree with
them!

Bill, you are NOT on "trial" here and these public messages
are NOT private and directed solely to you. [just a
reminder] :-)

>> It is a handful of PCTA Extra Double Standard bearers
>> on some personal "mission" to "win supremacy" in a
>> newsgroup. They will readily fall-to anyone speaking

>> vultures after ripe carrion. :-)
>

>The newsgroup has "some" folks that might fit your
>description...but they are fewer today than before and
>they are not sole participants in the newsgroup as
>others (you, me, etc) clearly have differing viewpoints.

There are NO "differing viewpoints" with that group,
Bill. They claim the only "truth" and all others are
"liars," "in error," "simply mistaken," etc. :-)

To NOT agree with these PCTA Extra Double Standard self-
imposed "judges" of all is to invite a barrage of their
anger and hatred and scathing insult commentary that is
NOT limited to radio subjects. Quod erat demonstrandum,
QED (not a Q code abbreviation).

>>>As such, I applaud the morse win over Text
>>>messaging because it was a good opportunity to
>>>get some publicity for ham radio.
>>

>you feel it was inevitable that text messaging would lose.

Okay, then you agree it was a SETUP? :-)

>> If that's the only means of "getting publicity" nationally,
>> then it is of rather low taste.
>
>Why is it of low taste? Did the losers get razzed by the morse
>winners?

Not on the show. In HERE. :-)

Several anony-mouses spoke up about the "triumph" of morse
(as a 160-year-old "technology" according to one anony-
mouse). :-)

>When was the last time you saw morse used on any TV
>show...especially as a mode used by hams? I watch a fair
>amount of TV and can't recall it.

The last time I remember was a bad rewrite of "The
French Atlantic Affair" as a movie-for-TV. That novel
of the same name was written by a radio amateur and
reviewed in one of the ham publications. Years ago.
Total rewrite of the plot characters...the ham heros
in the TV version were young teeners (with Extra
calls) instead of the medical doctor on the ship and

the TV writer in Beverly Hills doing the "CW" bit to
circumvent the hijacking of a French ocean liner.
Good suspensful novel, I thought (as did reviewers)
but an awful hokey rewrite for TV (as did reviewers).

> But the issue of publicity is
>simple. The airing of the morse vs text messaging contest
>was a brief opportunity to expose amateur radio to
>the public. I have no doubt that there would not be a sudden
>wave of new interest because of that airing, but perhaps
>it stirred some interest in a few...which is fine by me.

Okay...but, remember, you are not on trial here. :-)

Maybe David Letterman can come up with some better
publicity on his show? Something besides his "ten?"
And don't forget the CABLE channels...

Just think, the new Military channel could have Stebie
in a half hour interview explaining his "A" NCOIC ops on
Okinawa MARS as saving the free world. Or Kellie, in his
finest Banks suit, on the Food channel telling of the
dining (with the Captain) on aircraft carriers (served by
"drudges" of course)...perhaps his "shooting bears" would
still be Classified by Navy Intelligence. Tremendous
possibilities, Bill!

The History channel could do a whole hour documentary on
the successes - and failures - of the ARRL's first trans-
continental messaging system. Discovery channel could go
a whole hour on "Now You're Talking" about how morse code
is the "international language" in this new millennium
despite the pervasive Internet now linking most of the
world with no ionospheric problems.

Endless possibilities, Bill!

>Then argue against the test. Your post appeared to be
>far more focused against morse use in general rather
>than specifically the test requirement.

To use an old military term...TS. :-)

Saying ANYTHING negative to the PCTA Extra Double Standard
bearers is to invite the usual starving-vulture feeding
frenzy of OUTRAGE that anyone would speak against morse!
:-)

In effect, you are "blaming me" for "inciting a riot" (in
here). :-)

I am supposed to sit idly by and take all the **** such as
"I was 'only' a radio mechanic" (as a real E-5 supervisor in
a station FAR bigger than anything any ham organization has),

I "dishonor" deceased members of my military unit by honoring them, my wife got two Masters degrees by going to a "correspondence school" (University of Illinois at Urbana), I was "only a bench tech" in the aerospace industry, that an independent ham publication was "no good," "defunct," after 22 years of independent periodical sales and considered the best technical periodical on amateur radio? Not to mention that wonderful little expression of "PUTZ" written by a non-Yiddish person...or that I "didn't express 'interest' in radio" because I didn't get a ham license first before going into the radio-electronics industry, getting a commercial license first.

[there are many more examples...all are in Google archives]

Yes, Bill, you can lay ALL kinds of "blame" on ME. No problem. That suits the complacency and proper "position in the (closed) society" of amateur radio...all marching to the same music as composed in Newington "for the good of all." Critics of the "service" should all be SILENCED lest they "upset the status quo." All for ORDER in the "service." :-)

This newsgroup is full of EXAMPLES of modern-day licensed radio amateurs. Good "publicity" for amateur radio? Yes, for INSIDE amateur radio where the controllers can hold all miscreants silent while they berate the "infidels" who will not toe the line as they command.

OUTSIDE of amateur radio, where amateur radio must coexist with all other radio services, is another story. Even more so with the general public who are not overly interested in the HOBBY of some, not obligingly respectful of the claims of greatness by those INSIDE the hobby. <shrug>

So, Bill, three minutes of "publicity" on national TV is "good." After how many years of NONE AT ALL?

>As before, I try to stay out of the personal attack
>commentary that I've seen some of these discussions
>reduced to.

Okay, we'll put you down as CONDONING the actions of some of these licensed radio amateurs.

You did say that "some publicity" is better than none, right?

>> According to the U.S. Census Bureau figures for 2004, there
>> are 100 million cell phone subscriptions in the USA. How
>> many morse code operators are there in radio in the USA?
>
>Your point?

"Point?" What "point?" I asked "how many morse code operators are there in radio in the USA." [I didn't restrict that to just

radio amateurs]

One in three Americans has a cell phone subscription. It's a safe bet that there are at least 100 million cell phone handsets operational now. Hams are outnumberd by cell phone users at least 100:1.

Again, according to the U. S. Census Bureau statement (of 2004), in 2003 at least one in five Americans had some kind of Internet access. That's roughly 60 million Americans. The Internet enables all instant communications with every continent except Antarctica. Was "good publicity" responsible for that?

Twenty years ago neither of those cell phone or Internet statistics could have been stated. Suddenly (after 20 years) there they are.

Morse code has been around for 161 years. It was once the only means possible for "instant" communications anywhere. No longer. If morse code was so "good," "so triumphant" why didn't it survive and grow?

He doesn't have to remember such inane details. The appointing official is named in the signature block of his authentic letter of appointment.

Did he ever have any official documentation??? I think not.

I've Quiteenjoyed holding the Silly Gunny to the standards he has set for me. Not surprisingly, he has been unable to live up to his own standards. Yet he begs and begs me to accept less than authentic documentation. I think he is lying about most things he's claimed.

Welp, I find him Quiteineffective at the >>>Bully<<< role, try as he might. Maybe one day he will find serenity in the Hillary Clinton Home for Wayward Maniacs. Until then, we either keep trying to point him in the right direction, or killfile him. What do you suggest?

> have
> > stopped by on your way to the Dayton Hamfest.

So Creepy Steve, why did you drop the number "430" in your latest post
on rrap??? Planning on doing a little pre-Hamfest stalking? Post
Hamfest-stalking?

> > So did she swing a nasty rolling pin or did she wave her revolver?
>
> A revolver...?!?!

Yep, a five-shooter. Tree Fife Seben. Get it??? Tree fife Seben???
Hi, hi!

Go read your MARS MOD (for the very first time) and figure it out.
Hi!!!

> You leave your wife home alone with a REVOLVER...?!?!?!

Not "a" revolver, Silly Gunny. "Her" revolver.

And I don't consider her alone. Why would you?

>
BBBWWWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
> ! ! !

Hi, hi! Jokes on you. The very last laugh is always on you.

> Brain, I doubt she'd do either.

She's not much in the baking department, just biscuits and such. I
usaully get the birthday cakes from the bakery.
So the roller pin routine is just a figment of your over-vivid
imagination.

But I have absolutely no doubt she'd do the latter. I actually fear
coming home late.

> She married YOU,

Indeed. Smart woman. The smartest I've ever known. She could have
done better.

so with the exception of a few like Lloyd, Roger,
> Todd and Lennie, the only way left for her is up.

I know Len. I don't travel in the same circles as the others. Are
they buds of yours?

> Sheeeeeeeeeeeeeeeeeeesh.
>
> Steve, K4YZ

Sheesh indeed. Stay away. You'd be stupid not to, but intelligence
isn't your strong suite. Sigh!

You've been notified. Stay away. Get it??? Say yes, please.

Highly, highly unlikely. Guys like Jim have no problem letting guys like you, me, and Steve take the risks. They set way, way back and make the calls.

Later on you learn that they gave blood at the ARC Bloodmobile on the third Thursday and are very, very good with it all. They "served" in other ways. Cheers with a little glass of OJ. Hi!

1228. Re: Morse code contest on Jay Leno

Newsgroup: rec.radio.amateur.policy

Source record: 108461

LenAnderson@ieee.org wrote:
> For years and years the ARRL has emphasized morsemanship
> over and above all other skills in amateur radio.

How, Len?

Let's look at some examples...

Contests and Operating Activities:

Almost every contest ARRL sponsors is open to modes other than
Morse Code. The two exceptions are Straight Key Night and the
160 Meter Contest.

Public Service:

Most ARES activities are organized around voice modes, not Morse Code.
The NTS structure has had both voice and Morse Code nets for more than
40 years.

Publications:

QST has articles on every new mode that comes down the pike. Articles
on Morse Code are no more numerous than any other mode. There have long
been regular columns on VHF/UHF, digital modes,
and even SSB (in the late 1940s and early 1950s). No column
on Morse Code.

The long list of ARRL publications includes a very few books on Morse
Code. Other modes are at least as well represented. It has been many
years since Morse Code had its own chapter in the Handbook.

W1AW:

Bulletins and other information are sent from W1AW on voice, RTTY and
Morse Code. Morse Code does have its own practice sessions sent from
W1AW.

Awards:

Every operating award but one can be earned using modes other than
Morse Code. The sole exception is the Morse Code Proficiency program,
which starts at 10 wpm.

Policy:

In 1953, when the FCC opened all amateur operating privileges to all US
radio amateurs except Novices and Technicians, ARRL did not
try to require more code testing for full privileges.

In 1963, in its original "incentive licensing" proposal to FCC, ARRL proposed that full privileges be available only to Advanced and Extra licensees, and that the Advanced be reopened to new issues. This meant that full priviliges would require more written testing but not more code testing.

In 1990, ARRL supported the creation of a nocodetest amateur radio license.

In 1998, ARRL proposed reducing the code test requirement for a General class license from 13 wpm to 5 wpm, and the code test requirement for an Extra class license from 20 wpm to 12 wpm.

In 2001, ARRL took a neutral stand on retaining code testing as a part of ITU-R treaty requirements.

In 2004, ARRL proposed to FCC that code testing be retained only for the Extra class license, and only at 5 wpm.

So - how can it truthfully be said that:

"For years and years the ARRL has emphasized morsemanship over and above all other skills in amateur radio." ?

That's not a loaded question.

"Lessee....430...." what???? What??? I made no reference to "430."

Why does Steve stalk my street address??? Creepy!!!

Does he plan on stopping by my address on his way to the Dayton
Hamvention??? On his way home???

Gotta talk to my wife??? Equal time with my son???

Yikes! Extra Creepiness. Jim/N3EY might approve, but no one else
would.

Their very, very last effort at leadership. Fifty two years ago.

HALF A FRIGGIN LIFETIME AGO FOR RADIO EXPERIMENTORS!!! Idiot!

> In 1963, in its original "incentive licensing" proposal to FCC, ARRL
> proposed that full privileges be available only to Advanced and Extra
> licensees, and that the Advanced be reopened to new issues. This

I advocate that full privs be established for 90WPM tested amateurs.
Got any??? Privs for those not able to achieve 90WPM will be
reassigned to the BPL bands. Idiot!

> In 1990, ARRL supported the creation of a nocodetest amateur radio
> license.

Why not 1987??? Idiot!

Where was the ARRL's leadership when the FCC made the "Novice
Enhancement?" Why did the FCC have to go it alone without the ARRL's
"""Leadership???""" Extra-wipe! Idiot!

N2EY is so full of EXTRA excrement that I just can't allow the rest of
his original post to be quoted. You offend thinking people unlike any
"off color" callsign that you would care to strike.

> w3rv

I saw Ed Hare up on stage while I renewed my membership for the very last time. Haynie was approachable.

Though I disagreed with Ed, I actually respected his presence on RRAP right up to the time he called me a bootlegger. He crossed the line and he knows it.

I could have respected Kelly as well. He made the same mistake and he has told lies. For example, he has no military experience though he has said otherwise.

Maybe not the right place but seems there are several web experts here.

Can web spiders read and harvest e-mail addresses from a pdf file ?

Many users and folks like QRZ.com are using jpegs not ascii for listing
e-mails -- this seems to work.

So for pdf files without going to a jpeg --- are ascii text addresses
harvestable ?

Thanks

--
CL -- I doubt, therefore I might be !

It is a shame that hams are riding a sinking ship to the bottom... just so others can't ride... weird really... those old guys really have a axe to grind with someone... but, maybe it is as they claim--their minds are gone to alzheimers and they simply await for the need for morse to return... however, long before then--amateur radio will be dead...

I DON'T WANT TO BE A SAILOR

A little boy sat all alone, consumed by childish dreams
A baseball glove lay by his side, unraveling at its seams.
The final game had just been played, the score was 10 to 2
His little league team had lost again but that was nothing new.
Winning or losing didn't mean that much to this quiet, little lad
What bothered him most and hurt the worst was the absence of his dad.
There were seventeen kids and sixteen dads at almost every game.
And everyone knew why his dad didn't come but still it wasn't the same.

His daddy was a Boatswains Mate, a sailor all the way.
He'd been on cans and sweeps and such and often was away.
But then one day his dad came home without his usual grin
And told his Mom they had to talk, his orders had come in.

He heard his father speak of things he didn't understand
Like duty and honor and country and what's expected of a man.
His Mom sat awful quietly, her face was etched with fear.
He knew that she had heard some words she didn't want to hear.

And then his daddy picked him up just like any other day
And said "You know I love you, son, but I've got to go away."
"You know that I'm a sailor and you know what sailors do -
We run the ships and fight the wars for loved ones just like you."

To the boy it seemed like that had been a long, long, time ago.
And a boy really needs a dad around to help him as he grows.
To hold the bike when he learns to ride and to fix his baseball glove
But most of all he needs a dad to fill his life with love.

His mama read him letters that his daddy used to write
With strange new words he'd never heard that filled his heart with fright.
His daddy spoke of all the men who helped him fight the war
And how his Chief the day before had won the Silver Star.

His letters spoke of courage and a gallant brotherhood
Forged of soldiers and of sailors fighting for the common good.
And he praised the brave, young warriors - Army Green and Navy Blue
And he said "they keep the peace and fight the wars for loved ones just
like you."

Everyday the young boy waited for the mailman to come by
For he loved his daddy's letters but they made his mama cry.
Just how long, the young boy wondered, would his mama have to wait

For his daddy to come walking down the drive and through the gate.

As the young boy ate his sandwich and his mama swept the floor
There appeared two Navy chaplains knocking softly on the door.
We regret to inform you" was the way the speech began
Then the mother grabbed her little boy and out the door she ran.

Nestled softly in her bosom, the young boy began to cry
At his mama's mournful question "Oh Lord, Why? Oh Why? Oh Why?
Even at this tender age, he knew his dad was gone
And that he and his mama would always be alone.

A little boy sat all alone, consumed by childish dreams
A baseball glove lay at his side, unraveling at its seams.
He wiped away the tears of youth just as the hearse passed by
"Dad, I don't want to be a sailor. It makes my mama cry."

As The Old Man Turned

by Joe Roche

The old man said, "Stop the car, I'll walk the rest of the way." The younger man silently obeyed.

The old man got out of the car, leaning heavily on his cane, began the long walk down the deserted pier. Halfway down the pier he stopped. The younger man watched as the older man seemed to straighten up and uncurl his body that had been racked the last few years with rheumatism. The younger man got out of the car and slowly walked down the pier, until he stood about ten feet behind and to the side of the old man. He was worried about him. The old man hadn't been the same since his wife of fifty-six years died two years ago. He thought his request to visit this place was strange, but he took him here anyway, without question. He loved the old man and would certainly do anything he asked. He looked out to sea, wondering what the old man was looking for.

The years dropped from the older mans eyes as he watched the tall, strong young boy walking down the pier, in his summer whites, with his seabag jauntily thrown over his left shoulder with an arrogance that only is afforded the young. The young sailor was looking for his boat. When he found it, he crossed the brow, saluted the ensign and the topside watch and reported aboard his very first duty station. It was 1944.

The young man was told to go below and ask for the COB, who would assign him his bunk. After the COB introduced himself he pointed to a bunk and told him, "That would be his world for the next patrol." He then introduced him to his new boss, who threw a white apron at him and told him change out of his whites, since he wouldn't be going anywhere for the next few weeks.
The next few weeks turned into two months of mess cooking, trying to qualify and his first war patrol. During which, his duty station was to sit in the mess hall and use a stop watch. If they were attacked by the Japs, he was to time and count the depth charges.

One patrol led to another and then another and by the end of the third patrol he finally received his coveted Dolphins. It was about three weeks after his fourth patrol that he woke up one morning with terrible pains in his abdomen. He could barely get around. He took some good-natured kidding about trying to get out of work, but by nightfall it was clear something was very wrong and he was rushed over to sick bay. After a preliminary examination it was determined that he had acute appendicitis and would have to be operated on.

It was while he recuperated that his boat went back to sea. He was angry that she went to sea without him and he missed being with his friends and crewmates,

but he understood. After all, there was a war going on.

After his recuperation was over, he was given a new set of orders to another boat and immediately went to sea. It was while he was at sea, he found out his first boat was long overdue and was assumed lost.

The old man's eyes clouded up and his memories of so long ago faded once more to a place that he hadn't visited in such a long time.

As the old man turned, the younger man saw a single tear run down his cheek and was overwhelmed with sadness for his grandfather. He wanted to do something to make it allright for him, but in his heart he knew he couldn't. That what ever the old man was going through, he and only he, would have to deal with whatever was bothering him.

On the long trip home, the younger man said, "Poppa, what was it that made you so sad back there on the pier?"

The old man never spoke to anyone, including his wife, about what had happened during the war. But he told his grandson. He told him because he finally realized that his story needs to be remembered by people, so these things wouldn't repeat themselves. He told his story. His grandson listened without interruption. He thought of his Poppa, a kid going away to war.

"Hell, at that age, I was getting ready for four years of fun at college," thought the younger man.

Two days after they returned home, the old man died peacefully in his sleep.

At the funeral, a card with the following poem was left in the old man's coffin. It read;

There is a port of no return, where ships
May ride at anchor for a little space.
And then, some starless night, the cable slips,
Leaving an eddy at the mooring place . . .
Gulls, veer no longer. Sailor, rest your oar.
No tangled wreckage will be washed ashore.

The young man did not see who placed it there.

You may "think" anything you care to.

The facts are that the facts have been given to you and you're too
cowardly to verify them for yourself.

And I am far and away from any "standard" set by you, Brain.

You asked for information, and I gave it to you.

THEN you wanted "documentation".

YOU, on the other hand, have NEVER answered a single one of the
questions put to you by myself, Dave K8MN, Jim N2EY, etc. Not a single
answer HERE, let alone any "documentation".

Brian P Burke remains a documented habitual liar.

No...you keep "volunteering" to collect a paycheck.

You quite obviously have a problem with the society that the
Constitution you alleged to support and defend provides.

> > > Tell Jim to let
> > > us know how it's going when he gets there.

Yep. However there's no "enemies" of the Constitution here...

> > Obviously you have a problem, however, with people who live
> their

No explanation is necessary. Your on-going support of Lennie's
cowardly "Jimmie Noserve"'s rants is evidence enough.

> Hey, while you're at it, why don't you produce authentic
> documentation of your alleged "A" NCOIC MARS/Okinawa.

Right after we get some of the information we've been asking YOU
for for YEARS...

> > So...was your Oath as a member of the Armed Forces just some
> words
> > you recited in order to get a federal job? Sure looks that way.

ways?

Why would you expect Jim to answer such an insulting question when
YOU have overtly refused to answer questions he's put to you for YEARS,
Brain?

(Rhetorical question...we know the answer...you're a coward...)

Only one big one...being three paygrades junior to the guy who was
>>THE<< NCOIC.

> > Stebie no got them. Tsk.
>
> Hmmmm? No docs = lies. His rules, his logic, his embarassment.

I'm not the embarrassed one here, Brain.

In case you weren't paying attention, only Todd falls for your
misdirects, and that's because he's a developmentally delayed adult.

So far, nothing Jim has stated has been incorrect. He's corrected you AND Lennie on numerous military issues, communications and otherwise, and has yet to be shown to be wrong.

> Highly, highly unlikely. Guys like Jim have no problem letting guys
> like you, me, and Steve take the risks. They set way, way back and
> make the calls.

Don't try to lump yourself in with me, Brain. Most of my time in the USMC was crewing the MC version of the Pave Low (CH53A and D), a lot of which got me put in places I was not real happy to be in.

You and Lennie got to play rear area office clerk for most of your tours. I give you some added credit for your Somalia tour, your misrepresentation of your Amateur Radio exploits notwithstanding, but not by much.

> Later on you learn that they gave blood at the ARC Bloodmobile on the
> third Thursday and are very, very good with it all. They "served" in
> other ways. Cheers with a little glass of OJ.

I lucked out. The only "injury" I suffered in the field was some sand that got in under my visor and flight glasses and irritated the be-jeebers out of me. Some of my colleagues weren't so lucky. That bloodmobile donation you just made fun of was their ticket home alive instead of in a bag.

Yes, Brain, I'd have to agree...You're a moron.

Allow me to reattach the part you snipped:

REQUOTE:

Uh....Brain....???

His comment addressed "144 mhz".

That is very clearly within the scope of his license.

And although he didn't mention it, six meters is within the scope
of his license too. As are the "higher local" frequencies.

He didn't address any comments to the 20 meter frequency.

UNQUOTE:

I'm trying reeeeeeeeeeal hard to figure what you thought was
moronic about pointing out YOUR error...Unless you were just accepting
responsibility for MAKING a moronic post....

Wake up, Brain...

You're just too stupid to realize that you're only slightly less transparent than wax paper.

It really is THAT simple.

Hi! Silly Gunny has his blinders on.

Jim constantly makes statements on things which he has no experience in. Jim constantly tells others to be silent on things which they have little or no experience in. That is a clear double-standard. That you won't see it is telling.

He's corrected
> you AND Lennie on numerous military issues, communications and
> otherwise, and has yet to be shown to be wrong.

I recall you being corrected on military and MARS communications issues. Often.

They are your claims. You must verify them with authentic, legitimate
documentation.

Start with your letter of appointment to your alleged "A" NCOIC
MARS/Okinawa.

> And I am far and away from any "standard" set by you, Brain.

Without doubt. Furthermore, you are far away from the standard that
you have set for others. Far, far away.

> You asked for information, and I gave it to you.
>
> THEN you wanted "documentation".

No. You made claims of holding a MARS leadership position, and you
have demonstrated an intense ignorance of MARS. It doesn't add up.
New layers of claims are not valid verification.

I ask for authentic documentation of your claims. Got any?

> YOU, on the other hand, have NEVER answered a single one of the
> questions put to you by myself, Dave K8MN, Jim N2EY, etc. Not a
single
> answer HERE, let alone any "documentation".

A lie. Yet another Robeson lie.

Nope, you guys needed papers, Steve. Papers. Papers from my Commander
and/or the United Nations, and papers from the ARRL for DXCC.

And so you have labeled me a liar and coward, and have made inuendo that I am a gay man and a pedophile.

So where is your documentation? Without documentation, wouldn't that make you a liar and coward, a gay man and pedophile???

Steve, can you stand up to the standards that you have set for others?

I guess not. Other than being a documented liar, I won't hold you to the other names that you've applied to me. This is the conclusion of another Robeson tragedy. Case closed.

Some of my colleagues weren't so lucky. That
> bloodmobile donation you just made fun of was their ticket home alive
> instead of in a bag.
>
> Steve, K4YZ

People everywhere are lucky because others give blood and organ tissue.

But Jim says he "served in other ways." What ways?

.

Give it a rest, old timer. What Steve (or any other person) did or did not
do in service to this country is none of your business.
Nobody owes you an answer to anything.

It is probably just as well that Steve didn't bump into you at Dayton. You
would have had to walk all the way back to your car to change your Relys.

Brian, it doesn't matter in HERE.

Stebie will "come back" with "you are LYING" and make some kind of
dire implication "to reveal all to your wife" or some other
nonsense and just ignore production of actual proof. Stebie will
name-call, insult, denigrate anyone demanding that HE produce any
proof and that will be that. It's a standard Bluff.

>
>He's talking about the guys driving 1982 Subaru station wagons with
>"save da mediteranean fruit fly" and rainbow bumper stickers.

I think that Stebie's fanciful imagination was working overtime when
he got to the "presidential service" bit! :-)

Since FDR's time, Truman, Eisenhower, Kennedy, Johnson, Carter,
Reagan, Nixon, Ford, and G.H.W. Bush *ALL* served in the U.S.
military
but long before Stebie's alleged USMC "career." That's NINE U.S.
Presidents. I don't think any one of them had an amateur radio
license!

Clinton did NOT serve IN the U.S. military and Dubya never got
beyond the Air Guard. I don't think either one of them had an
amateur radio license. But Stebie gots an Extra AMATEUR license
so he is "comparable" in "service" to at least NINE U.S.
Presidents!!!

Geezus H. Cottonpicker, Stebie done stretched things out so FAR
that his comparison rubber BROKE. Stebie has SNAPPED.

This Memorial Day I'll do what I think on HONORING the veterans
of the United States military. You have and I have. I will
mention Cpl Elmer Hardy and Capt Jim Tomlinson, both gone
suddenly on the 1st of July, 1950, both members of *MY* Signal
Battalion (the one I served in). I will HONOR them and the
other 18 members of MY Battalion who lost their lives in the
same crash in Korea...sent there from the "rear-area" of Japan
by Gen MacArthur to improve communications after the North
Koreans invaded South Korea.

Stebie is going to say I "dishonor" them by mentioning them.
He has stated that before and that is just as damnably FALSE
as anything he has ever babbled. Normally I would have told
Stebie ("Mr. Seven Hostile Actions") to Go To Hell. He is
already there. Scroom.

>> >Indeed. Jim could have volunteered to serve in the Unites States

>> any veterans' "mistakes." He's read several books on the
subject...
>
>Jimmy is Mr. Fiction. "No Experience = Shut-Up" according to da
double
>standard.

Jimmie Noserve never worked any REAL radio communications beyond amateur hobby stuff. He never took any Oath on being inducted and never even got to "dine with the Captain" (on an aircraft carrier) and being "served by drudges." He never ever had any worries that anyone on the "other side" would harm his precious being. He could sit back and laff and laff at the "errors" of getting wrong USSR aircraft nomenclature and poke fun at no-coders doing REAL COMMUNICATIONS just a few flying hours away from hostiles.

>> >I'm good with volunteerism in the U.S. armed services. Tell Jim to
let
>> >us know how it's going when he gets there.
>>
>> Now THAT will be INTERESTING! :-)
>
>Highly, highly unlikely. Guys like Jim have no problem letting guys
>like you, me, and Steve take the risks. They set way, way back and
>make the calls.

They are the "elite" and shouldn't risk their precious bodies in any way. We are the "drudges" that Kellie talks about, the lower class, not near as ELITE as the No-Serves.

>Later on you learn that they gave blood at the ARC Bloodmobile on the
>third Thursday and are very, very good with it all. They "served" in
>other ways. Cheers with a little glass of OJ. Hi!

I'll follow "Kizzie's salute" and spit in THEIR O.J. Foggem!

A respectful salute to you, Brian, as one veteran to another.

>
>HALF A FRIGGIN LIFETIME AGO FOR RADIO EXPERIMENTORS!!! Idiot!

Jimmie was THERE...in his heart. :-)

Gosh and gee-whilikers...in 1953 I was doing HF communications
while in the U.S. Army and didn't have to know a thing about
morse code. Reason is probably that NONE of the three dozen
high power transmitters at one station (only the 3rd largest in
the Army network) used any morse code. NONE of the personnel
at that station were required to know morse code to operate
all those transmitters (minimum 1 KW RF out, maximum 15 KW
but later increased to 40 KW). HF bands, 24/7 operations,
nearly a quarter million messages handled each month.

>> In 1963, in its original "incentive licensing" proposal to FCC, ARRL
>> proposed that full privileges be available only to Advanced and
Extra
>> licensees, and that the Advanced be reopened to new issues. This
meant
>> that full priviliges would require more written testing but not more
>> code testing.
>
>I advocate that full privs be established for 90WPM tested amateurs.
>Got any??? Privs for those not able to achieve 90WPM will be

>reassigned to the BPL bands. Idiot!

As Jimmie Noserve likes to put it, "that's simply 'untrue'." :-)

Brian, you have to understand that Jimmie is the Compleat
(amateur) Manchurian Candidate. Fully brainwashed into thinking
that the ARRL is the holy grail of "truth" and all good works.

>> In 1990, ARRL supported the creation of a nocodetest amateur radio
>> license.
>
>Why not 1987??? Idiot!
>
>Where was the ARRL's leadership when the FCC made the "Novice
>Enhancement?" Why did the FCC have to go it alone without the ARRL's
>"""Leadership???""" Extra-wipe! Idiot!

Jimmie is WRONG BY OMISSION. According to all the documents
PRIOR to the final decision on FCC 90-53, the ARRL was
AGAINST that. The ARRL only supported the final R&O on the
creation of the no-code-test Technician class AFTER THE FACT.

Jimmie just can't bring himself to admit that many OTHER
parties were trying to cancel the code test PRIOR to 1990.
Some time spent in the FCC Reading Room of the correspondence
PRIOR to 1990 will show enough support for No-Code-Test that
the FCC was lobbied into the 90-53 issuance.

Once the NO-CODE-TEST Technician class was established, the
ARRL had no other choice to "support" it...it would have been
politically destructive to the League to oppose it AFTER THE
FACT.

Jimmie wants to OMIT certain details to show that the ARRL is
in the "leadership." It isn't. The ARRL still hasn't gotten
a membership larger than a quarter of all licensed U.S.
radio amateurs.

The FASTEST GROWING CLASS in U.S. amateur radio - since 1991 -
is that very same NO-CODE-TEST Technician class. NO OTHER
class has grown so large, so quickly, in the history of
amateur radio as regulated by the FCC since 1934.

Jimmie is going to trot out his outworn cliches' and other
statements (nearly all sinning by omission of details) and
state "that is simply wrong." :-) He can't think for
himself anymore in amateur radio matters, apparently. He
is one of the number-one bunting putter-upper and flag
waver for the League. The ARRL can do NO wrong in his eyes.

>N2EY is so full of EXTRA excrement that I just can't allow the rest of
>his original post to be quoted. You offend thinking people unlike any
>"off color" callsign that you would care to strike.

In my view, Jimmie is so brainwashed that he can't help himself. He, like Stebie da Avenging Angle of Dearth, is into such a fantasy that Jimmie really thinks what he writes is "truth" and anything contrary is "untrue." Jimmie just can't conceive of his words being in error, therefore he speaks "truth."

As to the "off-color callsign" (Kim's vanity call), that's just his personal morality thing. It's almost like he took Vows and was ordained a Priest in the Holy Orders of the Church of St. Hiram...of the Latter-Day Radio Saints? Or was it Former-Day Radio Saints? Must be that for his wanting to cite all those "leadership" actions happening during and before he was born. Another amateur "role-model" to emulate on seeking the "highest goals" in amateur radio...complete Nirvana in morsemanship. Ho hum.

>You've been outed.

Kellie was NEVER "IN." :-)

Kellie has NEVER worked any military communications, doesn't
know feces from footwear polish on what the BIG people do.

Kellie ought to go to the following links for some "education:"

http://kauko.hallikainen.org/history/equipment

>> In my J.A. Banks suits you bet!
>
>Hi!

The brand is more likely "Jar Jar Binks." :-)

Next month it will probably escalate to "Saville Row" and
the rack next to Sean Connery's... :-)

>> What's any of it have to do with ham radio??
>
>Absolutely nothing!
>
>So why did you make such lying claims on a ham radio newsgroup???
>
>You've been outed!

Kellie has made some outrageous claims in here NOT about amateur radio. His "I got 26 patents!" claim is a classic...which turns into ONE...that got "multiplied" from alleged "foreign filings."

There's Kellie's claims of the "P-51 pilot using a knee-key and morse to communicate while pioneering airways over the pole." Which is another great exaggeration stolen from old aviation tales.

Kellie's famous "28 Volt Jeeps" of WW2 is another...one used by somebody to "power up" some ARC-5 surplus radios. He could fool some newbies on that except for the fact that WW2 vehicles had mostly 6 Volt ignition systems. Post-WW2 jeeps were converted to 28 Volt systems along with most other land vehicles. [conversion was still going on until the mid-1950s]

Somehow he thinks that all will be impressed by his claim to having dinner (or was it supper?) "with the Captain" and being "served by 'drudges'" makes him "special" with hams. Now we are getting the "J. A. Banks suit" thing. [never heard of the brand, must be an eastie coast kind of thing]

>> > And I didn't say any on you'se guys at Dayton today.

>last time. Haynie was approachable.
>
>Though I disagreed with Ed, I actually respected his presence on RRAP
>right up to the time he called me a bootlegger. He crossed the line
>and he knows it.

I've exchanged e-mail with Jim Haynie after his short time in this newsgroup. That was civil...on both sides. I wasn't going to change his mind and he couldn't change mine.

Ed Hare was very kind in sending me a year's worth of back issues of QEX some time ago. Gracious act and those issues were, as expected, very interesting. We also exchanged e-mail, him expecting me to acquiesce and "accept" the Newington views. We were also civil in that back and forth

although he tended towards a bit of aggression when I did
not accept the Newington party line.

>I could have respected Kelly as well. He made the same mistake and he
>has told lies. For example, he has no military experience though he
>has said otherwise.

All of the "veterans" in here who have NOT worked any military
radio communications all say "that isn't AMATEUR." TS. Radio
is radio, regardless of who turns it on. In the 1950s - and on
into the 1970s - HF was still used by the military for majority
message traffic worldwide. Those military radios used the very
same physics as any civilian radios. The ionosphere didn't pop-
to and salute if a military radio came on HF. Millions of
messages flowed through the Defense Communications System or
DCS worldwide by the end of the Vietnam War (for US in 1975)
but Kellie was never a part of that. He likes to HINT that he
was, but anyone who has actually DONE it can recognize he is
only a standard bullshitter whose "experience" in BIG comms
is restricted to amateur radio hobby playing-around...and his
imagination.

Stebie is one of those computer-modem types who escapes into his
own world of imagination when on-line...the one where he can say
anything he wants to anyone and never worry about harm to him.

Stebie seems to worry a lot about how "wives" feel. That indicates
some problems HE has rather than us. [Stebie will deny and deny
that, yet we two don't mention our wives but Stebie brings that up
often]

>> >> Truth.
>> >>

I think they all work for the motto "For the Corps, God, and
Country!"

All "volunteer" work. :-)

Actually, Stebie is guilty as hell of the "projection" syndrome.
He must be worried that HIS wife will find out about his
extravagant claims. [his SECOND wife, that is...]

My wife and I have our computers (near identical) on separate computer desks (identical, I made them out of butcher-block tops on legs plus pull-out keyboard drawers) in our converted 3rd bedroom (now an "office"). Those are at right angles in one corner...we can easily look over and see what the other is doing. Right now I'm off-line answering this and she is on-line looking up something. We don't have any secrets from one another. She sees what I'm working on and I see what she's working on. Respect for one another is a large plus in any marriage.

Stebie wanted to drive in a "wedge" to my marriage early-on with lots and lots of insinuations and implications, all a lot of falsies. He didn't get anywhere...but that's all he had for his "replies." That's Stebie's idea of "amateur radio policy discussion" - trying to distort and insult other peoples' families and relationships.

Elect him to the ARRL Board of Directors? :-)

Find an autographed first-edition of "Mein Kampf" to add to his collection of amateur radio book?

Or we can just watch him disintigrate slowly, sinking deeper into his psychosis of self-perceived greatness and gargantuan claims.

Or maybe just call 1-800-DENTIST to find him a good one to fix his teeth so he can smile on a new photograph?

Stebie is one of those computer-modem types who escapes into his
own world of imagination when on-line...the one where he can say
anything he wants to anyone and never worry about harm to him.

Stebie seems to worry a lot about how "wives" feel. That indicates
some problems HE has rather than us. [Stebie will deny and deny
that, yet we two don't mention our wives but Stebie brings that up
often]

>> >> Truth.
>> >>

Stebie is still unaware that the U.S. government doesn't give
out information on citizens as freely as he thinks. The VA
won't give out any info on him by a simple phone call. Not
since 1976. :-)

I think you need to go back and look at the early exams. There was a time when an applicant was required to actually draw a schematic of various circuits and explaine how they worked. And even after the exams became multiple choice type, one had to know the material to get the correct answer as the answers to the acutal questions were not available. There were study guides with sample questions, but no questions pools with the exact answer available for memorization. If you did not know the theory, then you probably weren't going to pass.
Again john smith knows not of what he speaks.

Nice try, John

In the original post I stated "just for grins".

As far as Alzheimer's disease, I know the change I am due before the kid punches the cash tendered into the register. I had to chuckle one day when the gal punched in as though I had made exact change and had to figure out what my change was. She had to call a manager!

I am familiar with how great the Internet is and surf a bit plus am active in several Yahoo groups. Do you remember 911? I lost my AT&T service for a week as they had some central switching station in there. I had to use my Juno account as a backup. The radios, however, work - even without mains. Come to think of it, some of the repeaters work without mains. There are two of them around here that aren't even connected to the mains!

I have no axe to grind. Oh, it bothers me when a couple of high power stations are talking across town on 20 meters, however there is no sanity test for an amateur license. Come to think of it, the same applies to high power CBs. It causes interference thousands of miles away.

What I cannot understand is why so many folks get their panties in a knot over CW. If you enjoy it, use it; if not, don't. No big deal there.

As far as the folks who love to condemn those who enjoy Morse, I suspect that many of them are also lacking in theory and really want a no test ticket. Perhaps we could also do away with a test for a driver's license as well ....

Granted, folks will point out there is a big difference. There is, but the underlying problem is trying to make the airwaves available for *everyone*. This includes cell-phones (think duplex walk-talkie connected to a repeater which is connected to the telephone company), radio, television, aircraft guidance systems, satellite tv, satellite radio, gps, and so much more. Originally, there were no driver's licenses, but as more automobiles came about, there was a need for regulation. Should we get rid of traffic lights? How about the flashing red lights on school busses? Think there might be a need for regulation? The same applies to radio. Originally, there were no regulations for radio. If you have 100 stations in the world, total, there is really no need for regulation. As technology progressed, there were more demands made for radio spectrum (I say radio, but mean everything using the electro-magnetic spectrum from perhaps 3 kHz to 300 gHz). Regulations came into being and have been revisited and changed many times since.

At least we can discuss this problem with regulating the airwaves; I have another problem that I am going to have to "discuss" a different way.

Our new chief of police is claiming he is going to start cracking down on the loud stereos. One guy wrote an editorial stating "you just don't like my music". Well, I finally got one guy fined and he is staying quiet. It is disconcerting, to say the least, when someone has their boom box turned up 10 dB above distort at midnight and I have to get up in the morning. Some of us actually have jobs. I have some "tunes" that I will share should this start again. I'm not going to bother burning a cd as I've got the mp3 cuts on the computer. Just plug an audio line from the headphone jack on the computer speakers to the 700 stereo system I have for satellite tv. I hope they enjoy my tunes:

1) Washington Post March
2) Anchors aweigh
3) The Thunderer
4) The Stars and Stripes Forever (my favorite)

I've got others on CDs. From all of the services. Funny, but I have a feeling that they will be clamoring for "regulation" all of a sudden :))

With all due regards from Rochester, NY

Hello, Hans

Very true. One interesting thing of note - text messaging I'd consider similar to cw in one thing - it may be fun, but not highly useful. If one needs to send a lot of text, a computer and the Internet just might be considerably faster (assuming one can touch type at a reasonable rate). Via radio, there are digital modes, of course, and text can be reliably sent much faster with many of the digital modes (even the very dated RTTY).

I have to chuckle at the length of this thread; I thought it an interesting link and figured there would be a couple of cw detractors that would answer, but the thread turned out a bit longer than I figured. I keep forgetting how heated the cw vs no cw arguement can get.

I'd have responded earlier, but yesterday was my birthday and .... well, I probably consumed enough beer to build a 160 meter half wave beer can vertical :)

Fortunately, the better half didn't get upset ;)

1278. Why no Yaesu Prizes at Hamvention?

Newsgroup: rec.radio.amateur.policy
Date: 2005-05-22 23:30:58 UTC
From: "Leland C. Scott" <no-spam@junk-mail.net>
Message-ID: <GvGdnVkZy6GpiwzfRVn-uQ@comcast.com>
Source record: 108509

When I turned in my ticket at the Hamvention I normally check out what the prizes are. This year I couldn't see even one item from Yaesu. Kenwood and Icom etc. had items on display, but not Yaesu. I wonder if the Hamvention did something to tick them off.

Also I would say that both the flea market and the inside vendor numbers were down by at least 20%. There were MANY empty spaces in the flea market area when in past years it was mostly full. I also heard that Mendelson wanted more space and a break on the flea market rental since they are going out of business. The Hamvention, based I what I heard around, said no dice, so they didn't even bother to show up and they're only a few miles from the arena too. They spaced out many of the inside vendor booth areas so it wasn't too obvious that the number of vendors was way down.

What did anybody else notice? I hope the above isn't a long term trend.

Ah yes, a vertical 'beverage' antenna! Our FD group had one for 20M,
but we had to quit using it when our FD QTH changed to the football
field of a local High School.

Anyhow, Happy Birthday!

Well I sort of thought those blinder improved Stebie's
looks...kind of softened the fierce scowl he always shows
in pictures. [I do wish he would have a dentist work over
his teeth so he could smile in those photos...]

>Jim constantly makes statements on things which he has no experience
>in. Jim constantly tells others to be silent on things which they
have
>little or no experience in. That is a clear double-standard. That
you
>won't see it is telling.

Tsk. Jimmie has played with some surplus military radios
and suddenly becomes "expert" enough to "correct" others who
have worked with them...like AN/PRC-104s and AN/PRC-119s.

Jimmie made a bunch of "guru observations" of the aerospace
business a year or so ago, yet he's not told of which
companies those were...or the government branch where he was
employed as a "space expert."

Jimmie claims to be a "radio manufacturer" (!) yet there is
no record of such a business in the business journals. He
DID show pictures of a klugy vacuum tube transmitter that was
supposed to be "state of the art"...and built in the 1990s.

>> He's corrected
>> you AND Lennie on numerous military issues, communications and

>
>The Reluctant Marine! Figures. Even reluctant people serve. So how
>did Jim serve in other way?

Tsk. Stebie was GROUND crew.

Tsk, tsk, Stebie "wasn't real happy to be..." Poor baby.

Wow, "Pave Low!" Stebie sounds like he was reading old
Aviation Week & Space Technology magazines that are in
the CAP orderly room? :-) HELICOPTER. Wings rotate.

>
>You don't "give" me anything. My service is not up for your approval.

Nor mine. I went where I was assigned. Anyone can see where at:

http://kauko.hallikainen.org/history/equipment

Jimmie Noserve never understood that a while ago. He thought
anyone could go on up to the "front lines" and "fight" whenever
they wanted to. [he must see a lot of movies...]

>> > Later on you learn that they gave blood at the ARC Bloodmobile on
the

>
>So how did you malinger your way into a medical discharge requiring
>rehabilitative therapy?

Tsk, tsk, tsk. Stebie SLIPPED UP in his story generation!

This casts a great lot of DOUBT on his "medical discharge"
claims!

Of course, "medical discharge" can also be for PSYCHIATRIC
reasons.

>> Some of my colleagues weren't so lucky. That
>> bloodmobile donation you just made fun of was their ticket home
alive
>> instead of in a bag.

"Colleagues?!?" GROUND crew wre exposed to "hostile fire?"

>People everywhere are lucky because others give blood and organ
tissue.

True enough.

>But Jim says he "served in other ways." What ways?

I'm wondering the same thing...but will never get Jimmie to tell
what it is. <shrug>

You ask me "what is wrong with cw?" I ask you, "Why is amateur radio dying?"--I think the answer to both is a single one--there was a time when dropping code would have saved ham radio--I fear that time has come and gone... cw has no real use to anyone, anymore... it is like having to learn to type to use the internet... no such requirement... however, because typing DOES have a use--you will find many learning to type after they realize the need...

... the "anateur exams" are certainly no hinderence, they always have been as simple as pie--a college grad trained in the art of "test taking" could study for a day and pass the most challenging... they have been made even simplier still... yet amateur radio declined and continues to do so--

... now "critical mass" has been reached, so many other forms of communication exist that amateur radio is on its' death march... radios are so far and few between... and so little demand... they are too expensive with most to bother with... you could give ham licences away in the streets and not improve that...

... no, the OMs' alzheimers and lack of ability to see the future has killed ham radio--you'd think the old guys must have hated it--to have stood by and watched it die--if what you say is correct--and they DID have all their mental facilities about them and still allowed it...

Warmest regards,
John

He probably sent them all to the ARRL Truss Fund. :-)

I wonder if Stebie has bothered to study recent USA history?
He left out FOUR Presidents who served in the military since
FDR...and I'm not counting Dubya.

>> You quite obviously have a problem with the society that the
>> Constitution you alleged to support and defend provides.
>

>How so?

Somebody ought to break the news to Stebie, might as well be
me...

STEBIE, NOW HEAR THIS...

NO CITIZEN OF THE UNITED STATES ACKNOWLEDGES YOU AS EMPEROR,
LEADER, PLENTY-POTENT-ATE, OR EVEN "ANCOIC" OF ANYONE ELSE.

<CLIK>

Poor fella thinks the Constitution of the USA has some kind of
paragraph saying "everyone has to abide by this wanna-be Dill
Sergeant (with the pursed, pickled lips and sour disposition).

>> > > > Tell Jim to let
>> > > > us know how it's going when he gets there.

Tsk. Stebie >>IS<< the Constitution! :-)

Saying anything against Stebie is Sedition, Treason Against
The State!!!

>> > Hey, while you're at it, why don't you produce authentic
>> > documentation of your alleged "A" NCOIC MARS/Okinawa.
>>
>> Right after we get some of the information we've been asking
YOU
>> for for YEARS...
>
>So then, you really are a liar. You're the very thing you claim of
>everyone else.

Ah, not quite from Stebie's point of view. In his distorted view
Stebie is "always truthful" but everyone who doesn't like him is
a "LIAR," "deceitful," "hates ham radio," and/or has underarm odor.

>> > > So...was your Oath as a member of the Armed Forces just
some words
>> > > you recited in order to get a federal job? Sure looks that way.
>> >
>> > I'm offended that Jim claimed "service in other ways." What other
ways?
>>
>> Why would you expect Jim to answer such an insulting question
when
>> YOU have overtly refused to answer questions he's put to you for
YEARS,
>> Brain?
>
>Why wouldn't he? He has no problem insulting others.

Tsk, now Jimmie Noserve is going to be furious! Jimmie "NEVER"
"insults" anyone...all he does is "point out mistakes" that
"others do." :-)

>> (Rhetorical question...we know the answer...you're a coward...)
>
>Hi, hi! That's rich coming from the guy who couldn't make Dayton to
>see me. Seven hostile actions? Hi!

Tsk. Readers are still unaware of Stebie's mighty warrior acts
WHEN and WHERE of those "seven hostile actions!"

Maybe they were "special ops" and veddy, veddy "secret" that
Stebie can't reveal? :-)

[gosh, maybe we can hear one of his "HALO Drop" stories?]

>So is Jim checking out the governments needs over in the desert? He
>would be drawing a nice, tax-free paycheck.

Jimmie is "serving in other ways" by defending the Constitution
of the ARRL...against all enemies, especially the domestic
no-coders. Plus he is probably training for another marathon,
another "service for his country." Hi, hi!

That and keeping his Time Machine running so he can jump back to times when Kode was King in raddio. "Important national service," you bet! :-)

<insert eight lines of all-caps hyena laghter here>

Don't know if it was down or not but enjoyed it immensely. I and the OM
were helping out a new ham select and buy equipment and of course picked up
a few goodies for ourselves too.

Whoa, there, "SEA STALLION."

The CH-53A to CH-53D are called "Sea Stallion," NOT "Pave Low."
CH-53E is called "Super Sea Stallion."

The "Pave Low" is the MH-53E through O suffix, operated mostly
by the USAF. More specifially "Pave Low II" to "Pave Low VI."

The "CH" in the type designation stands for Cargo, Helicopter.

The CH-53A through CH-53D are CARGO HAULERS.

Some of the MH-53s are into special ops. But, the Sea Stallion
is basically a CARGO HAULER, first operational in 1966.

Took only a few minutes on the Internet to check that out.

Now, heroic "seven hostile actions" veteran, what exactly ARE
you trying to foist over on everyone with a CARGO HAULER, and
whatinhell does that have to do with AMATEUR RADIO?!?!?

As usual, the "seven hotile actions" hero is running another
reputation SCAM on everyone. Significant OMISSIONS of information
along with an outright LIE on aircraft names versus type number.

If you are going to LIE, BLUFF, SCAM, try to get your military
nomenclature CORRECT. You did NOT do so! Stand down.

That is all. Dismissed.

Nobody answered because they are afraid that you would post stuff about them on your gay blog.
Well answer this gayboy, where does it say no code on my license? Does a class of license make you better then others?
Are all Irish in your family gay and into kiddy porn or is it just you toad? Are you just saying you are Irish so you can wear a skirt and call it a kilt gayboy?

KC8GXW,

No but I looked at the FCC site...and I believe you to be a No-coder,
or in my humble opinion a No-code former CB operator. Well no one in my
family is gay, however, I feel that perhaps by you calling people gay
when they are not gay, you yourself are unable to grasp the
understanding that perhaps your gay, and your venting your sexual
furstrations out by calling people gay because you can't admit to
yourself what you are, gay. as for kilts they mostly worn by the
scottish not irsh. Perhaps you shouldn't vent your angry and sexual
frustrations out on people and do something creative with it, like
learning code.

I don't think so. Actually, now that I think about it, Google uses technology to generate hits on pdf's so it must be possible. Used to be it couldn't be done but OCR programming has come a long way and could be embedded in search engines. Unless the PDF files that are being found have a tag for the metasearchers because they want to be found. If I recall, when I search the net and get a pdf hit, the words in my search are still highlighted in the document. It probably wouldn't be difficult to do the same thing with a jpg.

Just my 2 cents.
Greg

I disagree!

They're both highly useful. Just in different ways.

> If one
> needs to send a lot of text, a computer and the Internet just

Of course! But then you need a readout device.

Usefulness depends on the application.

> Via
> radio, there are digital modes, of course, and text can be

> RTTY).

Sure - if someone has the equipment handy.

But the whole digital-mode-faster thing is kind of bogus in my view.
It's like saying that since we have cars, there's no reason to have
competitions where people run anymore. Heck, why doesn't everyone in
the Olympic marathon use rollerblades? The times would drop
dramatically.

The telling part is that the anticode folks call the test "rigged"
and other nonsense in an attempt to discredit what happened. But
the plain simple fact is that a couple of good Morse Code

operators, going about 1/3 the world-record speed, were faster
than the *world record holders* in text messaging.

What they missed is that the whole point of the segment was to
show that "newer" isn't always "faster/better/easier" and that
"older" doesn't equal "useless". The outfits on the two teams
were a visual way of adding to that.

One member of the Morse Code team was reportedly at Dayton
in his telegrapher outfit.

Here's exactly what Len wrote about "Bear" bombers:

> From: Len Over 21 (lenove...@aol.com)
> Subject: Re: 34 Years Ago Today
> Newsgroups: rec.radio.amateur.policy
> Date: 2002-12-08 21:01:08 PST

> Vladivostok, USSR, was about the same distance. That's about
> an hour's flight in a Bear (NATO name for a Soviet bomber). Less
> time of flight now with jet turbine aircraft."

Note that Len doesn't actually say there were any Bear bombers in
Vladivostok
or Chongjin at the time, or that he ever saw any, etc. But the
implication that
he was in some sort of imminent danger from them is clear.

Here's what I wrote in response:

>I think you missed some relevant points, Dave. Len's reference to the
>"Bear" bomber might lead the unsuspecting to think he was in some sort
>of danger from them while in Japan. However:

>- The airline distance from Chongjin, North Korea to Tokyo is at least
670 statute miles. The distance from Vladivostok to Tokyo is 663
statute
miles. (Source: "Esso War Map III, Featuring The Pacific Theater",
printed 1944).

>- For interesting info on the Tupolev TU-95, and its variants, known
> to NATO as the "Bear", see:

> http://www.fas.org/nuke/guide/russia/bomber/tu-95.htm

> which tells us that:

>- Development of the TU-95/"Bear" began in June, 1951.

>- First flight of the first prototype, November, 1952.

>- Production began January, 1956.

>- First deployment August, 1957.

>- Four turboprop engines driving counterrotating propellers.
> "Turboprop" refers to jet turbine engines driving propellers.

>- Len left Japan before any TU-95s were deployed.

Therefore, they were no threat at all to him when he was in Japan. Also, the
distances and flight times were greater than he stated.

>As with your well known
>"Sphincter Post", it leads some of us to question your character.

It just leads me to question Len's grasp of objective reality.

What's curious about the Sphincter Post is that it's a direct insult to the
military service of a member of the Coast Guard, who served as a radioman in
Hawaii and who described some experiences while serving. Yet Len was never in
the Coast Guard and never did the kind of radio operating he criticizes.

More telling, however, is Len's classic "Feldwebel Post" in which he told you
(Dave) to "shut the hell up, you little USMC feldwebel".

In just one short sentence, Len manages to violate Godwin's Law, insult a
branch of the US military, attempt to deny someone their First Amendment
rights, uses a mild profanity, tries to act as the moderator of an unmoderated
newsgroup, and arguably makes an ethnic slur in the mix.

As we often say where I work:

"Everybody's good at *something*.

>> >The bile on rrap comes from the three-way Steve/Len/Wiliam whizzing
>> >contest. You all must get something from it, because you sure put a
>> >lot of effort into it.

>>
>> Tsk. Rev. Jim is readying another Sermon on the Antenna Mount?
>
>Jim states a fact. Don't you have an acceptable response?

Acceptable to whom? Len sees nothing unacceptable in his behavior, but finds
the behavior of certain others to be unacceptable to him. In the above example,
it is perfectly acceptable (to Len) for him to imply that he was in constant,
imminent danger from TU-95s while he was in Japan, but completely unacceptable
for me to point out that there were no TU-95s deployed anywhere until after he
left.

>> Rev. Jim "puts a lot of effort" into making SURE that all those
>> he thinks need "corrections" get those "corrections!" QED.

Takes very little effort on my part. Len makes so many mistakes here that I
don't try to correct all of them.

>What has that to do with your whizzing contest?

Nothing.
>
>> >btw, Len, a little googling turned up the fun fact that Steve began
>> >calling you a putz back on August 6, 1999 - if not earlier. Of course

>this case, things didn't happen the way you claim they did.
>
>> When Rev. Jim runs out of arguments in the present, he MUST
>> resort to Googling to "prove" something.

Len constantly rehashes the past, then is angered by and abusive of those who
present conflicting information disproving his assertions.

Most importantly, Len cannot seem to get Steve to stop calling him a putz.
>

>...and it looks like the Google archives of newsgroup posts did just
>that. The archive seems to prove that version of events is not
correct.

Which is why Len switches to name-calling and excessive emoticons. He's
been
shown to be mistaken, which is simply unacceptable.

>> Jimmie thinks he can "win" some past arguments by repeating and
>> rehashing OLD ones?

The facts speak for themselves.
>
>When you start the "Jimmie" stuff, it is obvious that he has zapped
you
>good. You made a recent statement and issued it as a factual account
of
>something which took place. The trouble is, the Google archives say
>otherwise.

The amusing part is that Len talks about "the past" more than anyone
else here,
then gets angry when his version of events is shown to be somewhat
unreliable
or incomplete (to put it mildly).
>
>> Of course...if for no other reason that Jimmie

Let's remember that phrase, shall we?

"who can't argue a subject for squat and does the personal insult thing
in
order to "win an argument." "

That's pretty much a fair description of what Len does here.

No screaming eagle, huh, rear area gutless one...?!?!

Ya think that MAYBE that's why I said "...the MC >>>version<<< of
the Pave Low..."...?!?!

Brain was in the Air Force. That's why the cross-reference.

> The "Pave Low" is the MH-53E through O suffix, operated mostly
> by the USAF. More specifially "Pave Low II" to "Pave Low VI."

Amazing how "smart" you are with the click of a mouse, eh...?!?!

Too bad you can't retain some of that...

> The "CH" in the type designation stands for Cargo, Helicopter.

Very good....Still not any "smoking gun", though...

> The CH-53A through CH-53D are CARGO HAULERS.

As is the CH53E Super Sea Stallion, on which I was qual'ed.

> Some of the MH-53s are into special ops. But, the Sea Stallion
> is basically a CARGO HAULER, first operational in 1966.

Actually first operational in 1965.

The "CARGO HAULER" was used for "special ops" through out it's
career too, Lennie. That's why the USMC had them fitted with VULCAN's,
-50's, etc.

That's also why the USMC fit's them for vertical envelopment.

The USMC, The Air Force and the Navy all used them for SpecOp insertions, Maritime patrol, security-of-the seas missions.

> Took only a few minutes on the Internet to check that out.

Sure did.

Guess what else...?!?!

The airframe comes off the same production line at Sikorsky at Stratford, CT.

The same airframe...Over 80% interchangeable.

And the missions of the CH-53 (ALL variants) far exceed "CARGO HAULING".

Of course you didn't know that because the scope of your knowledge stopped at your wrist.

> Now, heroic "seven hostile actions" veteran, what exactly ARE
> you trying to foist over on everyone with a CARGO HAULER, and
> whatinhell does that have to do with AMATEUR RADIO?!?!?
>
> As usual, the "seven hotile actions" hero is running another
> reputation SCAM on everyone. Significant OMISSIONS of information
> along with an outright LIE on aircraft names versus type number.

I didn't lie about a single thing, Lennie.

If you want a REAL education, you should read some of the histories of the USMC's various Sea Stallion units...Most notably HMH-462, HMH-464, HMH-363 and HMH-361.

I was in all except 464 at one time or another.

Take the time to do some research and you'll find a few of those "seven hostile actions" you claim I never participated in.

> If you are going to LIE, BLUFF, SCAM, try to get your military
> nomenclature CORRECT.

I did so. Absolutely correct.

> You did NOT do so!

Leonard H. Anderson has uttered another falsehood. Why does he insist on doing that?

> Stand down.

You do not now have, nor did you ever, nor will you ever have the authority, expertise, training, experience or qualifications to give me an order or to imply you are giving me an order.

The service history and deployment of the CH53-series aircraft is
yet another "field" in which YOUR "experience" is from a mouse click.

I was there. You were not.

You're just TOO inadequate.

Putz.

I don't think the number was 20 percent, but it was down a bit.

I had a good time, spent too much money, and will be back again next year. One thing is for certain, vendors that weren't there didn't get any of my money...

Well, Todd...Once again, you've opened your mouth and made a
complete idiot out of yourself.

The FCC has not been archiving "TechPlus" licenses for a while
now. Any Technician class licensee who has (1) A CSCE from an approved
VEC attesting to completion of Element 1, or (2) A copy of a previously
held "coded" license (regardless of when) may exercise the privileges
of a "Tech Plus" without further FCC administrative requirement or
documentation.

A CSCE held for the purposes of documenting Element 1 completion
and exercising of "Tech Plus" privileges remains in force in
perpetuity.

A CSCE intended for upgrade purposes remains valid only for 1
year.

Do you have any other topics in which you are woefully
ill-prepared to discuss that you'd like to make stupid assertions
about?

> of the United States military.

You will "honor" no one until you've published an unequivocal
apology for your cowardly and snivveling attempts to use the sacrifices
of others in order to embellish what was an unremarkable tour of duty
in the Army.

Such as:

> I will mention Cpl Elmer Hardy and Capt Jim Tomlinson, both gone
> suddenly on the 1st of July, 1950, both members of *MY* Signal
> Battalion (the one I served in).

They were not members of "YOUR" signal batallion, Lennie.

You were still in the States when they died. A civilian.

> I will HONOR them and the
> other 18 members of MY Battalion who lost their lives in the
> same crash in Korea...sent there from the "rear-area" of Japan
> by Gen MacArthur to improve communications after the North
> Koreans invaded South Korea.

And you were STILL not a member of THEIR signal batallion.

You were still in the States when they died. A civilian.

> Stebie is going to say I "dishonor" them by mentioning them.

No, I do not state, nor have I EVER stated, that you dishonor
them by "mentioning" them.

What I DO state is that you try to embellish your own character
with THEIR scarifices, just like you did in the foregoing three
paragraphs.

Just like I've been saying all along....

> He has stated that before and that is just as damnably FALSE
> as anything he has ever babbled. Normally I would have told
> Stebie ("Mr. Seven Hostile Actions") to Go To Hell. He is
> already there. Scroom.
